# INTRODUCTION: SLANG IN THE 21ST CENTURY

## Slang and Society

Slang derives much of its power from the fact that it is clandestine, forbidden or generally disapproved of. So what happens once it is accepted, even in some cases embraced and promoted by 'mainstream' society? Not long ago the *Oxford English Dictionary* characterised slang as 'low and disreputable'; in the late 1970s the pioneering sociolinguist Michael Halliday used the phrase 'anti-language' in his study of the speech of criminals and marginals. For him, theirs was an interestingly 'pathological' form of language. The first description now sounds quaintly outmoded, while the second could be applied to street gangs – today's *posses*, *massives* or *sets* – and their secret codes. Both, however, involve value judgements which are essentially social and not linguistic. Attitudes to the use of language have changed profoundly over the last three decades, and the perceived boundaries between 'standard' and 'unorthodox' are becoming increasingly 'fuzzy'.

Today, tabloid newspapers in the UK such as the *Sun*, the *Star* and the *Sport* regularly use slang in headlines and articles, while the quality press use slang sparingly – usually for special effect – but the assumption remains that readers have a working knowledge of common slang terms.

There has been surprisingly little criticism of the use of slang (as opposed to the 'swear-words' and supposed grammatical errors which constantly irritate British readers and listeners). In the last five years I have only come across one instance, reported in local and national newspapers, of a south London secondary school head publicly warning pupils of the dangers of using slang in their conversation. The school in question has pupils from many ethnic and linguistic groups – which may give a clue as to why young people might opt for slang as a medium of communication and not just an embellishment. Perhaps they have come to see slang as their own common language, in which they are fluent, and which may therefore take precedence over the other varieties in their repertoires (Hindi, Gujarati, Punjabi, Creole, 'Cockney', 'textbook English' etc.). The use of slang forms part of what linguists call code-switching or style-shifting – the mixing of and moving between different languages, dialects or codes. This might be done for ease

of communication, for clarification, to show solidarity or – a reason sometimes overlooked by analysts – just for fun.

In the US, on the other hand, slang and so-called ‘vernacular’ use is still highly controversial. This stems in part from the contest between conservatism and ‘multiculturalism’ or ‘liberalism’, which in the late 1990s focused on the stalled attempt to establish so-called ‘ebonics’, or black spoken English, as a linguistic variety with official status. Recently, some North American academic linguists and their students have joined with parents, teachers and adult professionals to lament the corrupting and destabilising effect of slang on young peoples’ ability to manage in formal settings such as examinations or job interviews. Their fears can’t simply be dismissed, but they seem to be based on a very rigid notion of language’s potential. The key to effective communication is what language teachers term ‘appropriacy’; knowing what kind of English to use in a particular situation, rather than clinging to rigid ideas of what is universally right and proper.

In my experience, most slang users are not inarticulate dupes but quite the opposite: they are very adept at playing with appropriacy, skilfully manipulating ironically formal, mock-technical and standard styles of speech as well as slang. If prompted they can often provide insights into their own language quite as impressive as those hazarded by professional linguists or sociologists. For this reason, for the first time in the *Dictionary of Contemporary Slang* I have sometimes included, in their own words, users’ definitions of terms and comments on their usage as well as the direct quotations – ‘citations’ – contributed by them and featured in previous editions.

### **Slang versus ‘Proper English’**

Slang is language deliberately selected for its striking informality and is consciously used in preference to ‘proper’ speech (or, more rarely, writing). It usually originates in small social groups. For these groups, it is a private code that embodies their particular values and behaviour and reinforces their exclusivity. Slang expressions may escape the originating group and become more widely used, and although slang draws much of its effect from its novelty, some terms (*booze, punk, cool*) may stay in the language for many years.

This may seem a longwinded definition of a language variety that most people think they recognise, but the neater descriptions to be found in collections of quotations, such as G.K. Chesterton's 'all slang is metaphor' (much is but not all) or Ambrose Bierce's ironic 'the grunt of the human hog...' don't really succeed in nailing the phenomenon. (Definitions by academic linguists, apart from Halliday's, are entirely absent.) Slang has also been referred to as 'the poetry of everyday life' or 'of the common man'. Although it does make use of poetry's rhetorical tricks (and more devices besides), poetry is allusive while slang is anything but, depending for its power on either complete, shared understanding (by insiders) or complete bafflement (on the part of outsiders).

Ask users of slang for a definition and they might come up with: 'jargon, used playfully to prevent outsiders from intercepting the actual meaning'; 'the ever-evolving bastardisation of the written and spoken language as a result of social and cultural idolization [sic] of uneducated, unintelligable [sic] celebrities' and 'cool words, words that match the style' (all of these are from the Urban Dictionary website). One teenager I interviewed defined it simply as '*our* language'.

More specifically, slang terms have certain recognisable functions. Firstly, like any new coinage, a slang word may fill a gap in the existing lexicon. For example, there is no single verb in standard English that defines the cancelling of a romantic tryst or social arrangement, so British adolescents have adopted the words *ding* or *dingo*. To jump and hug someone from behind is rendered much more succinct in US campus speech as *glomp*.

Secondly, a slang expression may be substituted for an existing term – what linguists refer to as 'relexicalisation' – *smams* or *chebs* for breasts, *blamming* for exciting and *chuffie* for chewing gum are recent British examples. More than one motive may be in play here: renaming something makes it yours, and makes it funnier (*Ethiopia!*) or ruder (*cunted*). Using cultural allusions (*Mr Byrite*) demonstrates worldliness; rhyming slang (*Claire Rayners*) is not simply a useful mechanism, or a disguise, but may conceivably show solidarity with an older tradition.

Slang users tend to invent many more synonyms or near-synonyms than might be thought strictly necessary: for example, criminals may have a dozen different nicknames (*gat*, *cronz*, *iron*, *chrome*) for their guns, or for informers (*canary*, *grass*, *snout*, *stoolie*); drinkers can

choose from hundreds of competing descriptions of a state of intoxication (*hammered, hamstered, langered, mullered*). This phenomenon is technically described as 'overlexicalisation', and it happens because the words in question have an emblematic force over and above their primary meanings. Macho would-be seducers or *studs* require a range of usually disparaging or patronising terms for their sexual conquests and more than one pet-name for their manly attributes; drug users pride themselves on being able to distinguish the nuances in different states of euphoria or intoxication; cliques and gangs enjoy inventing a host of pejorative nicknames for *dissing* those they see as outsiders. The most significant groupings of terms in the new dictionary continue to be in the same 'semantic fields' as before: the categories of drunkenness and druggedness, of terms of approval and enthusiasm, of insults and pejorative nicknames and of expressions relating to sex and partnership.

### **The New Dictionary**

Thousands of new expressions have entered the language since the turn of the century and dozens, perhaps hundreds, more are added to the common vocabulary every week. The lexicographer has to try to identify novelties as they arise and to track the changes in the way existing words are being used. This dictionary has been regularly updated since its first publication in 1990 – but this, the first edition in the new millennium, has seen a wholesale revision of all entries and the addition of about 2,000 new terms.

One of the most painful procedures for the compiler is to decide which expressions must be deleted in order to make room for new material. Contrary to popular belief, very few slang items fall completely out of use. What happens is that certain words – *sorted* is an example – are assimilated into everyday colloquial usage, while others are abandoned by their original users as being outmoded or no longer exclusive enough, but are adopted by 'outsiders'. For example, a modish term of appreciation like *phat*, only known to a hip minority in the early 1990s, may now be heard in the primary school playground. Some words – the adjective *groovy* is one such – are recycled. Trendy in the 1960s, then sounding hopelessly outdated by the late 1970s, it was revived ironically in the later 1980s, before finally being used by some members of the new generation in more or less its original sense.

(Groovy is an interesting example in that, like *lucre/luka* and *ducats/duckets*, it seems to have been picked up by some youngsters who were unaware of its origins or 'correct' form, hearing it as *crovey*.) Seemingly archaic words may be rediscovered, as in the case of *duffer*, although there is always the chance that this is a coincidental coinage.

After much hesitation, therefore, the deletions were made on a fairly subjective basis. Genuine archaisms like *love-in-a-punt* (a comic description until the 1950s of weak beer: the joke is that it's 'fucking near water'), or *the lump*, designating a long-obsolete system of employment, were doomed, however picturesque or evocative. Terms which were always in very limited circulation, such as *puggled* (meaning tipsy or drunk) or *pipe*, in the sense of stare at, would have to go, as did others that were both dated and obvious, like the nicknames *jelly* (for the explosive gelignite) or *milko* (a milkman). Some, like *smidgin* or *channel-surfing*, are deemed to have become common colloquialisms.

The new expressions have all been collected since 2000 from a cross-section of the slang-using communities in what has come to be known as the anglosphere.

In a work of this size it isn't possible to include the entire vocabulary of every local subculture, so when a range of terms has been uncovered, we have included only those which have intrinsic interest (i.e. they are witty, inventive, particularly unusual linguistically – *Listerine* is all three), seem especially characteristic of a community (*chuddies*, *filmi*) or appear likely to cross over into wider use (*munter*, *hottie*). There are more British terms (although 'British' is nowadays shorthand for a multilingual mix) than North American, Australasian etc. since the bulk of the collecting was carried out in the UK. None of these criteria are in any way 'scientific', so the lexicographer is still the final judge.

One thing that has not changed since the first publication of this dictionary is the relative lack of interest shown by UK academics in this type of language, relative to their counterparts in the US, Europe and elsewhere. On the other hand, students in higher education and schoolchildren have increasingly chosen to study, analyse and research a variety of speech in which they have a special stake, while, judging by reference book sales and letters to newspapers and magazines (and to myself), the general public is

hungry for any reliable information about new language and language change.

### **Collecting the Data**

I have above all been inspired by the alternative Dr Johnson, Captain Francis Grose, who compiled the 1785 *Classical Dictionary of the Vulgar Tongue*. I have tried to emulate him, not so much in his fondness for huge meals and strong drink, but in his avoidance of print archives in favour of going out into the streets, the taverns and the barracks recording what people are actually saying.

The effect of Captain Grose's 18th-century slang dictionary was not to make respectable, but at least to treat with some respect, even to celebrate, the language of the dissolute and the dispossessed. Likewise, this dictionary applies lexicographic techniques to the speech of individuals and groups who may have little prestige in society as a whole, but who in their own environments are the impresarios of speech styles, the guardians and reinventors of subcultural mystique.

Halliday commented that of all the socialising environments (family, school, workplace) in which individuals develop their identities, the peer group is the most difficult for the researcher to penetrate. However, it is from the peer group, whether consisting of schoolkids, skateboarders or soldiers, that slang typically emerges. It is tricky for an ageing baby boomer to infiltrate these groups, to join a streetgang or even to go clubbing without attracting attention, but it's absolutely essential for the seeker of slang to get access to authentic samples of language – particularly spoken language – in their authentic settings, since much slang is never written down (calling into question the value of reference works based solely on printed examples) or only recorded in writing long after its first appearance.

When circumstances allow, listening in on conversations is an ideal approach, but as electronic eavesdropping is now forbidden except where consent has been given in advance, most of the examples collected here have been recorded and reported by users or their friends, gathered by interviews or by long-term recording of conversations in which participants gradually come to ignore the presence of the microphone. However expert the compiler, there is an obvious risk of being fed false information, so to qualify for inclusion terms must be attested by two separate sources.

## Cyberslang?

The Internet has transformed the way we manipulate our systems of signs and the relationships between producers and consumers of information. Its effect on slang has two aspects. Firstly, online communication has generated its own vocabulary of technical terminology, essentially jargon (*spam, blogging, phishing*) and informal, abbreviated or humorous terms (*addy, noob, barking moonbat* etc.) which qualify as slang. The amount of new cyberslang is fairly small, but the Internet has also allowed the collecting, classifying and promoting of slang from other sources in the form of so-called dictionaries, glossaries and articles written by individual enthusiasts. Even more interesting are the online lexicons compiled wholly by contributors, who post new expressions and provide their own explanations and examples.

Many of the websites in which slang is collected and discussed are truly democratic and genuinely user-driven, but almost none of them are authoritative, in the sense that they can be trusted to have studied the words they record, to produce accurate or convincing etymologies rather than supposition, or to comment from a basis of familiarity with other sources. Two that I particularly recommend, though, are the Urban Dictionary ([www.urbandictionary.com](http://www.urbandictionary.com)) and the Playground Dictionary ([www.odps.org](http://www.odps.org)). It is a point of honour among lexicographers that they don't poach words from rival collections, but I have used these online glossaries to verify the authenticity and sometimes the meanings of some of the more obscure words that I have come across. One hardcopy reference work that can also be recommended is *Viz* magazine's *Profanisaurus*, a regularly updated glossary of sexual and scatological expressions and insults, donated by readers. Despite its comic intent the material is a valuable trove of contemporary folk obsessions and I have tried not to duplicate it in these pages.

It is communications technology in general and not only the Internet that is enabling slang, especially the most pervasive English-based slang, to globalise. Late one night in a hotel room in Cologne, I watched a cable TV station from Berlin broadcasting a video diary in which teenagers improvised conversations in a mix of German, English and snatches of Spanish and Turkish. The soundtrack simultaneously ran sampled sequences of rock, rap, rai etc. while subtitles provided an ironic metacommentary also

blending a variety of languages. This was not an avant-garde artistic gesture as far as I could tell, but a snapshot of a genuine 'sociolect'; the creative and playful code in which this loose association of friends chooses to express itself.

Another technical development – text messaging – has triggered changes in the culture of communication, especially among young people, and brought with it, like telegrams, CB-radio or Internet chatrooms, a new form of abbreviated code. It has excited some academic linguists but it hasn't, however, contributed anything meaningful to the evolution of slang as such: no new words or radical shifts in syntax have been generated yet.

### **Blingage and Chavdom**

Two well-known examples from early in the 'noughties' decade, already history by the time this book appears, illustrate the linguistic development and cultural resonance of slang. The first is one of the words that the south London school head singled out for disapproval. *Bling* was coined as far as anyone knows – although music lyricists and journalists often claim slang words as their own creations, the real originators often remain anonymous – either in imitation of the sound of clanking jewellery, or, less probably, to evoke its glittering appearance. The jewellery in question was part of the ostentatious display associated with black aficionados of US rap music and hip hop culture, and the word, sometimes reduplicated as *bling-bling*, came to epitomise an attitude of conspicuous and shameless consumption, aggressive flaunting of wealth and 'street' status. Young speakers in the UK adopted the expression around 2002, then the noun form began to be used adjectivally (as in 'very bling'), and by 2005, middle-aged TV presenters and middle-class parents were experimenting with the word. In slang usage, meanwhile, by analogy with other American terms, (*fundage*, *grindage*), a new noun, *blingage*, appeared in 2003.

Although black slang is the dominant influence in many youth subcultures, it is not one dialect, but rather a range of terms from a continuum incorporating US, Caribbean, urban British and South African speech. As well as words like *bling* and its derivations, which have to some extent crossed over, there are a host of other 'black' words including *skank*, *hench*, *tonk*, *mashup* and *butters*

which have become common currency on the street. It's a sign of cultural importance if a trend is successfully parodied, and UK comedian Sasha Baron Cohen's fictional TV character Ali G very effectively mocked the language (not only the vocabulary but the assumed intonation) and appearance of the *wiggas* and Asians who resolutely imitated black styles from the late 1990s.

The second well-known example of media fascination with slang and cultural change is not inspired by black speech, but ultimately by the language of another oppressed minority with disproportionate subcultural capital, the Roma. In 2004 the British media became aware of a website, [www.chavscum.co.uk](http://www.chavscum.co.uk), which was celebrating a new social category. The nickname *chav* denoted a person with the following defining attributes (according to researcher Sarah Bromley): he or she is youngish, favours sportswear, loiters in groups in town centres, may be involved in petty crime, if female wears prominent cheap jewellery (known incidentally as *Argos bling* or *bingo bling*) and has scraped-back hair (the effect has been dubbed a *Croydon facelift*), if male has a shaven head or crew cut and probably wears a baseball cap. The categorisation is complex in that it describes not only a 'look', or a so-called subculture, but in some ways resembles an old-fashioned *class* distinction. The class connotations are new, though, as, often pejorative, *chav* can also be used with mock-affection or even admiration by sophisticates who have extended the scope of the concept to take in reality TV celebrities and pop stars and claimed that this vulgar, feckless, assertively uncultured group are, if not the 'new ruling class' (the extreme view), then at least an unstoppable social force.

With *chav*, once again an ancient slang term mutates or is reinvented (*punk* is another example of this), acquires powerful if temporary social significance, and prompts excited linguistic speculation. A completely spurious folk etymology was found – the word was said by some, including some police officers, to be an acronym; 'council-housed and violent'. *Chav* is actually one version of an old Romany term meaning child and/or friend, a word previously more often recorded (and included in earlier editions of this dictionary) in the variant forms *charvie* or *charver*. The people referred to were in fact identified by slang users in the 1990s and defined by a wide range of regional nicknames, including *spide*, *steek*, *scally*, *townie*, *pikey*, *pov*, *schemie*. In the evolutionary

struggle for dominance, media adoption helped *chav* to triumph, to spawn related witticisms like *chaviot* (a *chav-chariot* or cheap, over-embellished car), and become by general agreement of British journalists and lexicographers the vogue word of 2004 and 2005.

### Latest developments

In the last few months there have been a couple of significant eruptions of slang into the UK's 'national conversation', and one important subcultural phenomenon has been confirmed. Radio DJ Chris Moyles caused a furore when he referred on air to a mobile phone ringtone as *gay*, using the word, like many teenagers, as a generalised term of derision, a synonym for *lame*. Listeners complained about this latest appropriation of a word previously appropriated by homosexuals, while some gays actually defended the usage as non-homophobic, harmless and frivolous. Microphones left on at the Russian summit picked up the US President, George W Bush, greeting the UK Prime Minister in frat-boy or hip-hop style with 'Yo, Blair!'. The banter that followed in which both men used boyish colloquialisms, Bush easily, Blair self-consciously, seemed to confirm an unequal relationship between them. On the street meanwhile, and in the playground and youth-oriented media, the black North American verbal ritual of *signifyin'* or *soundin'*, also known as *the dozens*, *playing the dirty dozens*, *capping* or *bad-talk*, whereby males compete to *diss* one another's mothers with elaborate slanders, had crossed over to feature in UK speech. The tradition, which some think originates from slave auctions where the infirm were sold by the dozen, was designed to test both speaking skills and restraint in the face of provocation, but now functions as a humorous exchange, also practised by females and non-blacks.

### Back to the future

So to return to that question: what becomes of slang? Firstly, the general 'flattening out' of a hierarchical society and the relaxation of linguistic prejudices mean that slang may come to be seen not as something inherently substandard, but as an option among many available linguistic styles. At the same time there must always be a set of words and phrases which is beyond the reach of most speakers, that is always 'deviant', 'transgressive' and opaque. This slang must renew itself, not just in implied contrast with 'standard'

language, but with earlier versions of itself. So new slang words will continue to sprout, to metamorphose, to wither and disappear or else to spread and fertilise the common ground of language. This process may now be more visible and familiar, the crossover phenomenon may happen much faster (given the complicity of the media), and the shock value of the terms themselves may be lessened (the invention and use of slang does risk becoming locked into familiarity and cliché, like the tired gestures of rock, rap, conceptual art and fashion), but it is very unlikely ever to stop.

### **Thanks and Acknowledgements**

I have a very special debt of gratitude to Professor Connie C. Eble of the University of North Carolina at Chapel Hill, who generously made available the fruits of her recent research into US campus slang (complementing a tally begun in the 1970s, and her still unrivalled 1996 publication, *Slang and Sociability*).

The *Dictionary of Contemporary Slang* is an ongoing project; a survey which by virtue of its subject must be constantly updated to keep track of new coinages and changes in the status of existing terms. The idea of a reference work as something sternly authoritative and unreachably remote from its users is outmoded; thanks to electronic communications a dictionary can now interact with its readers. This was the first interactive slang dictionary and the compiler and the publishers would be very grateful for any contributions or suggestions from readers who can either mail material to: Dictionaries Department, A & C Black Publishers Ltd, 38 Soho Square, London W1D 3HB or communicate with the author via e-mail at [tony.thorne@kcl.ac.uk](mailto:tony.thorne@kcl.ac.uk). (The introduction to the previous edition and related articles can be consulted at [www.kcl.ac.uk/depsta/elc/slang.html](http://www.kcl.ac.uk/depsta/elc/slang.html).) Information about new slang terms should ideally include, as well as the meaning, details of when and where the word or phrase was used and a direct quotation if possible, together with the name of the contributor, who will be acknowledged in the next edition.

## HOW TO USE THIS BOOK

A typical entry in the dictionary will contain the components described below (with the typefaces explained in brackets):

The HEADWORDS are entered in alphabetical order (in primary bold type), together with any variant spellings or alternative forms. Next the PART OF SPEECH is given (in *italics*): these have been somewhat simplified so that an adjectival phrase appears as an adjective (*adj*), noun phrase as a noun (*n*). Unless a word is used in all parts of the English-speaking world, it is given a REGIONAL LABEL (in *italics*: *British, Australian*, etc.). This indicates the country of origin, or the country in which the term is most prevalent. If a particular term has more than one quite separate meaning, these meanings are NUMBERED (in **bold** type: **1, 2, 3** etc.). If one overall sense of a term is commonly subdivided into several slightly different meanings, these are indicated by LETTERS (in **bold** type: **a, b, c** etc.). The headword, part of speech and regional label are followed by a DEFINITION (in roman type). This in turn is followed by more information about the use and origin of the term (in roman type, unless it is a direct quote from a user, in which case it will appear in *italics*). In the explanations, foreign words are placed in *italics* and slang terms found elsewhere in the dictionary are shown in **bold** (these act as cross references throughout the dictionary). Many definitions are followed by an ILLUSTRATIVE PHRASE or sentence (in *italics*). If this example is an actual citation, its source follows in brackets.

# A

## aardvark *n*

1. *British* hard work, onerous tasks. A probably ephemeral pun heard among university students since the late 1980s.

*'They're giving us too much bloody aardvark, that's the problem.'*

(Recorded, undergraduate, London University, 1988)

2. *American* (a male with) an uncircumcised penis. The term was used by the Dixie Chicks country rock band in interviews in 2002. It is based on the supposed resemblance to the animal's snout, and prompted by the fact that most males in the USA are routinely circumcised. **Anteater** and **corn-dog** are contemporary synonyms.

## aardvarking *n American*

having sex. This term, popular among college students since the 1990s, often applies to sex in a public place, possibly evoking the animal's grubbing or rooting around in the earth or simply, as with **wombat**, heard in the same milieu, used for the sake of exoticism.

*This semester her number-one hobby has been aardvarking every chance she gets.*

## ABCD *n*

'American born confused **desi**': a designation of a young South Asian person featured in Tanuja Desai Hidier's young adult novel *Born Confused*, published in the USA in 2002

## 'abdabs *n pl British* See **screaming (h)abdabs**

## abo *n Australian*

an Aboriginal. A standard shortening used by whites which is now considered condescending or abusive: it is often part of offensive comparisons, as in 'to smell like an abo's armpit/abo's jock-strap'.

## absolutely, absobloodylutely *adv, exclamation*

these elaborations of the standard term are examples of 'infixing' (as opposed to prefixing or suffixing), a word-formation process unique to slang in English

*'Are you really determined to go ahead with this?' 'Absobloodylutely!'*

*She was absobloodylutely legless.*

**Abyssinia!** *exclamation British* goodbye, a jocular farewell. The expression is an alteration of 'I'll be seeing you', sometimes further elaborated into **Ethiopia!** It is in current use among students, but may have arisen in their parents' or grandparents' generations.

## AC/DC *adj*

bisexual. From the label on electrical appliances indicating that they can be used with either alternating or direct current. The slang term originated in the USA and spread to Britain around 1960.

## ace<sup>1</sup> *n*

1. a best friend or good person. Used by males to other males, usually as a greeting or a term of endearment. In this sense the term probably spread from black American street gangs in the 1950s to working-class whites in the USA, Australia and, to a lesser extent, Britain.

*Hey, ace!*

2. *Australian* the anus. By association with **arse** and the black mark on a playing card.

## ace<sup>2</sup>, ace out *vb American*

1. to outmanoeuvre, outwit or defeat

*'I had it all figured, but those guys aced me!'*

(*The A Team*, US TV series, 1985)

2. to succeed, win or score very highly

*She aced / aced out the test.*

## ace<sup>3</sup>, aces *adj*

excellent, first class. Used extensively since the late 1950s in the USA, since the mid-1960s in Australia, and by the

1970s, especially by teenagers, in Britain. The origin of the term is obviously in the highest value playing card, the meaning now having been extended from 'best' to 'smartest', 'cleverest', etc.

*an ace car*

*That film was really ace.*

*She's aces!*

**ace boon coon** *n* *American*

(in the language of black males) one's best friend. An item of black street-talk combining **ace** and **coon** with 'boon' to provide the suggestion of a cherished companion and the rhyme, which was included in so-called **Ebonics**, recognised as a legitimate language variety by school officials in Oakland, California, in late 1996. A similar usage is found in the phrase 'ace boom boom'. During the 1960s and 1970s the variant form 'ace coon' was heard, often ironically referring to a self-important black male or an individual who had achieved some success, e.g. in a work-group, department, etc.

*You my ace boon coon!*

**ace in the hole** *n*

an advantage held in reserve until it is needed. From American stud-poker terminology, it refers to an ace (the most valuable card) dealt face down and not revealed.

**acey-deucey** *adj* *American*

both good and bad, of uncertain quality. The term is at least pre-World War II, but is still heard occasionally, especially amongst middle-aged or elderly speakers. It comes from a card game similar to backgammon in which aces are high and deuces (twos) are low.

**acher** *n* See **acre**

**acid** *n*

1. LSD-25, the synthetic hallucinogenic drug. From the full name, Lysergic Acid Diethylamide. This has been the standard term by which users refer to the drug since its first popularity in California in 1965, in spite of the appearance of more picturesque but ephemeral alternatives. In the late 1980s, adherents of the **acid house** cult adopted the word as a slogan (usually a cry of 'a-c-e-e-e-d!') and to refer to LSD or **ecstasy**.

2. *British* sarcasm, snide comments or cheeky exaggeration, especially in the expression 'come the old acid', popular in working-class usage in the 1950s and 1960s and still heard. In such phrases as

'his acid comments' the adjectival meaning is similar, but cannot be described as slang.

*Don't come the old acid with me!*

**acid flash** *n*

a sudden recurrence of a much earlier experience of the drug LSD. Some users are disturbed months or years after taking the drug by sudden disorientation which lasts from seconds to hours and which may or may not be due to its effects.

**acid head, acid freak** *n*

a user, especially a heavy or habitual user, of the drug LSD. The terms are not pejorative and were used from the late 1960s to the mid-1970s by takers of LSD or other hallucinogens about themselves and each other.

**acid house** *n*

a youth cult involving synthetic electronic dance music (**house**) and the taking of euphoric hallucinogens such as **ecstasy** and LSD (**acid**). This fashion, celebrated in clubs and large impromptu parties and with garish clothing and lighting effects, succeeded hip hop, **rap** and other movements in 1988. 'A-c-e-e-e-d!' (an elongated version of **acid**) was a rallying cry of celebrants, shouted and written on walls.

**acid test** *n*

a party or informal ritual at which a group of people take food and/or drink laced with LSD. The expression and the practice were originated by Ken Kesey and the Merry Pranksters, a group of hedonistic travellers in the USA in the early 1960s who were successors to the **beats** and precursors of the **hippies**.

*'The Electric Kool-Aid Acid Test.'*

(Title of a book by Tom Wolfe, 1969)

**acid trip** *n*

a period under the influence of the drug LSD or **acid** (which produces an altered state of awareness and, sometimes, hallucinations). The experience lasts 4-6 hours at an average dose.

**ackers** *n* *British*

money. The word, which has been in armed-forces and working-class use since the 1920s, was revived, in common with synonyms such as **pelf**, **rhino**, etc., for jocular use since the 1980s by middle-class speakers. It comes from the Egyptian word *akka*, denoting a coin worth one *piastre*.

**acre, acher** *n*

1. the buttock(s). In this sense the word is common in Australia, normally in the singular form.

2. the testicle(s). Usually in the plural, this sense of the word is typically used by British schoolboys.

*'I told the estate agent I couldn't afford any land, so he kicked me in the balls and said, "There's a couple of achers for you".'*

(Schoolboy joke, London, 1965)

Both senses of both words stem from the simple play on the word 'ache' which has formed part of many different puns and dirty jokes during the last forty years, involving sensitive parts of the (male) anatomy.

**action gagnée** *n* *British*

a literal translation into French of 'winning action', i.e. a successful sexual encounter. A humorous euphemism used by students in 2003 and 2004.

**action man** *n* *British*

a devotee of military exercises or strenuous physical activities, or someone who makes a show of (relentless) energy. The term is applied derisively, originally by members of the armed forces to unpopular or excessively **gung-ho** colleagues, and now by extension to anyone who is showily or mindlessly **macho**. The satirical magazine *Private Eye* referred to Prince Andrew by this name in 1986 and 1987. The origin of this piece of sarcasm is the 'Action Man' doll – a poseable commando scale model in full kit sold to children in Britain since the 1960s.

*'Right little action man i'n' 'e? 'E simply wants to be prepared when the east wind blows 'ot.'*

(*Minder*, British TV series, 1988)

**A.D.** *n*

a drug addict. From the first two letters of 'addict' or a reversal of the initials of 'drug addict', to avoid confusion with 'District Attorney'. The term was quite popular among addicts themselves and the police in the USA. (In Britain **D.A.** was the 1960s vogue version.)

**adam** *n* *British*

the drug **MDA**; methyl diamphetamine. Adam is an acronym from the initials, used by middle-class Londoners during the vogue for the drug since the mid-1980s. MDA is more commonly known to

the press and non-users as **ecstasy**; to users it is also **E, X, xtc** and **Epsom salts**.

**adam and eve** *vb* *British*

to *believe*. Well-established rhyming slang which is still heard among working-class Londoners and their middle-class imitators, usually in the expression of astonishment 'Would you adam 'n' eve it?'

**addy** *n*

an Internet address. The abbreviation, used in Internet communication and text messaging, is also spoken.

**adhocratic** *adj*

improvised and/or temporary, as in decisions made to suit the moment rather than as part of planned policy. The term, from Caribbean speech, has been used by white as well as black youth in the UK since 2000.

**aerated** *adj*

angrily over-excited or agitated. Perhaps originated by educated speakers who were familiar with the technical senses of aerate (to supply the blood with oxygen or to make effervescent), but usually used nowadays by less sophisticated speakers who may mispronounce it as 'aeriated'.

*Now, don't get all aerated.*

**a few fries short of a happy meal** *adj*

intellectually impaired, deranged, eccentric. This variation on the lines of the colloquial 'one sandwich short of a picnic' was popular among students in the UK, and also recorded in the USA in 2002. The reference is to a McDonald's fast food meal.

**afro** *n*

a hairstyle consisting of a mass of tight curls which was adopted by Afro-Caribbeans and imitated (often by perming) by white **hippies**, particularly between 1967 and 1970

**afters** *n* *British*

a drinking session in a pub after official closing time, **lock-in**. The term is an abbreviation of 'after hours (drinking)'.

*There's going to be afters on Friday night.*

*Are you going to stay for afters?*

**ag, agg** *n* *British*

violence, aggression. A shortened form of **aggro**, heard in provincial adolescent slang from around 1990, and previously used by older prison inmates and members of the underworld. Like **aggro**, the

word may be employed with the weaker sense of trouble or irritation.

*If you go to the market precinct these days it's just ag.*

**-age suffix** *American*

a termination that became popular amongst older adolescents in the early 1990s in creating mock-serious nouns from existing slang and standard bases.

**Buffage**, **grindage** and **tuneage** are examples. The tendency was popularised by its use in such films as *Bill and Ted's Bogus Journey*, *Wayne's World* and *California Man*.

**ag-fay** *n American*

a male homosexual. Usually used pejoratively and almost always by heterosexuals, this example of **pig Latin** is based on **fag**. Unlike the superficially similar **ofay**, this expression is predominantly used by white speakers.

**aggers** *n British*

the backside, buttocks. An item of provincial slang recorded in the *Observer* newspaper, 23 July 1994. Its derivation is uncertain.

**aggie** *n British*

a marble (as used in children's games). An old term, usually for a striped marble, still heard in the 1950s. From agate, the banded stone from which marbles were originally made.

See also **alley**

**aggravation** *n British*

serious trouble, victimisation or mutual harassment. A colloquial extension of the standard meaning of the word, used by police and the underworld. Aggravation is, like **bother** and **seeing-to**, a typical example of menacing understatement as practised in London working-class speech.

**aggro**<sup>1</sup>, **agro** *n British and Australian*

**aggravation**. Originally the slang term was a euphemism for threatened or actual violence, offered typically by **skinheads**, although it is not clear whether they or their (typically **hippy**) victims first adopted the shortened form at the end of the 1960s. (Whichever is the case, the word is a derivation of aggravation in its colloquial sense as used by police officers and criminals since the 1950s.) **Aggro**, like **bother**, is a typical example of the use of menacing understatement in British working-class slang. The word was soon taken up by other users and, in informal English, has now reverted to something

like its original unspecific meaning of annoyance or trouble. In Australian usage **aggro** can be used as an adjective, as in 'I guess I was a bit **aggro** last night'.

*'He's steaming drunk and well up for some agro.'*

(Recorded, London student, 2001)

**aggro**<sup>2</sup> *adj American*

wonderful, excellent. This probably ephemeral term was recorded among teenagers in New York and California in the late 1980s. It is probably based on a misunderstanding or deliberate shifting in the meaning of the earlier British term.

**A.H.** *n American*

**asshole** (usually in the metaphorical rather than literal sense). A euphemistic abbreviation.

Compare **a-hole**

**ah-eet** *adj American*

'doing OK, feeling good' (recorded, US student, April 2002). The term, which can be used as an exclamation or greeting, is probably a humorous or mock-dialect deformation of **all right** or **awright**.

**a-hole** *n American*

a euphemism for **asshole**, usually in the literal rather than metaphorical sense

**ait!, ite!** *exclamation American*

contracted alterations of **all right** or **awright**, fashionable since 2000

**aim archie at the armitage** *vb Australian*

(of a male) to urinate. A later version of the widely known **point Percy at the porcelain**, popularised in Barry Humphries' *Barry McKenzie* cartoon series. ('Armitage Ware' is a brand name of toilet bowls.)

**aimed** *adj American*

identified, singled out and/or victimised. A slang version of 'targeted' which probably originated in the argot of black street gangs. It is now used in milder contexts by teenagers.

*There's no way we'll get out of this; we've been aimed...*

**airball** *n American*

a dim-witted, eccentric or unpleasant person. This mildly pejorative term, originating in the 1980s, is a combination of **airhead** and the more offensive **hairball**.

**airbrained** *adj American*

silly, frivolous, empty-headed. Slightly less derogatory than the noun **airhead**, this term has not been imported into Britain to any significant extent, perhaps

because of possible confusion with 'hare-brained' which is still in widespread use.

*She's not just some airbrained bimbo, you know.*

**airhead** *n*

a fool; a silly, empty-headed person. An American teenager's term heard since the mid-1970s, used for instance by **Valley Girls**; it has been adopted by British teenagers since the 1980s.

*'The usual crowd of airheads, phonies, deadlegs, posers, bimbos, wallies, wannabees, hangers-on and gatecrashers...'* (Christina Appleyard, *Daily Mirror*, 11 May 1989)

**air hose** *n* *American*

shoes, typically loafers (leather moccasins), worn without socks. A **preppie** term for a preppie sartorial convention, punning on the American sense of 'hose' meaning socks, stockings, etc., and the compressed air pipe at a filling station.

**airlocked** *adj* *British*

drunk. The term occurs especially in Northern Irish use and it is possibly an inoffensive form of 'bollocked' or evoking a loss of faculties as if from oxygen deprivation.

**airs** *n pl* *American*

trainers. The word is a shortening of the trademark label *Air Jordans* which was generalised to denote any sports shoes and widely heard in 1991 and 1992. (The rare use of 'airing' in black speech to mean walking or leaving is an unconnected earlier usage, probably based on 'open air'.)

**Alabama** *n* *See 'bama*

**Alan Whickers, Alans** *n pl* *British*

*knickers*, *panties*. The terms are non-working-class rhyming slang, heard among young people, particularly students, in the 1970s and 1980s. The reference was to Alan Whicker, a well-known punctilious and dapper television interviewer.

*There was this huge pair of Alan Whickers hanging on the line.*

**a laugh and a joke** *n* *British*

a *smoke*. The rhyming slang phrase generally refers to tobacco smoking. It was recorded in London in 2002.

**alec, aleck** *n*

a swindler's victim, dupe. This term from the early 20th century is still heard in the USA and Australia. It is not clear whether alec derives from 'smart alec'

or vice versa. The word was used for instance in the film *House of Games* (1987, David Mamet), which dramatises the world of small-time American gamblers.

**aled, aled-up** *adj* *British*

drunk. A mild and acceptable term which, although short and to-the-point, can be used in polite company or family newspapers. The expressions probably originated in the north of England where ale has been, and remains, a common all-purpose word for beer.

*He's aled again.*

**alert** *adj* *British*

(of a male) slightly sexually aroused. Related terms, also in use since 2000, include **lob-on** and **semi**. 'It means to be a bit turned on (i.e. having a slight erection)'. (Recorded, London student, May 2003).

**alf** *n* *Australian*

a common, foolish person. In the 1960s this term briefly vied with **ocker** as the generic term for uncouth manhood.

**alkie** *n*

an alcoholic, especially one who lives rough or frequents the streets. The obvious term, which usually carries overtones of contempt, has been widespread in the USA at least since the Depression; it was adopted after World War II in Australia and since the 1960s has been in limited use in Britain.

**all about (it)** *adj* *American*

enthusiastic, keen. In use among adolescents and college students since 2000.

*I asked her if she wanted to hang with us and she was all about it.*

*I'm all about some basketball.*

**alley, allie** *n* *British*

a marble (as used in children's games). Like **aggie**, the word is approximately a hundred years old and refers to a pale or white marble. Although rarely heard today, these terms probably survive where the traditional game is still played. The most likely origin of the term is a shortening of 'alabaster', from which some Victorian marbles were made.

**alley apple** *n* *American*

a lump of horse manure. A less common version of the expression **road apple**, which is now an international English term.

**alleycat** *vb*

to prowl the streets, particularly late at night

*'There's Arthur Smith alleycatting around, trying to pick up chicks.'*

(Kit Hollerbach, *The 39,000 Steps*, Channel 4 documentary on the Edinburgh Festival, July 1989)

**alligator shoes/boots** *n pl*

old footwear with the toes gaping open. A jocular play on (expensive and luxurious) alligator-skin shoes.

**all mouth and trousers** *adj British*

blustering and boastful, showing off without having the qualities to justify it. A commonly heard dismissive phrase, typically said by women about a loud or assertive man. There is a suggestion that this is a corruption of the more logical, but rarely heard expression, 'all mouth and no trousers', meaning full of talk but deficient in the sexual area. A less racy version is 'all talk and no action'. There is an analogy with other colourful expressions, now mostly archaic, such as 'all my eye and Betty Martin', meaning nonsense, and more abusive versions such as **all piss and wind**.

*Oh him! He's all mouth and trousers, that one.*

**all over the shop / show / gaff / lot / ballpark** *adj, adv*

disorganised, in chaos or disarray. The first three versions are British, the last two American. This is a more colourful extension into slang of the colloquial phrase 'all over the place', and the first version at least dates from the 19th century. ('Shop' is a working-class catch-all for any workplace.)

**all piss and wind** *adj*

full of bluster and noise, but without real substance. This expression can have a similar meaning to **all mouth and trousers**, but can be applied for instance to a politician's speech or a theatrical performance, as well as to an individual. 'All piss and vinegar' is a rarer synonym.

**all right!, awright!** *exclamation American*

an exclamation of recognition, greeting, approval or admiration. The 'right' is emphasised, high-pitched and elongated when shouted. Used in this way the phrase was originally black American; it was picked up by whites, especially **hippies**, in the late 1960s.

**alls-bay** *n pl American*

the testicles. An item of **pig Latin** based on **balls**.

**all that** *n, adj American*

(a person who is) exceptional, admirable. The phrase is almost invariably used dismissively or to express derision, as in 'She thinks that she's all that'. It occurs in black working-class speech and in black and white campus usage, and is probably a shortening of '(not) all that much' or 'all that great'.

**all that and a bag of chips** *n, adj American*

an elaboration of **all that** in use among college students since the late 1990s

*Wow, that movie was all that and a bag of chips.*

**almonds, almond rocks** *n pl British*

*socks*. A London rhyming-slang term which is still in use. (Almond rock cakes were a popular working-class treat early in the 20th century.)

**alms(-house)** *adj British*

rude, disrespectful. This item of British street slang of the late 1990s is a variant form of **arms**. The reference is unclear, but the expression may have arisen in Caribbean usage.

