## Introduction

Improve your English vocabulary today!

The number of English words you need to know varies based on the requirement. If you need to make do with daily life events in a foreign country and you are not a native speaker of English, 1000 words and basic grammatical structures might just be enough.

If you need to prepare for a test (for example, the verbal section of the GRE, SAT, ACT, or the GMAT), or for an English word power exam or for a job interview that requires verbal skills, you will need to memorize a word list that has anywhere between 2000 and 5000 difficult words, depending on the exact test for which you are preparing. This is not easy, and you need to choose creative methods of study to help you do it well.

This book will help you level up your English bank of knowledge, no matter what your goal is. It is both a repository of important words, and an exercise book; you will be able to learn hundreds of new words, and also make your brain strive to remember the

meanings of thousands of new words, which will be covered in upcoming books.

By the end, your verbal skills would have received a thorough workout, and you will be much better placed to use your verbal skills for success in your chosen career field.

Congratulations on choosing this book!

## Exercises: Part 1

Now that we have covered a large number of useful words, it is time to get ready for the next book in the series!

In this chapter, you will see a number of words. 40% of them have meanings that you will probably immediately know. 30% of them have slightly more obscure meanings; you will have a 50% chance of knowing them. 20% are hard words, and 10% are really difficult.

Your task is simple: to go through them, and to make a mental note of how many you already know. You can either look up the others, or stop when you're done going through them - many of the most difficult ones will be covered in the next book, so this is a great way to prepare in advance!
