About the Author: Jackie Bolen

I taught English in South Korea for a decade to every level and type of student and I've taught every age from kindergarten kids to adults. Most of my time centered around teaching at two universities: five years at a science and engineering school out in the rice paddies of Chungcheongnam-Do, and four years at a major university in Busan where I taught high-level classes for students majoring in English. These days, I live in Vancouver, Canada where I teach privately as well as in English language academies. In my spare time, you can usually find me outside surfing, biking, hiking, or on the hunt for the most delicious kimchi I can find.

In case you were wondering what my academic qualifications are, I hold a Master of Arts in Psychology. During my time in Korea, I've successfully completed both the Cambridge CELTA and DELTA certification programs. With the combination of almost 15 years teaching ESL/EFL learners of all ages and levels, and the more formal teaching qualifications I've obtained, I have a solid foundation on which to offer teaching advice. I truly hope that you find this book useful and would love it if you sent me an email with any questions or feedback that you might have—I'll always take the time to personally respond.

How to Use this Book

These conversation lessons are designed for teenagers, university students, or adults. They do assume a basic knowledge of English grammar and vocabulary so are best suited for intermediate or advanced students.

The main purpose of these lessons is to get students talking about a certain topic and can be used for classes of 30 minutes to two hours. There are 49 different topics in total and each lesson includes the following:

- warm-up question
- vocabulary challenge (5 scrambled words from the conversation questions)
- idioms and phrases related to the topic (5)
- 15 conversation questions
- 3 writing prompts suitable for class time or homework

For smaller classes of less than three students, it's possible to work through each lesson together as a class. It's also possible to use these conversation lessons for 1-1 or private tutoring. However, for larger classes of four or more, I recommend putting students into pairs and letting them work through the lesson together to make classes more student-centered.