**alpha geek** *n American*

the most technically proficient and/or knowledgeable member of a group. The term, usually but not invariably applied to males in an office or work-group, is inspired by the categorising of animal group-leaders as 'alpha males'. It was defined in *Wired* magazine in September 1995.

*'You gotta just identify the alpha geek and fire all your questions at him.'*

(Recorded, financial trader, New York, 1996)

**altered** *adj British*

drunk, a joky euphemism from the notion of being '(in an) altered state'. An item of student slang in use in London and elsewhere since around 2000.

**amagent** *n South African*

an alternative form of **ma-gent**

**amber fluid, amber nectar** *n*

beer, Australian lager. A facetious euphemism used by Australians in the 1970s which was popularised in Britain first by Barry Humphries' *Barry McKenzie* comic strip, then by TV advertisements, featuring the actor Paul Hogan, for Australian beer in the 1980s. The

term was enthusiastically adopted by some middle-class British drinkers, themselves fond of mock pompous coinages.

**ambulance chaser** *n*

a lawyer, literally one who specialises in claiming on behalf of accident victims. The phrase is also applied, facetiously or critically, to any lawyer who is known for sharp practice or unethical methods. This term was originally American (dating from the beginning of the 20th century) but is now employed in other English-speaking areas.

*'My daddy's a lawyer. Well, we often say he's an ambulance chaser.'*

(Recorded, young woman, Chicago, 1983)

**amp** *n*

1. an ampoule (of a narcotic). An obvious shortening used by drug abusers.

*I scored a couple of amps of meth[edrine].*

2. an amplifier. A common shortening used by musicians and hi-fi enthusiasts since the 1960s.

*He rammed his guitar into the amp.*

**amped (up)** *adj* *American*

excited or agitated. This term from black street slang, which can also indicate excited anticipation, may derive from an ampoule (of a narcotic) or from 'amphetamine(d)', but is equally likely to derive from the musicians' jargon 'amped-up', meaning with the amplifiers fully rigged.

*'While they were keeping me waiting I was getting more and more amped up...'*

(Recorded, musician, New York City, 1995)

**'ampsteads** *n pl* *British*

*teeth.* Cockney rhyming slang referring to the London beauty spot Hampstead Heath. The term (which is still heard) is invariably used with the dropped aspirate.

*a lovely set of 'ampsteads kicked in the 'ampsteads*

**amscray** *vb*

to **scram**, go away. One of the few examples of **backslang** or **pig Latin** which is actually used in speech, albeit rarely. The word is a pre-World War II Americanism which has been heard in Australia and in Britain since the 1950s.

*We'd better amscray before he gets back.*

**amyl** *n*

amyl nitrite (sometimes called amyl nitrate); a very powerful stimulant drug inhaled from a broken phial or **popper**. Amyl nitrite is prescribed for the treatment of angina pectoris, though it has been taken for fun since the 1950s, and for its supposed sexually stimulating effects, especially by **gay** men, since the late 1970s.

**anal** *adj* *American*

irritatingly pedantic, fastidious, conscientious, etc. This shortening of the popular psychological categorisation 'anal retentive' was a vogue term among US college students in the 1990s

*Don't be so anal!*

*That was such an anal thing to do.*

**anal astronaut** *n* *British*

a male homosexual. A pejorative and jocular term in use among schoolboys in 2004.

**anchor** *n* *British*

a young person, typically a younger sibling or babysittee, who inhibits one's pleasure or freedom of movement. The term was in use among adolescents and young adults from around 2000.

**anchors** *n pl* *British*

brakes. Originally part of the jargon of pre-war professional drivers. The term was popular with some middle-class motorists throughout the 1950s and 1960s, usually in the phrase 'slam on the anchors', meaning to brake suddenly. It now sounds rather dated.

**and relax!** *exclamation* *British*

1. a warning of an approaching person  
2. an exhortation to someone who is irate to calm down

Both usages have been recorded since 2000.

**Andrew, the** *n* *British*

**ane** *n* *British*

the backside, anus, a term used by schoolchildren since the 1990s. By extension the word can also refer to a foolish or unpleasant individual.

**angel**<sup>1</sup> *n*

cocaine. The term was recorded with this sense among clubbers in the UK in 2000.

**angel**<sup>2</sup>, **angela**, **angelina** *n*

a passive male homosexual. These are slang terms used by homosexuals themselves and (usually pejoratively) by heterosexuals. The words may originate as terms of affection, as feminine nicknames, or possibly from an earlier slang usage denoting a (female) prostitute.

**angel-drawers** *n* *British*

a term of endearment, used especially by middle-class speakers. The phrase is typical of the jocular compounds favoured, e.g., in St Valentine's Day dedications printed in newspaper small ads but, unlike many of these, it is spoken.

**angel dust** *n*

the drug **P.C.P.** A powdered (usually home-made) version of an animal tranquilliser which is smoked or sniffed through a tube and which produces in the user unpredictable and extreme physical and psychological effects. Users are capable of acts of violence, hallucinations and periods of imperviousness to pain and superhuman strength. P.C.P. is easy to produce in home laboratories and became a severe social problem in US cities after 1975, principally among poorer teenagers. Fears of its spread to Britain and elsewhere were groundless. Its milieu is now largely given over to **crack**.

*'For 15 years Washington has been struggling with abuse of PCP, also known as Angel Dust.'*

(*Independent*, 24 July 1989)

**Anglo** *n* *American*

a person of (mainly) Anglo-Saxon ethnic origin. The term came into widespread use in the 1970s, especially among Hispanics. This was the first attempt by Americans from other ethnic backgrounds to categorise white Anglo-Saxons as a subgroup. (**WASP** was first coined by Wasps themselves; **honky**, **pinkie**, etc., are terms of abuse.)

*'They're mainly Anglos out on Long Island these days.'*

(Recorded, suburban New Yorker, 1977)

**animal** *adj* *British*

excellent, exciting. This use of the term by young people since 2000 is based on

earlier uses of the noun animal to denote an impressively excessive individual.

**animal house** *n* *American*

any dwelling, but especially a college fraternity house, whose occupants are excessively dirty and rowdy. This late 1950s campus term was revived by the film *National Lampoon's Animal House*, starring the late John Belushi in the role of a typical 'animal' in 1978.

**animal night/act** *n* *Australian*

a planned or self-conscious bout of bad behaviour or excess. The term is typically used (by and about males) with pride or admiration rather than distaste.

**ankle**<sup>1</sup> *vb*

to walk, stroll, saunter. A raffish expression heard in the USA and occasionally in Britain since the 1980s.

*Let's ankle down to the off-licence.*

**ankle**<sup>2</sup> *n* *American*

an attractive female or females. This use of the word appears to predate its popularity among black youths and on campus since the late 1990s. The provenance is unclear and it may be a jocular reference to the archaic phrase 'a well-turned ankle' as a Victorian notion of beauty.

*She's some cute ankle.*

*Check out the ankle around here.*

**ankle-biter** *n*

a child, usually a baby or toddler. Commonly used with mock distaste by parents, sometimes with real distaste by others, ankle-biter has been heard in all social classes in Britain and Australia since the late 1970s. Synonyms are **leg-biter**, **rug rat** and **crumb-snatcher**.

**annihilated** *adj*

helplessly drunk, drugged or exhausted. A middle-class teenager's colloquial expression, popular in the 1970s and 1980s.

**anorak** *n* *British*

an unfashionable, studious or tedious person, usually a young male. A campus expression from the 1980s, based on the characteristic dress of these fellow-students. A sub-genre of jangling guitar pop music, supposedly beloved of such students, was dubbed 'anorak rock' in the music press in the mid-1980s.

*'An anorak is one of those boring gits who sit at the front of every lecture with their*

*Pringle jumpers asking the lecturer their clever questions.'*

(Graffiti in the toilets at King's College, London University, July 1988)

**anteater** *n* *American*

(a male with) an uncircumcised penis. Synonyms are **aardvark**, **corn-dog**.

**ante up** *vb*

to pay one's contribution, put one's money in the common pot. This expression, not to be confused with 'up the ante', comes from the preliminary stage in a poker game when one or all of the players must put a stake in the pot. By extension ante up is sometimes used to mean settle accounts or (reluctantly) hand over something demanded.

*OK, you guys, it's time to ante up.*

**(Sir) Anthony (Blunt)** *n*

a very unpleasant person, **cunt**. Still in use in 2004, this rhyming slang expression uses the name of the late keeper of the Queen's pictures and traitor.

**antiman** *n*

a male homosexual. The term, originating in Caribbean usage and heard among young speakers of most ethnic groups in the UK, is a Creole pronunciation of 'auntie-man'. It is usually pejorative.

**Panty-man** is a synonym.

**an't it?** *question form* *British*

a variation of **innit?** which, like that term, originated in black British usage and was adopted by adolescents and later by younger schoolchildren in the 1990s

**a.** nervous, jumpy, agitated

*'She's been getting a little antsy lately – wants me to leave my wife.'*

(*The Secret of my Success*, US film, 1987)

**b.** eager for sex

Both senses are derived from the older, humorous colloquial expression 'to have ants in one's pants' (meaning to be restless or agitated). Antsy is a fairly common and inoffensive term in the USA and Australia, but rare in Britain.

**antwacky** *adj* *British*

out-of-date, old-fashioned. The term, used especially in northwest England, is probably a mock ignorant alteration of antique.

**ape(shit)** *adj, adv*

out of control, berserk. Used especially in the expression 'go ape', the image is of a person reduced to a primal state, either by infatuation, excitement or, especially, anger. An American teenagers' term from the late 1950s, now in general currency.

*He's apeshit about her.*

*'I go ape ev'ry time I see you smile.'*

(*'I Go Ape'*, written and recorded by Neil Sedaka, 1960)

*'After I'd left my last school, I pinched a wallet full of credit cards and went apeshit in about five different counties.'*

(*Sunday Times* magazine, Stephen Fry, August 1989)

**ape-hangers** *n pl*

extra-high handlebars for motorbikes or bicycles. The style was popularised by **bikers** in the USA in the 1950s, spreading to Britain where **rockers**, **greasers** and schoolchildren had adopted the style and the term by about 1959.

**apple-polisher** *n*

a flatterer, someone who curries favour. The term comes from the image of the ingratiating pupil who polishes an apple carefully before presenting it to a teacher. The tradition of 'an apple for the teacher' was really practised in rural USA before World War II, but the term is common in all English-speaking areas. It is sometimes in the form of a verb, as in 'she's been apple-polishing again'. In Britain it is often shortened to **polisher**.

*'I had few qualifications for Hollywood; I was immoderately slothful, had no facility for salesmanship or apple-polishing, and possessed a very low boiling point.'*

(S. J. Perelman, quoted in *Groucho, Harpo, Chico & sometimes Zeppo*, Joe Adamson, 1973)

**apples**<sup>1</sup> *n pl*

**1.** female breasts

**2.** the testicles

Apples, like almost all other round fruits, have readily been used as euphemisms for these bodily parts. This type of metaphor may occur as a spontaneous coinage in any English-speaking community.

**3.** white people. An ethnic categorisation used by Afro-Caribbeans and South and East Asians. The reference is probably to pink skins and white flesh and is sometimes pejorative.

**apples<sup>2</sup>** *adj* *Australian*

An invention by an anonymous wit in the tradition of a **monkey**, a **pony**, etc. It refers to the sum paid by the author and Tory politician Jeffrey Archer to Miss Monica Coughlan, a prostitute, to enable her to go abroad. Her return in 1987 resulted in Mr Archer bringing a libel case against the *News of the World*, which he won. (The synonym **Jeffrey** was also heard.)

*'The usual two Archers in a plain envelope.'*

(*Weekending*, BBC Radio 4, 9 March 1990)

**arching for it** *adj* *British*

The term has been fashionable in both senses since 2000.

a less offensive alternative to **bollocks** as a cry of dismissal or derision, in use among middle-class students since 2000

**arms** *adj* *British*

offending codes of behaviour, breaking unwritten rules. This code term among teenage gangs was defined by one of its users as 'out of order'. The term was recorded in use among North London schoolboys in 1993 and 1994. It may in fact derive from the equally mysterious **alms(-house)**, which is heard in black British speech denoting rudeness or **dissing**.

*This is/he's arms.*

'**arris** *n*

1. the backside, buttocks. A cockney elaboration of **arse** sometimes adopted

by middle-class speakers who want to avoid the offensive term.

*a kick in the 'arris*

**2.** courage, nerve. A London working-class term which is a more recent derivation of **arse**.

*loads of 'arris*

Both senses derive from a double rhyme; 'arris from **Aristotle**, meaning *bottle*, while 'bottle and glass' gives *arse*.

### arse<sup>1</sup> *n*

**1.** *British* the backside, buttocks, anus. This word is not, strictly speaking, slang, but an ancient term (*aers* in Anglo-Saxon, descended from Germanic nouns related to an Indo-European ancestor meaning 'tail') which, since the 17th century, has been considered too vulgar for polite conversation. Australia follows the British spelling, while in the USA and Canada the word is spelled **ass**.

**2.** *British* a foolish or contemptible person. A fairly mild term of exasperated contempt, popular in upper- and middle-class speech until the 1960s, now generally replaced by stronger or more colourful alternatives. 'Silly arse!' was a favourite British rebuke.

**3a.** *British* courage, nerve or cheek. This has been a popular working-class usage in London and Australian slang. In Britain it has, since the 1960s, largely been supplanted by more colourful terms such as 'arris or **bottle**, which are derived from it, or by synonyms such as **balls**.

**3b.** *Australian* good luck. This usage, which is more commonly expressed by the adjective **arsy**, probably derives from the previous sense, with the implication that the good fortune came as a result of daring or impudence.

**4.** *Australian* a synonym for **heave-ho**, **elbow** or 'the boot', usually in the expression **give (someone) the arse**

**5.** **my arse!** *British* 'Nonsense!', 'I don't believe it!' or 'It's not true!' An exclamation of angry or impatient disbelief, dating at least from the 18th century. It is probably a shortening of a longer phrase such as in the following sense.

**6.** **kiss my arse!** *British* an exclamation of defiance or contempt

**7.** **not to know one's arse from one's elbow/a hole in the ground** *British* to be incapable or incompetent, stupid

**8.** **the sun shines out of his/her arse** *British* he or she is wonderful, perfect or the favourite. The expression is used con-

temptuously or enviously of a person who, in their own opinion or that of others, can do no wrong.

### arse<sup>2</sup> *adj* *British*

of poor quality. A vogue term (in all its senses) among younger speakers since the late 1990s, its usage popularised by cult TV comedies such as *Father Ted* and *The Fast Show*.

*pure arse*

*That new single of hers is arse.*

### arse about *vb*

to fool about, behave in an irresponsible or silly way. A favourite expression of many schoolmasters, especially in the 1950s and 1960s.

*Stop arsing about in there and get on with your work!*

### arse-about-face *adj, adv*

back to front, the wrong way round or wrongly ordered or organised

*Look at the state of that shelf you just put up; it's all arse-about-face!*

### arse bandit *n* *British*

a male homosexual. The humorous but not affectionate term suggests an aggressive, predatory or desperate enemy. It is very much a term of jovial male abuse (there is no record of women saying it) in public schools, the army and the pub. Slightly less vulgar versions are 'bum bandit' and **trouser bandit**; **chocolate bandit** is another synonym.

**arsed** *adj* *British* See **can't be arsed/bolloxed/fucked/shagged**

### arse-end *n*

the end, back or bottom of anything. A common vulgarism also used in the phrase 'the arse-end of nowhere', referring to a very remote and/or unpleasant place. 'Arse-end Charlie' is a more robust version of the colloquial 'tail-end Charlie', as applied to a straggler.

### arsehole<sup>1</sup> *n* *British*

**1.** the anus. **Asshole** in American English.

**2.** **the arsehole of the universe / earth / world** an extremely unpleasant place, especially one that is dirty, smelly and hot, but now by extension anywhere awful. The phrase was probably coined by troops stationed overseas, prompted by such captions as 'the pearl of the Orient' or 'the gateway to the Pacific'.

**3.** an extremely unpleasant person, especially one who combines offensiveness with stupidity. The term, when used in Britain or Australia, is stronger than the

American equivalent **asshole**, and slightly different in emphasis. It shows real distaste and dislike rather than mild contempt.

**arsehole<sup>2</sup> vb**

1. *British* to 'crawl', flatter or curry favour in a nauseating way. Typically used at work about a fellow employee, this is probably inspired by the now dated expressions 'arsehole-crawler' or 'arsehole-creep'.

*There he goes, arseholing again. It makes me sick.*

2. *Australian* to throw someone out, to get rid of (an unwanted lover). The word is often used plaintively or resentfully by jilted teenagers.

*I can't understand it. Robyn arseholed me last night.*

**arseholed adj**

1. *British* very drunk. A popular word among students, younger members of the armed forces and other heavy drinkers from the 1960s to the present. The image is of someone disgustingly or helplessly drunk, as in the expression 'pissed as an arsehole'; but the term is neutral, not usually pejorative, and is used by all social classes.

*'Once a month he gets completely arseholed and then comes home and asks me to forgive him.'*

(Recorded, housewife, Devon, 1986)

2a. *Australian* dismissed from one's job

2b. *Australian* ejected, especially from a bar

2c. *Australian* rejected by one's partner

**arseholes! exclamation British**

nonsense. A term expressing brusque dismissal or defiance which now seems to be falling into disuse. The singer Ian Dury included it in a stream of abuse featured on a 1978 record.

**arsehole to breakfast time adj, adv British**

1. completely disorganised, 'at sixes and sevens'. A picturesque, if fundamentally meaningless expression sometimes heard in Britain, especially in the north of England.

*It's no good, it's all arsehole to breakfast time in that office at the moment.*

2. thoroughly, constantly, or the full distance as, for instance, in the expression 'he kicked him from arsehole to breakfast time'. This may be an allusion to the complete digestive process (breakfast time

referring to the mouth), but the origins of the phrase are obscure.

**arselick vb British**

to flatter, curry favour. The verb, which may be transitive or, more often, intransitive, is a more recent back-formation from the noun form.

**arse-licker n**

a flatterer or toady, someone who is nauseatingly sycophantic. This ancient image and phrase is paralleled in many European languages (*Arschlecker* in German, *lèche-cul* in French).

**arse-man n**

a man whose favourite part of a woman's anatomy is the buttocks as opposed to a **leg-man** or **tit-man**

**arse-on n British**

a fit of bad temper, sulk. The term has been heard since 2000.

*feeling a bit of an arse-on*

*He's got the arse-on.*

**arse over tip/tit adv**

head over heels, upside down. The expression is typically cockney, but widespread in Britain and Australia. The American version is **ass over tincups/teacups**.

*'She tripped and fell arse over tit down the stairs.'*

(Recorded, plumber, London, 1987)

**arse up vb British**

to make a mess of, mix up or spoil. A less common variation of **balls up** and the verb form of **cock-up**.

*He managed to completely arse up the whole job.*

**arse-up n British**

a synonym for **cock-up** and **fuck-up**, which became popular from the mid-1990s, in common with most compounds based on **arse**

*'It [a student union function] was quite well planned this year – unlike the last one, which was a complete arse-up.'*

(Recorded, London University student, October 1996)

**arse-wipe n**

a British version of **ass-wipe**

**arsey adj British**

truculent, aggressive, bumptious. A vogue term among young people since the late 1990s, also heard on US campuses since 2000.

**arsy adj Australian**

lucky. Usually said grudgingly or enviously about someone who has managed

to get away with something. (**Arse** in Australian slang may signify luck as well as brazenness.)

**Arthur Scargill** *n* *Irish*

an alcoholic drink. The name of the militant leader of the UK miners' union in the 1980s was borrowed as a rhyme for **gar-gle**.

**artillery** *n*

needles, hypodermic syringes and other paraphernalia used by heroin addicts. The image of an arsenal of deadly equipment is typical of addicts' own self-dramatising slang (as in **shooting gallery**, **harpoon**, etc.)

*Have you got the artillery ready, man?*

**artist, -artist** *n*, *suffix*

an expert in, or devotee of, a particular activity. The word can be added to many others, but the most popular are bull(shit)-artist, burn-artist, con-artist, **piss-artist**, **ripoff artist** and **sack artist**.

This pattern entered modern British slang via the armed forces in the 1950s and 1960s, and separately via American **hippy** terminology of the late 1960s and early 1970s. The ultimate geographical origin of the usage is obscure; it may have come into use spontaneously in several English-speaking areas, perhaps prompted by the Edwardian habit of pompously applying 'artist' or 'artiste' to performers in various fields of expertise.

**arty-farty, artsy-fartsy** *adj*

pretentious, affected, more decorative than useful. A more vulgar parallel of the innocuous 'arty-crafty', which is Edwardian in origin and was usually applied to the pseudo-rustic, as in the Arts and Crafts design movement of the late 19th century.

**arvo** *n* *Australian*

afternoon. An example of the Australian tendency to abbreviate even the most mundane everyday words. The tendency is shared by nursery slang in general and, in Britain, especially the slang of Liverpool. (Arvo is, however, uniquely Australian.)

*'There's no excuse for being in that state in the middle of the arvo!'*

(Recorded, Australian tourist, London, 1989)

**asap, assap** *adv*

speech, pronounced letter by letter or as one word).

**Asian massive, the Asian invasion** *n* *British*

a group, clique or gang of young (South) Asians. The phrase has been used e.g. as an ethnic or social categorisation by university students since 2000. **The innit-crowd** is a synonymous phrase. 'It's a collective term for Asian gangsters with mobile phones who hang out in the student common room'.

**ass** *n* *American*

*You gonna get yo' ass killed!*

4. **Your ass is mine!** 'You are in my power!' A phrase used triumphantly, typically by representatives of authority to their victims

6. **have one's ass in a sling/ass on the line** to be in trouble, held responsible.

*See also the entries following and badass; candyass; kick ass*

**-ass** *combining form*

the term is used in American slang and, more recently, in Caribbean and, occasionally, British speech as an all-purpose affix denoting an individual or example, combining with a noun or adjective as in **big-ass**, 'old-ass', **lame-ass**

**assap** *adv* *See asap*

**ass-bandit** *n* *American*

a North American and Caribbean version of **arse bandit**

**asshole** *n* *American*

1. the anus. The American version of the British and Australian **arsehole**.

2. a very stupid person, someone who is pathetically or offensively foolish. This American word always implies contempt, but can also convey pity, unlike **arsehole**, which has overtones of real dislike. Since the 1960s, British and Australian speakers have adopted the American term in this sense, with its different spelling and pronunciation, for their own use. The

word has become very widespread since the late 1970s and has simultaneously become a vulgarism rather than a taboo term.

*'It didn't take very long to realise that he wasn't a threat, just a total asshole.'*

(Recorded, US executive, London, 1988)

**3.** a very unpleasant place

*'On top of a bleak, snow-swept hillside in Hermon, Maine, which, if not the asshole of the universe, is at least within farting distance of it.'*

**2.** committing a crime or crimes, or engaged in a confidence trick. A mild

euphemism typically used by police officers or criminals themselves, from the common colloquialism 'at it again', referring to any repeated and troublesome activity.

*'Joey Ganguli is at it all the time.*

*He... earns his rolls of cash in the middle of the Asian gang wars...in the East End of London.'*

(*Guardian*, 15 April 2004)

**a touch of the tarbrush** *n*

**attitude** *n* American

a bad attitude, antisocial behaviour, sullen hostility. This use of the word without 'an' or 'the' probably derives from the black American prisoners' shortening of the white authority figures' phrases 'bad/negative/antisocial attitude' or their accusation, 'You've got an attitude problem'.

**Audi!** *exclamation* American

goodbye. This announcement that one is leaving is probably a playful deformation of the phrase 'I'm out of here', punning on the brand of German luxury car coveted by young males. It almost certainly originated in black street slang where the variant forms 'Audi 5000!' or simply **5000!** are also heard. By the mid-1990s, the term was also in use on campuses and among high-school students.

**Aunt(ie) Flo** *n* British

a single dose of LSD or another hallucinogenic drug. A pun on the notion of a **trip** and the name of a cheap excursion ticket on British Rail.

**away with the fairies/pixies** *adj, adv*

distracted, absent-minded, in a reverie. The first version of the phrase is common in Scottish usage, the second is more often heard in Australia. Both derive ultimately from the folk belief that forces from the fairy world can abduct, enchant or derange human victims.

**awesome** *adj*

wonderful, excellent, very impressive. A popular teenage word, first used in the USA in the late 1970s and 1980s as part of the vocabulary of **Valley Girls**, **preppies** and hip hop music enthusiasts, among others. This use of the adjective was imported into Britain in the 1980s, especially by teenage skateboarders and **rap** music enthusiasts.

**awol, A.W.O.L.** *adj*

missing, not present when needed. The expression has been extended, especially by British middle-class speakers, from its original meaning in army jargon of 'absent without leave' to inexplicably absent, either with the implication of fleeing to avoid responsibilities, or wandering uncontrolled or running amok.

an abbreviated form of the fashionable slang sense of **awesome**, popular with college students, particularly females, since the 1990s

**axe** *n*

a guitar. The word in this sense was enthusiastically adopted by white rock musicians in the late 1960s. Black blues and jazz musicians had originally applied it to any instrument (such as a saxophone) that was held in both hands and 'wielded'. By the early 1970s the white use of the word, which had always had an element of self-consciousness, was mainly confined to rock music journalists or fans.

**aya!** *exclamation American*

an exclamation of amazement in vogue among teenagers in 1987 and 1988. The word may be a hearty cry or, more often, an affected shriek (possibly in imitation of Hispanic speech).

**aye-aye shepherd's pie!, aye-aye**

**Popeye!** *exclamation British*

these joky expressions of agreement or compliance originated among primary and junior schoolchildren, but during the early 1990s were adopted as catchphrases by adults, particularly those working in advertising, the media and finance in London.

*Compare* **okey-dokey, artichokey!; oy-oy, saveloy!**

**Ayrton (Senna)** *n British*

a *tenner*, a £10 note. The rhyming slang term, borrowing the name of the late Brazilian Formula One racing driver, was still in use among London students in 2004.

*I've only got an Ayrton left to last me the month!*

**ay yo trip!** *exclamation*

an exhortation or cry of solidarity used in hip hop and **rap** milieus

**Aztec two-step, the Aztec two-step** *n*

cally, the frantic and undignified clenched shuffle to the nearest toilet or bush. This parody of a dance title was coined by Americans who tend to suffer

while on holiday in Mexico, and is a late 1970s alternative to **Montezuma's revenge** or the British **gypsy tummy** and **Delhi belly**.

Originally from the terminology of the poorest black Americans, either as simple irony or based on the assumption that what is bad in the eyes of the white establishment is good for them, this usage spread via jazz musicians in the 1950s to teenagers in the 1970s. It is still primarily a black term, although it is occasionally used, rather self-consciously, by white teenagers in the USA and, under the influence of **rap** and hip hop, in Britain since the early 1980s. This use of bad is normally distinguished from its opposite, literal meaning by a long drawn-out pronunciation. The superlative form is 'baddest'.

**2.** an unfashionable, unattractive individual. In this pejorative sense the word, recorded among students and young adults since the later 1990s to refer to a supposed frump or **drabbie**, is either an elaboration of the colloquial '(old) bag', influenced by the homely images of baggy cardigans and tweeds, or possibly by **bag lady**.

**Baldwin** *n* *American*

an attractive male. This vogue word among Californian high-school students was featured in the 1994 US film *Clueless*, with its female counterpart **Betty** and its antonym **Barney**. **hippy** era, has rarely been used in Britain or Australia. Originally an item of black argot, it gained wider popularity in the early 1960s and, as its anatomical origin suggests, is generally a male usage.

*'Presley fired me because I balled his old lady.'*

(The singer P. J. Proby, interviewed in 1965)

2. to behave in a boisterous, fun-loving and uninhibited way; to 'have a ball'. The term usually implies dancing, but also a degree of Bacchanalian, even orgiastic revelry far beyond that signified by the standard English (hunt or charity) ball.

(Little Richard, [ambiguous] song lyrics, 1958)

3. to play basketball

4a. to behave ostentatiously

a stupid and/or obnoxious person. The slang for testicle has also been used as an insult by British junior-school pupils.

**ballin'** *n*

(*Clueless*, US film, 1995)

**'bama** *n* *American*

an unfashionable, unsophisticated or otherwise unfortunate person. The term, originating in hip hop culture and in more generalised usage since 2000, evokes a provincial bumpkin. The association with striking (as in the origin of the word 'fuck' itself) is said to suggest the masculine role in sex, but in practice the unaffectionate term can also apply to women, especially in Australian usage where it is more common than in America. In Britain 'bang' in this sense has only been widely understood since the late 1960s. It was introduced via the phrase **gang bang** and the following expression.

*'You're banging a major witness in a case you're trying?!*

*(The Last Innocent Man, US film, 1987)*

2. *American* to be an active gang member. From the parlance of Los Angeles street gangs of the late 1980s, derived from the specific sense of **gangbanger**.

'Caught wearing cheap clothing as in footballers other than Michael Owen and David Beckham'.

*He was caught bang to Byrites in that purple shellsuit.*

This 19th-century expression (paralleled in American English by **dead to rights**) is usually heard in the form 'caught bang to rights' or 'we've got him/her bang to rights' (i.e. helpless, indefensible). **banjaxed** *adj* *Irish*

defeated, overcome or overwhelmed. A humorous term from the early 20th century, often used ruefully by husbands floored or humiliated in a domestic dispute. This Irish word, probably formed by association with 'banged', 'bashed' and 'smashed', has been popularised in Britain by the Irish broadcaster, Terry Wogan, who used it as the title of a book in 1980. It can now be extended to mean stunned, flummoxed, amazed, drunk, etc.

2. a person in authority, especially a judge or schoolmaster. This old usage is now obsolete in American English, but is retained in Britain in public-school slang and in the expression 'up before the beak' (appearing before a magistrate or someone else sitting in judgment). Attempts have been made to derive this meaning of beak from a Celtic term for judgment, but the more obvious derivation is from the intrusive beak (the nose and/or mouth) of authority. *Tatler* magazine reported in August 1989 that beak was still the standard Etonian slang for a schoolmaster.

**beat**<sup>1</sup> *n*

a member of the 'beat generation' or aspirer to its values. The term, coined by the influential American writer Jack Kerouac and first published by John Clellon Holmes in his novel *Go*, is derived both from the notion of being beaten, down-trodden or poor, and from the notion of beatitude or holiness. The phrase 'the beat generation', coined in imitation of other literary groups such as the Lost Generation of the 1920s, originally applied to a relatively small group of writers, artists and bohemians in America immediately after World War II, whose activities and beliefs were minutely chronicled in autobiographical, mystical and experimental prose and poetry by Kerouac, Holmes, Gregory Corso, William Burroughs and Allen Ginsberg, among others. The term **beatniks** (employing the Slavonic '-nik' suffix disparagingly) was applied to these and later followers by members of **straight** society, hostile to what they saw as the licentious, irreligious and communistic aspects of the beat lifestyle. In Britain the beats were a youth subculture of the early- to mid-1960s, which co-existed with the **mods** and **rockers** and metamorphosed into the **hippies**.

*'The most beautifully executed, the clearest and most important utterance yet made by the generation Kerouac himself named years ago as "beat", and whose principal avatar he is.'*

*Come on man, beat it up! We don't have all day.*

**beatnik** *n*

someone following a **beat** lifestyle or modes of dress. The term was coined by newspapermen to deride the self-styled members of the beat generation but was later adopted by beatniks themselves; the '-nik' suffix came from Russian and was meant to identify the beats with godless Communism (as well as being a derogatory word-ending in Yiddish terms such as **nudnik**). Aspects of the beatnik lifestyle included scruffy dress (often black), berets, modern jazz, coffee bars, a slightly more liberal attitude to sex than their contemporaries, at least a pretence at interest in modern arts and literature and a youth cult. Beatniks had passed their peak by 1960, but many of them (who incidentally referred to themselves simply as **beats**) were absorbed into the **hippy** movement in the mid-1960s.

*'A petition signed by 2,321 residents and holidaymakers at St Ives, Cornwall was handed to the Mayor, Ald. Archie Knight during the weekend. It calls for tighter vagrancy laws to rid the town of beatniks.'*

It is still used by the police to refer to anyone who is not **straight**, and by criminals and others to refer to corrupt police officers (often by the cliché phrase 'a bent copper' – 'bent coppers' were damaged coins that could not be used in public lavatories in the 1950s and 1960s). A more colourful embroidery sometimes heard in Britain is 'bent as a butcher's hook'.

**berk** *n*

a fool. This word, which has been widespread since the early 1960s in Britain and Australia (where it was introduced via British TV comedies), is used as a form of mild derision by many speakers who would be shocked by its original meaning in rhyming slang. The origin is 'Berkeley hunt' or 'Berkshire hunt', meaning **cunt** which, in the late 19th and early 20th centuries, was a cockney synonym for a fool.

*'How tempting it must have been to add: "...despite what you may gathered from that posturing berk, Chirac..."'*

**bestie** *n* British

an unpleasant or despicable individual. A term of playground abuse from 'bestiality'.

**Betty** *n*

**biffa, biffer** *n British*  
1. an ugly or unattractive female. Biffa is sometimes used as a children's nickname, usually denoting a burly, boisterous individual, so probably from the colloquial verb 'biff' meaning to hit. **Bill, the Bill, the Old Bill** *n* *British*

the police. A working-class London term which slowly entered common currency during the 1970s, partly owing to television police dramas. The term's origins are obscure. It seems to have passed from 'Bill' or 'Old Bill', a mock affectionate name for individual police officers, via 'the Old Bill', a personification of the police force as a whole, to 'the Bill'. It can also be used in expressions such as '(look out) (s)he's Bill!', meaning he or she is a police officer. Coincidentally or not, in 1917 the Metropolitan Police used Bruce Bairns-

father's famous cartoon figure *Old Bill* (he of 'If you know of a better 'ole, go to it') on a recruiting campaign. It may also be significant that when the Flying Squad was first motorised, all their licence plates had **BYL** registrations.

**bimbo** *n*

1. a silly, empty-headed or frivolous woman. This is the sense of the word in vogue since the late 1980s, imported to Britain and Australia from the USA. The origin is almost certainly a variant of *bambino*, Italian for baby. In the early 1900s a bimbo, in American colloquial use, was a man, especially a big, unintelligent and aggressive man or a clumsy dupe. By the 1950s the word was used as a nickname for boys in England, perhaps inspired by a popular song of the time. By the 1920s bimbo was being applied to women, especially by popular crime-fiction writers, and it is this use that was revived in the 1980s with the return to fashion of glamorous but not over-cerebral celebrities. In the late 1980s the word was again applied occasionally to males, although with less brutish and more frivolous overtones than earlier usage.

The word 'blag' has been in widespread use in both sub-senses in underworld and police circles since the early 1950s. There have been suggestions that it is more simply an elaboration of to **bag**.

A word of obscure origin (it precedes the media attention paid to the Labour leader Tony Blair), it may have originated in black speech and may simply be an appropriation of the standard meaning of *blare*, i.e. to shout, trumpet. The term was recorded in use among North London schoolboys in 1993 and 1994.

**blamming** *adj* *British*

a. a boastful or bombastic person, a 'windbag'

b. a villainous or disreputable person

This picturesque word is the American and Australian version of the Scottish dialect word 'bletherskate'. Although it is a fairly innocuous term of mild abuse, it derives from 'blether' meaning a bladder or to blather, and 'skate', a dialect variant of **shit**. The image evoked is of someone who is 'full of shit'. During the War of Independence, Americans became familiar with the word from the Scottish song, *Maggie Lauder*.

**blatted** *adj British*

**blocked** *adj* *British*

under the influence of drugs, especially **pep pills** or amphetamines. This word was popular in the early 1960s among **mods**, who used it to refer to the state of intoxication caused by 'pep pills' or amphetamines, such as **purple hearts**, **blues**, **black bombers**, etc. The origin is probably in the idea that one's **block**, or head, is completely taken over and partly incapacitated by the drug. This is reinforced by the fact that a side-effect of amphetamines is to make the user tongue-tied, so that communication is literally blocked.

*"Does that mean you're blocked out of your mind on stage?"*

*"It means we're blocked out of our minds all the time."*

*(Pete Townshend of The Who, interviewed on the television programme A Whole Scene Going, 1966)*

The most widespread slang term in Britain and Australia from the 1950s, when it superseded 'chap' and 'fellow', to the 1970s, when 'guy' began to rival it in popularity amongst younger speakers. The exact origin of the word is mysterious. It seems to have entered working-class slang from vagrants' jargon; either from Shelta, the Irish travellers' secret language, or from Romany. Romany has a word, *loke*, which is

derived from the Hindustani for a man; in Dutch *blok* means a fool. Whatever its ultimate origin, *bloke* entered British usage early in the 19th century and is still thriving in colloquial speech.

*'I went into the boozier the other day and there was this bloke I hadn't seen for 25 years.'*

*(William Donaldson, Independent, 26 August 1989)*

**blonde** *adj*

slow-witted, vapid, scatterbrained. The pejorative use followed the rash of jokes which circulated internationally from around 1999, based on the supposed vacuity of blonde females and reinforced by Hollywood comedies such as *Legally Blonde*. 'Blondespeak', recorded in 2004, denotes simplified language as supposedly used by or to blondes.

*Don't be so blonde!*

*That was real blonde.*

**blood** *n* *American*

**bloody** *adj* *British*

an intensifying adjective which is now considered fairly mild, but which was held to be taboo in many circles until the later 1960s. The standard folk etymology is from the oath 'by our lady', but the word is more probably a simple extension of the literal meaning.

*(US TV programme featuring humorous out-takes from films and TV series, 1988)*

drunk. The word appeared around 1905. It implies that the person in question has soaked up alcohol in the manner of blotting paper.

**blow-in** *n* *Australian*

a newcomer and/or interloper. The noun, usually referring to an unwelcome visitor, is based on the colloquial verb 'to blow in' meaning to arrive unexpectedly.

*I've got enough to do without having to deal with bloody blow-ins.*

**blow job** *n*

an act of fellatio. This term, now widespread in English-speaking countries, spread from the USA in the 1960s. A puzzling misnomer to many, to **blow** in this context is probably a euphemism for ejaculate, a usage occasionally recorded in the 1950s. This may itself be influenced by the 'there (s)he blows' of whaling cliché. An alternative and equally plausible derivation of blow job is from the black jazz musicians' **hip** talk expression **blow**, meaning to play (an instrument). This term probably caught on in Britain and Australia simply because there was no well-known alternative in existence.

**blow one's mind** *vb*

to be transported beyond a normal state of mental equilibrium, experience sudden euphoria or disorientation. A key term from the lexicon of drug users of the 1960s, this phrase was rapidly gen-

eralised to cover less momentous instances of surprise, awe, admiration, etc. Now dated, the expression is still in many people's passive vocabulary, allowing it to be used, e.g., in advertising copy as late as 1989.

*'Happiness is hard to find – we just want peace to blow our minds.'*

(Lyrics to *Revolution* by Tomorrow, 1967)

(Pete Townshend, *Oz* magazine, June 1969)

Both senses of the phrase were part of the **hippy** lexicon of the 1960s and are now dated. (The Beatles were castigated for their ambiguous use of 'I want to blow your mind' in the lyrics of *A Day in the Life* in 1967.)

**blow the gaff** *vb*

to give away information, reveal a secret, inform on someone. This picturesque phrase was derived from the archaic term 'gaff' meaning a trickster's strategy or paraphernalia. Although it dates from the early 19th century and often evokes

the world of **spivs** or gangsters, the expression is still used. Confusingly, blow the gaff could conceivably also now mean 'leave (**blow**) the premises (**gaff**)'.

**blub** *vb* *British*

to cry, weep. A middle-class children's and public-school term, typically used derivatively. It is a shortening of the colloquial 'blubber'.

*'But the boiled egg made his gorge rise, and it was as much as he could do to stop himself blubbing over the toast and marmalade.'*

(*Scandal*, A. N. Wilson, 1983)

**bludge** *vb* *Australian*

to cadge, scrounge, shirk or loaf. Originally the word meant to bully and was a shortening of bludgeon. It later meant to live off immoral earnings. The word, which has given rise to the more common **bludger**, was introduced to Britain via Australian TV soap operas in the late 1980s.

**bludger** *n* *Australian*

a cadger or scrounger, a disreputable or despicable person. (A **dole-bludger** is the Australian equivalent of the British 'dole scrounger'.)

**blue** *n*

1. *Australian* a violent row or fight

*'They got into a blue – Kelly pushed Charlene into a gooseberry bush.'*

(*Neighbours*, Australian TV soap opera, 1987)

2. *British* an amphetamine tablet. A term from the 1960s when these tablets were light blue in colour and also known as 'French blues' and 'double-blues'. (Strictly speaking blues were tablets of drinamyl, a mixed amphetamine and barbiturate preparation, prescribed for slimmers.)

3. a police officer. A rare usage, but occasionally heard in all English-speaking countries; it is usually in the plural form.

4. *Australian* a red-headed man. A nickname mentioned in Rolf Harris's well-known song 'Tie me kangaroo down, sport!'

**blue balls** *n*

a condition of acute (male) sexual frustration, jocularly supposed to bring on a case of orchiditis, the testicles swelling to bursting point. This American expression of the 1950s, popular then among college students, has since spread to other English-speaking communities.

**bluebottle** *n* *British*

a police officer. A term popular in the 1950s and still heard. It has been used in Britain since the 16th century, well before policemen wore uniforms, and indeed existed in any organised form, which suggests that the original reference was to an annoying pestilential presence.

*'Before you could turn round the place filled up with bluebottles.'*

(Recorded, pub habitu , London, 1987)

**blue foot** *n* *British*

a prostitute. An ephemeral word of uncertain origin.

*Compare* **B.N.I.C.**

**B.N.I.C.** *n* *American*

a successful or dominant black male. The initials stand for 'Boss Nigger In Charge'. An item of black street-talk that was included in so-called **Ebonics**, recog-

nised as a legitimate language variety by school officials in Oakland, California, in late 1996.

Compare **B.M.O.C.**; **B.M.W.**

**boak** *vb* *British*

to vomit. The term, probably echoic in origin, is heard particularly in the Scottish Lowlands, the north of England and Northern Ireland. It occurs in the work of the Scottish novelist James Kelman and the Northern Irish poet Tom Paulin.

*It makes me want to boak.*

*We could hear him boaking in the next room.*

**boat** *n* *American*

a desirable, attractive individual. This item of adolescent slang is a clipping of the colloquial **dreamboat**.

**boat (race)** *n* *British*

the *face*. A piece of London rhyming slang which is still heard in both the shortened and full form. (The Oxford and Cambridge boat race provided an annual excursion for many East Enders.)

2. *British* the male genitals as visible through tight clothing. The term was inspired by the pop musician and impresario Bob Geldof. The female counterpart is **Paula**.

**bob**<sup>2</sup> *vb* *American*

to have sex (with). This fairly inoffensive term, heard among American adolescents, began to be used by younger speakers in Scotland and the north of England in the late 1990s. Like many similar terms (**boff**, **biff**, etc.) it probably derives from the use of the same word (in this case in British dialect) to denote a jab or punch.

*'You hear lads saying they just want to bob her. Not me, mate.'*

(*Guardian*, 15 July 1996)

**bobbins** *n* *British*

**BOBFOC** *n* *British*

a female with an attractive body but an ugly face. A very widespread male pejorative. The expression, popular since 2000, has been defined as '...a woman with a great rack and pegs, but a face like a builder'. The letters stand for 'body off *Baywatch*, face off *Crime-watch*'. It is pronounced as a word rather than letter by letter. A 2005 review of this dictionary wrongly claimed that the term was an invention by lexicographers. In 2006 an alternative spelling, BOBFOK, was proposed by would-be wits: it stands for 'body of Barbie, face of Ken' (the glamorous doll's square-jawed male consort).

**Bob Hope** *n* *British*

cannabis, **dope**. Rhyming slang from the name of the British-born American comedian. The term is usually said in full, as in 'We've run out of Bob Hope, let's call the man'. The 'H' is often dropped, in self-conscious imitation of the appropriate accent (compare the self-conscious glottal stop in, e.g., **bottle**). This is an example of rhyming slang used, and probably coined, by young middle-class soft-drug users in imitation of traditional working-class cockney rhyming slang.

**bobo** *n*

a 'bourgeois bohemian' (person who simultaneously favours materialistic behaviour and 'alternative' tastes). The word began to be used in New York in

**bod** *n*

1. the body. The short form is usually heard in American speech, as in 'check out his great bod'. In British middle-class speech it refers to an individual, as in 'odd-bod'.

2. *British* a tedious, intrusive, pretentious or otherwise irritating person. A vogue term among the fashionable young in the later 1980s. The word may be a shortening of the synonymous 'wimp-bod'.

*'We are going to create a club without bods...No bods. Bods being the sort of chaps who've got onto the scene and just stuck like glue.'*

(*Evening Standard*, 12 June 1989)

**bodacious, boldacious** *adj*

fearsome, enormous, impressive, **feisty**. The word is now often used in black speech and by teenagers and has spread from American usage (where it originated) to the language of British teenagers. It appears to be a blend of bold and audacious, but Chapman's *New Dictionary of American Slang* derives it from 'body-atically', meaning bodily.

**bodge** *n, vb* *Australian, British*

(to do) a slapdash job, especially in constructing something. The term may be a back-formation from 'bodger', a rural craftsman who works out-of-doors in primitive conditions roughly shaping and turning, e.g., chair-legs and spindles, or may be from the related standard verb to 'botch'.

**bodge-up** *n* *British*

1. a makeshift repair, a ramshackle construction. The result of someone bodging a job.

2. a mess or disaster. A variant of **balls-up** or 'botch-up' influenced by the above sense.

**bodgie** *n* *Australian*

a male member of a youth cult, similar to the British **teddy boys** of the 1950s. (The female counterpart was a **widgie**.) In the 1930s bodgie was apparently used in American **jive talk** to denote a male jitterbug (dance) fanatic; some authorities dispute this and derive bodgie from the British and Australian verb to **bodge**.

**bodgy** *adj* *British*

inferior, malfunctioning or out of order. A late-1980s adolescent term based on **bodge-up**.

*'Hey mate, your machine's bodgy!'*

(Recorded, video arcade habitué, 1989)

**B.O.F., b.o.f.** *n* *British*

a 'boring old **fact**'. An expression of derision institutionalised by rock-music journalists in the mid- and late 1970s, usually applied by devotees of **punk** music to musicians of the **hippy** era who were entering middle age.

*'Taking all my B.O.F. records and paperbacks down to [the] jumble sale...'*

(*Sincerely yours*, Biff, Chris Garratt and Mick Kidd, 1986)

**boff**<sup>1</sup> *vb*

1. to hit, punch. A nursery variant of **biff**, occasionally used semi-facetiously by adults.

2. to have sex (with), **fuck**

*"He's a logical choice".*

*"So the fact he's boffing her has nothing to do with it?"*

(*Vice Versa*, US film, 1986)

The term boff came to temporary prominence in Britain in 1974 when newspapers reported it as current among the upper-class set of which Lord Lucan (fugitive and alleged murderer) was a member. This gentle-sounding word, with its suggestions of 'puff', 'buff' and 'buffer', next appeared as a convenient euphemism employed in US TV series, such as *Soap*, of the late 1970s and 1980s, where verisimilitude would demand a more brusque alternative. It is unclear whether the word is American or British in origin or a simultaneous coinage. It may derive from its nursery sense of 'to hit'.

**boff**<sup>2</sup> *n*

1. *British* the backside, buttocks

*'A kick up the boff.'*

(*Only Fools and Horses*, British TV comedy series, 1989)

2a. *American* a successful joke

2b. *American* a hearty laugh

Both senses of the word are part of the jargon of the entertainment industry and are probably imitative of an explosive chortle, or else like 'biff' denote a 'hit'.

**3. British** a **swot**. The word is probably a shortening of the colloquial 'boffin'.

*'Some took so much pride in never being seen with a book, they had virtual slaves carry their books to and from school...the worst thing you could be was a "boff" or an "anorak".'*

(*Independent*, 17 November 1996)

**4. British** a sweet. In this sense the word has been used by schoolchildren since 2000.

*Crash me some boffs.*

**bog(s)** *n* **British**

(*Evening Standard*, 17 March 1988)

(www.effect.net.au, September 2004)

**bogart** *vb*

to monopolise or fail to pass on a **joint** or cigarette during communal smoking. This popular **hippy** term of the late 1960s was prompted by the actor Humphrey Bogart's habit in films of keeping a cigarette in his mouth for long periods. The verb originated in the USA and quickly spread to other English-speaking areas.

*'Don't Bogart that Joint.'*

(Song title, The Holy Modal Rounders, featured on the soundtrack to the film *Easy Rider*, 1969)

**bog off** *vb* **British**

A vulgar term that existed in armed-service use before becoming a vogue successor to **naff off** around 1980. In spite of the brusque nature, the phrase is not taboo and is used by women.

**boiler** *n* *British*

a woman. A contemptuous, derogatory term, implying a lack of both attractiveness and intelligence, commonly used by young working-class males. The phrase 'dodgy boiler' suggests the extra possibility of sexually transmitted diseases. The word in this sense originated pre-World War II when it referred to an older woman with the dimensions and explosive attributes of the contraption. An alternative derivation is from 'boiler' as used to denote a tough or scrawny chicken.

**boink** *vb* *American*

to have sex (with), **fuck**. A 1980s variation of **bonk**, sufficiently inoffensive to be used in TV series such as *Moonlighting*.

**bokoo**<sup>1</sup> *adj* *American*

very. This facetious adoption of the French *beaucoup* ('much' or 'many') probably originated in black bebop or white Cajun usage, but by the 1990s was fashionable among hip hop aficionados and white adolescents. The same French word appeared in British slang after World War I in the form 'boko', now obsolete.)

*The program was, like, bokoo boring.*

the 1980s, probably derived from 'bona fide' or from the Spanish and Italian words for good (*buena* and *buona*). In the 1960s *bona* was part of the **camp** lexicon (popularised in Kenneth Horne's radio comedy shows), originating in theatrical performers' and prostitutes' argot of the 19th century, in which it often meant 'beautiful'.

*a bona geezer*

**bonce** *n* *British*

the head. *Bonce* was a mid-19th-century dialect and schoolboy term for a big marble. The word was soon adapted to mean the head, and in that sense remained popular in young people's usage until the 1960s. It now sounds old-fashioned or affectedly upper class, but may be due for revival, in common with other obsolescent but 'jolly' words.

**bone**<sup>1</sup> *vb*

to have sex. A vulgarism, originating in American speech, in use in many English-speaking areas. Common from the mid-1980s, it was recorded among black Londoners in 1999. This usage may be a back-formation from **boner**.

*'I hate them.*

*Yeah but would you bone them?'*

**bonk** *vb* *British*

to have sex (with). A vogue word of the late 1980s; first heard in the late 1970s and quickly picked up by the media as a useful, vigorous, but printable euphemism for **fuck**. (The word was first broadcast in a British TV comedy series; at a later date, the tennis champion Boris Becker was dubbed 'Bonking Boris' by the gutter press.) It is a childish synonym for 'hit'; the sexual sense may derive from the sound of energetic bouncing. Alternatively, an extended correspondence in *Private Eye* magazine suggested that this had long been a schoolboy term meaning to masturbate or ejaculate. It may also be significant that the immediately precedent vogue word for copulate among teenagers was **knob**, which in **backslang** would give bonk.

*'They do call it bonking after all, which, as everyone knows, is THE word used by promiscuous people who DON'T REALLY LIKE SEX.'*

(Julie Burchill, *Elle* magazine, December 1987)

**bonkers** *adj*

This term is now an acceptable middle-class colloquialism although its origin is more vulgar. It derives from 'bum fodder', a pre-World War II public-school and armed-forces term for toilet paper. This was applied scornfully in wartime to excessive bureaucratic paperwork. In Australia the usage is sometimes extended to mean unnecessary or verbose speech. The phrase 'bum fodder' in full is now obsolete, but was used from the 17th century to refer to waste paper.

Give it a burl is one of many Australian expressions given currency in Britain by the cartoon strip *The Adventures of Barry McKenzie*, written by Barry Humphries, which ran in the satirical magazine *Private Eye* between 1965 and 1974. Some of the more colourful of these expressions were in fact coined, or embellished, by Humphries himself, but this phrase was well established in Australia by the early 1960s.

busk it'), but is now widely used in other forms of endeavour, such as business. The word 'busk' seems to have originated in an 18th-century borrowing from a Latin language: the Spanish *buscar*, meaning to search or the archaic French *busquer*, meaning to cruise, etc.

*If they don't accept our agenda we'll just have to busk it.*

**butch** *adj*

**a.** tough, strong and assertive. The term is now often used humorously or to express mild derision; it probably comes from 'Butch' as a male nickname first heard at the end of the 19th century in the USA, which in turn probably derives from butcher.

**b.** assertively masculine in behaviour and/or appearance. The term, typically applied disapprovingly or derisively, is used about heterosexual women, lesbians and **gay** men. During the 1950s the word had a narrower sense of a 'masculine' (active) rather than a 'feminine' (passive) partner in a homosexual relationship, or of a lesbian who behaved and

dressed like a man; in this sense butch was also used as a noun.

**butcher's** *n* *British*

the backside, buttocks. In the USA, butt is the most common colloquial term for this part of the body. Although slightly vulgar and generally the monopoly of male speakers, butt, unlike **ass**, is permissible in 'polite society' or broadcasts. It is rarely heard in Britain or Australia. Butt is historically related to 'buttocks' and in British, Australian and American English is still used to denote the thick end of something, such as in the butt of a cue or a rifle, or simply the end, such as in a cigarette butt.

to stop interfering, keep out, leave somewhere. Usually in the form of an instruction to remove oneself, butt out is a fairly mild, if brusque expression. The **butt** component is interesting in that it is probably inspired by 'butt in', in which case it derives from 'butt' meaning to strike or push with the head. (It is commonly assumed to derive from **butt**, meaning the backside.)

**buttplug** *n American*

a slightly milder version of **buttfuck**. A term of abuse among schoolchildren.

**buy it** *vb*

to die or meet disaster. A euphemism often ascribed to airforce pilots in war

*I'm sorry, Madge, but Archie's bought it.*

**buy the farm** *vb American*

to die. An expression which is said to have originated with barnstorming or fighter pilots. The farm in question is either a 'worm farm' (i.e. a grave) or an ironic reference to a symbol of retirement (if a pilot survived he would often literally buy a farm).

**buzz<sup>1</sup>** *n*

**1.** a rumour. A usage now so widespread as to be a colloquialism rather than slang.

**cabbage** *n* *British*

1. money. This is a lighthearted 1950s expression rarely heard today. The term was used for instance by 'Flash Harry' (played by George Cole) in the film *The Pure Hell of St Trinians* in 1960. **Lettuce** was a more popular alternative, with the same derivation from the 'green and leafy' nature of banknotes.

2. a brain-damaged, inert or incapable person

**cabbaged** *adj* *British*

**cable** *n* *American*

a golden chain worn as decoration, especially by males. The use of the word and the practice arose in the hip hop black street subculture of the early 1980s in which heavy gold chains (also known as **ropes**) and (often improvised) medallions were an essential part of the paraphernalia.

**ca-ca** *n* *British*

excrement, **shit**. A word generally used by parents and children in the home. For the derivation see **cack**.

**cack**<sup>1</sup> *vb, n*

(to) **shit**, (to perform) an act of defecation. A word which, in Britain, is fairly rare (it is heard more often in the north of England than in London and the southeast), but remains common in Australia. Cack is a variation of **ca-ca**; both are usually nursery words and come from a common and very ancient Indo-European base. There are equivalents in Latin (*caecare*) and many modern European languages – *caca* in French, *kaka* in German, *kakani* in Czech. *Cakken* was the Middle English verb.

**cack**<sup>2</sup> *adj*

awful, inferior, despicable

**cack-handed** *adj* *British*

clumsy, inept. The term originally meant left-handed, probably deriving from the idea of handling **cack** (excrement). Although the connection seems obvious, this expression is probably too old to be influenced by reports of the Muslim practice of eating with the right hand, wiping away excrement with the left. This pejorative adjective seems to be country dialect in origin; it is now fairly widespread and not particularly offensive.

*a cack-handed attempt at patching up the dispute*

**cacks** *n* *pl* *Irish*

trousers. An Irish version of **kecks**.

**cad** *n* *British*

an unprincipled, contemptible fellow. A word applied in the 19th century by privileged school pupils and students to their 'common' counterparts. **camp<sup>1</sup>** *adj*

homosexual, effeminate or affectedly theatrical in manner, gesture, speech, etc. A word which emerged from theatrical slang into general use in the 1960s. The sense of the term has moved from the specific (a (male) homosexual) to the general (affected, exaggerated, parodic). The word was adopted by the theatrical world some time after World War I from London slang, but the ultimate derivation of the adjective is obscure. It may come from the French *camper*, meaning to portray or pose, or from the dialect term *kemp*, meaning uncouth. In the late 1970s the **gay** phrase 'as camp as a row of tents', referring to a person who is outrageously or blatantly camp, crossed over into general usage. The word 'camp' was adopted in Australia and the USA before World War II.

**cane** *vb British*

1. to beat up, assault. A working-class brawlers' and prisoners' term. It is probably a back-formation from the more wide-

spread colloquialism a 'caning', meaning a trouncing or defeat.

2. to devour or consume. A vogue term from the language of adolescents since the later 1990s, it is an extension of the colloquial sense of 'cane' as meaning to punish or subject to heavy use. Among students it typically applies to excessive or spectacular use of cocaine, cigarettes, etc.

**Canuck** *n*

a Canadian. The only widespread slang term for Canadians, whether French or English-speaking, it is rarely used by the British. The word has usually been used in a derogatory sense. **casual**<sup>1</sup> *n* *British*

a member of a working-class subgroup of the early 1980s who were to some extent successors to **skinheads** and 'suede-heads'. The characteristic of a casual was that he or she wore fairly expensive designer sports clothes in imitation of Italian or US **preppie** looks. The musical accompaniment to this style was generally home-produced soul or disco music. Casuals were a more materialistic and conformist manifestation from the skinhead and **mod** milieus. Optional elements

of the lifestyle included football hooliganism and shoplifting for clothes or profit. Casuals were personified by the 1988 comic character Eddie Loadsamoney, created by Harry Enfield.

In American usage it was originally applied to the effect of a heroin injection.

**charlie**<sup>1</sup> *n*

There have been many attempts to explain this term by deriving it from rhyming slang (Charlie Wheeler: **Sheila**), from Romany or from the habits of Charles II. It is more probably simply a personification which implies affectionate familiarity.

**charver, charva** *vb, n* *British*

(to have) sexual intercourse. A word that was almost unknown by the 1980s, but which was used in criminal, theatrical and other circles in the 1950s and early 1960s. The word originates as Romany for 'friend'. The *chav's* appearance typically incorporates (for both sexes) white trainers, a tracksuit, heavy jewellery (known as **Argos bling** after the catalogue chain store), baseball caps and often the scraped-back hairstyle dubbed a 'Croydon facelift' (Croydon being a London suburb considered emblematic of brash unsophistication).

*'The cultural phenomenon that is "chav" was kicked off by [www.chavscum.co.uk](http://www.chavscum.co.uk), a site billing itself as a humorous guide to Britain's burgeoning peasant underclass.'*

**chunder** *vb* Australian

to vomit. This term, in use among Australian **surfies** and others in the 1960s, was imported into Britain later in the decade by the strip cartoon *The Adventures of Barry McKenzie*. The writer, Barry Humphries, derives it from the warning cry 'Watch under!', perhaps used by sailors. An alternative derivation is from 'Chunder Loo' as rhyming slang for *spew*, from the name of a character used in advertisements for boot polish fifty years earlier. Already established in Britain, especially among young sportsmen and drinkers, there are signs that this and other Australianisms are making headway in the USA following the success of the Australian comedy film *Crocodile Dundee* in 1987.

*'I have valued my fleeting acquaintance with Larry Adler over the years because it has always given me an easy way of explaining the meaning of the Jewish word chutzpah to those who have not met this valuable term. As far as I can define it briefly, it's an elegant opportunism, so fast as to deceive the eye, and so successful as to be totally disarming. Or what cockneys call bloody cheek.'*

(Miles Kington, *Independent*, 27 January 1989)

**cider-punk** *n* *British*

**clap, the clap** *n*

venereal disease, gonorrhoea. The only widespread slang term for the condition, this word was derived from French (*clapoir*, meaning a swelling, or *clapier*, meaning a brothel) in the late 16th century. It became a taboo, and therefore slang term only in the 19th century. The specific reference to gonorrhoea had widened to include other venereal diseases by the 1950s.

*'For while he nibbles at her Am'rous Trap  
She gets the Mony but he gets the Clap.'*  
(*Poor Pensive Punck*, poem by John Dryden, 1691)

**clapped<sup>1</sup>, clapped out** *adj*

worn out, exhausted. The second of these essentially British terms has been adopted in the USA since the 1950s. They are normally applied to machines, particularly cars, although they derive originally from the idea of a person debilitated by the **clap** (venereal disease). As

the origin has been forgotten, the terms are now colloquial rather than vulgar.

**clart, clarts** *n* *British*

This dialect term from the north of England and Scotland – probably a variant of 'clot' or 'clod' (of mud, slime, excrement) – is heard occasionally in other parts of Britain, usually in expressions such as 'too much faff and clart' or '(dropped) in the clarts'. 'Clarty', the dialect adjective meaning dirty, sticky and messy, is also still heard.

**class** *adj* *British*  
excellent. Deriving from the colloquial 'classy' and top-class, class act, etc., this use of the word has been a vogue term among younger speakers since the mid-1990s – a successor to **wicked** and **safe** and a contemporary synonym of **sound** or **the bollocks**.

and, by extension, also by brawlers, hooligans, etc., off the field.

**clemmed, clemped** *adj* *British*  
starving, hungry. An old term which is a survival of northern dialect (from the Middle English *clemmen*, meaning 'to pinch'). **1a.** jail, prison. The most common (in Britain) and least racy synonym; it was the name of a prison on Clink Street in Southwark, London, from at least 1509 until the 18th century. The term may also be inspired by the sounds of metal keys, doors and manacles.

*You'll end up in the clink.*

**clinker** *n* *American*  
a failure. A word used particularly with reference to a film or play. In this sense it has been adopted by some British writers; in the USA it may occasionally denote other types of failure or incompetence. The slang use is based on the word's standard meaning of coal residue or cinder.

**clock** *vb British*

**1.** to notice or see, to look at. A working-class usage widespread, especially in southeast England, since World War II. The middle-class fashion since the late 1980s for imitating working-class speech brought the word into some prominence and greater respectability. It probably derives from the obsolete use of 'clock' to mean a person's face.

*'Villains call it clocking in Leeds, eye-balling in Manchester and screwing in*

*London's East End...It came as a shock: juries can be intimidated by a stare.'*

*(Sunday Times, 5 June 1988)*

**2.** to hit. A usage that was, and is, popular in Australia and which has been adopted in Britain (where it may have originated) and the USA. *(Sunday Times, 10 September 1989)*

Indistinguishable conformists to this standard code were referred to by others and themselves as clones. In this sense the word is not necessarily pejorative.

**b.** any fashion-follower or imitator who is indistinguishable from others, or is blindly conformist to a dress code. A derogatory term since the late 1970s, often added to a prefix to form such epithets as '*Madonna-clone*', '*Michael Jackson-clone*', etc.

Originally part of underground **gay** terminology, this phrase became well known in the early 1970s when many previously secretive homosexuals decided to **come out**. The connection between closet and secrecy is obvious; compare the phrase with the well-known 'skeleton in the cupboard'.

*When it comes down to it, she's not too clue-ie, is she?*

**clueless** *adj* *American*

unfashionable, unpopular, unattractive. The standard colloquialism was adopted as a vogue term among Californian high-school students from the early 1990s, often in order to categorise a person excluded from the in-group. **Clydesdale** *n* *American*

an attractive male. A humorous term of the late 1980s based on the supposed suggestion of heroic **WASP** maledom inherent in the Christian names 'Clyde' and 'Dale'. The word, which probably originated on the streets ('Clyde' was used by **hipsters** in the 1950s to categorise an archetypal **square**), was used by **Valley Girls** and **preppies** among others

from the early 1980s. (The literal meaning of Clydesdale is a form of large, handsome, pedigree horse; strong, hardworking and enormously expensive.)

under the influence of illicit drugs, moving around in a drug-induced daze or stupor. By extension, being in a euphoric state after listening to jazz, rock music, etc.

**coating** *n* *British*

abuse, insults. This use of the word has been recorded since the 1990s among middle-aged speakers and either refers to the grabbing by the lapels, or is based on the notion of **pasting** and the colloquial slang sense of 'paint' (to beat up). The archaic verb to 'coat' was also recorded in Britain and Australia in the sense of to reprimand.

**cob** *vb, n* *American*

(to give someone) a pinch or poke in the buttocks. In this sense the word, originally a dialect term for a lump or a protrusion, can be dated back to the English slang of the later 18th century. See also **get/have a cob on**

**cobber** *n* *Australian*

a friend, 'mate'. An unsophisticated term of address among men, which is now virtually obsolete. There are two possible derivations proposed for this well-known Australianism: the archaic English dialect verb to 'cob', meaning to take a liking to (someone) or the Yiddish word *chaber* (from Hebrew, meaning comrade).

**cobblers** *n* *British*

nonsense, rubbish, **balls**. A popular example of rhyming slang (from 'cobblers's awls') which is often used in ignorance of its vulgar derivation. Formerly used literally by cockneys to mean the testicles, the word is old, but was given widespread currency in the 1960s by such TV comedies as *Steptoe and Son*.

*'He is dismissive about awards: "A load of cobblers".'*

(*Observer*, Section 5, 9 April 1989)

**cob-on** *n* *British*

a fit of ill-temper. A term heard predominantly in the north of England.

**cock** *n* *British*

Typically, the word is used in an affectionate, bantering way in expressions such as the dated cockney 'wotcher cock!' or '(my) old cock'. Cock has been used in this general sense for at least three hundred years.

**2.** nonsense, rubbish. This sense of the word has been in use since the 1940s and may be a shortening of 'poppycock' (from the Dutch *pappekak*, meaning 'soft shit' or absolute rubbish), 'cock and bull' or a euphemistic variant of **cack**.

**3.** the penis. In this sense the word is used all over the English-speaking world. In Britain the usage dates from the 17th century. Its origin is in the image of the male member either as a strutting fighter or as resembling a chicken's neck or water-valve. (In the USA the word rooster is usually prudishly substituted when referring to the male bird.)

**cockblock** *n*

**1.** an obstacle to seduction by a male, typically an obstructive or intrusive female friend of the intended seductee. The term was posted on the Internet in 2003.

**cock diesel** *n* *American*

a powerful, attractive male. The term, usually employed appreciatively, but sometimes ironically, was heard in black street slang and on white campuses in the 1990s. The 'diesel' element (as in **diesel-dyke**) suggests the unrefined power of a diesel-engined vehicle.

**cocksucker** *n*

a despicable, contemptible person. This expression is almost always used in this sense rather than its literal meaning of someone who performs fellatio; it is generally an Americanism, applied to males as a term of abuse. The implication is of a person who is willing to stoop (metaphorically) to disgusting or debasing acts.

**cock-tease, cock-teaser** *n*

a slightly more polite version of **prick-tease(r)**

**cock (something) up** *vb* *British*

**cock-up** *n* *British*

a mistake, blunder or shambles. Many different sources have been posited for this expression; 'cock' may refer to some obscure piece of professional jargon (it occurs in the vocabularies of printers, hunters, brewers and others), to the penis, or it may be an alteration of **cack**. Alternatively, 'cock' may simply have been chosen as a more acceptable complement in a phrase synonymous with **balls-up** and **fuck-up**.

*'Mercifully these cock-ups don't happen too often.'*

(Jeremy Paxman, Breakfast TV, November 1988)

**coco**<sup>1</sup> *n* *British*

a black or coloured person. A pejorative or patronising term used especially by middle- and upper-class speakers since the 1960s.

*'And there were two cocos changing a wheel in the outside lane.'*

(Recorded, public schoolboy, London, 1971)

**coco**<sup>2</sup>, **cocoa** *vb* *British*

almost always used in the phrase 'I should coco(a)!', expressing disbelief or indignation. This is London rhyming slang for *say so* (as in 'I should say so!').

**cocoa-shunter** *n* *British*

a male homosexual. One of many vulgarisms (**fudge-nudger**, etc.) playing on the notion of sodomy and faeces, this expression was used in the TV comedy spoof *Brass Eye* in March 1997.

**coconut** *n*

1. *British* a non-white person who collaborates with the white establishment, an 'Uncle Tom'. This expression, used by young Asians and blacks since the 1980s, refers to the idea that such people are, like the coconut, black on the outside but white on the inside. **Bounty bar** is an alternative.

2. one's head. An obvious, but probably obsolescent usage.

an instance of faecal incontinence or diarrhoea in medical slang, given wider currency by its use in the US TV series *ER*. Sometimes extended to refer to a moment of panic.

**cods** *n* *pl* *British*

the testicles. The singular form 'cod' is an archaic word for the scrotum; it is an Anglo-Saxon word meaning 'bag' (seen in the obsolete terms *pease-cod* and *codpiece*). Since the era of Middle English the plural has had this meaning in British and, later, Australian usage, although not in the USA.

*He got kicked in the cods for his efforts.*

**codswallop, cods** *n* *British*

nonsense, worthless rubbish. A dismissive term, typically applied to something purporting to be true. There is more than one theory as to the origin of the word; the most fanciful is that it referred to the 'wallop' (gassy drink) produced by Mr. 'Codd' (inventor of a patent ginger-beer bottle). Alternatively, it may refer to the testicles (**cods**) as in **balls**.

*'Equal opportunities? That's a load of old codswallop!'*

(Recorded, office worker, London, 1986)

**coffee-spitter** *n*

**coffin-dodger** *n* *British*

an elderly person. A sometimes humorous pejorative.

**coinage** *n*

money. A vogue term among younger speakers since 2000.

**cojones** *n* *pl*

**a.** courage, 'guts'. A word (pronounced 'co-honays') introduced to many English speakers by Ernest Hemingway, it is the Spanish slang word for **balls** in both the literal and metaphorical senses.

*She kicked him in the cojones.*

a sudden withdrawal from hard drugs, typically heroin, with the attendant hot and cold flushes, goose-pimples, discomfort, etc. The expression is originally American, from the 1940s or earlier, and in the late 1980s was increasingly used, often ironically, to

describe a sudden withdrawal from any habitual activity. The phrase refers either to 'goose flesh' or to the general pallor and consistency of cold turkey meat.

*to go cold turkey/go through cold turkey*

*They gave him cold turkey treatment.*

**collar** *n, vb*

(to) arrest (someone). The noun form is a later coinage from the verb, meaning to 'catch', and the idiomatic expression 'to feel someone's collar', meaning to arrest them. Collar is another police jargon term which has passed into general use.

*'Forget it Friday, this is our collar.'*

(*Dragnet*, US film, 1987)

semen. A later derivation from the verb to **come**.

**come on** *vb*

to start to menstruate. A euphemism used by women and men.

**come out** *vb*

to reveal oneself as a homosexual, declare one's homosexuality. The expression is a shortening of 'come out of the closet', dating from the period in the early 1970s when liberalisation encouraged more openness among **gay** men and women in their relations with each other and the **straight** world. Subsequently the term has sometimes been extended to mean 'to declare one's real position' in non-sexual contexts.

**come the raw prawn** *vb* *Australian*

to try to take advantage of or deceive someone. This colourful expression probably originated in the 1940s and is still heard. The precise connection between the uncooked crustacean and deceitfulness is not clear, but the suggestion is of cadging by feigning innocence or naïveté.

**come untied** *vb* *See untied***commodore** *n* *British*

the sum of £15. The item of financial slang is inspired by the Commodores' hit single 'Three Times a Lady' (a **Lady** (**Godiva**) being £5 in rhyming slang).

*Compare arvo***con**<sup>1</sup> *vb, n*

(*News of the World*, 1988)

**cones** *n* *pl*

female breasts

**conk** *n*

**1a.** the nose. The generally quoted origin for this comical word is the conch shell (often collected as a curio since the 17th century), or a learned play on the Latin *concha*, meaning shell in general, or a trumpet.

*'This face, embossed as it is with a vast fleshy conk.'*

(*Observer* magazine, 15 May 1988)

**1b.** the head. A less common use of the word.

**2.** *American* a 'process' hairstyle (one where the hair is straightened by the application of chemicals and/or heat) as worn by **hip** young blacks from the 1930s until the 1960s when it was superseded by the racially affirmative **afro** styles

**connection, connexion** *n*

a drug supplier, a **dealer** or **pusher**. Originally from the language of American drug users of the late 1950s and 1960s, the term has become part of the international jargon of illicit drug users. It particularly refers to a source of heroin. ('Connection' was used ambiguously as the title and in the lyrics of a 1967 song by the Rolling Stones.)

**connoption** *n*

a fit of irritation, agitation. The geographical origin and derivation of the word is obscure (it is fairly common in Australian and North American speech) but it is most often heard among middle-aged speakers.

*to have/get into a connoption*

**content** *adj*

attractive, pretty. The term has typically been used by younger males for describing females since 2000. It is probably a transferral of the idea of pleased from subject to (pleasing) object.

**contrasexual** *n*

a person, usually female, who prefers domestic comforts to sexual display or activity. The semi-technical term from psychology and anthropology (originally denoting someone who displays traits of the opposite sex) was borrowed in 2004 for this jocular social categorisation on the lines of **metrosexual** and **retrosexual**.

**coo**<sup>1</sup> *n*

gossip, news. The term, usually in the form 'What's the coo?', has been used in London since 2000. Its origins are obscure, but it may be the same word as **ku**, or derive from the adjectival sense. It has also been suggested that it is inspired by the cooing of congregating birds.

a deliberately lazy pronunciation of **cool** in the sense of relaxed, congenial, etc.

**coochie** *n* *American*

**cookie-pusher** *n* *American*

an unmanly man, an effete or sycophantic male (the word never seems to be used of women). The image is of someone who spends his time passing cookies at tea parties, either because he enjoys such 'effeminate' activities, or in order to curry favour or further his career.

*some little State Department cookie-pusher trying to persuade them all to play ball*

**cooking** *adj* *American*

going well, moving fast, succeeding. Originally from pre-World War II street language, this usage spread, especially via jazz musicians, to young whites. It is still often used to refer to musicians who are performing well and generating excitement. A stronger form is 'cooking with gas'.

**cool**<sup>1</sup> *adj*

**a.** unflappable, imperturbable

**b.** excellent, admirable, acceptable

One of the key items in the vocabulary of jazz musicians, **hipsters**, **beatniks** and **hippies**, cool, with its original suggestion of calm disinterested serenity, is a word which has not dated. It is as much in

vogue with teenagers in the early 21st century as it was among the 1930s jazz musicians who probably coined it (to denote gentler, progressive jazz, as opposed to 'hot' jazz).

**cool**<sup>2</sup> *n*

sang-froid, imperturbability. A back-formation from the adjective.

**cool**<sup>3</sup> *vb*

to calm down. A more fashionable abbreviated form of the colloquial 'cool down', heard since 2000.

**coon** *n*

a black person. Originally (and still) a term of racist abuse common in the southern states of the USA, from 'raccoon' (a black-faced rural pest). The word has been adopted in Britain and Australia to refer to a person of any supposedly inferior race. In Britain it is a widespread racist epithet in use by the police and other working-class whites; **egg and spoon** is the rhyming-slang version.

**b.** the female sex organs. The origin of the word is obscure.

**cop**<sup>1</sup> *n*

a police officer. A shortening of **copper**. In Britain, until the 1960s **cop** was felt to be an Americanism and only in the late 1980s did it find its way into print, albeit in the gutter press.

*Some chinese rock?'*

(*'Chinese Rock'* by Dee Dee Ramone and Richard Hell, recorded by the Heartbreakers, 1977)

**copacetic, kopasetic** *adj* *American*

excellent, satisfactory, hunky dory. Used usually of a situation or state of affairs, copacetic is as likely to be said by a college professor as a New York **cop**. The college professor might think he is using a newish slang term; the cop may suspect that a word ending in -ic derives from Greek or Latin. Both would be wrong. This bizarre word has rarely been written down, but was recorded as early as 1919. Attempts have been made to derive it from Latin, Yiddish or even Amerindian roots, but its true origin is unknown. It has not crossed the Atlantic in its comparatively long history.

*'What's your sign, love?'*

*'Stop.'*

*'Well that's copacetic.'*

(*Beach Party*, US film, 1981)

*'You stick with me and everything will be copacetic.'*

(*The Secret of My Success*, US film, 1987)

**cop a feel** *vb* *American*

to grope (someone) sexually; succeed in heavy petting. A (mainly male) teenagers' term from the 1950s, when this might be the goal, rather than a way-stage in the process of seduction.

(High-school student, *IT* magazine, June 1972)

*The guy copped a goddam plea and only went down for three.*

**cop off** *vb* *British*

to find a sexual partner, to **pull** someone. A term from the north of England that had become widespread elsewhere by the 1990s.

(*Just Seventeen* magazine, August 1996)

**cop-out** *vb, n*

(to be guilty of) an evasion, avoidance of responsibility. This expression (almost always heard in the noun form) was American slang until the late 1970s, at which time it suddenly gained widespread currency, even among 'respectable' speakers in Britain. The phrase arose in the 1960s meaning specifically to 'duck out' of one's obligations to one's peers.

**corgis** *n pl* *British*

the penis. Rhyming slang for **knob**.

**corn-dog** *n* *American*

**cornflake** *n* *American*

an eccentric, crazy or silly person. An elaboration of the widespread term **flake** (which has the same meaning). The pun is on the name of the breakfast cereal; 'corn' is otherwise meaningless.

**corn-hole** *n* *American*

a. the anus

b. a pinch or poke in the anal region. In this sense the phrase has been recorded since the early years of the 20th century.

**Cornish pasties** *n* *pl* *British*

a style of men's shoe considered deeply unfashionable or indicative of a certain social subgroup in the 1970s and 1980s (specified by Judy Rumbold, fashion editor of the *Guardian*, as 'maths teachers countryside'). The pastie was so-called because of the supposed resemblance of the moulded-soled, heavily stitched shoe to the meat and vegetable savoury.

**corpse** *vb* *British*

1. (in acting) to be rendered unable to speak or act by the onset of uncontrollable hysterical laughter, in rehearsal or before an audience. The word has been used in the theatre since the 19th century.

These meanings are also true of performers in operas and musicals.

**cory, corey** *n* *British*

**costered up** *adj* *British*

solvent, wealthy. A phrase from the East End of London, probably based on the

old word 'costermonger' for a fruit-seller.

an act of sex. A **Sloane Ranger** euphemism, used by girls and perhaps revealing of sexual attitudes in that milieu.

**cot-case** *n*

an invalid or someone who has been mentally and/or physically incapacitated. (Patrick Skene Catling, *Daily Telegraph*, Christmas Book Review, 1989)

**cough** *vb* British

to confess to a crime, to reluctantly give up information. A police and underworld term influenced by the notion of coughing up something stuck in the throat.

**1a.** an unpleasant or obnoxious woman

**1b.** a placid, drab or humiliated woman

The word is often used with real malice or, alternatively, can be said with fellow feeling by a sympathetic woman, especially in the phrase 'poor cow'. Cow is not a universal term of abuse (in French for instance it can be a term of affection). It is said that the synonym **mo** was used in the 1960s because cow was still considered beyond the pale for family TV.

**2.** an unpleasant or extremely irritating task, experience or sensation, etc. In this sense the word is often used in the phrase 'a cow of a job', etc.

*Compare* **mare****cowboy**<sup>1</sup> *n*

**a.** a reckless or irresponsible person, especially someone young, inexperienced and/or wild. The term is typically used by older workers referring to younger ones, or by police about a delinquent loner. The term originated in the 1950s, drawing comparisons with western film heroes or with pre-war gangsters' use of 'cowboy job' or the verb 'to **cowboy**' to refer to a particularly messy or violent crime.

**b.** *British* a bad workman. The above sense of cowboy has been extended and popularised in colloquial language to refer to anyone who does a shoddy job in order to make a quick profit.

A term from the late 1970s and 1980s.

**coz** *n* See **cuz****cozzer** *n*

a police officer. An item of London working-class slang. The word might have originated in the archaic market porters' term 'cozza(r)', from the Hebrew *chazar* meaning pork or pig. London's first black policeman, Norwell Roberts, was known as 'Nozzer the cozzer'.

**crack** *n*

**1.** a purified, addictive form of cocaine. When pellets of crack are smoked they fizz and crackle, which is probably the origin of the name, reinforced by the precedent of **smack**. The drug became

popular in the USA in 1985, but was first described in *The Gourmet Cookbook, a Complete Guide to Cocaine*, published in California in 1972.

*'Crack – cocaine mixed with baking soda and cooked in microwave ovens – has been described as the "fast food of drugs".'*

(*Independent*, 24 July 1989)

*'It's a right crack.'*

**4.** the **crack** *Irish and British* what's going on, the latest news or the current ambience. This word is used all over Ireland and in the late 1980s spread to Britain. The all-purpose term, usually in phrases such as 'what's the crack?' or 'that's the crack!', seems to combine two very old, popular unorthodox senses of the word: to talk, gossip or boast, as in **crack on**, and the adjective crack meaning first-rate, excellent.

*'This is the only place to live. I tried Australia but I came back because I missed the crack.'*

(Belfast resident, *The Crack: a Belfast Year*, Sally Belfrage, 1987)

*'Big Alex is a minder and a fixer. In his words, he knows all the crack.'*

Compare **hacker**

**cracker**<sup>2</sup> *adj* *British*

**crackerbox** *n* *American*

**a.** a psychiatric hospital

**b.** a crazy person

*'I'm stuck in some private crackerbox.'*

(*Man Trouble*, US film, 1993)

The terms are a pun on the colloquial adjectival sense of 'crackers'.

**crack house** *n*

a place where the drug **crack** is prepared, sold or consumed

*'In the depressed inner-city areas of Los Angeles or New York, crack is frequently consumed in "crack houses" or "rock houses" – derelict buildings, often occupied by squatters, where addicts can buy and consume the drug.'*

(*Sunday Times*, 10 September 1989)

an attractive female, or women in general seen as sex objects. This male expression was particularly popular in the 1950s and early 1960s, usually in the phrase 'a bit of crackling'. It derives from the idea of pork crackling being a 'tasty morsel', perhaps reinforced by the vulgar sense of **crack**.

**crack on** *vb* *British*

**1.** to talk incessantly, browbeat or boast. The phrase, which is now generally used by middle-class speakers, is a successor to a colloquial use of **crack** to mean gossip, brag or tell tales which is at least 300

years old and survives in Scottish and American speech.

*'He was cracking on about his job and his responsibilities.'*

(Recorded, city financier, London, 1987)

*They're going to crank up.*

**crap**<sup>1</sup> *n*

**1a.** excrement, **shit**

**1b.** dirt, rubbish

**1c.** worthless nonsense, **bullshit**

In modern usage **crap** is generally seen as a more moderate synonym for **shit**; in fact the word comes from Middle English *crappe*, which meant scrapings, scale, residue or chaff; this in turn came from words existing in Old French, German and Dutch, distantly related to 'crop' and 'crabbed'. (The fact that the flush toilet was invented by a Thomas Crapper appears to be pure coincidence.)

**2.** oppressive, petty or unpleasant behaviour; by extension from **crap 1a** and **1b**. This idea is usually expressed in such phrases as 'he doesn't take any crap from anyone' or 'she's not going to put up with this crap any more'.

**crap**<sup>2</sup> *vb*

to defecate, **shit**. The verb form, which began to be used in the late 18th century, is derived from the earlier noun **crap**, which originally meant rubbish, rather than excrement.

**crap on** *vb* *British*

*'The only moments of light relief we get are when you come in and we crap on about anything we like.'*

(Recorded, London University student, July 1988)

**crapper, the crapper** *n*

**crappy, crappo** *adj*

worthless, contemptible, of very low quality. From **crap**. Crappo is a more recent variant.

**crash**<sup>1</sup> *vb*

**1.** to go to sleep, lie down and lose consciousness. This word was very popular in the **hippy** era, perhaps because the suggestion of sudden collapse coincided with drug-induced sleep or simply curling up on a floor exhausted. Crash sounded rather dated by the late 1990s; it originated in armed-services slang in World War II, probably among airmen, and was

adopted by bohemian travellers and **beatniks** during the 1950s.

**2.** to gatecrash. A word made especially popular by the teenage custom (from the 1960s onward) of arriving uninvited at parties.

**3.** *British* to cadge, borrow or lend. In use among working-class speakers and members of the armed services in the 1950s, this term became popular among adolescents in the 1990s. It is heard particularly in the Scottish Lowlands and the north of England.

*Can you crash me a tenner?*

*I just wanted to crash a couple of biffs.*

**crash<sup>2</sup>** *adj*

excellent, attractive, exciting. In this sense, fashionable since 2000, the word may be a shortening of **crash-hot** or an unrelated coinage.

**cream<sup>2</sup>, cream one's jeans** *vb*

to have an orgasm or to become sexually excited (while dressed). The vulgarism can be used of either sex (and now, by extension, can even sometimes mean to become over-excited or over-enthusiastic without the sexual connotation). Cream has been a euphemism for

semen or sexual lubricant for at least a century. Cream one's jeans dates from the late 1960s.

**cream-crackered** *adj British*

**knackered**; exhausted, worn out. A humorous rhyming-slang version of the more common word. It was probably coined in the 1970s, inspired by the savoury dry biscuits called 'cream crackers'.

**crease** *n British*

**creasing, creasing up** *adj British*

*'You tell me it's OK for whites to imitate black culture? I'm creasin'.'*

**creep (someone) out** *vb*

*'I don't care: he creeps me out, plus he smells gross...'*

(*The X-Files*, US TV series, 1996)

**creepshow** *adj*

frightening, grotesque or merely unpleasant. An American teenagers' word, from the title of a horror film released in 1982. The adjective is an elaboration of 'creepy' and the earlier term 'creepsville', and has been heard among British teenagers since the late 1980s.

*a creepshow party*

*her creepshow boyfriend*

**cremated** *adj* *British*

ruined, destroyed, defeated, trounced. A coinage of the 1980s combining the notions of 'killed' and **burned**. The term was briefly in vogue among **yuppies**.

(*Serious Money*, Caryl Churchill, 1987)

**creps** *n pl* *British*

**crinkle** *n* *British*

In both senses the words have been in vogue since around 2000.

**crispy** *adj* *American*

**1a.** suffering from a hangover. A teenage and adolescent vogue word of 1988. Its provenance is uncertain; it may evoke the notion of 'brittle' or 'fragile'.

**1b.** unpleasant, inferior. The generalised term, in use among American adolescents in the 1990s, seems to postdate the more specific sense above.

**criss-kross** *n*

a foolish and/or obnoxious person. A term used by young street-gang members in London since around 2000.

**critter** *n* *Canadian*

*He croaked before he could tell us anything useful.*

**2.** to kill. An American gangster and prison term.

*The guy threatened to croak his business partner.*

**croaker** *n* *British*

a doctor who prescribes for addicts. A drug addicts' and prisoners' term in use since the 1960s, although the notion of the death-dealing doctor thus expressed goes back to the 19th century.

**croc(k)** *n* *British*

a stupid and/or irritating person. The word occurred in the speech of London schoolchildren in the early 1990s. Its exact etymology is uncertain, although in early 19th-century dialect the word denoted a worthless or worn-out animal and it was later used in public-school slang to refer to a weak or unsporting fellow pupil.

**crock, crock of shit** *n* *American*

nonsense, something worthless and unpleasant. 'It's a crock!' is an expression (inoffensive enough to be used on TV) which was employed in the 1970s and 1980s to dismiss, deride or reject something such as false information. In North America the word *crock*, for container, is not archaic as it is in Britain and Australia.

**crooked** *adj*

**1.** *American* drunk. A word used, e.g., by college students, in the 1980s. It probably comes from the old use of 'crocks' as containers for pickling or preserving in alcohol or, particularly in Canada, as con-

tainers for whiskey. Alternatively, the derivation may be the same as that of the following sense.

**2.** *American* angry. This use of the word is connected with an archaic or dialect use of 'crook' and 'crook' to mean an old, infirm, cantankerous and complaining person.

**3.** *British* broken or injured, used particularly of sportsmen incapacitated through injury. From the standard English sense of *crock* as a potsherd, or from a dialect term for a decrepit animal.

**croggie** *n* *British*

a ride on the crossbar or handlebars of another rider's bicycle. An item of schoolchildren's slang recorded in 2003.

**cronk** *n, adj* *American*

(something) excellent, powerful. In use since 2000, the word may be an alteration of **chronic**, as applied, e.g., to high-grade marihuana. It might alternatively be related to **crunk**, but that seems to be a more recent coinage.

**crook** *adj* *Australian*

unwell, unhealthy, wrong, dubious. A common term in Australia, *crook* is either an alteration of the archaic slang term 'cronk' (from the German and Yiddish *krank*) meaning ill, or of *crooked*, meaning bent out of shape. By 1988, due to the influence of Australian soap operas, the word could be used in a British newspaper or magazine, although it has not as yet penetrated British speech.

**crovey** *adj* *British*

excellent. A term of unknown origin in use among teenagers since the late 1990s. It could conceivably be a deformation of **groovy**.

**crud** *n*

**b.** a worthless, despicable person (usually male). A word used widely in the 1960s, in place of taboo synonyms such as **turd**.

**cruddy** *adj*

unpleasant, inferior, worthless. A word in vogue in the mid-1960s. It is now heard mainly among schoolchildren.

**cruel** *vb* *Australian*

to spoil, frustrate, defeat. This use of the word often occurs in the phrase 'to cruel it' meaning to ruin or jeopardise an enterprise.

**cruise** *vb*

**a.** (used intransitively) to move around in search of a sexual partner. The word was first used by prostitutes seeking clients then, in the 1960s, by **gays**, and subsequently in the 1970s by heterosexuals, especially those frequenting singles bars.

**b.** (used transitively) to actively try to attract a particular potential sexual partner. The overtones of cruising a person are a discreet display of oneself with some unmistakable hints or 'come-ons'.

**crumb (it)** *vb* *American*

to ruin, mess up. From 'crumble' in its standard sense, reinforced by the notion of acting like a 'crumb' (the obsolescent noun form denoting a worthless person) and by **crummy**.

*'You crumbed the play.'*

(*House of Games*, US film, David Mamet, 1987)

**crumble** *n* *British*

*'Senior citizens, inevitably, watch 37 hours a week. "Audiences are getting crumbly", says Street-Porter in media-speak.'*

(*Independent*, 23 March 1988)

**b.** a parent or adult. Used by children and teenagers since the mid-1970s. A fairly inoffensive middle- and upper-class word favoured by **Sloane Rangers** among others.

See also **wrinkly**; **crinkly**; **dusty**

**crumb-snatcher** *n*

a baby or small child. Like **ankle-biter**, **rug rat**, etc., the phrase can be used affectionately and/or ruefully.

**crummy, crumby** *adj*

dilapidated, dirty, worthless. By the mid-19th century this word was in use in Britain as a literal and figurative synonym for 'lousy', apparently due to the resemblance of body lice to crumbs. The word (usually spelled with double 'm') has remained in widespread use in Britain and the USA.

**crump** *British*

**1.** *n, adj* (something) unpleasant, of poor quality, disappointing. A vogue term among teenagers in 2005, it may be a variant of **crummy** or ironically of **cronk**.

**2.** *n* sex, a sex act. In use among UK teenagers since 2000, the word might derive from the slang sense of **crumpet**, imitate the sound of pounding, or be an arbitrary formation.

**crumpet** *n* *British*

a woman, or women viewed collectively as sex objects. 'Crumpet' or 'a bit of crumpet' date from the last decade of the 19th century and conform to a much older pattern of likening women to cakes (e.g. **tart**), delicacies (e.g. **crackling**), etc. The terms 'crumpet' or 'a bit of crumpet' are now likely to offend most women although both are still widespread, mainly in working-class usage. Women are now beginning to use the terms to refer to males.

*'I don't think we should condemn a doctor simply because he made a wrong diagnosis of what is, or is not, crumpet.'*  
(*Carry on Again, Doctor*, British comedy film, 1969)

a homeless person and/or beggar, especially a member of a militant subculture of importunate vagrants of the early 1990s, centred on the English West Country, who practised deliberate self-degradation and embraced personal filthiness (hence the name, from the encrustations on bodies and clothing). Other names for members of the same subculture were **fraggles**, **hedgers**, **scrotes**, **smellies**, **soap-dodgers** and **cider-punks**.

*'The Crusties of Bath are, with their counterparts at the other end of the social spectrum, the smooth lawyers and medics, considerably more redolent of*

**cunt** *n*

**1a.** the vagina. This taboo word has ancient origins; related words exist in other European languages (French *con*, Spanish *coño*, etc.) and it seems that, in the unwritten prehistoric Indo-European parent languages, *cu* or *koo* was a word base expressing 'feminine' or 'fecund' and associated notions.

**1b.** a woman or women in general. An extension of the above sense which is probably most commonly heard in the USA.

**2.** a very unpleasant person. As well as being the most 'obscene' of the common set of sexually related taboo words, 'cunt' is also used to indicate extreme distaste or dislike. This usage, which is more noticeable in British and Australian English than American, is presumably inspired by deep-seated fear and loathing of women's sexuality, although in practice the word is usually applied to men.

From Anglo-Saxon times until the 14th century the word was in standard use, but was then replaced by euphemisms in all but rural dialect speech. Most dictionaries refused to acknowledge the word until the 1960s and it is probably the only word that is still banned from most British newspapers and television.

**b.** intoxicated by alcohol or drugs

*'I went to a bop last night and got totally cunted.'*

**curry-queen** *n*

a **gay** male who is attracted to South Asian partners.

**curse, the curse** *n*

menstruation, a monthly period. This is the standard term used by schoolgirls and women; its probable origin is in Genesis, in which Eve is 'cursed' by God who promises to 'multiply thy sorrow and thy conception: in sorrow thou shalt bring forth children'. The 'curse of Eve' thus became a euphemism for the most troublesome aspect of femininity.

*I've got the curse, I'm afraid.*

**cushdy, cushti, kushti** *adj* *British*

fine, wonderful. An all-purpose term of approbation or agreement. This working-class term (recently brought to a wider audience by the television comedy *Only Fools and Horses*) is related to 'cushy', the colloquial term for easy or comfortable. Both words derive ultimately from an archaic Persian word *khosh*, meaning 'pleasant', either via the Hindustani *khush*, or the Romany *kushto*, or both.

**cuss (someone) off** *vb*

to criticise, denigrate someone. The phrase is in black usage in Britain and the USA and may have originated in Caribbean speech.

**3.** also **dinky** *American* one of a childless **yuppie** couple; an acronym for 'double (or dual) income, no kids', coined in New

York in 1986. Dink is an example of the American use of acronyms to describe social subgroups. This tendency, which produced **WASP**, **JAP** and, later, **yuppies** in the 1970s, became a vogue among New Yorkers in the mid-1980s. In spite of enthusiastic use by some journalists and imitation by their London counterparts, this term, like **guppy**, has achieved only limited currency.

(Recorded, American teenager, London, 1988)

**2.** a pickpocket. A Victorian term, still in police and underworld use.

**3.** *British* an act of sex. The vulgarism usually refers to male sexual activity and was used, e.g., by the stand-up comedian Frank Skinner in stage monologues

in 1992. It is derived from the phrase **dip one's/the wick**.

**dip (out)** *vb* *American*

to depart, leave. A vogue term from black street slang of the 1990s. The variant form 'do the dip' has also been recorded. **dip one's/the wick** *vb*

(of a man) to have sex. A vulgar euphemism which is about a century old. 'Wick' is either a shortening of the rhyming slang **Hampton Wick: prick**, or a straight-forward metaphor from candle wick. Originally British, the term is now used, albeit less commonly, in the USA and Australia.

**dipso** *n*

an alcoholic or drunkard. A shortening of the term 'dipsomaniac' (from the Greek *dipsa*, meaning thirst).

**dipstick** *n*

a fool. The word is probably a euphemism for **dipshit**, but with less unpleasant overtones. It has been popularised by television series and films in both Britain and the USA since the early 1980s and is a favourite with teenagers.

*I've been feeling discombobulated since we got back.*

**discuss Uganda** *vb* *British*

to have sex. A euphemism coined in the 1970s by the British satirical magazine *Private Eye*. It has become one of the magazine's long-running jokes and is said to stem from a party at which a female journalist was alleged to have explained an upstairs sexual encounter by saying 'We were discussing Uganda'. (Idi Amin's regime was in the news at the time.) The term 'Ugandan Affairs' is also derived from this source.

**dish** *n*

1a. a very attractive woman. This appreciative term (though offensive to most modern women) is one of many that liken a woman to a tasty snack or meal. Unlike **tart** or **crumpet**, e.g., **dish** was introduced, or perhaps reintroduced (the metaphor

was not unknown in earlier times) into Britain from the USA in the 1930s.

(*Cheers*, US TV comedy series, 1989)

**dish<sup>2</sup> vb**

to defeat, destroy or ruin. The original sense of this British term of the 18th century was to swindle, deceive or make a fool of. The image behind the expression was probably that of 'serving up' something (or someone) that has been well and truly 'processed', exploited, etc.

**dish the dirt vb** *American*

to spread scandalous or malicious gossip. 'Dish' here is, of course, dish up in the sense of 'serve' to an eager audience.

**dishy adj**

very attractive, handsome or beautiful. The adjectival form of **dish** is currently more often used by women than men and is so common in Britain as to be a colloquialism rather than true slang.

**diss vb**

to scorn, snub, belittle. This vogue word of the late 1980s entered adolescent speech via the hip hop and **rap** subcultures originating in the USA. A typical 'clipping', like **def**, **treach**, etc., it is based on the verbs to dismiss, disapprove or disrespect [sic] (perhaps influenced by **dish**).

**distress vb**

to annoy (someone). A vogue use of the standard term, heard since 2000 and probably originating in black speech.

**ditch vb** *British*

**diving n** *American*

picking pockets. An underworld term which is the equivalent of the British **dipping**.

**divot n** *American*

a toupée or hairpiece. The standard word, denoting a clod of earth and grass dug out by a golfing stroke, has become part of the adolescent lexicon of mockery (like its UK counterparts **syrup (of figs)**, **Irish**, etc.) 'Divot' itself is an old Scottish word of unknown origin.

**divvy adj** *British*

odd, stupid, deviant, weak or pathetic. This term, of uncertain origin, has existed in the vocabulary of society's 'marginals' since at least the late 1950s (it is unlikely to derive from deviant, but may be related to 'daft' or **daffy**, or even by a tortuous etymology from 'divine' in the sense of possessed). It has recently been revived as a vogue term by schoolchildren, although the short noun form **div** is more common. (Divvy itself has occasionally been recorded as a noun.)

*'Who's your friend with the glasses? 'E looks a bit divvy.'*

(Recorded, street-gang member, London, 1967)

It is possibly from the Edwardian era, when turning King's Evidence would have been joining 'Bertie's' side, and seems to have existed before the days of Bertie Smalls, a 1970s criminal supergrass (a high-level informer).

**do-able** *adj* American

sexually attractive. This term, used to categorise a potential partner, was popular among female Californian high-school students in the 1990s and was featured in the 1994 US film *Clueless*.

**Doctor Feelgood** *n* *American*

It originated in American teen usage in the late 1970s.

**dope<sup>1</sup>** *n*

1. an illicit drug, narcotics. The word was first applied to stupefying drugs such as opium and heroin at the turn of the 20th century, and remained limited to this context until the 1960s. In the late 1960s **hippy** drug users began to apply the then almost archaic form ironically to their preferred soft drug, cannabis (marijuana and hashish), and this remains the most common use today.

*'He said: "You know how you leave dope lying around? Well, she ate some and she went berserk. She hasn't liked it much since".'*

(*News of the World*, 29 October 1989)

1. the penis

2. a fool or contemptible person. The earlier sense seems to have fallen into disuse but, like many synonyms (**prick**, **plonker**, etc.), has been adopted to denote a stupid person. The word 'dopper' itself occurred in Norfolk dialect, meaning a thick blanket or sweater, but this is unlikely to be the origin of the derogatory usage which is probably related to the archaic 'dobber', referring to the male member.

**do-re-mi** *n* *American*

money. A pun on **dough**.

**Doris** *n* *British*

1. a frumpy or unattractive older woman in the slang of City traders from the 1990s. Such women, especially if thought to be unglamorous or too serious, are typically dismissed by males as 'a bit of a Doris'. **Nora** is a synonym.

Since the late 1970s this term has been in vogue in Britain and Australia as well as in its country of origin.

*'I love your husband, but he's a real dork.'*

It is a favourite with alternative comedians and 'professional cockneys'. The original would seem logically to be the old African colonial term **dash**, denoting a tip or bribe, but other authorities claim that it is influenced by **doss**, in the sense of the price of a bed (for the night).

**doss**<sup>1</sup> *vb*

a. to sleep

*I need a place to doss for a couple of nights.*

b. to move from place to place, sleeping in borrowed or low-class accommodation

(Recorded, London student, 1988)

**c.** to relax, **chill**. A fashionable usage since 2000.

A 19th-century term which may derive from the Latin *dorsum*, for 'back'. The verb forms, as opposed to the noun forms of the word, are mainly encountered in British English.

**doss<sup>2</sup> n**

**1a.** a place to sleep, especially a temporary, free and/or makeshift bed. This word, from 19th-century tramps' jargon, was probably originally a corruption of the Latin *dorsum*, for 'back'. Tramps are unlikely to have coined the term; it may have come from the jargon surrounding pugilism (meaning 'flat on one's back') which was a sport subscribed to by aristocrats and students, among others.

**1b.** a period of sleep, a nap

**2.** a very easy task, a pushover. In this sense the word, although based on the notion of lying down, may be influenced by 'toss', as in easily tossing off a piece of work.

**b.** a slovenly, irresponsible person. A favourite term of affectionate abuse between young (usually male) people since the 1980s. (From the noun **doss** or the verb **doss around**.)

*I don't know how you manage to live in this doss house you call a flat.*

'I felt like pissing off and spending the night in some Arab dosshouse.'

(Joe Orton's diary, 14 May 1967)

**dot vb**

**b.** to have sex

An item of black slang which may have given rise to the widely reported **wilding**.

**do time vb**

**double-bagger n** *American*

a hideous or repellent person. A phrase from the vocabulary of **Valley Girls** and other American teenagers from the mid-1970s, probably originating in earlier surfers' slang. The image evoked is of a person who must wear a bag over their head – and provide one for the onlooker too, or alternatively wear *two* bags. The expression, in this humorous usage, was first borrowed from the language of baseball, where it describes a hit which allows the hitter to advance two bases or 'bags'.

**douchebag n** *American*

a contemptible or very unpleasant person. The expression is usually a strong term of abuse, indicating real distaste, although like comparable words it is sometimes used lightheartedly, typically by high-school and college students. Rubber bags were a part of douching paraphernalia when that form of contraception was widespread, especially among prostitutes. The word is applied to males and females.

*'OK, we're going in there and anyone who doesn't act elegant is a douchebag.'*

(*Satisfaction*, US film, 1988)

money. This was the most popular American slang term for money from the 19th century until the mid-1960s when it was supplanted by **bread**.

**doughboy** *n*

2. *British* a blow, a heavy punch. In working-class and cockney jargon this rare sense of the word is occasionally recorded. Its derivation may be from the (heavy) dumpling referred to above.

*He landed him a real doughboy round the chops.*

**Douglas** *n* *British*

a 3rd, a third-class university honours degree. A student witticism of the late 1980s playing on the name, Douglas Hurd, of a long-serving member of Mrs Thatcher's Conservative cabinet (a **Richard** is a synonym).

**down** *adj* *American*

1. authentic, trustworthy, sound. The usage may derive from the appreciative sense of **down-and-dirty** or the phrase **down with** (someone).

2. in agreement, interested

*I'm down with that.*

**down-and-dirty** *adj* *American*

a. deceitful, corrupt, savage. An exclamation used in poker (when cards are dealt or slapped on the table) extended to describe base or brutal behaviour.

*She's on downers.*

2. a depressing or boring experience. From the slang of American **hipsters** of the 1950s, widespread in the English-speaking world since the 1960s, but now sounding rather dated in British English; although the phrase 'on a downer' (going through a depressed or unlucky phase) is currently widespread.

**drabbie** *n* *British*

a 'frump', 'bluestocking' or puritanical person, usually female. A middle-class term of mild derision or disapproval, based on 'drab' and applied, often by journalists, in the 1980s to literary, academic or other professional women who deliberately eschewed a glamorous appearance.

**drag** *n*

**1.** women's clothing, as worn by men, especially homosexuals, transvestites or female impersonators. Originally theatrical slang of the early 20th century in Britain, signifying a long dress (dragging along the ground), the phrase 'in drag' crossed into popular terminology in the early 1960s. In the case of women wearing masculine clothing, 'man-drag' or 'male-drag' is usually specified.

*'Marlene in man-drag.'*

(Caption to photograph of Marlene Dietrich in Kenneth Anger's *Hollywood Babylon*, 1975)

**2.** a thing, event or person considered to be boring or depressing. An Americanism, probably originating in the late 19th century and remaining in marginal use until the 1960s, it was adopted into teenage currency in Britain and Australia in the late 1950s and was widespread by the mid-1960s.

*'What a drag it is getting old.'*

*Give me a drag on that.*

**3b.** *British* a marijuana cigarette, a **joint**. A prisoners' term.

**4.** a street, especially a long or important street, usually in the form **main drag**. This Americanism gave rise to 'drag racing' to describe unofficial races from a standing start over a short, straight stretch of pub-

*Here he comes, all dragged-up in his best things.*

**draggy** *adj*

*It was a totally draggy scene.*

**dragon** *n* *British*

a formidable (and therefore unattractive and/or unavailable) female. The earlier colloquialism was adopted as a code term by male financial traders in the City of London and was recorded (with other categorisations such as **oof**, **mum**, etc.) by psychologist Belinda Brookes in the *Independent on Sunday*, 9 July 1995.

**drag queen** *n*

a male homosexual who wears women's clothing. The phrase now has overtones of flamboyant, exhibitionist 'femininity' rather than mere cross-dressing.

*'Kenneth Williams then gave a long portrait of a dismal drag queen writing a witty letter requesting employment.'*

(Joe Orton's Diary, 13 April 1967)

*'The most important week in my life and I'm going to be spending it with a drag queen?'*

**drain the lizard/dragon/snake** *vb*

to urinate. Colourful euphemisms popular with (invariably male) college students, hearty drinkers, etc. These expressions entered the slang lexicon of teenagers and college students in the late 1960s and early 1970s, although they are probably older, adult coinages on the pattern of **siphon the python**. It is not clear where in the English-speaking world the pattern originated, but it is thought by many to be typically Australian.

*'He can't come to the phone right now, he's in the can draining his lizard.'*  
(Friday 13th Part VI, US film, 1986)

**draipsing** *n* *British*

extorting money or items of value from a weaker person. The synonym of **taxing** was employed in the 1970s among comprehensive-school pupils in London and referred to using a threat rather than actual violence to bully younger pupils into giving up items of value. Its derivation is uncertain.

**drama queen** *n*

a self-dramatising or hysterical person. The expression was originally (in the 1960s) applied by male homosexuals to their fellows. In the 1970s the phrase was adopted by heterosexuals and applied to women and, sometimes, to **straight** as well as **gay** men.

**drape(s)** *n*

**a.** clothes, a suit or outfit. The word was in use in the USA (where 'drapes' are curtains) in the 1950s among black musicians, **hipsters** and **beatniks**. It was then adopted by **spivs** and prisoners in Britain, where it is still heard.

**b.** *British* a drape jacket, the top half of a 'zoot suit' and part of the uniform of the **teddy boy** in the 1950s. (The drape had wide shoulders and was almost as long as a frock-coat, but loose and unwaisted.)

a 'two-one' honours degree in the late 1980s parlance of university students. (The joke is that a draw means 'two won'.) Alternative names for the same award are **made-in** or **Taiwan**.

**1.** *Jamaican* an all-purpose word implying authentic, impressive, etc., in connection with the black reggae and **ganja** culture and Rastafarian religion of Jamaica. The word first conveyed the power and awe felt and inspired by the (dreadlock-wearing) devotees of Rastafarianism.

*He's dread.*  
*It's real dread.*

**2a.** *British* good

Shorn of its Rasta associations the word had, by 2000, become popular among UK adolescents. Like its synonym **rough**, its meaning changed according to intonation.

**dread**<sup>2</sup>, **dred** *adj* *British*

awful. Employed by middle-class speakers since around 2000, this usage of the term is more likely to be an abbreviation of 'dreadful' than the Rastafarian key-word.

*I'm feeling dread, man.*

**dreamboat** *n*

a very attractive person of the opposite sex. The word, redolent of Hollywood in the 1940s, is still used, especially in the USA and usually, but not always, facetiously as a description or term of endearment.

**dreck** *n*

rubbish, a worthless thing, **shit**. From the Yiddish *drek* and German *dreck*, which have the same meaning.

(*Time Out* magazine, July 1989)

**dreg** *n* *British*

a despicable or worthless person. A middle-class term of abuse or disapproval which has been rare since the late 1960s. It is a modern back-formation from the standard plural 'dregs', which itself derives from an Old Norse term for oil or wine residues.

**dreich** *adj* *Scottish*

an unpleasant, obnoxious and/or unfortunate person. In playground usage since 2000.

**drill** *vb*

1. *British* to sleep. A middle-class and public-school term deriving from the phrase 'blanket drill', a facetious army expression for sleeping.

2. to shoot (usually to kill). A now dated Americanism adopted by crime and western movies and fiction.

3. to have sex with. A rare usage on the same pattern as **screw**.

**drink** *n* *British*

a small bribe, tip or other financial inducement. Originally, in London working-class usage, it meant literally the price of an (alcoholic) drink. Now it usually refers to a more substantial sum and is sometimes extended to a share in an attractive venture, or a 'piece of the action'. As an item of British police and underworld slang, it was given wider currency by TV series such as *Minder*.

*Brian will need a drink, too.*

**drinkable** *adj* *British*

**drip**<sup>1</sup> *n*

1. an insipid, unassertive or boring person. This common colloquialism is probably British in origin, but is also used, especially by school and college students, in the USA and Australia. It is one of many terms (**wet**, **damp**, **dripping**) equating weakness with water.

*Her husband's absolutely dripping.*

**drive the porcelain bus/great white bus/big bus** *vb* *American*

to vomit. A popular expression among college and high-school students. The image is of a helpless drunk or hangover victim kneeling before the toilet pedestal, clutching the rim of the bowl in both hands like an oversized steering wheel, as the room spins. (**Kiss the porcelain god** is an alternative form.)

**droid** *n* *American*

a stupid, slow or completely unimaginative person, in the language of teenagers and students. It is a shortening of 'android', of which both the full and abbreviated forms have been used extensively in science-fiction books and films since the mid-1970s.

*'Man, he's a total droid.'*

(*Zombie High*, US film, 1987)

**drongo** *n*

a foolish, unfortunate or unpleasant person. An Australian word which was adopted by British speakers in the early 1970s, probably introduced to it by an influx of young Australian travellers. It is a term of scathing contempt which may have been inspired by a spectacularly unsuccessful racehorse of the same name in the 1920s, although 'drongo' is also the name of an Australian bird. The word seemed to be declining in popularity by the late 1980s.

**droob** *n* *Australian*

a dullard. This word is probably a blend of **drip** and **boob(y)**.

**drooly** *adj*

very attractive, appealing or appetising. A less usual synonym of **dishy** or 'yummy', often used by adolescent females.

**drop<sup>1</sup>** *vb*

1. to take (an illicit drug) orally. The word was most often encountered in the phrase 'drop acid', meaning to take LSD by mouth. Originally an American term, 'drop' replaced the neutral 'take' in Britain around 1966.

*a dropdead blonde*

*dropdead gorgeous*

**drop-kick** *n* *Australian*

a 'low', worthless or miserable person. This relatively mild epithet, used, e.g., in television soap operas of the 1980s, is probably a descendant of the vulgar rhyming slang (based on soccer), 'drop-kick and punt': **cunt**.

*This makes me seem like a real drop-kick or something.*

**drop off the twig** *vb*

to die. A lighthearted expression in vogue in Britain since the late 1980s. Bird imagery features in several colourful, predominantly working-class phrases in British colloquial use, such as 'sick as a parrot' or **rattle someone's cage**.

to panic. The bundle in question may originate in a **hobo's** pack, or may be a reference to fright's tendency to empty the bowels.

**drop one's daks** *vb* *Australian*

to take off one's trousers. An Australianism (Daks is a trademark for a brand of casual slacks especially popular in the early 1960s in Britain and Australia). A catchphrase from *The Adventures of Barry McKenzie*, the cartoon strip published in *Private Eye* magazine in the late 1960s was 'drop your daks and say the magic word'.

**drop out** *vb*

to withdraw from conventional society, opt out. The motto of the **hippy** movement, coined by Dr Timothy Leary in 1967, was '**turn on, tune in, and drop out**'

(take drugs and/or become enlightened; make contact with like-minded people or the life force; and leave society behind). The phrase survives in the specific sense of abandon one's education.

*'Since I dropped out in September last year I have come to the conclusion that the city drop-out scene is a pathetic one.'*  
(Letter to *Oz* magazine, June 1968)

### drop-out *n*

someone who has opted out of society. In this sense the word and the concept date from the late 1960s when **hippies** renounced capitalism, the education system, etc. to form an 'alternative society'. The term was quickly picked up by the press and others who disapproved and it became a pejorative description. In the USA in the 1950s and early 1960s drop-out was used to refer specifically to those who had left full-time education before graduating from high school.

### dropped on *adj*

punished, reprimanded. The expression in full is 'dropped on from a great height'; the 'dropping' in question may refer to the weight of authority, or may be a euphemism for **shitting**. Predominantly a middle-class term, it is generally used in the context of a hierarchy.

### drum *n*

**1. British** a house, home or building. The word, which is used especially in police and underworld circles, may come from the Romany word *drom*, meaning 'highway', but is possibly a back-formation from **drummer**, referring to someone who knocks ('drums') on people's doors, either to buy or sell goods or to find some-

where unoccupied to rob. In the past the word has also meant 'prison cell' and 'brothel', especially in Canada and Australia respectively.

*'Go and turn over his drum while we keep him locked up here.'*

(Recorded, Detective Sergeant, Canterbury, 1971)

**2. Australian** a tip, piece of information or news, probably from the notion of 'jungle drums'

*I got a drum that she was in town.*

### drummer *n*

**a.** a door-to-door salesperson, peddler or buyer of junk

**b.** a housebreaker or burglar

This now obsolescent term derives either from knocking ('drumming') on doors or from **drum** as a vagrants' and criminals' synonym for house.

### drumming *n* *British*

**a.** selling door-to-door

**b.** housebreaking or burglary

Both senses of the word derive from **drum** as a slang term for house or home, or from **drum** in the sense of knock.

### drumsticks *n* *pl* *South African*

rubbish, **shit**. The origin of this vogue term among adolescent gangs is uncertain. The term was recorded in use among North London schoolboys in 1993 and 1994 as an all-purpose adjective signifying anything unpleasant, disappointing, etc. It was still in vogue in 2006.

### dry-hump, dry-fuck, dry root *n, vb*

(to perform) a sexual activity (often while standing up) in which the partners simulate intercourse while they (or at least their genitals) are fully clothed. The term usually describes the behaviour of consenting heterosexuals rather than 'perversions' such as frottage (where the activity is performed on an unwilling victim, as for instance in a crowded lift or train), tribadism (between lesbian partners) or friction (between male homosexual partners). Dry root is an expression peculiar to Australian speakers.

*'You can't dry hump good in the car. Unless you're a midget.'*

(High-school student, *IT* magazine, June 1972)

*'...for £20 a head the "cuddle party" is bringing together lost souls...there are strict rules: no alcohol, no nudity and emphatically no "dry humping".'*

**Tucked up** is a more recent alternative.

#### dubber *n American*

#### dubbo *n Australian*

a fool. An embellishment of the archaic **dub** meaning an awkward or incompetent person, especially a rustic simpleton.

#### ducats *n pl American* See **duckets**

#### duchess *n British*

a woman, usually one's wife. The image is of a dignified, respectable female who is no longer young. This cockney usage is still in evidence although roughly a century old. The word is either a straightforward simile or a shortening of a rhyming-slang phrase, 'Duchess of Fife': *wife*.

between the written or printed 0 and the egg.

#### ducky *adj*

cute, delightful. A word which today is almost invariably used ironically or facetiously. It derives from 'duck' as a term of endearment.

#### dude *n*

a man. The 19th-century American sense of **dude** as a 'fop', an overdressed city dweller, etc. (familiar from westerns and 'dude ranches') gave rise to a 20th-century black usage meaning first pimp or 'fancy man', then simply a (male) person. The term came into vogue in the 1970s and spread to Britain, where in 1973 it was briefly adopted by the **gay** and teenage milieus (appearing for instance in the title of the David Bowie

song 'All the Young Dudes'). In the late 1980s the word had again surfaced in teenage parlance, inspired by its continuing presence in black American street speech. Dude was originally a German rustic term for a fool.

*'There were more commercials...but no more crime...nothing about two dudes in Halloween masks breaking into a Bloomfield Village home.'*  
(*The Switch*, Elmore Leonard, 1978)

### **duds** *n pl*

### **duff**<sup>1</sup> *n*

1. the backside, buttocks. Duff is a 19th-century word for boiled dumpling or pudding (surviving in the British 'plum duff'), from which this usage was probably derived.

*'Come on you turkeys, get off your duffs and give me some info.'*  
(*Buck Rogers in the 25th Century*, US film, 1979)

### 2. See up the duff

### **duff**<sup>2</sup> *adj*

useless, inferior. The word derives from a piece of 18th-century thieves' jargon meaning worthless or counterfeit, related to **duffer** which originally denoted a seller of supposedly stolen goods.

### **duff**<sup>3</sup> *vb Australian*

to steal. A verb formed from the generalised negative sense of duff. The usage is now fairly rare.

### **DUFF** *n*

an unattractive female. The letters stand for 'designated ugly fat friend'. Pronounced as a word, not letter by letter, this pejorative epithet has been used by younger males since around 2000.

### **duffer** *n British*

an ugly or unattractive female. An item of student slang in use in London and elsewhere since around 2000.

**duffies** *n pl Australian*  
underpants, usually male

### **duff up/over** *vb British*

to beat up. Mild-sounding terms for what may be anything from a children's scuffle

to a murderous attack. The modern sense, in vogue since the 1950s, seems to derive from an earlier sense meaning to 'ruin' which is related to the adjective **duff**.

*'Michael threatened to duff him up if he ever did anything like that again.'*  
(Recorded, teenage girl, London, 1986)

### **dufus, doofus** *n American*

**a.** an eccentric person

**b.** a foolish or gauche person

**c.** a gadget, intriguing object, thingummy

All three senses are typically used on college campuses. The origin of the term is obscure. It is probably an invented word with a mock Latin suffix, although there is a possible connection with *doofart*, a Scandinavian word for 'fool'.

### **duke it, duke it out, duke it up** *vb*

to fight, brawl or box. Later formulations from the noun **dukes**, meaning fists.

### **duke on it** *vb*

to shake hands. A slang version of 'shake on it', from **dukes**, meaning fists.

### **dukes** *n pl American*

fists. This has been part of the jargon of streetfighters and pugilists since the turn of the 20th century. It originates either in the rhyming slang Duke of York: *fork*, i.e. a hand or finger, or from a Romany word meaning palm or hand. The word is most commonly heard in the challenge 'put up your dukes' or the phrase **duke it out** (to engage in a fist-fight).

### **duke someone** *vb*

to slash someone across the legs with a sharp instrument as, e.g., a gang punishment. Recorded among Asian youths in Oldham, UK, 2003.

**dumb-head** *n*

a stupid person. An elaboration of the American sense of dumb which is a direct translation of the German *Dummkopf*: fool.

**dumbo** *n, adj*

(a person who is) stupid. The American use of dumb for stupid, reinforced by the German *dumm*, is as old as the British sense of mute. Since the 1960s the American sense has been adopted in colloquial British English. This variant word may have been reinforced by the Walt Disney film *Dumbo* (which was itself inspired by 'Jumbo', the name of an elephant at London Zoo).

**dumdum, dum-dum** *n*

a stupid person. An embellishment (by the linguistic process known as 'reduplication', which is common in nursery words) of dumb.

See also **dumbo**

**dummy** *n American*

a fool, simpleton or dupe. From 'dumb' in the American sense.

*'The dummy got too chummy in a Bing Crosby number.'*

(*Salome Maloney*, John Cooper Clarke, 1978)

See also **dumbo**

**dummy up** *vb*

to keep silent; refuse to speak. A more robust alternative to **clam up**, used for instance by underworld characters in fact and fiction.

**dump** *n*

1. a dirty, messy or dilapidated place. The word in this sense is now so common as to be a colloquialism rather than slang (which it would have been considered to be, say, in the 1950s).

2. an act of defecation, usually in a phrase such as 'take or have a dump'

*'What are you doing back there, taking a dump?'*

(*Friday 13th Part VI*, US film, 1986)

**dumper** *n American*

a violent male devotee of aggressive sexual practices. The term is used by police and pornographers to describe males indulging in rough sexual treatment of women.

**dump on (someone)** *vb*

to criticise or chastise, heap blame or responsibility on, denigrate. This expression is now often used as an innocuous

colloquialism, although it derives from the decidedly vulgar sense of **dump 2** above.

**dun** *vb British*

to criticise, denigrate, berate (someone). The usage was recorded among middle-class adolescent males in 2000.

**dune-coon** *n American*

an Arab, Middle-Eastern person. A derogatory term recorded in armed-forces' use during the Iraq conflict of 2004.

**dung-puncher** *n*

a male homosexual. A highly pejorative term paralleling **fudgepacker**, **brownie-hound** and **turd burglar** in the reference to the faecal aspects of sodomy.

**dunkie** *n British*

a girl. The word is probably an abbreviation of 'dunkin' donut', a trademark name of an American chain of doughnut and coffee shops, although there may be a connection with the sexual sense of **dunking**. The overtones of the expression, used by teenagers in the 1970s, were not respectful.

**dunking** *n British*

sex. A euphemism which was in middle-class and 'society' use in the early and mid-1970s. It now seems to have fallen out of use but might be revived (on the pattern of similarly predictable terms which are periodically rediscovered). The origin is of course in the practice of dunking biscuits (in Britain) or doughnuts (in America) in tea or coffee.

**dunky** *n British*

a condom. The term is a back-formation from 'dunk' as a sexual euphemism.

**dunnee, dunny** *n Australian*

a toilet, especially an 'outhouse' or outside lavatory. The word was reintroduced to some British speakers via the Australianisms in the cartoon strip *The Adventures of Barry McKenzie* in *Private Eye* magazine in the late 1960s. In fact this term has existed for approximately 200 years in British English as 'dunnakin' (spelt in various ways, including 'dunnigan' in Ireland) and had become obsolete. The ultimate origin of these words is obscure but seems to be related to archaic dialect words for excrement such as *danna*, or its colour ('dun').

**dunning** *n* *British*

an admonition, telling-off, humiliation. The term has been recorded since 2000, but may relate to a much older use of the word to mean 'harass or importune'.

*'Three duhs in quick succession indicate a relatively light dunning, but said more slowly and forcefully the dunning becomes more severe.'*

(Recorded, London student, 2000)

**durk** *n* *British* See **derk****durr-brain, durb** *n* *British*

a foolish, slow-witted person. This popular term of abuse among schoolchildren probably imitates the hesitation noise supposedly made, e.g., before responding of a simpleton or dullard, but might possibly be a version of the American 'dough-brain'.

**duss, dust** *vb*

to depart, leave. In this sense the word dust was recorded among black Americans as long ago as the 1930s, the expression deriving from the image of a cloud of dust being thrown up. As 'duss', the term was fashionable among gang members and schoolchildren in the UK from the mid-1990s.

*It's the beast-man, let's duss!*

**dust**<sup>1</sup> *n*

**angel dust, P.C.P.** Among young people the shortened form was considered cooler than the full phrase in the late 1980s

*'Johnny does dust.'*

(Graffito, Hammersmith, London, 1987)

**dust**<sup>2</sup> *vb* *American*

to kill. A 'tough-guy' euphemism implying the casual elimination of nuisances, typically in a gangland or military context. The origin is probably in a now-obsolete use of dust, meaning to 'hit', which survives in the expression 'dust-up'.

**dustbin lids** *n* *pl* *British*

children, *kids*. A piece of fairly modern rhyming slang which has spread beyond its working-class London context. The singular form exists, but is rare. 'Saucepan lids' is an alternative form.

**dust bunny** *n* *American*

a ball of fluff lurking in an undusted part of a household. (Also known as **dust kitty** and many other terms.)

*'She won't make the bed, she won't sweep up the dust bunnies or nothin.'*

(*The Rockford Files*, US TV series, 1980)

**dust kitty** *n* *American*

**a.** a ball of fluff, found for instance under a bed or in another undusted part of a household. This domestic phenomenon has given rise to a number of colourful expressions in American English (**dust bunny**, **beggar's velvet**, 'house moss' and **ghost turds** are others), but none in British English.

**b.** the navel. So-called due to its being a repository for fluff, etc.

**dusty, dustie** *n* *British*

**1.** an old person. A term of mild contempt or even affection to their elders among **Sloane Rangers** and other young people of the late 1970s, becoming more widespread since. A less common alternative to **wrinkly**. In *The Official Sloane Ranger Handbook* (1982) Ann Barr and Peter York attempted to define the ages of adults as follows: **wrinkly** (40 to 50 years old); **crumbly** (50 to 70 years old); and **dusty** (70 and above).

**2.** a dustman. Not as common an abbreviation as **postie** for postman, for instance.

**Dutch**<sup>1</sup> *n* *British*

**1.** one's wife. This hundred-year-old piece of cockney usage is still heard (invariably in the form 'my old Dutch'), although now often used facetiously or self-consciously. It may be a shortening of **duchess** (originally 'Duchess of Fife', rhyming slang for *wife*), or she may be so-called after 'an old Dutch clock' (a homely piece of furniture with a broad open dial).

**2.** a friend, *mate*. A second cockney sense of the word comes from the rhyme 'Dutch plate'.

**Dutch**<sup>2</sup>, **Dutch fuck** *vb* *American*

to have sex by putting the penis between the female breasts. Dutch here is used as in other expressions, like 'Dutch auction', 'go Dutch', etc., to mean unorthodox. In British armed-service slang Dutch fuck referred to lighting one cigarette from another.

**dweeb** *n*

a foolish, gormless or unpopular person. An American campus and high-school word of the late 1980s, adopted by British youth since 1988.

*'I didn't even tell her my name – I am a dweeb!'*

(*18 Again!*, US film, 1988)

**dwem** *n*

a 'dead white European male'. A key term in the 'politically correct' lexicon of the mid-1990s; a dismissive categorisation of members of the supposed literary canon, such as Shakespeare.

**dyke, dike** *n*

a lesbian. The only common slang term to describe a female homosexual; it was first used derogatorily by heterosexuals, but it is now used by **gay** women themselves, though often wryly. When said by a heterosexual the word usually still carries overtones of the 'aggressive masculine' stereotype of a lesbian. No one has satisfactorily explained the term's ultimate origin; it might be from an old pejorative euphemism for a woman's genitals. Another, rather far-fetched, theory is that it is inspired by the story of the little Dutch

boy with his finger in the dyke. Whatever its origin the word seems to have been imported into British English from America between the world wars.

**dykie, dyky** *n, adj*

**a.** like a **dyke**, a lesbian

**b.** (of a woman) 'masculine' in behaviour and/or appearance

**dykon** *n British*

a lesbian. A variant form of **dyke** in use among schoolchildren since the 1990s. It may have originated as a blending of 'dyke' and 'icon', thus referring to the object of **gay** females' admiration rather than the females themselves.

**dynosupreme** *adj American*

excellent, perfect, outstanding. Often an exclamation, this is a teenage vogue elaboration of supreme using a mock-prefix based on 'dynamo' or 'dynamic', or a contraction of 'dynamite'.

**b.** face-paint, make-up. Also a theatrical term, presumably derived from the first sense. **Slap** is a more common alternative.

**eff** *vb*

a euphemism for **fuck** heard in America and Australia but more popular in Britain. It is most often encountered in the phrase 'eff off' and 'effing and blinding' (cursing, using bad language).

'**erbert** *n* *British*

a foolish person, a cheeky, unwashed child. For many years, in London working-class slang, Herbert or 'Erbert was used to refer to any otherwise unnamed man or boy. Gradually, probably by being used in phrases such as 'silly 'erbert', it came to have the more pejorative sense. There probably never was an eponymous Herbert; it was merely a common working-class name from the Edwardian era.

**erdie** *n* *British*

a tedious, orthodox, **straight** individual. The origin of the term is mysterious: Eric Partridge's dictionary derives it somewhat unconvincingly from the German *Erde*, meaning 'Earth', as in earth-bound.

**ert** *adj* *British*

alert, lively, aware. A humorous back-formation from the standard term inert,

In the 20th century the word was generalised to refer to any cigarette.

*"Come on darling give us a fag", says a brass to an elderly tom. "Have pity on a destitute prostitute!"*

(*Sunday Times* colour supplement feature on the East End of London, 2 June 1968)

**2.** *American* a male homosexual. This is generally taken to be a shortened version of **faggot**, but may pre-date it. (There is no discernible connection with the British public-school term meaning a junior boy performing servant duties.)

*Well, congratulations.'*

(*Kiss of the Spider Woman*, film by Hector Babenco, 1985)

**faggy** *adj* *American*

*'She [Edith Olivier] became the supreme fag-hag of the 1920s and 1930s, the older woman who acts as mother-confessor and salonnière to a group of young homosexual men.'*

**fanny** *n*

1. British the female genitals. This old and relatively inoffensive euphemism is possibly derived from the well-known erotic novel, *The Memoirs of Fanny Hill*, by John Cleland, published in 1749, or is perhaps simply an affectionate personification of the sex organs, using the short form of Frances. The word is used by women as well as men.

2. American the backside, buttocks. The American sense of the word probably derives from the earlier British sense. Fanny is sometimes confusingly used with this meaning by middle-class speakers in Britain too.

**fanny about** *vb* British

The word is a descendant of an old Germanic verb *ferzan* which in turn comes from an Indo-European root *perd-* or *pard-* (giving modern French *péter* among others). Popularised by the cartoon strip in *Private Eye* magazine in the 1960s, it was briefly current as a result among students and others. It is probably inspired by the jounalese 'featuring' as in 'starring', or as in being the main protagonist of a scandal.

*'If I don't feature with this tart tonight the Pope's a flamin' Jew.'*

**flim-flam** *vb, n*

The word, which is in use in Britain, but more widespread in the USA, probably comes, via Scottish dialect, from an old Scandinavian word *flim* meaning mockery. **french** *vb*

**1.** to perform oral sex. A jargon term from the world of prostitution and pornography. The word may refer to cunnilingus or fellatio and derives from the British notion that all forms of 'deviant' sexual

behaviour are widespread among, if not invented by, the French. This may originate in the widespread accusation or supposition of the spreading of venereal disease by foreign neighbours.

**2.** to engage in **French kissing**, in the language of teenagers. In this sense the word is most commonly heard in the USA.

See also **Frenching unit**

**frenchie, frenchy** *n*

a condom. From the now obsolescent 'French letter', one of many examples of ascribing anything with sexual connotations to the French. (In French the equivalent is *une capote anglaise*, meaning an English bonnet or overcoat.)

**Frenching unit** *n* *American*

the mouth or tongue. A humorous euphemism, popular among college students for instance, and derived from the verb, to **french**, in the sense of tongue kissing or oral sex.

**French kiss** *n*

an open-mouthed kiss with tongue contact. A phrase which appeared in British and American speech shortly after World War I, before which there was, perhaps significantly, no equivalent term. Later alternatives were 'soul kiss' and **tongue sushi**.

**French safe** *n* *Canadian*

a condom. The phrase has been heard since the 1970s.

**fresh** *adj* *American*

excellent. A vogue term among teenagers in 1987 and 1988. Teenage argot is in constant need of new terms of approbation but this fairly obvious example (derived probably from its over-use in advertising hyperbole rather than its standard American colloquial sense of cheeky) was still in use after 2000.

*'I've got to have that [red carpet] in my crib in LA. That's fresh to death!'*

(Damon Dash, hip hop record producer, quoted in the *Sunday Times*, 6 June 2004)

**freshi** *n* *British*

Compare **desi**

**frier tuck** *n* British

an act of sexual intercourse. A rhyming-slang form of **fuck**.

**fridge** *n* British

a male. An item of rhyming slang ('fridge freezer', meaning **geezer**) heard since the 1970s.

**fried** *adj*

suffering from the effects of drug intoxication. The term probably derives from the notion of 'frying one's brains', and denotes a state of dangerous disorientation, physical collapse, etc. **Baked** and **toasted** are used in the USA in similar senses.

**frig** *vb*

1. to masturbate (oneself or another person). The ultimate origin of the word is the Latin *fricare*, meaning to rub (from which friction is derived), via the Middle English *friggen*.

*'Friggin' in the rigging 'cause there's fuck-all else to do.'*

(Chorus from the rugby song 'The Good Ship Venus')

2. to have sex (with). Since the 19th century the word has been used as a slightly less offensive alternative to **fuck**, although this was not its original sense.

The verb is nowadays rarely used in either sense except in the noun or adjectival form **frigging**.

**frigging** *adj*

an intensifier used with adjectives and nouns for emphasis in the same way as **bloody** or **fucking**. It is considered substantially more offensive than the former and slightly less offensive than the latter.

*'I was talking to my Canadian niece this very weekend; she (a devout Mormon, 22-ish, not given to profanity) used the word frigging and said, "I'm sorry. I keep forgetting it's a bad word over here" or words to that effect.'*

(Recorded, editor, London, 1989)

aggressive, willing to fight. This item of black street-talk of the 1990s was probably derived from the phrase **feel froggy** rather than vice versa.

**front, the front** *n* British

courage, cheek, effrontery, **chutzpah**. This use of the word, as opposed to the colloquial senses of bearing or façade, occurs in phrases such as 'loads of front' or 'he's got more front than Harrods' (a reference to the large, impressive frontage of the London store).

See also **front out/off/it**

**front (someone)** *vb* Australian

**frost**<sup>2</sup> *n*

**1.** a failure, a woeful example of inadequacy. This fairly rare usage of the word occurs in educated speech, particularly in reference to a disappointing performance (e.g. in the theatre; it may originate in a literary or Shakespearean 'killing frost').

**2.** a snub or silent rebuff. This sense of the word derives from the verb form, currently in vogue among adolescents, particularly in the USA.

**frost-top** *n* *American*

an elderly person. This item of adult and family slang often refers to a relative. Synonyms are **cotton-top** and **moss-back**.

**frowdy** *n, adj* *British*

**frowsty** *adj*

**fry** *vb* *American*

**b.** to punish or chastise someone. A college students' and armed-forces recruits' term, used in such expressions as 'he got fried' or 'they fried her ass'.

**fubar** *n*

a spectacular instance of incompetence, a hopeless mess. The term originated as an acronym standing for 'fucked up' or 'fouled up beyond all recognition'. It probably originated in armed-forces usage like the similar **snafu** and is now heard particularly in US campus and office speech.

**fuck**<sup>1</sup> *vb*

**1.** to have sex with. The most commonly used 'four-letter' word, used intransitively ('let's fuck') and transitively ('he fucked her/him'); now also used of women ('she fucked him/her'). Surprisingly, the age and origins of this word are obscure. It may not be Anglo-Saxon as is often supposed (it was not recorded in writing until the 16th century) and does not occur in Chaucer and Shakespeare, but may have been borrowed from Norse (*fukkar* in Norwegian, *fockar* in Swedish). Wherever and whenever the word entered English, it is undoubtedly related to a pattern of words in Indo-European languages which give, among many others, the Latin *pungere* (meaning to prick), the German *ficken* (meaning to fuck or strike) and the French *foutre* (meaning to fuck). The common semantic feature of these words is that they all contain the meanings strike, push or prick.

Fuck has always been a taboo word in all English-speaking countries and is still omitted from broadcasts and generally asterisked if written in the press. In the late 20th century the verb often had the more specialised sense of 'habitually copulate'

or 'be sexually willing' as in 'does she fuck?'

**2.** to make a mess of, destroy. A 1980s shortening of **fuck up** with slightly more emphatic or drastic connotations.

*They fucked the experiment totally.*

*Jesus, it's fucking cold in here.*

*Abso-fucking-lutely!*

### fuck-me shoes *n* *pl*

provocative female footwear. This obscure term received extensive publicity at the end of 1995 when the former feminist writer Germaine Greer accused the *Guardian* columnist Suzanne Moore of betraying feminist principles by wearing 'fuck-me shoes' among other items. The phrase probably originated in American usage but may be a confusion with 'fuck-you shoes', implying a disregard for convention or propriety, or 'fuck-off shoes', where fuck-off means both outsize and aggressive.

### fucknuckle *n*

a term of abuse, used of males. The second component is included merely for the purpose of reduplication of sound and signifies nothing.

**fudge-nudger** *n* *British*

a male homosexual. The term was one of many synonyms based on the notion of excrement (others include **turd burglar**, **chutney-ferret** and **jobbie-jabber**), denoting 'active' or 'predatory' homosexuality, heard since the 1990s.

drunk. A more recent variation of expressions based on the notion of full (of drink), heard during the late 1980s, but perhaps older.

**full monty, the** *n* *British*

all that is desired and/or required. The previously obscure phrase suddenly became extremely popular in 1990 and 1991 and many derivations were proposed, ranging from a nickname given to inhabitants of the Potteries region of England to a comment on the quality of the wartime briefings given by the British General Montgomery in North Africa. In fact, the most likely explanation of the phrase is that it is a piece of gamblers' jargon meaning the entire kitty or necessary 'pot' to be bet, from the Spanish *monte* (mountain). In the US 'monte' was adopted as the name of a risky card game, while in Australian horseracing circles 'monty' used to mean an accurate tip or certain bet.

*'We had starters, main course, wine, you name it – the full monty...'*

(Recorded, financial consultant, London, May 1993)

**1a.** heavily rhythmic, 'earthy' music, particularly soul or disco music. A term applied to varieties of urban black music since the 1950s.

**1b.** an authentic feeling, earthiness, a quality of unsophisticated, raw vitality. The noun form is a back-formation from the adjective **funky**.

**2.** *British* cowardice, fearfulness, a fit of panic. A word which is quite unrelated to the musical sense. Funk here comes from the Flemish *fonck*, meaning worry or agitation. (A blue funk is a state of extreme fear.) It has been in use since the 18th century.

**3.** *British skunk* marihuana. The term has been in use since around 2000.

**funky** *adj*

**1a.** earthy, raw in the style of **funk** music (characteristically having heavy rhythm and bass and simple repeated melodies). This term, applied to urban soul-music which contained elements of African, jazz, blues and rock music, has been heard since the 1950s. It is sometimes elaborated to 'funky-butt'.

**1b.** vital, raw, energetic in an unsophisticated way. A term of approval applied to people, objects, ideas, etc. by extension from the musical sense.

**2.** smelly, fetid. This is the original sense of the word, dating from the early 17th-century British noun *funk*, meaning a stink or 'fug' of tobacco smoke. This in turn probably derives from the Latin verb *fumigare* (to smoke or fumigate), via French. Senses **1a** and **b** originate in this meaning.

**funny farm** *n*

a psychiatric hospital or home for mental patients

*She's in a fusion again.*

**futz<sup>2</sup>** *vb American*

to mess or fool around. The word is a deformation of a Yiddish verb *arum-fartzen*, meaning literally and metaphorically to **fart around**.

**fuzz, the fuzz** *n*

the police. A 1960s buzzword nowadays only likely to be used by a hopelessly out-of-date adult attempting to communicate ingratiatingly with young people (who will either not understand at all, or regard the dated term with contempt). It derives either from the likening of a worthless person to mould, fluff or dust, or it is a black reference to white men's 'wispy' head and body hair.

*'You're more likely to be damaged permanently in a tangle with the American fuzz though, if you see what I mean.'*

(Terry Reid, interviewed in *Oz* magazine, February 1969)

# G

## **G<sup>1</sup>** *n* American

## **G<sup>2</sup>** *n*

1. a gram (of some illicit substance). The abbreviation is typically used in referring to cocaine, which is sold in grams.

2. a thousand, a **grand**

*It cost me two g's.*

3. *American* a friend, peer. The abbreviation (probably of 'guy') is used as a greeting between males, particularly in black street usage.

## **gadger** *n* British

*He's a good gadger.*

## **gadgie, gadgy** *n, adj* British

(an) old, infirm or senile (person). A schoolchildren's word mainly heard in the north of England. The source is in dialect of the 19th century or earlier but the precise original meaning is lost.

## **gaff** *n* British

a home or house. In 19th-century slang a gaff was a fair, fairground or any place of cheap entertainment. These notions were expanded in the argot of actors, tramps, market stallholders, criminals, etc. and the word came to be used to describe any place or location, hence the current meaning which was racy underworld jargon from the 1920s to the 1950s when **spivs**, **teddy boys**, etc. gave it wider currency. (It is still mainly used by working-class speakers.)

*Nice gaff you've got here.*

*'If I was you I'd go round his gaff and pour brake fluid all over his paintwork – see how that goes down.'*

(*The Firm*, British TV play, February 1989)

See also **blow the gaff**

## **gaffer** *n*

a. a boss. A rustic term of address or descriptive word for an old man or master current in Britain since the 16th century, gaffer is a contraction of 'grandfather'. It is still widely used, particularly by working-class speakers.

*If I were you I'd go and fetch the gaffer; he's the only one who knows what's going on.*

b. an old man. This is probably the most common sense of the word in the USA, where it is also used to refer to a father (but rarely specifically a grandfather), and to a foreman as in the first sense.

c. *British* a police officer. The term was recorded among London criminals in 1993.

## **gaffle** *vb* American

1. to confound, defeat, cheat. A term heard in black street slang in the 1990s, perhaps derived from the use of 'gaff' in black slang to mean a swindler or crooked betting scheme.

*Hey, who gaffed my smokes?*

## **gag** *vb*

to vomit. A teenager's specialised use of the colloquial term for choking or retching. Its use is not entirely restricted to the speech of teenagers.

## **gaga** *adj*

senile, crazy, besotted. The word has come into world English from French, via upper-class or educated British English of the 1920s. In French it was probably originally a nursery word, influ-

enced by *grand-père* (grandfather) and *gâteux* (feeble-minded, infirm).

*'She's gone completely gaga over this appalling creep.'*

(Recorded, wine bar habituée, London, 1986)

**gage, gauge** *n*

marihuana or hashish. Gauge is a now obsolete slang term for an alcoholic drink and later also for a pipe or a pipeful of tobacco, coming presumably from the idea of a 'measure' (of something intoxicating). The survival of these senses in American and Jamaican English led to the use of the same word for cannabis.

*'You want to blow that gage this way? We'd love it.'*

(Chrissie Hynde of the Pretenders rock group, shouting from the stage at Glas-tonbury music festival, 25 June 1994)

**gagging** *adj* *British*

desperate (for relief, typically in the form of sex or alcohol). Like its synonym **choking**, gagging (literally, retching) became a popular vulgarism in all social circles during the 1990s. The phrase 'gagging for it' refers specifically and invariably to sex.

**gag me with a spoon!** *exclamation* *American*

a favourite **Valley Girl** expression of exaggerated or thrilled disgust or astonishment

*Wow, gag me with a spoon! How gross can you get?*

**galah** *n* *Australian*

a fool, a silly, empty-headed person. The galah is a species of Australian cockatoo which characteristically congregates with others and 'chatters'. A rural catchphrase in currency before World War II was 'as mad as a (gum)tree full of galahs'. The word is pronounced with the stress on the second syllable.

*'Let's forget the whole thing, I feel like a right galah.'*

(*The Flying Doctors*, Australian TV series, 1987)

**gallis** *n*

a group of females, girls. In black British speech since 2000 the term is the female counterpart of **mans**. It may derive from the Scottish **gallus**.

**gallus** *adj* *Scottish*

cheeky, assertive, **feisty**. A Scottish dialect term applied particularly to women, it

was used specifically to refer to TV presenter Muriel Gray in 1995. It is said to derive from the observation that someone was 'fit for the gallows'.

**gam** *vb* *British*

to perform oral sex. A shortening of *gamahucher*, a 19th-century French term for this practice which was adopted into the specialist jargon of prostitutes, pornographers and their customers. The word is now a rather old-fashioned working-class and schoolchildren's vulgarism.

**game** *adj* *British*

working as a prostitute, available for sex. The word in this sense is a back-formation from the earlier 'on the game'. It is used by **punters** and those involved professionally in prostitution.

*She's game.*

**game on!** *exclamation* *British*

a cry of enthusiasm or encouragement. Since the late 1990s the phrase has been used in association with competition and merrymaking, or as a euphemistic reference to sex. It was the title of a TV comedy series.

**game over!** *exclamation*

an assertion that an attempt has failed or that an activity has been definitively terminated. The expression, first featuring on pinball machines, has been a catchphrase since the mid-1990s.

**gamer** *n* *American*

an irritating, foolish and/or inept person. An expression used on campus in the USA since around 2000. The word first described a devotee of video games, thus someone despised by would-be sophisticates.

**gams** *n* *pl*

legs, especially a woman's legs when considered shapely. A jocular word which now sounds old-fashioned, unsurprisingly in that it originates in the medieval heraldic term for leg, *gamb*, which in turn comes from Old Northern French dialect *gambe* (modern French is *jambe*, Italian is *gamba*). Gams is sometimes thought to come from 'gammon', a word which features in several cockney slang expressions; it does not, but it is distantly related etymologically. It is still heard occasionally throughout the English-speaking world.

*'Oo Nudge, check out those gams.'*

(*Beach House*, US film, 1981)

**gander** *n*

a look. The word, which is usually part of phrases such as 'take/have a gander at this', comes from the bird's characteristic craning of the neck.

**Gandhi** *adj* See **Mahatma (Gandhi)****ganef, gonef, gonof** *n* *American*

**gang bang**<sup>2</sup> *vb* *American*

to take part in the activities of a street gang. A term from the 1980s which is a play on the well-known sexual term, and bang in the sense of gunshot. The word has been brought to public attention by TV documentaries describing the activities of such gangs in the era of **crack**. (The phrase is now sometimes shortened to **bang**.)

**gangbanger** *n* *American*

a loyal and committed member of a street gang. This 1980s term is used by and about the members of street gangs in Los Angeles. The bang in question is a gunshot; shooting a victim is often part of the initiation process.

**gangbusters** *n pl, adj* *American*

(something) superlative, excellent, impressive. A schoolchildren's word which is a shortening of the jocular adult phrase 'like gangbusters', meaning very strongly, energetically or dynamically. The terms originate in the violently heroic actions of the anti-mob law enforcers (nicknamed gangbusters) of yellow journalism and crime fiction.

**ganja** *n*

**gannet** *n* *British*

(Recorded, teacher, York, 1981)

**garbonzas** *n pl* *American*

*'What male priests can do – give choir-boys one up the Gary Glitter.'*

(Comedienne Jo Brand, Christmas 1994)

**gas** *n*

**1.** something which is exhilarating, stimulating or highly enjoyable. In the phrases 'it's a gas' and 'what a gas!', this word became one of the clich s of the **hippy** vocabulary. It probably originated in American black street slang of the late 1950s, inspired by the exhilarating effects of nitrous oxide (laughing gas), although the same word, with the same meaning and origin, already existed in Irish speech.

*'But it's all right now, in fact it's a gas...I'm jumping Jack Flash, it's a gas, gas, gas.'*

(*'Jumping Jack Flash'*, Rolling Stones, 1968)

**gash**<sup>1</sup> *adj British*

**1.** spare, available. This now almost obsolete use of the word was common in the armed services in the 1950s and probably has the same origins as the following senses.

**2.** attractive, impressive. The origin of this sub-sense of gash is obscure, but may be inspired by the attractiveness of 'spare' or available women. It was heard

among working-class Londoners until the late 1960s.

**3.** useless, worn out, broken. In this sense gash is still heard, especially in London, among workmen, technicians, musicians, etc. and in the armed forces.

*'There's nothing in there but a pile of gash tapes.'*

(Recorded, video technician, London, 1988)

The various meanings of the term probably all derive from a 19th-century adoption of the French word *g cher* (to waste or spoil) or *g chis* (mess) for rubbish on board ship. The meaning was ironically extended to cover extra portions, then anything spare. The original French is preserved in the third sense above.

**gash**<sup>2</sup> *n*

**a.** a woman or girl. A male term of sexual origin but not necessarily used with sexual connotations. The term existed in the argot of the streets in the 1950s, both in the USA and in working-class Britain (where it usually occurred in the phrase 'a bit of gash'). It was revived in the 1980s by aficionados of **rap** music and hip hop as a fashionable synonym for girlfriend. The origin of the word lies in **b**, which is unknown to many users.

**b.** a woman's genitals, or women as sex objects. The fearful or dismissive male image of a woman's external sex organs as a wound is an ancient one. Gash in this sense was a widespread vulgar euphemism in the 19th century.

**gasper** *n*

**1.** a cigarette. An ironic witticism from the days before the anti-smoking lobby, when shortness of breath was still a possible subject for levity. (It is probably unconnected with the more recent British clich  'gasping for a fag'.) The word was at its most popular in the 1950s in the language of **spivs**, **cads**, etc., but is not yet obsolete.

**2.** *British* a devotee of self-asphyxiation as a sexual stimulus. The term, from the lexicon of prostitution, received publicity at the time of the death in 1994 of the Tory MP Stephen Milligan while indulging in this practice (known in slang as **scarfing**).

**gassed** *adj*

drunk. A popular word among middle-class, middle-aged drinkers in the USA from the mid-1960s, gassed was also a synonym for tipsy in Britain after World

War I (probably from 'laughing-' rather than 'mustard-gas').

**gasser** *n*

1. something which is highly amusing or impressive. This sense of the word is inspired by the properties of laughing-gas and is used to denote, e.g., a good joke. This is an Americanism which is also heard in Britain and may have been coined there independently. It was first used before World War II, and is now heard particularly among teenagers.

2. *American* a depressing experience, person or situation. The word is rare in this sense, in which the image evoked is presumably of a poisonous, asphyxiating or anaesthetic gas.

**gat** *n*

a pistol, revolver. A piece of obsolete underworld slang from the early 1900s derived from 'Gatling' gun (an early revolving-barrel machine-gun). The word is occasionally resurrected by writers invoking the atmosphere of the gangster era, and was the trademark name of a cheap British air pistol of the 1950s.

**gata** *n* *South African*

**gay** *adj*

1. homosexual. In late-medieval English gay often had the sense of showy or affected as well as happy and light-hearted. In British slang of the 18th and 19th centuries it was a euphemism for sexually available or living an immoral life, and was invariably applied to women, usually prostitutes. In the early 20th century it was adopted as a code word by the British and American homosexual community, an innocent-sounding term which they could use of themselves and each other. The word had the secondary purpose of reinforcing homosexuals' positive perception of their sexual identity as opposed to the derisive or disapproving terminology of the heter-

osexual world. Gay was widely used in the theatrical milieu by the mid-1960s and, when homosexuals began to assert themselves openly in the later 1960s, it supplanted all alternatives to become the standard non-discriminatory designation.

2. bad, in poor taste, socially inept or unsophisticated. This non-homophobic use of the term has been in vogue among teenagers in the USA since the 1980s and in the UK since 2000. It was given prominence by its use in 2006 by British radio DJ Chris Moyles.

*That show was, like, so gay.*

*Don't be gay!*

**gaydar** *n*

the (supposed) ability to detect homosexuality in others. The blend of **gay** and 'radar' suggests an instinctive appreciation of invisible qualities.

**gaylord** *n* *British*

a very large number or quantity. An alternative form for **zillion**, **sqillion** and **bazillion**.

**gazing** *n* *British*

relaxing. A fashionable term among adolescents from the later 1990s, the word may be related to 'shoe-gazing', a phrase earlier used to describe the posturing of **indie** musicians who would slouch almost motionless while performing staring down at the stage.

**gazump** *vb* *British*

to cheat (in a house purchase) by raising the price at the last moment, after agreement has been reached but before contracts have been formalised. An old expression from the language of swindlers, revived to denote a practice which became widespread during and after the dramatic rise in property prices in 1972. The word formerly existed in several forms (gazumph, gazoomph, gazumf, etc.) and is from Yiddish.

**gazumped** *adj* *British*

drunk. An item of student slang in use in London and elsewhere since around 2000.

**gazunda, gazunder, gazunta, gozunder** *n*

a chamber pot. A perennial humorous euphemism heard in Britain and Australia, based on the fact that the un-

nameable article in question 'goes under' the bed. By extension these words are sometimes used to refer to other un-named gadgets, containers, implements or contraptions.

**gazungas** *n pl*

female breasts. A male term.

**gear**<sup>1</sup> *adj British*

excellent, absolutely right, first rate. An ephemeral vogue word that spread with the popularity of the Beatles and the 'Mersey sound' from Liverpool in 1963 to be picked up by the media (a fact which incidentally marked its demise as a fashionable term). It is related to 'the gear', meaning the 'real thing' or top quality merchandise.

**gear**<sup>2</sup> *n*

1. clothes, accessories. Now a widely used colloquialism, gear was slang, in the sense of being a vogue word in restricted usage, in the early 1960s, when its use paralleled the new interest in fashion among **mods**.

2. illicit drug(s). Since the early 1960s gear has been used by drug abusers, prisoners, etc. to denote, in particular, cannabis or heroin. In this sense the word is a typical part of the drug user's quasi-military or workmanlike vocabulary (**works, equipment** and **artillery** are other examples).

**geek**<sup>1</sup> *n*

1. *American* a freak, an insane or disgusting person. This old word originated with fairground folk to describe someone willing to abase themselves or perform disgusting acts, such as biting the heads

off live chickens, or a grotesque person exhibited for money. The word is now firmly established in teenage and school-children's slang, helped by the preponderance of geeks in the horror films of the late 1970s and 1980s. It may be derived from German, Dutch or Yiddish words for 'to peep', or from Dutch and English dialect words for a fool.

*'I'm gonna marry the geek tycoon.'*

(*Cheers*, US TV series, 1988)

2. a menstrual period. This use of the word, indicating distaste and/or fascination and used by both sexes, originated in the USA. 'On the geek' (having one's period), 'geek pains' (period pains).

In fact it probably originates in 'guiser' or 'gizer', a word for a masquerader or mummer who wears a (dis)guise. In the 19th century geezer could be applied to women. The word is also used in the USA, where it is regarded as rather colourful.

A cliché of the 'alternative society' of the early 1970s (members of rock groups, suffering from the excesses of social and professional life, typically spoke of going to the countryside to get their heads together). to obtain sexual satisfaction, achieve orgasm, ejaculate. An American vulgarism which became part of the **hippy** linguistic repertoire; some British users of the expression are unaware that **rocks** is a direct euphemism for testicles. (In American usage **nuts** or other terms could be substituted for rocks.) In the later 1970s the phrase was extended to mean to indulge oneself or enjoy oneself generally rather than in a specifically sexual sense. It now sounds dated.

*'But I only get my rocks off while I'm dreaming.'*

(Lyric from 'Rocks Off', The Rolling Stones, 1972)

**get on one's wick/tits** *vb* *British*

to irritate, annoy or vex. The 'wick' in question, unknown to many speakers, is a now rather archaic shortening of **Hampton Wick**, rhyming slang for **prick** (which is nowadays more usually shortened to **hampton**). In spite of the implied gender difference, both versions of the expression are used indiscriminately by both men and women.

*'It really gets on my tits when someone calls me a career woman.'*

(Recorded, female journalist, London, 1986)

language variety by school officials in Oakland, California, in late 1996.

**get the horn** *vb*

**get the hump** *vb* *British*

to become bad-tempered, morose or offended. This common expression is at least 100 years old. The origin of this sense of hump is not clear, although it may refer straightforwardly to a hunchback's deformity, to a back bent with care, a head dropped in gloom, or a traveller's burden. Many saloon-bar lexicologists have claimed that this word is an Arabic term of abuse, meaning 'pregnant camel', which was imported by servicemen who had been stationed in Egypt. The Arabic word does exist, but was probably noticed by British soldiers because the word **git**, a southern pronunciation of **get** (bastard or fool), was already part of their stock of vulgarisms.

a dull-witted, buffoonish or grotesque person. Gonk was services' slang in the 1950s for sleep (probably from 'conk out'), but the word was used as a trademark name for troll-like dolls in the late 1960s. It is from this source that the word as a term of abuse or contempt arose, just as **muppet** did in the late 1970s. Gonk was applied by schoolchildren to unfortunate fellow-pupils and by hospital staff and police to the mentally retarded.

**gonof** *n* *American*

unrestrained, hedonistic, extremist as a style, particularly a journalistic style popularised by the late Hunter S. Thompson in his articles for *Rolling Stone* magazine in the early 1970s. Gonzo is said to be an earlier **hipster** term made up of **gone** and the '-o' ending (with a median s or z to aid pronunciation), but is more likely to be a straightforward borrowing of the Italian *gonzo*, meaning foolish.

*'He was responsible for pioneering the style of modern journalism known as "Gonzo": the freewheeling and often self-indulgent method which has been copied by countless writers.'*

(*I-D* magazine, November 1987)

This sense was reinforced by a more circuitous route; the gypsies' language, Romany, also adopted the Indian word *gooli*, from which the English and Australian schoolchildren's word 'gully', for a marble, derived. **Marbles** itself was a common euphemism for the testicles.

*'The temperature further increased each time we dipped a deep fried fish ball into the special Oh' Boy sauce. "It's enough to take your goolies off", gasped my sister-in-law.'*

(Craig Brown, *Sunday Times* magazine, 8 October 1989)

**goomba, gumba** *n American*

a friend or associate. The word has been widely used, mainly by males, in many social contexts. It is often assumed to have an Afro-Caribbean origin, but one authority, Robert L. Chapman, derives it from a dialect pronunciation of the Italian *compare* (a 'comrade' or 'relation').

**goon** *n*

a. a foolish, clumsy or clownish person. This sense of the word was popularised in Britain by the zany radio series *The Goon Show* in the 1950s, and was earlier used in the *Popeye* cartoons for 'Alice the Goon', a huge dull-witted character. This in turn was probably influenced by a pre-existing word in British dialect meaning vacuous or simple (and distantly related to 'yawn'). Since 2000 the expression 'you goon!' has been used by British adolescents to indicate strong dislike or disdain.

b. a thug. The word was already being used in this sense in the USA in the late 1930s, typically of hired strike-breakers. It was later applied particularly to strong-arm men of low intelligence used by gangsters to intimidate or punish.

a black person. This racist term of abuse, a shortening of the adjective 'negroid', was particularly prevalent in police usage in London in the late 1980s. It also exists in American speech.

*'Travelling around – being an International Knee-grow (or a "groid" as the Met would have it) – thanks chaps!'*

(Lenny Henry, *Time Out* magazine, 26 July 1989)

### grolly n, adj

*British* (someone (usually a male) who is) dull, unattractive, 'frumpish'. An item of student slang in use in London and elsewhere since around 2000.

### grommet, grom n

*Australian* a young and/or inexperienced person. The term is used by surfers to denote novices, especially those under 16.

### gronk n

*British* an unattractive female. In armed-forces' usage since the 1990s.

### groove<sup>1</sup> n

**1.** An enjoyable experience or situation. An Americanism derived from the verb to **groove** (on) and the adjective **groovy**. The word was **hip** jargon of jazz musicians since the 1930s, later becoming part of the **hippy** lexicon and as such was also

heard outside the USA until the mid-1970s. It now sounds very dated.

### 2. See in the groove

### groove<sup>2</sup> vb

to experience a sensation of well-being, fellow-feeling, to feel in tune with one's surroundings. This well-known and characteristic **hippy** term originates in the slang of jazz musicians and others for whom being in the groove meant being at one with the melody, with one's fellow players, etc. (like a needle in the groove of a record). The word subsequently became a pivotal one for hippies, for whom it expressed a notion of enjoyable one-ness with one's environment that hitherto lacked a name. The expression was hackneyed by the time James Taylor was ridiculed by British rock journalists for his declaration at a mid-1970s concert at the Royal Albert Hall that he 'grooved to the vibes'. To 'groove on something' was another typical form.

*'Groovin' down a crowded avenue/ doin' anythin'/ we like to do.'*

(*'Groovin'*, recorded by the Young Rascals, 1967)

### groover n

**1.** a fashionable, dynamic, **hip** person. A 1960s formation from **groovy** and the verb to **groove**.

**2.** a tedious person, a **swot**. A probably ephemeral usage of the late 1980s, based on the newly pejorative teenage sense of **groovy**.

*'Charmless college swots are no longer known as "nerds" but are on the receiving end of a whole variety of new insults including "dweeb", "geek", "goober", "wank", "corn-dog", "goob-a-tron" and "groover".'*

(*Independent* magazine, 24 December 1988)

### groovy adj

**1.** satisfactory, satisfying, fine. A term of approval, sometimes in the form of a mild exclamation, from the **hippy** era. The adjective is derived from the verb to **groove**; originally an American term, it was adopted by British rock musicians, **beatniks** and, later, hippies from about 1965. Sounding risibly dated in the 1970s and 1980, groovy was revived first for ironic, then appreciative use from around 2000.

*'You see we have a lot of other groovy things going for us, and not just concerning music.'*

(Mick Jagger, *Record Mirror*, 26 August 1967)

**2. American** tedious, dull. A vogue word among adolescents from 1988. It is probably inspired by the ironic use of the dated term of approbation.

*'Another 1960s catchword, "groovy", has mysteriously turned into its opposite, now signifying stodgy or old-fashioned.'*

(*Independent magazine*, 24 December 1988)

**gross** *adj*

disgusting, distasteful. An Americanism of the mid-1960s, particularly popular among teenage girls. It is a fashionable usage of the standard term (from Latin *grossus*, meaning thick, via French and Middle English) in its sense of excessive, vulgar or obscene.

*'Like Joan's, Marlene's entire range of expression was pretty much limited to "far out", "super" and "gross".'*

(*The Serial*, Cyra McFadden, 1976)

**gross (someone) out** *vb* *American*

to disgust or repel (someone). The expression is normally used by a speaker to refer to their own distaste. It is a teenagers' term, popular since the late 1960s.

*'Would you move your socks. Like out into the patio or something? I mean they're really grossing me out.'*

(*The Serial*, Cyra McFadden, 1976)

**gross-out** *n* *American*

a disgusting act or situation. A favourite term of teenagers since the mid-1960s, usually said with excited or exaggerated distaste.

*'After totting up the score-sheet of exposed breasts ("garbonzas"), mutilations, rolling heads, gross-outs, auto-collisions, he awards a number of stars and puts his seal of approval on a film.'*

(*Observer*, 9 April 1989)

**Grosvenor Squares** *n pl* *British*

rhyming slang for *flares*, i.e. bell-bottom trousers. This phrase was an ephemeral youth term of the late 1970s used contemptuously of the (by then) unfashionable style and the remnants of the **hippy** movement who still favoured it. London's Grosvenor Square, the site of the US embassy, was the scene of peace demonstrations by students and hippies during the Vietnam war. A later, more

lasting, alternative piece of rhyming slang for the same item was **Lionel Blairs**, followed by **Tony Blairs**.

*'Belinda has discovered an important pair of "jeans" dating from the late 1960s. These are most certainly rare items, known by collectors as "Grosvenor Squares".'*

(Caption to cartoon by Posy Simmonds, *Guardian*, 1981)

**grot** *n* *British*

**a.** dirt, squalor, unpleasantness. Although this word was a back-formation from the adjective 'grotty', it no longer reflects that word's origin in 'grotesque'.

*I can't go on living among all this grot.*

**b.** a dirty, slovenly or disreputable person  
*He really is an awful grot.*

**grotty** *adj* *British*

unpleasant, revolting or distasteful. The word became extremely popular in the early 1960s and quickly passed into the middle-class lexicon where it is still found. Grotty, a typically Liverpudlian shortening of 'grotesque', became popular among young people, via the influence of the 'Mersey boom' in the early 1960s. It was adopted by some Americans in imitation of British usage, although an American form, **grody**, arose in the 1970s.

**grounded** *adj* *American*

confined to one's home, deprived of one's car keys. A popular parental means of chastising American teenagers. The image is of course that of a plane and/or pilot prevented from flying.

*'I can't go out tonight, I'm grounded too, you know.'*

(*The Stepford Children*, US TV film, 1987)

**group-grope** *n*

a group 'heavy-petting' session. A teenagers' term from the early 1960s. The phrase was later applied to full-scale **gang bangs** or orgies and, scathingly, to group therapy sessions.

**groupie** *n*

a girl who associates with or follows a musical group or star. The term originally assumed, and still implies, the sexual availability of the girl. The word and the phenomenon were publicised in the late 1960s, particularly in the semi-autobiographical book *Groupie* by the British writer Jenny Fabian in 1968 and the US film *Groupie Girl*, 1969.

**grouse** *n, adj* *Australian* (something) excellent, superlative. This use of the word probably derives from the notion of the bird as a delicacy; also used figuratively to denote an attractive woman since the pre-war period.

**grub** *n*

**1.** food. The word has existed with this meaning since at least the 17th century, inspired by the action of grubbing around.

*'At the weigh-in, Reynolds, in the red corner, weighed eight stone, two pounds.'* *'Give the poor sod some grub!'* (Adolf Hitler, *My Part in his Downfall*, Spike Milligan, 1971)

**2a.** *Australian* a dirty, slovenly person. This sense of the word was in British use until the early 20th century, but is now obsolete there.

**2b.** *British* a younger child, especially a grubby or defiant one. From the terminology of prep and public schools.

Both these senses of grub derive from the lowly insect larva.

**grues** *adj* *British* See **gruse**

**gruff** *vb, n* *British* (to) **fart**

**grundies** *n pl* *British and Australian* underpants, perhaps related to the earlier **undie-grundie**

**grunge** *n*

**1a.** *American* anything dirty, distasteful, squalid or sordid. This adolescent coinage is now heard in Britain.

*'For Martin Amis is the Wodehouse of grunge...'* (David Sexton, *Sunday Correspondent*, 17 September 1989)

**1b.** *American* a boring or irritating person or task

**2.** a genre of rock music and subsequently a youth subculture and fashion movement, originating in Seattle in 1992. The earlier senses of the word were applied to the heavy, fuzzy sound of the musical style and to the deliberately scruffy image cultivated by its adherents.

*'Sure, even before Kurt Cobain took his own life last year, whispers of grunge's death had been patently acknowledged.'* (*Guardian*, 25 March 1995)

**grunt** *n* *American*

**1.** a soldier, an army private. A derogatory term sometimes used ironically by the soldiers themselves, deriving from the supposedly low intelligence and pre-

dilection for grumbling of the humble enlisted man or conscript.

*'The grunts were conscious that they were involved in a drug-and-rock 'n' roll extension. Most of the combatants, black and white, came from the working class.'* (Michael Herr, *Observer*, 15 January 1989)

**2.** power. The term is used particularly by car enthusiasts to refer to engine power.

*'The engine size has gone up from 3.4 to 3.6 so there's plenty of grunt.'* (*Top Gear*, BBC 2 TV motoring series, 13 February 1997)

**grunted** *adj*

satisfied, gratified. A jocular back-formation from the standard 'disgruntled' (in which 'gruntle' in fact means grumble and is related to grunt). This rare word is typically used by educated speakers, saloon-bar philosophers and amateur or professional comedians.

*I was feeling extremely grunted following my success.*

**grunt-work** *n* *American*

menial or demeaning job(s)

*'You know, I used to do the grunt-work around here. Now I own the place.'* (*Double Cross*, US film, 1994)

*You wouldn't understand: it's a G-thing.*

**gub** *vb* *British*

**a.** to hit (someone), especially in the mouth or face

*The geezer kept at him and finally Mickey gubbed him.*

**b.** to defeat

*Our team got well and truly gubbed.*

Both senses of the verb derive from a dialect form of **gob** meaning mouth. The terms are heard particularly in the Scottish Lowlands and the north of England.

**gubbing** *n* *British*

a beating. The term, from the verb to **gub**, is almost always used literally, but can

also be used figuratively to mean a verbal attack.

**Gucci** *adj*

flashy, materialistic. The name of the Italian design company, usually employed with (mildly) critical intent, was adopted for use in street and, later, campus slang in the USA in the 1980s. Gucci shoes and handbags were part of the accessories favoured by devotees of the hip hop and **rap** subcultures. In the slang of the British Officer Training Corps the phrase **Gucci kit** is used to mock those who bring expensive luggage and accessories to training camps.

**guck** *n*

a sticky substance, muck. A mainly American nursery word blending 'goo' and 'muck'. Also spelt **gook**.

**guff** *vb, n British*

(to) **gart**. An old childish vulgarism which has been revived since the late 1980s as part of a vogue for pseudo-nursery slang among students and others.

*'The force of the gigantic guff you used has wrecked the entire drainage system.'*  
(*Johnny Fartpants*, *Viz* comic, April/May 1988)

**guffie** *n British*

a **gart**. A variation of **guff**.

**guinea** *n American*

an Italian. An offensive term, the origin of which is obscure, but which might derive from a proper name such as Gianni or Giovanni, or else by a tortuous process from the name of the African country (whence slaves were exported).

**gumby** *n*

an aggressively gormless, clumsy and/or dull person. From the name of a character personifying these qualities in the TV comedy series *Monty Python's Flying Circus* in the 1970s (in turn partially inspired by Peter Cook's earlier invention 'E. L. Wisty'). The personification and name were taken up by British and American teenagers in particular.

**gump** *n American*

1. a foolish, clumsy person, a simpleton. This widespread term pre-dated the 1994 film *Forrest Gump*. It originated in Yorkshire English dialect, in which it denoted a 'dolt' and was probably related to the colloquial 'gumption'.

2. a male prostitute, particularly a transvestite male prostitute, from the slang of Chicago police, recorded in the non-fic-

tion work *Pure Cop*, 1991. By 2000 it was also in use in the UK.

**gumshoe** *n*

a detective, private eye or plain-clothes police officer. The term was first used in the USA early in the 20th century and referred to the silent rubber-soled shoes that detectives supposedly wore, as opposed to uniformed police officers' heavy boots.

**gunge** *n British*

a sticky substance, muck. A slang term of the 1960s which has become a middle-class colloquialism.

**gung-ho** *adj*

excessively eager, enthusiastic and/or assertive, especially in the context of patriotism, jingoism and military aggression. This phrase was thought to be a Chinese rallying cry. (The words 'gung ho' were part of the Chinese title of an Industrial Cooperative and were assumed wrongly to mean 'work together'.) It was adopted by the Marine Corps and later for general American military use in World War II. It became known outside the USA to a limited extent during the Korean war and more particularly during the Vietnam war, now being so well known as to constitute a colloquialism rather than a slang term.

**gunk** *n*

1. muck, goo, sticky stuff. An American version of the British **gunge**, now heard in Britain, too. By extension it can also mean debris or rubbish.

2. *British* a school misfit. A schoolboy term reported to be in use in Eton College by *Tatler* magazine in September 1989.

**gunsel** *n American*

a. a callow youth

b. a gunman

The latter meaning is now more widely encountered, but the former, with overtones of punkishness, comes from the Yiddish slang for young man (*gantsel* or *ganzl*: 'gosling') and was the sense in which it was used in crime novels and *film noir* in the 1930s. The second meaning is based on a misreading of the first.

**guns of Navarone** *n pl South African*

female breasts. The jocular expression from the 1990s borrows the title of a 1961 film featuring giant cliff-top cannons.

**guppy** *n*

an environmental **yuppie**. A journalese coinage blending 'green' and 'yuppie', inspired by the popular tropical fish.

**gurgle** *n* *British*

(an) alcoholic drink. A fairly predictable euphemism, used typically by pub habitués and other hearty drinkers. It is probably influenced by **gargle**.

*'Fancy popping down to the Swan for a bit of a gurgle?'*

Imitative words used, mainly by children, since the 1950s.

**gurner** *n*

a tablet of **ecstasy**. The term was in use among UK students and others from the late 1990s.

**gurning** *adj* *British*

intoxicated by drugs or drink. The term was popular among adolescents and students from the later 1990s and refers particularly to someone feeling the ill effects of drugs. It is inspired by the verb to 'gurn' (from Middle English *girn*, a form of 'grin'), which means to pull grotesque faces.

*'Look at Gemma, she is properly gurning man...'*

(Recorded, art student, UK, 2002)

**gussied-up** *adj*

smartly dressed, neatly turned out. The term is common in American speech and is heard elsewhere. It may have originated in Australian usage and is possibly based on the names Augustus, Gus or Gussie as supposedly denoting an effeminate or fussy male.

*'Well, you're all gussied-up.'*

(Curaçao, US film, 1993)

**gut-rot** *n*

a cheap, low-quality alcoholic drink. This phrase is probably more widespread in Britain and Australia than the alternative **rot-gut**. Unlike rot-gut, it is occasionally also used to refer to food.

**gutsache** *n*

a miserable, complaining person, a **misery-guts**. The expression is particularly

popular in Australia, but is also heard in Britain. The image evoked is of someone perpetually suffering from dyspepsia or provoking indigestion in others.

**gutser, gutzer** *n* *Australian* See **come a gutser**

**guttled** *adj* *British*

**a.** devastated, deeply disappointed, saddened or shocked. A vogue word among working-class and lower-middle-class speakers since the late 1980s, perhaps encouraged by the over-use of the word by sportsmen and sports commentators. The concept has also been expressed subsequently by the alternatives **kippeded** and **filleted**.

*'24 hours before work on the commercial was due to start the answer came from Central. It was no. After all those years – just no. I was gutted.'*

(Paul 'Benny' Henry, *News of the World*, 8 January 1989)

**b.** used as an exclamation. By the end of 1990 the term had become a schoolchildren's catchphrase, used as a shout of victory or defiance, meaning 'I have humiliated you' or 'you have been shamed'. The form 'guttled out' is also heard.

**gutters** *n* *British*

an unattractive female. A synonym for **butters** and **dog**, in the jargon of clubland recorded from the early 1990s.

*'An out and out gutters.'*

(*Touch* magazine, September 1993)

**gutty, gutsy** *adj* *British*

bold, brave or 'bolshie'. A late 1980s coinage, popular in unsophisticated speech, which is a back-formation from the well-established colloquial sense of guts denoting courage.

**guv** *n* *British*

a respectful term of address to a male, in working-class usage. Said invariably by, as well as to, men, *guv* is a shortening of the almost equally widespread **guvnor**, meaning boss.

**guvnor, governor** *n* *British*

a boss, chief or leader. A descriptive term or term of address used by, to and about males in working-class speech. This widespread colloquial form of governor arose in the early 19th century and shows no sign of dying out. Governor, then spelt correctly, was recorded as a slang term for one's employer as early as 1802; Charles Dickens later

referred to it as a slang synonym for 'old man' or 'boss' when referring to one's father. In the 1980s it acquired a further nuance in the form 'the guvnor' as an acknowledged expert or leading exponent (for instance among rock musicians and fans).

*'I'll be alright 'cos I believe in the life here-after. I mean, Jesus was the governor wasn't he?'*

(East Ender, *Sunday Times*, 2 June 1968)

**gweeb, gweebo** *n* American

a stupid, dull person. A late 1980s variation on **dweeb**, coined by teenagers. It is probably unrelated to the British **grebo**.

**gwot** *n* American

a contemptible person. This high-school term of great distaste, heard since the late 1980s, is an invention, obviously influenced by other evocations of

unpleasantness such as grotesque, **weed, twat**, etc.

*'Oh God, not him, he's such a gwot.'*

(*Some Kind of Wonderful*, US film, 1987)

**gyppo, gippo** *n*

1. a gypsy

2. an Egyptian. A neutral rather than pejorative term in origin, gyppo was, and is, sometimes extended in uneducated speech to encompass other Arabs or Muslims.

*He's been on H for years.*

## habit *n*

an addiction, a 'drug habit'. A drug-user and law enforcers' term, sometimes extended to refer to more innocuous addictions.

*a \$100 a day habit*

## hack *n*

1. a journalist, professional writer. The word, inspired by the image of a worn-out workhorse, has traditionally denoted a disreputable, unprincipled, mercenary reporter or writer. Since the late 1960s, if not earlier, journalists have appropriated it to refer to themselves proudly rather than self-deprecatingly. Hack is still used in publishing as a simple descriptive term for a journeyman writer prepared to tackle any subject, as distinct from a specialist.

2. *British* an excessively ambitious student. In the slang of Oxford and Cambridge universities this is the undergraduate equivalent of the many schoolchildren's synonyms for **swot**.

3. a cough, particularly a dry, rasping cough. The word imitates the sound in question.

## hacked-off, hacked *adj*

annoyed, irritated, resentful. From the late 1980s, this phrase has enjoyed something of a vogue as a replacement for the better-known 'brassed-off', 'cheesed-off' and as a euphemism for **pissed-off**. It has been recorded in both the USA and Britain since the early 1950s.

## hacker *n*

1. someone who **hacks into** a computer system. The hacking in question is the evocation of a person chopping their way

through dense undergrowth to their destination. Hacker in this sense appeared as part of data-processing jargon in the early 1980s. Spectacular instances of the penetration of computerised systems brought the word to public awareness.

2. a taxi driver. A 'hackney cab' (the archaic version of taxi cab) takes its name from 'hackney', meaning a horse used for transportation. The short version of the phrase survives in this sense.

3. a clumsy worker. Here hack evokes chopping clumsily, rather than handling or cutting finely.

## hackette *n British*

a female journalist. A jocular term coined by journalists (on the basis of **hack**) and popularised in the 1980s by *Private Eye* magazine (who referred to society gossip columnist Lady Olga Maitland as 'the fragrant hackette') among others.

## hack into *vb* See **hacker**

## hack it *vb*

to succeed, to manage (in spite of adversity). A slang usage which remained relatively obscure until the early 1980s, since when it has become a common colloquialism. The original sense of hack is uncertain here; it may mean to drive, to strive or to chop (one's way through).

*The poor guy's finished, he just can't hack it anymore.*

## hagsay *n, vb British*

(a) **shag** in **pig Latin**, in secondary school usage

marihuana or hashish (cannabis), or another 'euphoric' drug. A light-hearted reference by middle-class soft-drug users to the hilarity induced by smoking, ingesting or sniffing the chosen substance.

**hairball** *n* American

an unpleasant and/or despicable person, by analogy with something vomited by a cat. The phrase owes its usage from the 1980s partly to the fact that, while offensive, it is not obscene and can therefore be used in television dramas and by children in the presence of adults.

**hairy<sup>1</sup>, hairie** *n* British

a bearded, long-haired person and, by extension, a **beatnik**, 'bohemian' or intellectual. A disparaging term typically used by middle-class speakers in the mid-1960s.

*Honestly, she spends her time with all these weirdos and hairies.*

**hairy<sup>2</sup>, herry, herrie** *n* Scottish

a female. The term is almost invariably pejorative and often refers to an unattractive or troublesome young woman. It is said to derive from the fact that the poorer female inhabitants of Glasgow in the 1930s and 1940s could not afford hats (then *de rigueur* for respectable women), thereby exposing their hair to onlookers.

*Mick was off wi' a wee herrie, so I'm told.*

**hairy-arsed, hairy-assed** *adj* British

wild, primitive, uncouth or rugged. A term in armed-forces and middle-class use which is often, but by no means always, appreciative in tone.

*'I am not some hairy-arsed Viking from the North bent on a bit of rape and pillage.'*

(John Ashworth, Director of the LSE, quoted in the *Independent*, 5 January 1995)

**half a bar** *n* British

before decimalisation in 1971 half a bar was ten shillings; since then it has meant fifty pence. The phrase is London working class or cockney. 'Bar' is an archaic term, still occasionally heard in London, coming from a Romany word (*bar* or *baur(o)*) meaning a sovereign and, later, one pound.

**half-arsed, half-assed** *adj*

ill-considered, incomplete, ineffectual. An expression which appeared in British and American usage around the turn of the 20th century. The term may originate in the notion of something which has less than a whole solid base or, according to a more fanciful theory, derive from a jocular deformation of 'haphazard'. In modern British speech

it is sometimes used as a more vulgar version of half-hearted (its more probable inspiration).

*'I'd rather write nothing than something half-arsed. There are far too many half-arsed books in the world.'*

(Novelist Dan Rhodes, interviewed in the *Guardian*, 9 April 2003)

**hamburger** *n* British

the vagina. A vulgarity in use among adolescents in the 1990s and listed in *Viz* comic in 1994. **Furbugger** is a (probably earlier) synonym.

**hammer** *n*

1. a male who behaves excessively, a heavy drinker. In this sense the word has been used by US college students and some British adolescents since 2000.

2. a gun. A term used by young street-gang members in London since around 2000.

3. See **put the hammer on (someone)**

**hammered** *adj* British

drunk. A fashionable word among mainly middle class young people since the 1980s.

*'Sloane Rebs all support Chelsea FC, and can be seen every other Saturday lunch-time "chugging brew" and getting hammered at any number of pubs in the Fulham Road, before charging down to Stamford Bridge for a "frightfully good game of footy".'*

(*I-D* magazine, November 1987)

*'First things first: I'm a bit hammered and a bit dyslexic.'*

(Posted on online student blog, October 2004)

**Hampsteads** *n* pl British

a short form of the cockney rhyming slang 'Hampstead Heath': **teeth**

**hampton, Hampton Wick** *n* British

the penis. Hampton Wick is a southwestern suburb of London, providing a rhyme for **prick**. In modern usage the short form of the phrase is usually preferred. Since the mid-1970s the term has been considered well established and inoffensive enough to be used in television comedies.

*'Then there were these telephone calls from...groupies. Somehow they'd learned a hell of a lot of cockney slang. They'd phone up and say "Hi Jeff Beck, how's your 'Ampton Wick?" Ridiculous!'* (Jimmy Page, *Oz* magazine, April 1969)

**handbag situation, handbags at ten paces** *n* British

a scene of provocation, a confrontation and/or feigned violence. These sarcastic phrases are typically used by football supporters to describe a scene in which players make a show of menacing or jostling each other. The reference is to a supposed brawl between middle-aged women.

*'A handbag situation – when players square up and scuffle (supermarket style) but the ball is too far away for them to kick each other...'*

(*Evening Standard*, 26 May 1994)

**hand-job** *n*

*He's been hangin' with the homeboys.*

**hang one on** *vb*

an alternative form of **tie one on**

**hang one on someone** *vb*

**hang-up** *n*

a neurosis, obsession. From the image of being hung on a hook. This **beatnik** term was seized upon by the **hippies** to describe the concerns of the **straight** world. Unlike many contemporary terms, hang-up has not dated significantly and is still in use today.

*He's got a hang-up about young chicks in uniform.*

**hank** *adj* *British*

extremely hungry. Recorded in London in 1994, the word is a shortening of the rhyming slang phrase 'Hank B. Marvin', meaning *starvin(g)*, borrowing the name of the lead guitarist of the *Shadows* pop group.

*'Can you hurry up, we're all bloody hank in here.'*

(Recorded, builder, southeast London, July 1994)

**hankie-head** *n*

**happening** *adj* *American*

exciting, stimulating and/or up-to-date. A fashionable term from the vocabulary of teenagers since the mid-1970s. It is influenced by the earlier black catch-

**happy slapping** *n* *British*

**haps** *adj* *British*

**hardass** *n* *American* See **hard-arse**

**hardball** *n* See **play hardball**

**hardcore**<sup>1</sup> *adj*

1. thoroughly criminal, deviant or sexually debauched. This is a specific sense of the colloquial meaning of **hardcore** (committed or uncompromising, as applied, e.g., to political beliefs or pornography). In the 1970s in the USA the word took on a narrower connotation in the jargon of the street and underworld, coming to mean irredeemably criminal. It was often used in this sense to indicate admiration or awe.

*the hardcore life*

*That guy's real hardcore.*

2. excessive, outrageous, relentless. This vogue term in adolescent speech in the later 1990s was often used to indicate appreciation or admiration. It is based on the earlier uses of the word to characterise pornography and rock music and, according to its users (one of whom defined the usage as referring to 'somebody who stays up all night, is violent, or drinks everyone under the table or takes loads of drugs'), its antonym is **light-weight**.

*a hardcore guy/scene*

*acting/playing hardcore.*

**hardcore**<sup>2</sup> *n*

a style of fast, loud, aggressive music, a development of **punk**. The term originated in America in the early 1980s, perhaps influenced by the adjectival use of **hardcore** to mean (uncompromisingly) rebellious, anarchic or criminal, spreading to Britain around 1985. The genre has since spawned subcults such as 'deathcore' and 'speedcore'.

**hard-off** *n* *American*

an unstimulating, disappointing person, experience or sensation. The term, coined by analogy with **hard-on**, is used by members of both sexes.

**hard-on** *n*

**a.** an erection. To 'have a hard-on' has been the most common way of expressing male sexual tumescence since the early 20th century. It derives from a slightly earlier adjectival form (to be 'hard-on') which follows a pattern of Victorian euphemism which includes 'fetch off' (to have sex or an orgasm), etc.

*'Don't go home with your hard-on/It will only drive you insane.'*

(Lyrics from 'Don't go home with your hard-on', Leonard Cohen and Phil Spector, 1977)

**b.** a sudden strong desire or affection. This specialised sense is a piece of **macho** business jargon from the late 1970s. It suggests an aggressive and uncompromising wish to acquire or cement relations with, e.g., a business partner.

*I think Ingrams is nursing a hard-on for United Mills.*

**hard word, the** *n*

**a.** a rejection or condemnation

*'It was the one thing that would bring Christina [Onassis] and her father together again. It was only a matter of time before Christina gave me the hard word.'*

(Joseph Bolker quoted in *Heiress*, by Nigel Dempster, 1989)

**b.** a difficult request or ultimatum, particularly a demand for money or sex

The phrase is normally part of longer expressions such as 'put the hard word on' or 'give someone the hard word'. The origin of the expression is obscure, but it is most prevalent in Australian use.

**harf, hark** *vb* *American*

to vomit. Echoic terms in use among students in 2003. **Hork** is a variant form.

**haricot (bean)** *n* *Australian*

a male homosexual. Rhyming slang on **queen**.

**Harold Ramp, Harold** *n* *British*

a rhyming slang term for **tramp** or homeless person, popular since 200. The proper name seems to be an invention for the purposes of the rhyme.

**harolds** *n* *pl* *Australian*

trousers or underpants. The etymology of this jocular usage is unclear: it is thought to originate in rhyming slang based on a real or imaginary proper name such as 'Harold Taggs/Wraggs': **bags**.

**harp, harpoon** *n*

a harmonica. Long known as a 'mouth harp' among black American blues musicians, the harmonica became known worldwide as a harp during the rhythm and blues boom of the early 1960s. Harpoon is a later and fairly rare elaboration.

*'Seriously he [Stevie Wonder]'s a knockout harp player, but this singing-only effort is a swinger.'*

(*Rave* magazine, March 1966)

**harpic** *adj* *British*

crazy, deranged. A pun which was popular for instance among schoolchildren in the 1960s. The person so described was 'clean round the bend', from the slogan of the Harpic toilet cleaning preparation which claimed in a TV advertisement to 'clean round the hidden bend'. The word was used on *Whacko!*, a parody of public-school life starring the late Jimmy Edwards.

**harpoon** *n*

**1.** a hypodermic syringe. Another example of the self-dramatising language of drug abusers.

*Compare* **artillery; shooting gallery**

**harry-** *prefix* *British*

a prefix used in public-school, university and armed-services' slang, almost always by males, to add jocular familiarity to a standard term. It is often used in conjunction with the **-er(s)** word ending. The **-er(s)** form is probably earlier; 'harry-'

seems to have originated in armed-forces speech pre-World War II.

*Fiona's harry-preggers again.*

**harry-starkers** *adj* *British*

naked. An upper-class or armed-services jocularity.

**harsh** *adj*

1. *American* unpleasant, inferior. An all-purpose negative, briefly a vogue term among Californian adolescents in the mid-1990s.

2. good, impressive. In this reversed or ironic sense, recorded among British **mods** of the 1960s and US high-school and college students of the 1990s, the word is one of a large set of near-synonyms including **savage**, **brutal**, **tough**, etc., which have been adopted into adolescent codes.

**hash** *n*

hashish (cannabis resin). Hashish from North Africa, the Middle East and the Himalayas is the most widely used form of cannabis in Britain, especially among white smokers, while **grass** (herbal cannabis) is more common in the USA. This shortened form of the word was probably the most widespread term in use among British cannabis smokers in the early 1960s. It was then largely supplanted by more colourful terms such as **charge**, **shit**, **dope**, etc.

*'Hash smoking is now a widespread social habit, almost in the same class as whiskey and soda.'*

(Letter to *Oz* magazine, June 1969)

**hassle** *vb, n*

(to subject someone to) bother, harassment, intrusive complications. This term had existed in American English since the 19th century; in the 1960s it formed part of the **hip** and counterculture jargon which became established throughout the anglophone community. In origin it is either a blend of 'harass' or 'haggle' and 'tussle' or 'wrestle', an anglicisation of the synonymous French verb *harceler* or, more convincingly, a version of **hustle**. In Britain hassle replaced hustle as a vogue term among **beatniks** and **mods** in about 1967.

**hat** *n* *American*

a condom. **Jim(my)-hat** is an alternative form.

**hatch** *vb* *British*

to drink, drain one's glass. A matter-of-fact beer-drinkers' term, derived from the exclamation 'down the hatch!'.

*'I think we'd better hatch these [beers] and get going.'*

**have a cow** *vb* *American*

to throw a tantrum, become extremely agitated. An expression used on campus in the USA since around 2000. The analogy is probably with the colloquial 'having kittens'.

**have a lend (of someone)** *vb* *Australian*

to deceive, bamboozle, lie about. The phrase is related to older locutions such as 'get a lend of/have a loan of' which refer to a dishonest individual taking advantage of another by borrowing from them.

*'You better be sure he's having a lend of you.'*

(Recorded, Melbourne bus driver to adolescent passenger, 1995)

**have a mare** *vb* *British*

to become angry, infuriated. The mare in question may be a shortening of night-mare, or the phrase is possibly a version of the American **have a cow**, evoking the

pain of giving birth to something enormous. The expression was in use among London teenagers in 2000.

**have a scene (with someone)** *vb*

to have a sexual relationship, have an affair (with someone). This phrase, now sounding rather dated but as yet lacking a more fashionable alternative, was the standard term throughout the late 1960s and early 1970s for an unmarried relationship. The expression, particularly popular with middle-class British **hippies**, avoided the juvenile, frivolous or banal implications of 'going out with' and the middle-aged overtones of the word 'affair'.

**have it away, have it off** *vb*

to have sex. These phrases, which have been commonly used in Britain and Australia since the 1940s, seem to derive from an earlier sense of the same terms meaning to succeed in stealing or succeed in accomplishing (something illicit). There is also significant similarity with 19th-century sexual euphemisms such as 'fetch off'. Both expressions are used by all social classes.

*'He later told me he'd had it off with a photographer the previous night and so wasn't much concerned with having it away himself.'*

(Joe Orton's Diary, 14 May 1967)

**have it (away) on one's toes** *vb* *British*

**have (someone) over** *vb* *British*

**a.** to trick, dupe, deceive. A working-class euphemism related to the colloquialism 'get one over on (someone)'.

*'Similar themes run through stories about social workers who are reckoned to be easily "had over" by "villains" and even by juvenile offenders.'*

(*Inside the British Police*, Simon Holdaway, 1983)

*'I was a young geezer and I was trying to have the police over.'*

(Vincent Hickey, released prisoner speaking on *Panorama*, 24 February 1997)

**b.** to seduce. A specialised sense of the preceding usage, invariably referring to a male 'taking advantage of' a female.

**have the bomb** *vb* *Australian*

to be exhausted. The phrase may be related to the use of **bombed**, meaning incapacitated by drink or drugs.

**have the decorators in, have the painters in** *vb*

to menstruate. A women's euphemism; both phrases are heard in Britain and Australia, the second version in the USA.

**have the hots (for someone)** *vb*

to nurse a sexual desire for someone, to lust after. The phrase is a variation of other, now obsolescent phrases (to 'be hot for', to 'have the hot ass', etc.) in which hot equates with sexually excited. First heard in the USA in the 1960s, the term quickly spread to other English-speaking countries.

**having it large, having it** *n* See 'avin' it large

**Hawaii** *n* *British*

a £50 note or the sum of fifty pounds. A raffish expression inspired by *Hawaii-Five O*, the title of an American TV crime series of the 1970s.

*I got him to do it, but it cost me a Hawaii.*

**hawk one's fork, hawk the fork** *vb* *Australian*

to sell one's body, engage in prostitution. A colourful vulgarism playing on the medieval sense of fork as the joint of the legs. In archaic British slang 'hawk one's mutton' and 'hawk one's meat' were terms with the same meaning.

**hay** *n*

**a.** a homosexual person

**b.** a heterosexual with **gay** mannerisms or appearance.

*Compare metrosexual*

**hazing** *n* *American*

teasing or humiliation, especially as part of a student initiation rite. An American version of the British 'ragging', but often with less light-hearted overtones. The word originated in naval use where it meant to oppress or harass. It probably has no etymological connection with other senses of haze, deriving instead from the archaic French *haser*, meaning to irritate.

**head** *n*

**1.** an aficionado of the drug-using counterculture, a drug-user. A word used by **hippies** to refer to themselves. The term originally simply meant a person or indi-

vidual in the slang of black jazz musicians and, later, white **hipsters**.

*'Those were the days of heads and freaks. And if getting high was where it was at, then Vietnam was the ultimate trip.'*

(Michael Herr, *Observer*, 15 January 1989)

**2.** a toilet. This is the singular form of **the heads**, the earlier designation for ship-board latrines.

### **headbanger** *n*

**a.** a devotee of heavy metal rock music who expresses excitement by frenzied shaking and even literal banging of the head in time to the music. The practice and term originated in the early 1970s.

**b.** a person who behaves in a relentlessly frenzied or dangerous way. This usage, deriving from the first sense of the term, usually expresses a certain shocked admiration. It has been current among British schoolchildren and students since the late 1970s, and is rapidly becoming 'respectable' by its use in the press and elsewhere by adults, typically with reference to political extremists.

*'I'd like to meet her father; he sounds like a right headbanger.'*

(Contestant on *Blind Date*, TV show, September 1989)

**c.** a madman, psychotic, **headcase**

### **headbanging** *adj*

**a.** shaking or banging one's head in response to rock music

### **headcase** *n*

an unhinged or deranged person. The word, originally an Americanism of the early 1970s, is typically used by teenagers to indicate awe or dismissive contempt; it rarely refers to the genuinely insane.

### **header** *n Irish*

an unhinged, deranged or unstable person. A version of the earlier **headcase**, recorded in 2004.

### **head honcho** *n*

**1.** the top person in a hierarchy, the most important boss

**2.** See **honcho**

### **headlamps, headlights** *n pl*

### **heads, the heads** *n pl*

a toilet, latrine. This plural form is now rather dated, except in armed-services' usage. It originated in naval terminology where it referred to the forward location of the privies on a ship. **(The) head** is more common.

### **headset** *n*

someone's attitude, way of thinking. This version of the colloquial 'mindset', punning on headset as, e.g., a virtual reality helmet, is heard in British campus slang. It may have originated in the jargon of psychotherapy.

(Recorded, postgraduate student, Warwick University, November 1995)

### **headshrinker, headshrink** *n*

a psychiatrist, psychoanalyst. A jocular term of the 1950s originating in the USA and reflecting the mild contempt, tinged with fear, felt towards the practitioners of these professions. Since the late 1960s both terms have normally been shortened to **shrink**.

### **heat, the heat** *n American*

the police. A black street form of the early 1960s (using the image of heat as pressure, oppression, something stifling) which was adopted by **hippies**. 'The heat's on the street!' was a warning among black communities and white activists alike.

*'Her man got took away by the heat/we're lost and incomplete.'*

('Endgame', song by Doll by Doll, 1979)

### **heater** *n American*

a handgun. A pre-World War II term which was appropriated by writers of crime fiction.

**heatseeker** *n* *American*

a dynamic person. The usage derives from the phrase 'heat-seeking missile' as used in news reports, etc., from the 1970s, and was heard in the 1990s in a professional context and among students.

**heave** *vb*

to retch or vomit. A literal, rather than metaphorical usage.

**heave-ho, the old heave-ho, heave-o** *n*

a rejection or dismissal. A worldwide English expression, typically referring to being jilted by a lover or being fired from one's job. It originates in the shouts of exhortation made by men engaging in physical exertion. It was a sailors' call in the 17th century.

*'It was evens...four men had broken her heart and she had given another four the old heave-ho.'*

(*A Touch of Spice*, British TV comedy, 1989)

**heaves, the heaves** *n*

an attack of retching or vomiting. A literal description of these spasms, although the expression is, by its context, considered slang.

**heaving** *adj*

**1.** *British* stinking. The term, in use in working-class speech in the north of England and Scotland, possibly evokes the notion of something so rotten as to be infested with maggots and literally pulsating, or else evokes the heaving (i.e. retching) of the person sensing the odour. Slightly less overwhelming experiences are evoked by **minging** and **howling**.

*I couldn't stay in the flat more than five minutes – it was fuckin' heavin' in there...*

**2.** *British, Irish* very crowded with people  
*It was heaving in there last night.*

**heavy<sup>1</sup>** *n*

a thug, **minder**, someone employed for their intimidating physical presence rather than their intellectual qualities. Originally an Americanism, the term has spread to world English via crime fiction and films. In current British colloquial speech it is sometimes used in the phrase 'come the heavy', meaning to act in a threatening manner.

**heavy<sup>2</sup>** *vb*

to intimidate, threaten or pressurise (someone). The verb forms (expressed as 'to heavy someone', 'to heavy someone into (doing) something' or to 'come

the heavy') postdate the adjective and noun forms.

**heavy<sup>3</sup>** *adj*

**1.** violent, oppressive, intimidating, powerful

**2a.** (of a situation) emotionally charged

**2b.** (of a person) difficult to cope with, having a powerful personality

These senses of the word, which were slang terms of the 1960s, have become common colloquialisms.

**hebe, heeb, heebie** *n*

a Jew. Based on the word Hebrew, these words originated in the USA. They have been heard in Britain and Australia since the early 1970s, sometimes jocularly lengthened to 'heebie-jeebies'. Hebe is less offensive than **yid**, **kike**, etc., but discriminatory nonetheless.

**hectic** *adj* *British*

excellent, exciting. A vogue term of approbation among adolescents and schoolchildren since 2000.

**hedger** *n* *British*

a rural vagrant. The term, from the lexicon of the homeless, travellers, etc., denotes a **crustie** who prefers to live rough in the countryside. It was first recorded in the early 1990s, although phrases containing 'hedger' – like 'ditch' for a scene of sordid or dishonest behaviour – were common from the 16th century.

**heel** *n* *American*

someone who behaves in an unworthy or base way. This use of the word appeared at the turn of the 20th century.

**heesh** *n* *American*

an altered pronunciation and spelling of **hash** (hashish). The term was used on the street in the 1960s and 1970s, since when it has been adopted by schoolchildren and **preppies** in imitation of more louche speakers.

**b.** an unattractive, clumsy or unsophisticated young woman

*I feel like such a heifer.*

**height** *adj* *American*

excellent, first-rate. A term of approbation from the hip hop youth culture of the 1980s, coined by black teenagers

(as a shortening of 'height of fashion') in the USA and spread with the music and dance trend to Britain where it enjoyed a brief vogue.

*'Don't reach for a tape measure the next time someone refers to your bullet-proof safari jacket as "height". They just mean it's cool.'*

(Charles Maclean on New York terminology, *Evening Standard*, 22 January 1987)

**heimie** *n*

an alternative spelling of **hymie**

**heinie** *n* *American*

the backside, buttocks. A coy diminutive of hind(quarters) or behind, although spelt as if it were Yiddish. The term is innocuous enough to be used by mothers and children.

*'He hit me daddy – and then he kicked me in the heinie.'*

(*Date with an Angel*, US film, 1987)

**heist** *vb, n*

(to commit) a robbery or hold-up. The word, redolent of American gangsterdom, dates from the first two decades of the 20th century. It is probably a variant form of **hoist** which, like 'lift', is a 200-year-old euphemism for steal, influenced by German and Yiddish speakers who would know the verb as *heisst*. Heist in its current usage usually suggests a carefully staged major robbery or criminal operation.

**helicopter** *n* *American*

a temporary visitor. In middle-class adult slang of the 1990s the word would be applied to a neighbour who drops in just to eat and then disappears or, as in the phrase 'helicopter-parents', by school staff referring to parents who stay only long enough for a brief consultation or complaint. In 2006 'helicopter parent' was in vogue with the slightly different sense of one who hovers constantly, prompting offspring and scrutinising teachers.

**helicopters, the** *n* *British*

a bout of dizziness.

See also **whirling pits, the**

**helioproctosis** *n* *British*

arrogance, overweening self-assurance. In medical slang the supposed condition in which 'the sun shines out of someone's **arse**'. Also known as **proctoheliosis**, from the Greek *helios* – Sun and *procto* – rectal.

**hella, hellov** *prefix* *American*  
very. A variant form of 'helluva' and 'hellish', influenced by the fashionable prefix **mega**. The first popular use of the device was in the combination 'hellacool', heard among American teenagers in 1987 and 1988. By 2000 the variant form *hellov* was also in use.

**hellacious** *adj* *American*

**a.** appalling, awful, horrifying. A hyperbolic term mainly used and presumably coined by educated speakers, this is an invented elaboration of 'hellish'.

*'Well, we made it but we had a truly hellacious flight.'*

(US visitor to the UK, June 2005)

**b.** impressive, excellent. The term, like **bad**, **wicked**, etc. has since the early 1980s been used by the young to indicate approval.

*Hey, they're a hellacious band.*

**hench** *adj* *British*

**heng** *vb* *British*

to stink. The term was posted on the b3ta website in 2004.

**Hennessey** *n*

**a.** alcohol

**b.** marihuana

For US **rappers** and hip hop aficionados the French cognac brand Hennessey became a generic term for (expensive) alcohol. Among black British adolescents in London in 2001, probably in ignorance of its origin, the word could be used of both alcohol and cannabis.

**hep** *adj*

aware, in touch with the latest (cultural) trends. An Americanism from the jargon of jazz musicians in the early part of the 20th century, *hep* was adopted by the white intellectuals of the **beat** generation in the mid-1950s and slightly later by teenagers. The word metamorphosed into **hip** (although the two terms co-existed in the early 1960s), which itself prompted the coinage of **hippy**. The precise dates and derivation of *hep* are somewhat obscure, although it almost certainly originates in a shout of exhortation or encouragement: either the noise used by riders, ploughmen, etc. to

horses, or (perhaps more likely, given the importance of marching bands in the early history of jazz) that used by parade leaders, drill sergeants, etc. to keep time. To 'get hep' or 'be hep' signifies to be working in harmony or in step.

### hepcat *n*

an aficionado of **jive**, jazz and other aspects of progressive popular culture of the 1940s and 1950s. Originally a black term combining **hep** (fashionably aware) and **cat** (a man), it was adopted by white bohemians, intellectuals and proto-**beatniks** and used until replaced by such terms as **hipster** in the 1960s. British jazz fans also picked up the expression and used it self-consciously or humorously until the mid-1960s.

### herb *n*

1. marihuana, herbal cannabis. This is probably the most common name for the drug in Caribbean use (usually pronounced **'erb**). The word has been given especial prominence since the early 1970s by reference to it (in popular songs and elsewhere) by Jamaican Rastafarians, for whom it is sacramental. White British cannabis smokers adopted the term as an alternative to the more commonplace **grass**, **bush**, etc. in the mid-1970s.

2. *British* a street urchin. A rare shortening of **Herbert**, typically pronounced **'erb**.

3. *American* a dupe. This term, heard in the 1990s in street argot, is probably taken from the proper name supposedly denoting a quintessential 'sucker'. **(H)herbert** is the British equivalent.

### herbal, herbals *n*

marihuana. The term is a predictable borrowing of one component of the official designation 'herbal cannabis' for the leaves and flowers of the plant sold and consumed loose, as opposed to compacted into hashish. It had partly supplanted the form **(h)erb** by the later 1990s.

*'Didn't any of them enjoy a lug on the herbals?'*

(*Q* magazine, March 1997)

### Herbert *n* *British* See **'erbert**

### her indoors *n* *British*

one's wife, female partner or boss. A London working-class circumlocution which was popularised by its use in the TV series *Minder* (broadcast between 1979 and 1988). The expression has

established itself as a facetious or ironic reference to an unseen (and by implication oppressive) female presence.

*'All right I'll stop off for a quick drink, but for God's sake don't tell her indoors.'*

(Recorded, teacher, London, 1988)

### Hershey highway *n* *American*

the anus. The expression, usually heard in connection with homosexual behaviour, uses the brand name of chocolate bars like its British equivalent, **Bourneville boulevard**.

### het *n*, *adj* *British*

(a person who is) heterosexual

*'They wouldn't understand, they're all hets.'*

*It's a strictly het affair.*

### hey diddle diddle *n*

an act of urination, a **piddle**. A piece of rhyming slang in use in London and Australia. (**Jimmy Riddle** is a more common alternative.) The words are from the first line of a well-known nursery rhyme.

### hickey *n* *American*

a. a love bite

*'I like your date, Sam. Be careful she doesn't lose a baby tooth when she's giving you a hickey.'*

(*Cheers*, US TV comedy series, 1986)

b. a spot or other skin blemish

### Hicksville *n* *American*

### H.I.D. *n* *British*

an abbreviated form of **her indoors** used by City financial traders during the 1990s

### hide the sausage/salami/weenie *vb*

to have sexual intercourse. Usually preceded by 'play', these phrases are adult imitations of baby talk, used facetiously since the late 1960s. The first version is British and Australian, the second and third American.

### hidren *n* *Caribbean*

a good friend. The term is an alteration of, or synonym for, **bredren**. **Idren** is an alternative form.

### high *adj*

intoxicated by alcohol or drugs, euphoric. The expression 'high as a kite' preceded the shorter usage which became widespread in the late 1960s.

*high on life*

*I feel like getting high.*

**high five (someone)** *vb* *American*  
to slap raised palms and fingers together as a ritual greeting. The custom and the expression appeared in the black community in the 1970s and was subsequently adopted by sportspeople and adolescents in general.

**high-hat** *vb* *American*  
to behave condescendingly or 'high-handedly' (towards someone). A fairly rare but long-established expression. The silent-film star Clara Bow claimed that more sedate members of the Hollywood community high-hatted her.

**high muckamuck** *n* *American* See **muckamuck**

**hike** *vb, n*  
(to make) a departure or journey

*Take a hike.*

*It's a bit hill-billy in here.*

**hilljack** *n* *American*

**hinky, hincky** *adj* *American*  
1. inspiring doubt or suspicion; of uncertain loyalty, origin, etc. This term of unknown derivation is roughly equivalent to the British **dodgy**

2. cute and/or neat

**hip** *adj*  
a. in touch with current trends, up-to-date, culturally aware. This word co-existed with, and then supplanted, **hep** in the 1960s in the argot of musicians, **beatniks** and other bohemians. It implied identification with an ideal of **cool** behaviour characterised by a nonchalant, enlightened detachment and a rejection of 'bourgeois' values.

*'Now, the truly hip stay at home with the baby and open a bottle of wine with a couple of friends; if they do go out, they dress down in T-shirts, jeans and sneakers.'*

(*Sunday Times*, 9 July 1989)

b. aware, 'in the know'. Hip, now divested of its counterculture overtones, is used in

popular speech to denote an unspoken understanding of a certain state of affairs.

*There's no need to give me all this bulls-hit, man. I'm hip to what's going down.*

**hippie** *n* *American*  
a term of address or endearment, usually for a male

**hippie lettuce** *n* *American*  
marihuana. A jocular term heard on campus since 2000.

**hippy, hippie** *n*  
a proponent and member of the 'alternative society' or counterculture movement which opposed orthodox bourgeois values during the late 1960s. The hippy movement was a much more widely based successor to the **hipster** and **beatnik** tendency, reaching public notice in California in 1966. By the summer of 1967 (known as the 'Summer of Love') manifestations of hippiedom had spread to Britain. True hippies never referred to themselves as such, but rather as **freaks** or **heads**; the term was originally a slightly condescending nickname (based on **hip** or **hipster**) bestowed by older musicians and other bohemians.

*'In punk's style degradation, there is still no worse insult than "hippie".'*

(*Observer*, 24 May 1977)

**hipster** *n*  
a culturally aware person, a **cool** bohemian. Predecessors to the **hippies** of the late 1960s, hipsters were the aficionados of jazz, Oriental philosophy, modernist art-forms, etc., who themselves succeeded the **hepcats** of the 1940s and 1950s. Hipster and **beatnik** are, in a historical perspective, almost identical, although the word hipster, unlike beatnik, was used by those in question to describe themselves. For the etymology of the word, see **hep**.

**hissie-fit, hissie** *n*  
a bout of hysterical anger, agitation, despair, etc. The term is used particularly by women and **gay** males and is obviously derived from the standard term hysterical. **Fanny-fit** is a similar phrase recorded in British speech from the 1990s.

*'Julian's having a hissie-fit.'*

(*Concierge*, US film, 1993)

**hit**<sup>1</sup> *n*  
1a. a puff on a cigarette or pipe containing marihuana or another illicit drug

*Give me a hit on that joint.*

*'It opens my head, opens my membranes. If you get a good hit, maybe you go comatose for ten minutes.'*

(Crack user, *Guardian*, 5 September 1989)

**1b.** a single dose of a drug, particularly LSD

Both uses date from the late 1960s and are still current.

**2.** a killing, assassination. An underworld euphemism from the USA since the early 1970s, used or understood all over the English-speaking world. The term invariably refers to a professional murder.

**hit<sup>2</sup> vb**

**1.** to assassinate or murder. The verb probably postdates the noun form.

**2.** *American* to serve a drink to. Usually in a form such as 'hit me again with one of those'.

**3.** to solicit money from, borrow from. A more robust version of the colloquial 'touch'. A racier and more recent *American* version is 'hit someone up (for)'.

*He hit me for \$20.*

**hit it vb**

to have sex. In this sense, the term was used among aficionados of London dancefloor culture in the 1990s. It is probably based on the notion of 'scoring a hit' or of 'hitting it off'.

*'When they all got together afterwards, I'm sure Max thought he was going to hit it with Lisa.'*

(Recorded, club habitué, London, April 1996)

**hit-man n**

a professional killer, a paid assassin. This euphemistic term from the jargon of the American underworld and law enforcers had spread to other English-speaking areas by about 1972.

**hit on vb American**

**a.** to 'chat up', attempt to seduce, accost sexually or romantically

**b.** to aggress, bully or criticise

**c.** to importune or beg for money

All senses of the term became popular in the 1980s, especially among teenagers. The unorthodox verb form probably originates from an immigrants' error, or a deliberate elaboration by black speakers.

**hit the bricks vb American**

a more fashionable version of the colloquial 'hit the road' and later 'hit the street' (to get going or appear in public).

Originally the phrase specifically referred to released prisoners.

**hit the hay/sack vb**

to go to bed, lie down to sleep. Both expressions have been widespread in English since the turn of the 20th century and probably originated in tramps' jargon.

**hit the toe vb Australian**

to depart, leave. Although the coinage seems transparent, Partridge records it as rhyming slang for *go* and attributes it to the **surfie** subculture.

**hit up vb**

**1.** to inject oneself with an illicit drug, particularly heroin. An *American* addicts' expression of the 1960s, since adopted elsewhere. It may be used intransitively as in 'she's hitting up', or transitively as in 'hit up some smack'.

**2. hit (someone) up** a racier version of **hit** in the sense of borrow (money) from

**hizzle n American**

a home, residence. A vogue term in **rap** and hip hop parlance since 2000, using the **-izzle** suffix.

**ho n**

**a.** a female prostitute, promiscuous and/or immoral woman

**b.** a female

The southern US and Afro-Caribbean pronunciation of **whore** became one of the best-known items of hip hop and **rappers'** slang, moving, like many pejorative terms in transgressive subcultures, to take on first ironic, then straightforwardly neutral or appreciative connotations before crossing over into the generalised slang of adolescents in all English-speaking areas.

**hobo n American**

a tramp or vagrant. The word is now a common colloquialism and no longer considered to be slang by most speakers. Authorities disagree on the origin of the term; it may be from a greeting ('Ho! Boy' or 'Ho Bro!') or refer to 'hoe-boys' (agricultural migrant workers).

**hobson-jobson n British**

the linguistic process whereby foreign words or phrases are anglicised for use by English speakers. The practice was particularly noticeable during the colonial era and World War I. Hobson-Jobson is itself a rendering of the Muslim religious cry 'Ya Hasan, Ya Hosain!' (praising or lamenting Hassan and Hussein, grandsons of Mohammed). **Plonk** (an alteration

of the French *vin blanc*) and hocus-pocus (from the Latin *hoc est corpus*) are examples of this type of pun or folk etymology.

**hock** *vb*

to pawn. The word comes from the Dutch *hok*, the literal meaning of which is 'hook'. In 19th-century Dutch slang, *hok* meant both debt and the clutches of creditors or the law, whence the English term.

**hockey, hockie** *n*

**a.** an act of (hawking and spitting)

**b.** a gob of spit

**c.** a piece of any disgusting substance, such as excrement. The term is imitative either of clearing the throat and spitting or of a choking reaction to a disgusting sight.

**hockshop** *n*

a pawnshop, pawnbroker's. An expression (from **hock**) used all over the English-speaking world.

**hog** *n*

**1.** a motorcycle. A word popular with American Hell's Angels of the late 1950s and 1960s and their British and Australian imitators. The word originally referred specifically and affectionately to Harley Davidsons, the Hell's Angels' preferred machines. (Hog is the standard American term for pig.)

**2.** *American* an angry or unpleasant woman. An Americanism which, unlike the similar **pig** or **dog**, has not been adopted in other English-speaking areas.

**3. PCP, angel dust.** This disorienting narcotic, phencyclidine, is an animal tranquilliser used on pigs, among other species.

**hogans** *n pl American*

female breasts. The word is probably an ignorant or facetious alteration of **ogens**.

*'Look at them hogans!'*

(*Herman's Head*, US TV comedy, 1993)

**hog-tied** *adj American*

incapacitated, rendered helpless. Hogs (the standard American term for pigs) were hobbled by having all four legs bound.

**hog-whimpering** *adj British*

**a.** abject, bestial, helpless

**b.** abjectly or bestially drunk

*Old Ollie was absolutely hog-whimpering last night.*

A colourful term popular among **Sloane Rangers** in Britain from the mid-1970s.

The word is probably an original public-school or army coinage, but may echo the many now obsolete slang terms containing the word 'hog' that invoke wallowing, snorting and other excessive behaviour: expressions such as **hog-wild**, 'hog-rubber' (a peasant), 'hog-fat' (a slovenly person), etc.

**hog-wild** *adj, adv*

uncontrolled, unrestrained in behaviour. A folksy Americanism from the turn of the 20th century which is normally heard in the form of 'go hog-wild' or 'run hog-wild'. (Hog is the standard American term for pig.) The term was immortalised as the title of a Laurel and Hardy short film in 1930.

**ho-hum** *n, adj, vb*

(something) dull, tedious, of mediocre quality or little interest. When used by Americans this expression usually denotes boredom, by British speakers it may rather suggest uncertainty. In American English the adjective occasionally doubles as a noun or, more rarely, a verb (meaning to be bored by or to declare something boring).

*a big ho-hum*

*They ho-hummed the lecture course.*

**hoick** *vb British*

to spit or to clear the throat and spit. The word is a more echoic version of the standard English 'hawk'.

*He hoicked over the fence into the garden.*

**hoist** *vb*

*He managed to hoist a couple of watches.*

**2.** *American* to raise and down a drink, usually beer. A masculine term with overtones of heroic or hearty drinking sessions. (The word may occasionally refer to eating, as in 'hoist some oysters'.)

*What say we go hoist a few?*

**hoisty** *adj British*

stolen, illicit, **bent** or **hot**. The term may have originated in TV scripts (based on the authentic slang senses of hoist and by analogy with **hooky**), rather than in underworld usage. It was featured in the Simpson and Galton comedy *Over the Rainbow*, 1993.

**hoity-toity** *adj*

affectedly arrogant, condescendingly superior. A 19th-century term which derives from the earlier 'highly-tighty' (meaning 'high and mighty') and is influenced by haughty.

**hokey** *adj* *American*

phony, counterfeit, of dubious quality, third-rate. A back-formation from 'hokum'.

**holding** *adj* *American*

*When they found him he was holding but they had to let him go on a technicality.*

**hold it down** *vb*

2. to shut up, keep silent. A term used by young street-gang members in London since around 2000.

**hole** *n*

1a. the anus or vagina. The word is barely a euphemism but a simple description of an orifice, in common use at least since Chaucer's *Canterbury Tales* (begun sometime in the later 1380s).

*'Dark was the night as pitch or as coal and at the window out she [Alison] put her hole.'*

(*'The Miller's Tale', Canterbury Tales*, Geoffrey Chaucer)

1b. the mouth. In this sense the word is often used by schoolchildren, especially in the phrase 'shut your hole!'.

2a. an unpleasant place. **Rat-hole** is a more vivid modern embellishment.

2b. a one-person cell, a place of solitary confinement

*'And some homeboys looking for trouble down here from the Bronx.'*

(Lou Reed, 'Halloween Parade', from the album *New York*, 1989)

**homegirl** *n* *American*

the female equivalent of the more common **homeboy**, recorded in black American speech as long ago as the 1930s. By the 1990s the term was often abbreviated to **homey**.

**home run, homer** *n* *American*

an instance of sexual satisfaction or conquest; full sexual intercourse. This adolescents' expression, inspired by baseball and typically used by males, denotes the successful culmination of a heavy petting session or attempted seduction. Partial success is referred to as reaching **first base**.

*Danny managed to score a home run.*

*He made a homer.*

**homey, homie** *n*

a shortening of **homeboy** or **homegirl**, which became popular in the 1990s and was also adopted by white adolescents to refer to their peers, first in North America and subsequently to a limited extent in the UK. When it first appeared approximately fifty years earlier the word was used by black American migrants as an affectionate term of address for anyone originating from the same home town or city

*'I'm square with my homeys...'*

(17-year-old black female suspected of the murder of another girl, quoted in the *Evening Standard*, 2 March 1997)

**homo** *n*

a male homosexual. This was probably the most common term in colloquial use among heterosexuals until the popular adoption of the non-discriminatory **gay** and its many pejorative alternatives in the late 1960s.

Compare **stromo**

**honcho** *n*

a boss, an important person. This word from American English of the late 1950s is not, as is often supposed, Hispanic in origin, but from the Japanese *hancho* meaning squad-leader; the term was adopted by Americans during the Korean War. It is now used typically in a business context, often in the phrase **head honcho**.

*'He [Reagan] was surrounded in his own White House by the portly honchos of the Democratic Party. The message was un-witting but clear: these are the people who count in Washington today.'*  
(*Observer*, 22 November 1987)

**honeypot** *n*

the vagina. A euphemism which was first recorded in the 17th century and is still employed today, particularly in the USA.

**honk**<sup>1</sup> *vb*

2. to stink. Related to the Liverpoolian **ronk**, this sense of the word is widespread in Australia and not unknown in Britain.

3. to drink (to excess). A middle-class and high-society term of the 1950s in Britain, now rarely heard.

See also **honkers**; **honking**

**honk**<sup>2</sup> *n*

1a. a stink, bad smell. A variation of **ronk**, perhaps influenced by **hum** and stink. A usage popular in Australia and, to a lesser extent, in Britain.

1b. an evil-smelling person or animal

2. an act of vomiting, from the verb to **honk**

3. a wild, noisy, drunken party. A British term of the 1950s, probably from **honk**, meaning to drink and **honked**, meaning drunk.

**honked** *adj* *British*

drunk. The 'honk' in question may echo the hooting and vomiting of drunkards, or else the gulping or quaffing. **Honking** and **honkers** are synonyms.

**honkers** *adj* *British*

drunk. A middle-class term perhaps originating in armed-services slang, where it has been heard since the 1950s. The **-ers** ending is typical of public-school and army expressions.

**honkies** *n pl* *American*

the backside or buttocks. An Americanism of the 1970s, derived from the colloquial verb to 'hunker down' (i.e. to squat), which in turn is related to the word haunches (in mock-rustic English, 'hunkers').

**honking** *adj* *British*

drunk. A middle-class usage, heard less often nowadays than in the 1960s, which may have originated in armed-services slang. The 'honk' denotes either drinking in gulps, the braying made by drunken revellers or, more probably, vomiting.

**honky, honkey, honkie** *n* *American*

a white person. A pejorative black term which became widely known in the early 1970s. The word's origin is unclear; it is said to be a deformation of 'hunk', meaning an immigrant (ultimately from 'Hungarian'), but may equally be inspired by the honking of pigs.

**hooch** *n*

alcohol, particularly illicitly produced alcoholic drink. The word originally referred to strong liquor made by the Hoochino Indians of Alaska.

**hood**<sup>1</sup> *n* *American*

a neighbourhood. This abbreviation, heard in the argot of black street gangs, was popularised by the title of the 1991 US film *Boyz 'N the Hood*.

**hood**<sup>2</sup>, **hoodlum** *n* *American*

a criminal, (small-time) gangster. The longer form of the word was in use in the USA by the end of the 19th century; hood became widespread from the 1940s. Many suggestions have been offered as to the origin of the terms. The least unlikely are: a deformation of an Irish surname such as Hoolahan; an altered **backslang** version of Muldoon; a corruption of 'huddle-'em', supposedly the cry of a gang of muggers; and *hodalem* or *hudilump*, respectively Bavarian and Swiss dialect terms for a wretch or naughty boy.

*'Go tell your hoodlum friends outside/ you ain't got time to take a ride.'*

(Lyrics to 'Yakety-Yak', by The Coasters, 1958)

**hoodie** *n* *British*

a young, usually male, hooligan. The term, in vogue in 2005, is the nickname for the hooded tracksuit top worn as a disguise and uniform.

**hood-top** *n* *Jamaican*

the tip of the penis. A vulgarism used as the title of a ragga song by Shabba Ranks in 1993; a female singer rapped with a song entitled *Hood Top Flop*.

**hoof** *n* *See iron***hooper** *n*

a dancer, particularly a chorus girl, tap-dancer or other hard-working professional dancer

**hoof it** *vb*

**a.** to go on foot, walk. In this sense the term has been used since the 17th century.

**b.** to leave, walk away. This sense of the verb dates from the 19th century and enjoyed a vogue in Britain in the late 1980s as a fashionable synonym for **leg it** or **hook it**.

**c.** to dance. A usage popularised in the context of pre-World War II Hollywood musicals. The predictable use of hoof (an animal's foot) is probably reinforced by the word's echoing of the panting of hard-working chorus dancers.

**hoo-hoos** *n pl* *American*

female breasts. The term, popular from 2003, may be an alteration of **hooters** or an arbitrary coinage.

**hook**<sup>1</sup> *vb*

**1.** *British* to steal. This euphemism, which is still in use in London working-class speech, is at least 200 years old. The 'h' is almost invariably dropped.

*She managed to hook a few videotapes.*

*'Barry's been out hookin' again.'*

(Recorded, street trader, Islington, London, 1986)

**2.** *Australian* to 'pick up' (a romantic partner). Unsurprisingly, the word has been used in this sense before, e.g. in 19th century England, where it referred to obtaining a potential marriage partner.

*'When you hooked Darcy last night, did you sleep with her?'*

(*A Country Practice*, Australian TV series, August 1994)

**hook<sup>2</sup>, hook up** *vb*

to have sex. A term used by young street-gang members in London since around 2000.

**hooker** *n*

a prostitute (invariably female). This American term has been imported into British and Australian usage since the mid-1970s. The origin of the word is stated authoritatively by many works of reference. However, they disagree. The most popular version cites the Civil War commander, General Hooker, who supposedly encouraged his men to frequent brothels. Another source gives Corlear's Hook, the name of a New York red-light district, as the inspiration for the term. In fact hooker seems to have been in use with its current meaning as early as 1845 (which invalidates the Civil War explanation) and may simply be a figurative use of the literal meaning as 'enticer', 'ensnarer', a sense which it has in Dutch slang (*hoeker* would be known to the large Dutch-American population of New York as meaning 'huckster', for instance). Hooker was obsolescent by the 1920s, but was revived in the late 1960s.

*a high-class hooker*

*down on the strip where the hookers hang out*

**hook it** *vb* *British*

to leave, run away. The phrase, a variant of 'hook off', an earlier and now obsolescent cockney expression, is over 100 years old and is also heard occasionally in the USA. The origin of the hook reference is obscure but may be related to its use to mean anchor (whence the expression to **sling one's hook**: to weigh anchor, although this etymology is disputed).

**hook (someone) one** *vb*

to hit, punch

**hooks** *n pl*

hands. For obvious reasons this metaphorical usage, associated with the images of 'getting one's hooks into' someone or something and to **hook** meaning to steal, has existed for several hundred years.

**hook up** *vb* *American*

to kiss, embrace and/or engage in sexual play, especially used of recent acquaintances. The phrase is used particularly by high school and college students.

**hooky** *adj* *British*

stolen, of dubious provenance, **hot**. A London working-class and underworld term from **hook**, meaning to steal. Hooky

is often pronounced with a dropped aspirate.

*'Last time I saw John 'e was sellin' 'ooky watches out of a suitcase down Brick Lane.'*

(Recorded, young male, London, 1988)

**hoolie** *n*

a wild, noisy party or celebration. The word is Irish in origin and is probably an anglicisation of the Irish Gaelic term *ceilidh*, meaning an informal gathering for folk music and dance.

**hoon** *n*

**a.** *Australian* a lout, hooligan or disreputable youth. Originally this word (of unknown etymology) signified a man 'living on immoral earnings'; its meaning has now been generalised to denote, for instance, a member of a gang of ne'er-do-wells.

**b.** *British* an obnoxious individual

**hoop** *n* *British*

the anus. The term has been used in this sense in the armed forces since 2000.

**hooped** *adj*

tired, exhausted. The reference is to **breathing out of one's hoop**, an expression, evoking a desperate need for extra oxygen, in army and Officer Training Corps usage since around 2000.

**hoop out** *vb* *American*

to play basketball. A high-school and campus term. To 'hoop down' is to play particularly earnestly or dynamically.

**hooptie** *n* *American*

an old and/or dilapidated car. The term is used in black speech and rap lyrics.

a drive-by murder, in the jargon of street gangs and rappers

**Hooray, Hooray Henry** *n* *British*

This pejorative term arose in the late 1960s to describe the more exhibitionist members of a social subgroup which was later anatomised under the name **Sloane Rangers**. Hooray was a later shortening. A version of this epithet first appeared in Damon Runyon's story *Tight Shoes*, in which a young man called Calvin Colby was described as 'without doubt, strictly a Hooray Henry'. In March 1990 Viscount Linley won libel damages from *Today* newspaper which had, among

more serious allegations, referred to him as a Hooray.

*'Hooray Henrys sometimes cruise down here just looking for an old codger to beat up. The last time they did it, we smashed up their flashy car.'*

(Homeless dossier, *Observer*, 6 August 1987)

The phrase hootchie cootchie first appeared in the USA in the 1880s, when it denoted a sort of belly-dance. The words may be a pseudo-exotic invention or a distortion of a now-forgotten foreign term.

**hooted** *adj* *American*

Hophead, dating from the 1940s, was one of the first words for a category of drug-users to use the '-head' suffix. By the 1960s the word was used mainly by law enforcers and other disapproving adults. It is now rare.

Although the **horn** in question is the penis (in an image which dates from the 18th century, if not earlier), the expression is now used by and about both sexes, sometimes in colourful phrases such as 'horny as a hoot-owl'. It is a 1960s successor of longer phrases such as to **get the horn**, to be **on the horn**, etc.

*'The total absurdity of it all; seven or eight able bodied policemen keeping 24 hour*

*watch on this horny endomorphic Jewish intellectual.'*

**1a.** unhealthy, sick. This conversion of the adjective ill has been a feature of many English dialects, particularly black and rural ones, since the 18th century.

**1b.** stupid, crazy, unbalanced

**2.** bad, **uncool**. This sense results from the appropriation of the older expression by black youth and later white emulators in the USA in the early 1980s. The word enjoyed a vogue in Britain in 1987 and 1988, having been imported as one of the buzzwords of the **rap** and hip hop cultures.

Indian hemp was a term employed by official and quasi-scientific authorities in the early 20th century (*The Charms of Indian Hemp* was the title of a 1907 publication). In the 1950s smokers of the drug also used the expression, but by the 1960s it was confined to judicial or journalese usage. The word cannabis largely supplanted the term in the 1970s.

**indie** *n British*

**a.** an independent record label (i.e. one not affiliated to one of the big business conglomerates known as 'the majors'), or

a record issued on one of these. The expression and the phenomenon date from the mid-1970s when small-scale record companies, boosted by the advent of **punk** rock with its do-it-yourself ethic, began to threaten the virtual monopoly of the majors. Indie had previously referred to independent films produced in the USA.

**in Dutch** *adj*

in trouble, in a vulnerable condition or delicate situation. This expression is a surviving example of the tendency (dating from the Anglo-Dutch wars of the 17th century) to use Dutch as a pejorative, as in 'Dutch courage', 'Dutch treat' or 'Dutch Uncle'. In Dutch appears to date from the beginning of the 20th century. An alternative etymology would derive the expression from American English in which Dutch refers to the habits of Dutch settlers and indicates peculiarity rather than any more negative qualities.

**in effect** *adj, adv* *British*

in action, at large or happening. A black euphemism used particularly by street gangs in the 1980s. The expression has been picked up by black and white schoolchildren.

**inked, inky** *adj*

in the early years of the 20th century, referred to as 'ink'.

**inky smudge** *n* *British*

a *judge*. An old item of rhyming slang.

**in like Flynn** *adj*

successful, in a very comfortable or advantageous position. A phrase which originated in the late 1940s and which shows no signs of disappearing despite the death of Errol Flynn, its inspiration. Flynn, the Australian hero of swash-buckling adventure films, was turned, especially in Australia and Britain, into a folk symbol of male sexual prowess by the press coverage of his trial on trumped-up statutory rape charges. The expression originally referred to success in seduction, but is now generalised to mean any impressive achievement, piece of opportunism or stroke of luck.

**inna** *adj* *British*

intrusive, 'nosy'. The term was recorded in West London in 1998. It may be related to the notion of 'in one's face'.

**innit?** *question form, exclamation* *British*

**a.** a question tag used to precede or to follow a statement

*"'Innit?" has now found its way to the beginning of sentences: "Innit we're going to McDonalds today?"*

(Roy Kerridge writing in the *Evening Standard*, 20 August 1993)

**b.** an exclamation of agreement

*We should split up and meet back here later.*

*Innit!*

Unlike some languages, English requires many different question phrases (aren't they?, can't we?, don't you?, etc.) instead of one (as in French *n'est-ce pas?*). Indian and Pakistani English has for many years used 'isn't it?' in this way, but in the early 1980s black British speakers appropriated the London working-class 'innit?' to serve as an all-purpose tag. The usage was imitated by white schoolchildren (leading black speakers to adopt 'in't it?', 'an't it?' and 'don't it?' as alternatives) and the word became detached from its context as a catchphrase.

**innit-crowd, the** *n*

a generic term for Asians or a specific group of Asians, from the colloquial term 'in-crowd' and **innit?** as a question tag characteristic of Asian speakers.

Compare **Asian massive**

**in shtuk/shtook/stook/schtuk** *adj* *British*  
in trouble. A very widespread expression which moved from a restricted demimonde and theatrical usage to common currency in the mid-1960s, partly through its use in the entertainment media. *Shtuk* in its various spellings is Yiddish for difficulties. 'In shtuk' often refers to financial difficulties.

**inside** *adj, adv*

communicating or getting on well. A piece of jargon from the world of computing, transposed by **yuppies** and others into a humorous (or straightforward) synonym for communicating (with) or relating to others.

**in the club** *adj* *British*

pregnant. This very common expression is in origin a shortening of 'in the **pudding**

**club**', which dates from the 17th century and is one of many folk expressions using baking metaphors in a sexual context. Pudding is an obsolete euphemism for semen and, more rarely, for the female sex organs.

**in the frame** *adj*

identified as a suspect in a crime. This example of police jargon, in use both in Britain and the USA, is derived either from the simple image of a portrait in a frame or from horse-racing parlance, in which it refers to the practice of displaying the numbers of the winning and placed horses in a metal frame at the end of the race.

more recent versions of **innit?**, recorded since 2000

**ite!** *exclamation* *See aiit!***item** *n*

1. a current (sexual) relationship, a couple. An Americanism of the 1970s which

Ixnay was heard, particularly in the USA, in the 1950s and 1960s, but is now virtually obsolete apart from in the phrase 'ixnay ofay', meaning no white people allowed. Like **nix** it can also function as a verb.

**-izzle** *combining form* *American*

2b. an informer

These British and Australian senses of the word have existed at least since the 19th century.

6. *British* the anus or buttocks. A rarer euphemism than **jacksie**, typically used in provincial working-class speech.

*a kick up the jack*

7. venereal disease. In this sense the word is common in Australia, although it is also heard in Britain. The origin of this usage is either in archaic rhyming slang, 'jack in the box': **pox**, or from the archaic use of jack to mean the penis or semen.

8. *British* **on one's Jack/Jack Jones**, rhyming slang for *alone*

## jack<sup>2</sup> vb American

to steal, rob, mug or hold up. The term, which became widespread in black street-gang jargon in the late 1980s, was probably a shortening of car-jack (itself modelled on hi-jack), describing armed holdups carried out on passing vehicles, a criminal fashion of the time.

*'You come down here, you goin' get jacked for sure.'*

(Recorded, black youth, New York City, May 1995)

## jack<sup>3</sup> adj Australian

adults as milder synonyms for **hacked-off** and **pissed-off**.

a **gang bang**. Recorded as an item of Soutwan slang in the *Cape Sunday Times*, 29 January 1995, the expression was previously heard in North American slang where it signified a mugging.

the **arse**, anus, buttocks. A fairly inoffensive working-class word, particularly popular in the north of England, jacksie (the form jaxy has also been recorded) dates from the 19th century. It is probably an affectionate diminutive form of the commoner nickname **jack**. Instances of the

word in American speech point to a recent borrowing from British usage.

(*My Beautiful Laundrette*, British film, 1985)

*'I've got ten minutes to spare. If you like I can redecorate the front room. A better idea still, why don't we shove a broom up my jacksie and I could sweep the floor at the same time.'*

an individual who is cleverer, more successful, more attractive than the rest. Originating in the working-class language of Liverpool and the surrounding area, the phrase had spread to the rest of Britain by the mid-1980s, probably due to the influence of television drama, films, fiction, etc. It can be used to express either approbation or contempt and is a modern example of the coining of male epithets with 'Jack' since medieval times.

*He's Jack-the-lad now, but he'll get his comeuppance.*

**jack up** *vb* *British*

to arrange, organise (especially at short notice). This sense of the phrase, used typically by working-class speakers such as police and gang members, suggests mounting an improvised operation or rigging up a contraption. It is presumably an extension of the specific use of the term as employed by car mechanics.

**jack (oneself) up** *vb*

to inject (oneself), usually with heroin, but possibly with amphetamines, etc. Apart from **shoot up**, this was probably the most common expression for the practice in the 1960s

American slang, whence it was re-imported.

**2b.** an inhalation of glue or another solvent. These invented terms are probably influenced by 'jab', **jack**, **jack (oneself) up** and **jagged**, as well as the first and more widespread sense of jag itself. aggregations of jazz musicians, typically playing 'after hours', later to rock and blues.

**2.** *American* to take part in a wild celebration, to 'party'. An extension of the original musical sense of the word.

**3.** *American* to have sex (with). This vulgarity usually occurs in the form 'jamming', and is heard typically among adolescents. Slang uses of the word jam as verb or noun play on its standard sense of crush(ed) or wedge(d) together. The additional sense of sweet confection also influences the use of the word in sexual euphemisms.

See also **jooky jam**

**4.** *American* to move quickly, leave hurriedly. This sense is of uncertain origin, but may refer to jamming the foot on the accelerator.

**jazz<sup>1</sup>** *vb*

1a. to talk deceitfully, bamboozle, **bullshit**

1b. to tease or provoke

Both sub-senses originated in black American slang and have, since the 1970s, become established in general American colloquial speech. In these meanings, **jive** is a synonym.

2. *American* to have sex with

A black slang term from the early 20th century, jazz is still used, albeit rarely, in this sense. The word jazz is said to be a New Orleans Creole patois term for sex, erotic dancing or music.

**jazz<sup>2</sup>** *n*

1a. empty, pretentious or deceitful talk

1b. provocation, obfuscation, nuisance

2a. stuff, unspecified things. Often heard in the dismissive phrase 'all that jazz'.

2b. ornamentation, decoration, showiness

The precise origin of the word jazz is uncertain. It was first used in New Orleans in the early years of the 20th century in the form *jass*, referring to music and dances inspired by African rhythms. The word also had sexual overtones in its Creole origin. It was later applied to improvised music and, later still, to other forms of exciting display.

**jeet** *vb* *South African*

to leave, hurry away. The term, recorded since 2000, may be a form of **jet**.

**jeeter** *n* *American*

a slovenly male. Jeeter Lester was a quintessentially uncouth rustic character in Erskine Caldwell's 1932 novel *Tobacco Road*; his first name became part of New York slang in the 1940s and subsequently spread to other areas. By the 1990s the term was still used, often as part of domestic slang.

**jeez!** *exclamation*

a less offensive form of Jesus, originally American, but now heard elsewhere

**jeff** *n* American

a white person. This sometimes pejorative black term is applied invariably to white males and is inspired by Jefferson Davis, the American president portrayed on banknotes, seen as a quintessential Caucasian.

A probably ephemeral invention by an anonymous wit in the tradition of a **monkey**, a 'pony', etc. It refers to the sum paid by the author and Tory politician Jeffrey Archer to Miss Monica Coughlan, a prostitute, to enable her to go abroad. This figure has also been referred to as an **Archer**.

**jelly roll** *n* American

**a.** a woman's sex organs

**b.** sexual intercourse

**c.** a woman seen as a sexual partner, sex object or sweetheart

**d.** a male lover or seducer

All these terms, popularised by their use in jazz, blues and rock music, derive from black American argot of the late 19th century. A jelly roll is literally a jam or Swiss roll. The triple metaphor implied in the first three senses derives from the rolling motion, the supposed resemblance of the

cake to the vulva, and the notion of 'sweet reward'. In the case of the fourth sense, which is less common but may historically antedate the others, the word represents the sweet element of 'sweetheart'.

**jerk** *n*

a foolish, despicable or obnoxious person. This American term crossed over into limited British usage during and after World War II. It is usually pejorative, although it is sometimes used with pitying or even affectionate connotations in American speech. The word seems to derive from **jerk off**, meaning to masturbate, and was probably originally a rural term for an idle or immature boy.

*'Poor Michael Reagan. As if it weren't bad enough being the son of Ronald Reagan, the guy happens to be a complete jerk as well.'*

(Nigella Lawson, book review, the *Sunday Times*, April 1989)

**jerkin' the gherkin** *n*

male masturbation. A rhyming witticism from around 1960, it replaced other rarer phrases employing the word **jerk** which had been in use since the mid-19th century, such as 'jerk the turkey', 'jerk the jelly', etc.

**jerk off** *vb*

to masturbate. An Americanism which has gained currency throughout the English-speaking world since the late 1960s when it became a **hippy** and student vogue term. The phrase existed in British English in the 19th century but was never widespread.

(*Oz* magazine, 1970)

**jerkwater** *adj* American

remote, insignificant. This expression does not, as is often thought, have any implication of urination or masturbation. It derives from the rural American practice of stopping trains in remote country areas to take on water, by pulling across a connection and sluice or lading from a trough.

*'When you work for a jerkwater [TV] station like this you learn to do everything.'*  
(*Prime Suspect*, US film, 1982)

**Jerry Springer** *n* British

a **minger**. The rhyming slang phrase borrows the name of the US talk show host.

**jessie** *n* British

a weak or effeminate man. A Scottish and northern English term of ridicule which has become widespread since the mid-1970s, partly due to the influence of comics such as the Scot, Billy Connolly. It is synonymous with **nellie** and **big girl's blouse**. There are two proposed derivations for the word; the first is simply a borrowing of the female name as a term of endearment, the second is a Biblical reference to 'a rod out of the stem of Jesse', giving rise to jokes on the subject of masturbation, etc.

*Oaw, come on you big soft jessie.*

*'Peelie [John Peel] blubbed throughout, the big jessie, and before long we all joined in.'*

(*Evening Standard*, 31 August 1989)

**Jesus** *n* See **creeping Jesus****jet** *vb* American

to depart, leave. A vogue term in black street argot and white campus slang since the 1990s. The word has been used figuratively to mean 'run fast' since the 1950s. **jigaboo, jiggaboo** *n* American

a black person. This was originally a racist epithet used by whites since the early years of the 20th century and later adopted in a gesture of defiance, like **nigger**, by blacks to refer to themselves. The black American author and academic Clarence Major derives the expression from the Bantu word *tshikabo*, meaning 'servile', and dates its adoption to the 17th century. In *School Daze*, a 1988 film by the black director Spike Lee, a fictional all-black southern US campus is riven between the 'jigaboo' faction who want the college authorities to sever links with South Africa, and the **wannabes** who are ambitious and apolitical and ape white pastimes and rituals.

**jig-a-jig, jiggy-jig** *n*

sexual intercourse. Since at least the 18th century there have been various slang terms for copulation using versions of the word jig. 'Jiggle' and 'jigger', for instance, are now archaic, but jig-a-jig has survived, probably because of its use by non-English speakers and

those imitating lewd invitations in broken English.

**jigger** *n*

the penis. An 18th-century word which is still heard, albeit rarely, mainly in the north of England.

**jiggered** *adj*

**a.** *British* exhausted

**b.** nonplussed, astonished. The usual form of words employed is 'I'll be jiggered!' as an exclamation of surprise on the pattern of 'I'll be blown!' or 'I'll be damned!'.

Jiggered in both the above senses probably originated as a 19th-century euphemism for **buggered**.

mundane jitters. It was first recorded in the mid-19th century.

**3.** *American* marihuana. A now obsolete usage.

**jive**<sup>2</sup> *vb*

**joanie, joany** *adj* *American*

old-fashioned, boringly outdated. A term from the **Valley Girl** lexicon of the 1970s. Its origins are obscure; it may reflect an original antipathy to an individual such as Joan Crawford or Joni Mitchell or may simply be a choice of Joan as a quintessentially older-generation first-name.

**joanna** *n* *British*

3. *American* an athlete or sportsman. This campus term can now also apply in some cases to sportswomen, in spite of its origin as a shortening of jock strap. Although it can be said affectionately and is a term used by sportsmen about themselves, the word often has overtones of excessive heartiness, brawn, aggression or lack of intelligence.

*'And the jock shall dwell with the nerd and the cheerleader lie down with the wimp and there will be peace upon the campus.'*

(*Observer*, 29 May 1988)

Joey is currently used by teenagers to refer to a timid or unpopular fellow-pupil or gang member.

**John Thomas** *n* *British*

the penis. A hearty and/or affectionate personification in use since the mid-19th century. It was used by D. H. Lawrence in *Lady Chatterley's Lover*, written in 1928 and first published in an unabridged edition in Britain in 1959. The phrase now seems to be used particularly by women.

1. the penis. Now predominantly a term used by black speakers and their imitators. It may derive from a 19th-century personification of the male member as 'Mr Jones'.

2. a drug habit

*They said they had to knock over a couple of stores for money to support their scag jones.*

**jooky jam** *vb*

to have sex. A phrase originating in black usage: *jook* is said to derive from an African word for *jab* or *poke*, used since at least the 19th century in the USA as a euphemism for sex. **Jam** is a slang synonym in its own right.

**Jordan** *n* *American*

an attractive male. The use of the term either refers to Michael Jordan, a US sports star, or to a first name thought to typify a rugged, glamorous male.

**josser** *n* *British*

a foolish or obnoxious person. Used as a less offensive version of **tosser**, the term was heard particularly in the north of England in the 1980s. The word, in fact, has had a separate existence since the 19th century, during which time it has designated a simpleton, a codger, a fop and a parasite, among other senses. (which may in fact derive ultimately from 'joist').

2. a cannabis cigarette, a **joint**. A fairly rare euphemism.

**job** *n* *British*

a menial or junior worker, a **gofer**. The word, of uncertain origin, was used in the City of London financial markets from the late 1990s to refer, often dismissively, to messengers and 'back-office' underlings.

**jubnuts** *n* *pl* *British*

**jug<sup>1</sup>** *n*

prison. This term from the beginning of the 19th century is usually part of the phrases 'in jug' or 'in the jug'. It probably derives from 18th-century dialect *jougs*, meaning stocks or pillory (from the French *joug*, meaning yoke), rather than from *jug* as a container of liquid. In modern usage the term is jocular.

**jug<sup>2</sup>** *vb*

**jumbo** *n*

1. *British* a fool, a slow, large and/or dim-witted person. A mainly working-class term, used for instance by the CID to refer to uniformed police officers. (Jumbo as applied to elephants derives from the African word *jamba*, anglicised as a name for P. T. Barnum's famous animal exhibit.) In this case the image of a slow, ponderous person is probably also influenced by **dumbo**.

2. *British* the backside, buttocks

3. **crack**. This is one of many probably ephemeral nicknames used on the *American* streets for this powerful drug. Jumbo in this sense was recorded in 1986.

**jump**<sup>1</sup> *vb*

to have sex with. This term implying male assertion, domination or assault has been in use in English since the 17th century. It is paralleled in many other languages (the French equivalent is *sauter*). The word is now often used by street-gang members, etc. to refer to indecent assault, influenced by the term's colloquial meaning of to attack unexpectedly.

**jump**<sup>2</sup> *n*

an act of sexual intercourse. This old vulgarism has been revived since 2000, and was defined by one user (a London student) as 'a comedy term for sex used to embarrass mates in innocent situations, i.e. "they're going for a jump" when they are just going for a walk'.

**jump in (someone's) face** *vb American*

**jump off** *vb American*

a. (of a person) to become aggressive, lose one's temper

b. (of a situation) to happen or escalate suddenly. The phrase probably arose in black slang where jump was a component in a number of obsolete expressions evoking rapidity and/or violence and the contemporary **jump salty**. **Step off** has similar meanings.

**jump salty** *vb American*

to become angry. A well-known item of black argot which was included in so-called **Ebonics**, recognised as a legitimate

language variety by school officials in Oakland, California, in late 1996. The phrase, which seems to date from pre-World War II **jive talk** (it was listed in Cal Calloway's famous Hepster's lexicon in 1938), became part of street slang in the 1970s. It is now in widespread use and is sometimes heard among younger white speakers describing a key behaviour pattern, also expressed by **jump off** and **step off** and the British **kick off**.

**jump someone's bones** *vb* *American*

**junk** *n*  
narcotics, hard drugs. The word (originally a Middle English term for nautical paraphernalia and detritus) was applied to opium in American underworld argot in the late 19th century. It was used to designate heroin by the first decade of the 20th century and has remained one of the most widespread synonyms for this and other addictive drugs.

*'Fuzz against junk.'*

(Title of book by the pseudonymous Akbar del Piombo, 1965)

1. a dilapidated car, **banger**

(*Independent*, 17 July 1989)

**jupe, juped** *adj* *British*

shamed, humiliated. One of many terms in the lexicon of teenage gangs which refers to respect or the lack/loss of it. The origin of the term is obscure, but it may be a deformation of the standard 'dupe', 'duped'. It can also be used as an exclamation of triumph or derision. The term was recorded in use among North London schoolboys from the early 1990s.

*You're juped!*

**1.** one thousand. This abbreviation existed in limited slang usage in the 1970s (based on the k of kilo), but it was its use in computer jargon (to mean a storage capacity of 1,024 bytes) which was first transposed to express sums of money when discussing fees or salaries. It then entered general colloquial use in the 1980s.

*He's on 60K a year.*

*and all he could do was go out and get kali*ed

Liverpool **mods** of the mid-1960s used to refer contemptuously to 'half-mast kecks', that is unfashionably short trousers which flap around the lower calves or above the ankles. **Strides** was the slang synonym usually preferred further south. **Underkecks** are, of course, underpants, worn by either sex.

**keek** *n* *British*

**keen** *adj*

excellent, great. A teenage vogue word in North America in the late 1950s and 1960s. **keister, keester** *n* *American*

the backside, buttocks, anus. This fairly common term is from Yiddish *kiste*, in turn deriving from Middle and Old Germanic *Kista* and from the Latin *cista*, meaning a chest. The Yiddish word denoted a portable chest and was adapted by English speakers to mean anything used as a travelling container, including a hawker's display cabinet, a satchel and a trouser pocket. The transition from these senses to a part of the human body is not completely clear; it has been suggested that it became an underworld synonym for the anus as

used to smuggle contraband across borders or into prison. The term is now rather old-fashioned but was used by Ronald Reagan in the late 1980s.

**Ken** *n* *American*

artificial blood, as used in the theatre and broadcast media. **Kensington Gore** is a more colourful(!) synonym.

**Kev** *n* *British*

a foolish and/or unsophisticated young male. Kev was the name of a truculent uncouth teenager played by the TV comedian Harry Enfield.

**Kevin** *n* *British*

a common, vulgar or boorish young man. This disparaging term from the 1970s and 1980s is typically used by snobs or wags to designate a working-class or lower-middle-class youth without taste or sophistication. The Christian name supposedly epitomises this social subgroup (the female equivalent of a Kevin is a **Sharon**). **Wayne** is sometimes suggested as an alternative for Kevin.

*That pub's full of Kevins, we never go in there.*

*Compare* **Kev**; **Brian**

**Kevinish** *adj* *British*

**khazi, kharzie** *n* *British*

a toilet. A term dating from the 19th century which has been in widespread use in working-class speech and in the armed services. There are many alternative spellings of this word, which is often assumed to be of African or Far Eastern colonial origin, perhaps by analogy with **khaki**. In fact it derives from the Latin word for house and its derivatives, such as *casa* in Spanish and Italian or *case* (meaning 'hut') in French. The word entered working-class speech in **parl-yaree**, the latinate jargon of tramps, peddlers and showpeople. **Khazi** was first thought suitable for broadcasting in the late 1960s and was popularised by such TV comedies as *Till Death Us Do Part* (written by Johnny Speight).

**Khyber** *n* *British*

the anus. From the rhyming slang 'Khyber Pass': **arse**. This London working-class expression was used in TV comedies of the late 1960s, trading on the fact that most viewers were only vaguely aware of its vulgar provenance. The word appeared in working-class speech after the Khyber Pass was introduced into the public perception by the Afghan wars of the later 19th century.

**kibitz, kibbitz** *vb* *American*

to pass comment on or offer (normally unwelcome) advice. The verb, which typically applies to an annoying onlooker at a card game or sports performance, comes from the Yiddish *kibitsen*, which in turn derives from *Kiebitz*, the German name for a lapwing, a supposedly raucous, insistent bird. The term is sometimes used to mean simply spectate without the pejorative overtones.

to relax. A vogue term (sometimes occurring in the tautological phrase 'kick back and relax/chill out') from the lexicon of black street gangs, **rappers** and, subsequently, surfers, skaters, etc., and adopted by British adolescents in the mid-1990s. It may be based on the notion of a motorcyclist 'throttling back' or on the image of kicking away furniture in order to stretch out.

**kickback** *n*

money returned or paid as part of an illegal or covert agreement. This term, which is no longer slang, originated in the pre-World War II American underworld, in which to kick back meant to pay a fixed part of one's income, or a fixed commission, in return for favour or protection. (The original image evoked was probably that of kicking back a portion of booty across a floor.)

**kick in** *vb*

to contribute, subscribe or pay up. The phrase is more popular in the USA than in Britain. It is presumably based on the image of a circle of gang members each kicking a portion of their booty into a central pile. It usually has overtones of illegal, or at least unofficial, activity,

such as bribery or a 'whip-round' to buy liquor.

*If everyone kicks in we should be able to afford to give her a decent sendoff.*

*Compare kick on*

**kicking** *adj*

excellent, exciting, powerful. A vogue term of approbation of the later 1990s, probably deriving from the phrase (it) **kicks the shit**.

(*Clueless*, US film, 1995)

**kicking it** *adj*

**kick out the jams** *vb* *American*

to 'let rip', get rid of all inhibitions and restrictions. A catchphrase in the rock-music world of the late 1960s, to which it was introduced by the rock group the MC5, who were allied to the anarchistic White Panther movement in Detroit. The phrase probably comes originally

from an instruction to remove the chocks or wedges restraining a dragster car or aircraft.

*The chick really had to kickstart the old goat.*

**kick the bucket** *vb*

to die. The phrase dates from the 17th or 18th centuries and the bucket in question may be either a suicide's prop or, more probably, a British dialect word (also in the form 'bucker') for the beam from which slaughtered animals were hung.

*'Ches hasn't been the same since his old lady kicked the bucket.'*

(Recorded, barman, London, 1988)

**kick the shit** *vb American*

to succeed, perform powerfully and/or admirably. The image is one of dancing or performing some other frenzied activity in a rustic setting; the phrase itself may be a back-formation from the adjective **shit-kicking**.

**kicky, kicky** *adj American*

exciting, stimulating, spirited. From the noun **kick** or **kicks** in the sense of excitement, the word has taken on an extra nuance of up-to-date or modish. (The comparative and superlative forms are *kickier* and *kickiest*.)

More specifically, kif may designate refined powdered hemp plants mixed with powdered tobacco or, as in the Berber stories of Mohammed Mrabet, may refer to uncleaned **grass**. The word's literal meaning is 'pleasure'. Many British drug users of the late 1950s and 1960s had their formative experiences of cannabis in Morocco.

(Recorded, petroleum engineer, London, 1987)

This word in its various spellings is now rarely used. It was nearly always restricted to working-class, underworld or armed-services slang, with an area of meaning now more often catered for by words such as **crumpet**, **tottie** or **rumpo**. The exact etymology of the term is obscure; it may be a 19th-century alteration of an Arabic word *keyif*, meaning sensual consolation. As the definition implies, the word is used exclusively by men.

**kifer, kyfer** *vb British*

to have sex (with). A rare, and now virtually obsolete, derivation of the nouns **kife**, **kifer**, etc. (meaning women or sex). The word was used exclusively by men.

**kike** *n*

a Jew. An old-fashioned racist term which some authorities derive from diminutives of the name Isaac (see **ikay** (**mo**)). Others, including the Yiddish expert and humorist, Leo Rosten, ascribe it to the practice of illiterate Jewish immigrants signing their names with a circle (*kikel* in Yiddish) on arrival in the USA. The word was adopted by British and Australian speakers and is still occasionally heard.

*'Take her, kike, she's all yours...a wop whore and a kike fag in a one-room office on the strip should go a long way together.'*  
(*Platinum Logic*, Tony Parsons, 1981)

**kiki** *n*, *adj* *American*

**a.** (a) bisexual

**b.** (a male) homosexual

A fairly rare descriptive term of uncertain origin. It may be a corruption of an Hispanic word or of he/she.

**killer, killer-diller** *n*, *adj*

(something) superlative. Killer-diller was an Americanism of the 1940s which was briefly in vogue in Britain in the late 1950s among **teddy boys** and bohemians. Killer was a popular teenage term in the USA, particularly among black youth in the 1960s and 1970s, spreading to Britain and Australia in the 1980s with disco and hip hop music, break dancing, etc.

*That band's a killer.*

*Man, that's a killer-diller car.*

**killfile** *n*

a computer program that allows Internet users to discard unwanted messages and exclude unpopular communicators, in the patois of **cyberpunks** and **net-heads**

**killing floor** *n* *American*

a place where sexual intercourse takes place. A phrase which figured in the lyrics of many blues and rock songs until the 1970s. The expression may originally refer to an abattoir, in which case the transposition to a sexual context is evoking brutal carnality. Alternatively, the sexual usage may arise via a sense of a place where punishing work or effort takes place. The phrase was used as the title of a Howling Wolf record of the early 1960s.

**kimshi, kim'chee** *n* *American*

trouble, difficulties. The origin of the term is uncertain.

**kink** *n*

**a.** a sexual deviant

**b.** a sexual perversion or perverse idiosyncrasy, an unhealthy trait

**Kinky** has been used since the 1920s for deviant, becoming a vogue word of the early 1960s. The noun form (borrowed as the name of the pop group, the Kinks) is a later adaptation, usually used to express mild disapproval. In colloquial speech the word has now acquired an innocent sense of a 'minor problem', flaw or irregularity.

**kinky** *adj*

perverted or perverse, unorthodox. In Britain in the early 1960s kinky became so widespread a vogue word that its meaning became diluted to denote merely fashionable or interesting. The term began in the 1920s or earlier as an underground euphemism for sexually deviant, and later became an ironic **gay** term of approbation. In spite of its suggestion of perversities such as fetishism, the word was inoffensive enough to be used in 'polite' company, hence its popularity in the first flush of sexual liberalism in the 1960s.

*'He looks at me like that, at least he's not kinky. That's a relief. He's too fat to be kinky, too fat and forty guineas at least.'*  
(*About Town* magazine, June 1962)

*'Kinky? Kinky is British for weird, you know what I mean?'*  
(*Harper*, US film, 1966)

**b.** a bed or place to sleep

*a kip for the night*

The word *kippe* meant a brothel in 18th-century English, probably deriving from a similar Danish word signifying a low-class inn. In the 19th century the word was extended to denote a **doss house**, and by the early 20th century was acquiring its modern meanings. The word is not unknown in the USA but is much more commonly used in Britain.

**Kipling** *adj* *British*

(*Guardian*, 26 September 1989)

**kipper** *n* *British*

the vagina. A vulgarism in use among adolescents in the 1990s and listed in *Viz* comic in 1994.

**kippered** *adj* *British*

devastated, trounced, **stitched up** or **gutted**. A working-class term which is currently in vogue among the fashionable young in London. The metaphor is 'dead, gutted, skinned and cooked', in the sense of thoroughly humiliated or taken advantage of, and is probably inspired by the earlier 'done up like a kipper'.

*'I wouldn't advise you to try doing business with them. I tell you, I was kippered ...'*

(Recorded, advertising executive, London, 1988)

**kiss** *n* See **French kiss**

**kisser** *n*

the mouth. A now rather dated word which probably originated among boxers and their entourages in the mid-19th century. Its meaning is occasionally extended to mean 'face', particularly as part of an expression such as 'a punch/smack in the kisser'.

*Wipe that silly expression off your kisser.*

**kiss-off** *n*

a dismissal. Originally an Americanism, the term has entered international English with the connotations of off-handedness, abrupt thoughtlessness or condescending rejection.

**kiss the porcelain god** *vb*

to vomit. A picturesque euphemism which is particularly popular among American college students; an alternative form is 'kneel to the porcelain god' or **drive the porcelain bus**. The image is one of bending over to kiss the feet of an idol. An attack of diarrhoea involves **riding the porcelain Honda**.

*'His idea of romantic chat was to say "get your kit off and come over here".'*

(Recorded, female social worker, London, 1987)

**kite** *vb*

*'You wouldn't try to kite a cheque on me, would you?'*

(*Budgie*, TV series, 1971)

**kite man/dropper/flyer** *n*

an issuer of worthless cheques. **Kite** has meant a dud cheque or other financial document for the past century. These terms, heard in all anglophone areas, usually refer to professional criminals who specialise in **kiting**.

**kiting** *n*

passing dud cheques. From the 1980s the term invariably described a deliberate criminal activity, although it could formerly also refer to issuing a cheque in the hope, possibly ill-founded, of finding the funds to support it. The word is part of international English.

**kit-kat shuffle** *n*

an act of female masturbation. The phrase was explained by the female standup comedian Jo Brand in her 1995 TV show. It occurs in the forms 'have a kit-kat shuffle' or 'do the kit-kat shuffle'.

**kitty** *n* See **dust kitty**

**klangered** *adj* *British*

drunk. An item of student slang in use in London and elsewhere since around 2000. It is probably an arbitrary coinage and unrelated to the Clangers, puppet characters in a children's tv series.

**(Calvin) Klein** *adj* *British*

*I'm feeling just Calvin Klein.*

**kludge** *n*

a cumbersome, overcomplicated system or situation. A piece of computer jargon, originating in the USA, blending 'clumsy' and 'sludge'.

**klutz** *n* *American*

a foolish, clumsy person. The word is from the Yiddish *klots* which literally means lump or block. (It comes from the German *Klotz* with the same meaning, which is related to the English 'clot' and 'clod'.) In the 1980s the word passed from being an Americanism into world English, particularly among adolescents.

*'As the incidents repeated themselves, Ms Reagan told her fellow workers and friends that she was a "klutz" who kept*

*banging into doors and falling down stairs.'*

(*Guardian*, 4 April 1989)

**klutzy** *adj* *American*

foolish and/or clumsy. A back-formation from the more common noun **klutz**.

**knack** *vb* *British*

to destroy, damage, mess up. This back-formation from **knacker** is common in middle-class and armed-forces usage, often in the form **knack it**.

**knacked** *adj* *British*

a variant form of **knackered** in all its senses. The term is heard particularly in the Scottish Lowlands and the north of England.

*She's feeling knacked.*

**knacker** *vb* *British*

to tire or exhaust. A back-formation from **knackered**.

*'I knacker myself at my job to keep her nice and warm in my house, with my kids and my dog.'*

(Divorced husband in cartoon by Posy Simmonds, *Guardian*, 1981)

**knackered** *adj* *British*

exhausted. This is not, strictly speaking, a slang word as it derives from 'knacker', denoting a worn-out horse or a slaughterer of horses, but has come to be seen as slang because of confusion with **knackers**, in the sense of testicles. The ultimate origin of the word is probably a dialect word meaning saddle-maker and based on a version of the word knock.

*'That washing machine's about knackered, gel, and we ain't even finished payin' for it yet!'*

(*Biff* cartoon, *Guardian*, 1986)

**knackers** *n* *pl* *British*

the testicles. Originally a dialect or rustic pronunciation of knockers (with the sense of 'clappers'), this is the form of the word which has predominated. In the 1950s and 1960s the word was often used in the form of an exclamation on the lines of the now more widespread **balls**, **bollocks** and **cobblers**, expressing defiance or contempt.

*'Your boyfriend burned his jacket*

*his ticket expired*

*his tyres are knackered*

*his knackers are tired.'*

(*Psyche sluts*, poem by John Cooper Clarke, 1978)

**knee-jerk** *n, adj*

(a person) displaying a reflex action, an unthinking, automatic reaction. This piece of American slang of the early 1970s has passed into general colloquial use since its adoption as part of disparaging descriptions such as 'knee-jerk liberal' or 'knee-jerk reactionary'. The expression of course derives from the doctors' testing of the patellar reflex, featured in cartoons and situation comedies since the mid-1950s.

**knees-up** *n British*

a boisterous party, celebration and/or sing-song. The popular cockney song 'Knees up, Mother Brown' probably produced the expression.

**kneetrembler, knee-tremble** *n British*

an act of sexual intercourse while standing up. A popular term in the 1960s, when furtive assignations outdoors were perforce more prevalent. The word was used in TV comedies such as *The Likely Lads*; it originated in the 19th century and is still heard.

*'Lugged their possessions from one digs to another in a cardboard suitcase, and, by way of recreation, enjoyed a quick "knee-trembler" up against a tree in a wilit local park.'*

(*Sunday Times* book review, 18 March 1990)

**knickers!** *exclamation British*

a cry of dismissal, defiance or contempt. This primary and junior schoolchildren's rude word has been adopted for humorous use by adults since the early 1970s. Some authorities claim that it was originally a euphemism for the more offensive **knackers**, but this seems unlikely in that underwear in itself is a favourite subject of prurient interest in pre-pubescent children. (Knickers is in origin a shortening of 'knickerbockers', meaning baggy knee-length trousers as worn in 19th-century Holland.)

**knob<sup>1</sup>** *vb British*

to have sex (with). This is a variant of **nob**, and is said by users of the word to be the incorrect spelling, in spite of the derivation.

*'If you were in with the Royal Family and you were a girl, you'd definitely want to knob Prince Andrew or someone.'*

(Boy George, *NME*, 4 June 1988)

**knob<sup>2</sup>** *n*

the penis. The word has been in use with this sense since the 19th century and was the most common vulgar synonym in Britain and Australia in the 1950s and 1960s, since when such words as **dick** and **prick** have increased in popularity.

**knobbo** *n British*

a fool, contemptible person. The expression, probably based on **knob-head**, was heard in the 1990s and quoted in the *NME*, a music paper.

**knob job** *n*

an act of (male) masturbation or fellatio. A vulgarism in use since the 1960s, **knob** being one of the commonest terms for the penis in Britain and Australia. Although knob alone is rare in this sense in the USA, 'knob job' is commonly heard there.

employed in this sense since the 19th century.

*They tried to convince her it was a fair deal, but she definitely got knocked.*

**5.** to steal. The term is heard particularly in the Scottish Lowlands and the north of England.

Knock here may originally refer to 'financial damage' or to the rapping of the table by a player who cannot take his or her turn in cards or dominoes.

See also **knockout**

**knocked up** *adj, vb*

**1.** *American* (to be) made pregnant. Amateur lexicologists never tire of pointing out the possibility of confusion between the American sense and the innocently colloquial British sense of waken (someone) up.

(*The World According to Garp*, US film, 1982)

**2.** *Australian* (to be) exhausted

**knocker** *n* *British*

**1.** a borrower of money, debtor, defaulter. The word is used to refer to personal debtors, those renegeing on hire purchase agreements or, by prisoners in particular, to those who **welch** on a bet – a sense in which the word was used in sporting circles before World War II. The origin of this use of knock is not completely clear; it may simply have the sense of to damage (financially), come from an obsolete word meaning to borrow, or may refer to some more specific practice such as rapping on a table to indicate one's inability to continue in a card game.

All these uses of the phrase are variations of the underlying meaning of 'to account for' or 'accomplish hurriedly'.

This includes the wearing of key rings, chains and specific colours of handkerchiefs in specific pockets, etc. The language is literally code in that it takes terms from standard English such as **straight**, **clone**, **boystown**, etc. and uses them ironically. refers to the typical behaviour of adolescent males in groups. It is inspired by 'male-bonding' expressions such as 'one of the lads' and the **Geordie** battle cry 'howay the lads!', but is more often used disparagingly or dismissively by women or more mature males. The term took on greater significance when it was applied to a social tendency among young adult males in the second half of the 1990s which involved celebrating, rather than disguising hedonistic excess, love of sport/cars/hardware, socialising in male groups, etc. The new 'laddishness' was celebrated in publications such as *Loaded* magazine and TV comedies such as *Men Behaving Badly*.

a female who behaves laddishly. The term became popular at the end of the 1990s and was the title of a reality TV 'makeover' series, *Ladette to Lady*, in 2005, in which ladettes were taught to be ladylike.

## **ladies who lunch** *n pl*

self-indulgent and/or pampered females. The expression originated in the late 1980s as a New York characterisation of wealthy, leisured wives of rich (working) husbands. Since 2000 it has been generalised to refer jocularly to any females thought to be indulging themselves.

## **Lady (Godiva)** *n British*

**lag<sup>2</sup>, lag up** *vb* *British*

**a.** also **lag up** to send to prison

**b.** to arrest

Both words, which are now rare, date from the beginning of the 19th century, when lag meant specifically 'to transport to a penal colony'. (An archaic meaning of the word was 'to carry away'.)

**lag<sup>3</sup>, lag on** *vb* *Australian*

to inform (on someone), to tell tales. A prisoners' and schoolchildren's word, this was British slang of the 19th century with the meaning of 'betray to the authorities'. It has survived in Australia but has not been heard in the UK since the turn of the 20th century. Its frequent use in Australian TV soap operas during the 1990s may result in the reintroduction of the term.

*'Don't worry - 'e won't go laggin' on us.'*  
(*Prisoner: Cell Block H*, Australian TV series, 1985)

**lagged, lagged** *adj* *British*

**lainie** *adj*

an alternative form for **laney**

**lair, lare** *n* *Australian*

a layabout, flashy young tough. This modern usage postdates an earlier sense of the word denoting an over-dressed, showy or beautiful man. Since the 1940s the term has been identified specifically with delinquent or disreputable young males. It forms the basis of many combinations such as 'come the lair', 'lair it up' or 'ten-cen lair'. Lair is based on a variant form of older British words such as **leery**, **leary**, etc.

**lairy** *adj*

**a.** flashy, showy, especially in an ostentatious, provocative or vulgar way. This term is especially popular in Australia but was also in use among British youth from the late 1980s.

Lallies was given exposure in the radio comedy shows *Beyond our Ken* and *Round the Horne* in the exchanges between Kenneth Horne and the **camp** characters Julian and Sandy, played by Kenneth Williams and Hugh Paddick. The word, of unknown origin, is still in limited use.

**lam** *vb*

1. to run away or escape from prison. The verb form is probably a back-formation from the phrase 'on the lam', although 'lam' originates in the verb 'lambaste', meaning to hit or beat.

2. *Australian* to have sex with. Like many of its synonyms (**boff**, **biff**, **bonk**, etc.), the term uses the notion of striking in evoking sex from the male perspective. Lam in its earlier colloquial sense derives from the Old Norse *lemja*, meaning to thrash.

**lamb chop** *vb British*

to inject a drug (e.g. heroin). The phrase is rhyming slang for **pop**.

**lame** *adj*

a. poor quality, disappointing, bad. The common colloquialism was adopted as an all-purpose teenage vogue word from the late 1980s.

b. unfortunate, unfair

Based either on the colloquial sense of lame meaning poor (as in 'lame excuse'), or on the image of a lame person who is unable to keep pace, the term has been generalised and intensified in the fashionable speech of adolescents since the 1990s.

**lame-arse** *n, adj British*

(*Evening Standard* magazine, May 1989)

**lamer** *n*

an inadequate person. An item of Internet slang, used for instance by **hackers** since the 1990s.

**lamp** *vb*

1. to look (at), to eye. The term, currently in vogue among fashionable adolescents in Britain, comes from a now archaic three-hundred-year-old use of lamp as a slang synonym for an eye.

2. *British* to hit, beat up or attack. A now dated usage perhaps combining elements of 'lam', in the sense of beat, and lump. The word was frequently used with this meaning in the 1950s.

3. *Australian* to have sex with. A synonym of **lam**, **slam**.

4. to relax. A contemporary synonym of **chill**.

**lancing** *n British*

having sex. A synonym is **jousting**. An item of student slang in use in London and elsewhere since around 2000.

**laney, lany, lani, lainie** *adj*

inferior, worthless. These recent vogue terms are probably deformations of the obsolescent American slang 'lane', which signified unsophisticated, provincial or naïve, and which was said to derive from the notion of a rustic living on a country lane. Originating in American adolescent speech in the 1980s, these variants were adopted by young British speakers in the 1990s.

**large it** *vb* *British*

to enjoy oneself, behave boisterously. Together with **large** and **give it large**, this was a vogue term among devotees of **rave** and **indie** culture in 1994, although it had been recorded in London usage in 1991 and may originally have been adopted from black American speech.

**large portions** *n* *British*

enjoyment. Recorded in the Midlands in 2005, usually in the phrase 'get large portions', this is an elaboration of the earlier slang sense of **large**.

**larrikin** *n* *Australian*

a ruffian, ne'er-do-well. The word has been in use in Australia since the mid-19th century and may be a native coinage or an imported British dialect term based on 'lark'. It is not usually strongly pejorative, having the sense of (fairly harmlessly) rowdy and cheeky.

**larrup** *vb*

to beat, spank, thrash. A word used by toughs in Australia but mainly by par-

ents to children in Britain, where it now sounds rather dated. The term may be a blend of 'leather' and 'wallop' or may be an attempt to imitate the sound of blows landing.

These terms, from code employed among adolescent gang members, were adopted as fashionable expressions among adolescents in general from the mid-1990s.

**lathered** *adj* *British*

drunk. The word may suggest the image of beer froth or saliva on the face of the drinker or may, like many similar terms, be based on the notion of beating/punishment as conveyed by the colloquial sense of 'lather', meaning to thrash. An item of student slang in use in London and elsewhere since around 2000.

'...topics that might appear unrelated to those not pleasantly lathered at this comfortably indecent hour.'

(*Q* magazine, March 1997)

(*Things To Do In Denver When You're Dead*, US film, 1996)

**lavender** *adj*

(of a male) homosexual, **gay**. A facetious term appropriated from the vocabulary of heterosexual mockers for use by the gay community itself; the colour and scent of lavender being thought of as quintessentially feminine and old-maidish respectively.

**lay**<sup>1</sup> *n*

**a.** a person viewed or evaluated as a sexual partner

**b.** an act of sexual intercourse

*He's not interested in her, he's just looking for a lay.*

These uses of the word spread to British English from the USA with the verb form during the 1950s and 1960s, becoming established by the early 1970s. In the first sense the word is nearly always used in combinations such as 'a good lay' or 'an easy lay'.

**lay**<sup>2</sup> *vb*

to have sex (with). The verb was absorbed into British English gradually during the 1950s and 1960s from the USA, where it had been current since the turn of the 20th century. The term implies sex from the male viewpoint but during the **hippy** era began to be used by women. The word is a development of the literal sense of to lay someone down and of the euphemistic 'lie with', meaning to copulate with, well known from its use in the King James translation of the Bible.

*'One time I thought she was trying to make me come lay her – flirting to herself at the sink – lay back on huge bed that filled most of the room, dress up round her hips.'*

(*Kaddish*, poem by Allen Ginsberg, 1958)

*If that joker doesn't stop mouthing off I'm going to be forced to lay one on him.*

**lay rubber** *vb* *American*

(*Sunday Telegraph* magazine, 15 December 1996)

**least, the** *n, adj* *American*

(something) very bad, disappointing, of the worst quality. This term, which is popular especially with teenagers, was probably coined in the 1970s as a humorous complement to the older **hip** expression **the most** (meaning superlative). 'The very least' is a stronger term.

*Boy, that movie was the least.*

**leather** *n* *British*

1. a middle-aged male jet-setter, an ageing sun-tanned playboy. This term was coined by the upper-class young and their imitators in the late 1970s to refer

disparagingly to the more prominent members of the international **white trash** frequenting ski resorts, yacht basins, etc. The word could occasionally be extended to apply to women too. Leather refers to the skin texture of the subgroup in question (perhaps compounded by their characteristic wearing of expensive leather clothes in the period in question).

2. a wallet or purse. A long established item from the underworld lexicon.

**leatherboy** *n*

drunk. An item of student slang in use in London and elsewhere since around 2000.

**lech, lech** *n* *British*

a. a carnal desire, brief sexual infatuation. This word, often used by women, was particularly popular in the 1960s and early 1970s in upper- or middle-class speech. It was often (and sometimes is still) used in the form 'lech, lech!' as a jocular or coyly prurient exclamation (although this more probably refers to the verb form to **lech after** or **lech for**).

*'Leched over by managers, stitched up by agents, girls in the music biz have traditionally paid a high price for succumbing to the lure of lures.'*

(*Ms London* magazine, 4 September 1989)

*He's nothing but a boring old lech.*

**leery, leary** *adj*

**a.** wary, suspicious, shy, cautious. This sense of the word is standard in all English-speaking areas.

**b.** *British* alert, clever, cheeky. This sense of leery is related to **lairy**, meaning both flashy and conceited.

**c.** *British* bad-tempered, sour

**d.** *British* untrustworthy, devious, cunning

These nuances of meaning within the same term are difficult to disentangle, given that modern usage is probably derived from two originally separate words: the archaic *leer*, from an Anglo-Saxon word meaning 'face' or 'cheek', and the obsolete dialect term *lere*, related to 'learn' and 'lore' and similar in meaning to 'know-how'.

**left field** *n, adj*

(something) unorthodox, bizarre, unexpected. An American usage which was picked up by British journalists, musicians, etc. in the mid-1970s. The term arises from an earlier colloquial expression 'out of left field', used to describe something startling or totally unexpected coming from an improbable source. The field in question is the baseball field and the left field, the area to the batter's left and beyond third base, is an area of the park which sees little action and from which the ball rarely arrives. The same thing can be said of the right field, however, and the choice of left perhaps has something to do with the overtones of unorthodoxy and radicalism inherent in 'left' in its political context, or simply by analogy with left-handed.

**left-footer** *n*

1. a Catholic
2. a homosexual

Both uses of the term have been heard since the 1960s and are derived from the

notion of abnormality associated with left-handed/footedness.

**legged over** *adj* *British*

**leg it** *vb* *British*

to run away, escape or leave. A working-class expression, formerly popular with police and criminals, which became fashionable in middle-class circles in the later 1980s in keeping with a tendency among **yuppies**, students and those in the media, among others, to affect cockney styles of speech.

*'His pals sprang him by blowing a hole in the wall. He then legged it to Amsterdam, where he changed his name.'*

(Charles Catchpole, *News of the World*, 5 February 1989)

**legless** *adj*

drunk. The word originally denoted someone who was helplessly or falling-down drunk; nowadays 'getting legless' can simply mean getting drunk. It has moved from being a raffish slang term to a common colloquialism over the last 25 years.

*'Same old story really: by 7pm she was wide-eyed and legless.'*

(Recorded, Financial Secretary, London, May 2005)

**legover** *n* *British*

an act of sexual intercourse (usually from a male perspective). The term originates in the expression **get one's leg over**, one of many 18th- and 19th-century phrases in which leg is meant both literally and as a euphemism for the parts of the lower body ('leg-business' is one archaic example). From the 1980s the satirical magazine *Private Eye* has regularly referred to a 'legover situation', a supposed middle-class code for copulation.

**2a.** a fool, embarrassed or discomfited person. To 'feel a lemon' is to be put in an uncomfortable or humiliating situation.

**2b.** also **lem**, **lemmo** an outcast, misfit, lonely person. In playground usage, from the earlier colloquial sense of an unfortunate person.

*I'm damned if I'm going to lie down for them.*

The word, coined in Britain in the early 1970s, refers to the activities of hangers-on, **gropies**, music journalists, etc., who attend receptions, parties, concerts, and other functions, usually financed by record companies. The origin of the word is obscure, it has been suggested that it is made up of the initials of 'least important guest' or is a blend of 'linger' and **gig**. Alternatively it may be an obscure vagrants' term from a dialect survival of the Anglo-Saxon *liegan*, meaning 'to lie'.

**lig<sup>2</sup>** *n* **British**

an opportunity for freeloading, a party, reception or other occasion when it is possible to enjoy oneself at someone else's expense. The word refers to the rock and pop-music world, and probably

postdates the verb form **lig** and the noun **ligger**.

**ligger** *n* *British*

a freeloader, hanger-on or gatecrasher at concerts, receptions, parties, etc., in the rock and pop-music milieus. The word is part of rock music's jargon and was adopted enthusiastically by journalists in such publications as *New Musical Express* in the 1970s to describe those enjoying themselves at the expense of record companies.

**lils** *n* *pl* *British*

female breasts. A vulgar schoolchildren's word of the 1950s and 1960s, which may be a shortening of an earlier term, 'lily-whites', or an invention, possibly influenced by 'loll' and 'spill'. The term was still in use in 2004.

**lime** *n*

a casual gathering of friends and family. A Caribbean usage later adopted by black speakers in the USA. The term is probably a back-formation from the noun **limer** and verb **lime**.

*This lime has no juice! [This gathering is dull.]*

**limer** *n* *Caribbean*

The word, used mostly in North America, is a shortening of 'lime-juicer', a usually pejorative term applied originally to British sailors who were issued with rations of lime juice as a protection against scurvy. **lingo** *n*

a language, jargon or way of speaking. The word, which often indicates puzzlement, amusement or xenophobia on the part of the speaker, obviously derives ultimately from the Latin word *lingua*, meaning tongue and language. The question as to which romance language inspired the modern slang word is difficult to resolve; it may be a corruption of the Latin word itself, or of Italian, Spanish (*lengua*), or Portuguese (*lingoa*). Provençal is the only modern language in which the correct form of the word is *lingo*.

*'Oxford University aristocrats disguise themselves with lingo like: "It's wicked, guy".'*

(*Evening Standard*, 16 June 1988)

a gentlemen's toilet. Originally a coy euphemism, used by some Americans in all seriousness, this expression has come to be used facetiously all over the English-speaking world.

**little number** *n* *See* **number**

**lit up, lit** *adj*

**a.** drunk. Originally an American expression, this phrase derives from the visible effects of alcohol (a 'glow', red nose, etc.) as well as the sensation of heat and the notion of alcohol as firewater or fuel. Embellishments of this usage are 'lit up like a Christmas tree' and 'lit up like a dime-store window'. The shorter form, lit, often signifies tipsy or merry rather than thoroughly inebriated.

*'As a whiskey salesman ... I'm often lit up by elevenses, loop-legged by luncheon and totally schnoekered by 6.'*

(Cartoon by Posy Simmonds, *Guardian*, 1979)

**1a.** drunk. An Americanism in use since the turn of the 20th century, now heard elsewhere in the English-speaking world. The original metaphor may refer to a burden or a large quantity being imbibed or, more dramatically, to the person being charged like a firearm.

('I Got Loaded', song recorded by Peppermint Harris, 1957)

**3.** *British* in the mood for sex or sexually aroused. The term, which refers to males only, is part of the language of adolescents in use in the later 1990s and was included in *Just Seventeen* magazine's 'lingo of lurve' in August 1996.

**loadsamoney** *n British*

(someone flaunting) excessive wealth; vulgar, conspicuous consumption. The eponymous comedy character Loadsamoney, created by Harry Enfield in 1987, was based on observation of a specific social group. This group comprises bumptious and philistine skilled and semi-skilled working-class young people from southeastern England, who use their comparative wealth – often gained as part of the black economy – to taunt and provoke those worse off than themselves.

*'Singer Mike Rivers has vowed never again to work for the Hooray Henry set – "I hate those loadsamoney thugs", he declared.'*

(*News of the World*, 29 May 1988)

The catchphrase 'loadsamoney!' was seized upon by journalists and by the

leader of the Labour opposition, Neil Kinnock, who in May 1988 accused the Thatcher administration of fostering an uncaring 'loadsamoney mentality'. In journalism 'loadsa-' was a vogue prefix in 1988 and 1989.

**b.** life. The more common sense of 'head' and the word 'life' itself are blended in the cockney oath 'on my mother's loaf'.

**lob**<sup>1</sup> *vb British*

to throw away, dispose of. A fashionable narrowing of the standard English meaning of the word, heard, particularly in the London area, since the beginning of the 1980s. A near-synonym to **bin**.

**lock** *n* *American*

1. a certainty, usually heard in the teenagers' phrase 'it's a lock'. This sense of the word is an adaptation of the colloquial phrase to 'have (the situation) all locked up'.

2. a person of Polish origin or descent. The racist term heard in the US is supposedly a corruption of **polack**.

**locked** *adj*

drunk. The term was recorded in Ireland in this sense in 1970 and was in use among London clubbers in 2002. It may be a short form of **bollocked** or **air-locked**.

**lock-in** *n* *British*

a drinking session taking place in a pub after official closing time. The practice, which usually involves locking out late arrivals, hence locking in the existing clientele, is illegal but sometimes unofficially condoned by local police. A more fashionable term is **afters**.

*They have a lock-in every Friday night.*

**locko** *adj*

angry. In use since 2000, the term probably originates in Caribbean speech. **Loops** is a contemporary synonym.

**loco** *adj*

**loke** *n* *American*

an unattractive thing and/or unattractive person. An expression used on campus in the USA since around 2000. The origin of the word is uncertain. It might conceivably be related to **local** as used in black British speech to denote a slovenly or promiscuous person.

**lollapalooza, lolapalooza** *n* *American*

something wonderful, outstanding, enormous and/or spectacular. This invented term is a synonym for words like 'whopper', **lulu** or **humdinger**, depending on the context. (Like 'whopper' it can sometimes refer to an outrageous lie.) The word is used in particular by schoolchildren and parents.

**lollipop** *vb* *British*

to inform on someone, betray (to the police). This is London rhyming slang for the term to **shop**. It is sometimes shortened to **lolly**.

*It wouldn't be like Smoky to lollipop his mates.*

*If you ask me they were lollied.*

**lolly** *n* *British*

money. A well-established, light-hearted word which was popular in the 1950s and 1960s and enjoyed a revival, significantly, in the 'Thatcher years' (the mid- and late 1980s), when many obsolescent euphemisms for money had received a new lease of life. It is said to originate in the Romany word *loli*, meaning red, used by gypsies to mean copper coins, and hence money in general. It is perhaps easier to derive the word from lolly, meaning sweet or candy, which itself originated in dialect with the meaning of tongue. (The sense of lollipop is later.)

*Lots of lovely lolly – that's what we want.*

**lombard** *n* *British*

a wealthy but stupid and/or unpleasant person. A late 1980s acronym from

'loads of money but a real dickhead', coined by **yuppies** to refer particularly to young moneymakers in the City of London, on the lines of expressions such as **dinky**, **nimby**, etc. The word's resonance is enhanced by the role of London's Lombard Street as the home of banking and insurance companies. (The historical Lombards were incidentally a 6th-century Germanic people who invaded northern Italy and became known as money-lenders.)

*'If they were not Sloanes or yuppies they had to be dinkies (dual income no kids), lombards (lots of money but a real dick-head) or even swells (single women earning lots of lolly).'*

(*Evening Standard* magazine, May 1988)

**long streak of misery** *n* *British*

a tall, thin person who may or may not be morose, gloomy or habitually pessimistic. This expression, like the less common 'long drink of water' and the more vulgar **long streak of piss**, is normally part of the working-class catchphrase announcement 'here he comes again – the long streak of misery!' which may indicate affectionate recognition or genuine dislike. The phrase can refer to women as well as men.

something or someone who wastes time  
*ain't no long ting*

**loo** *n* *British*

a toilet. The most widespread and socially acceptable euphemism for lavatory, privy, etc. This word, which became firmly established in the mid-1960s, is a favourite of amateur etymologists who derive it variously from *lieu* ('place', as in the French euphemism *lieu d'aisance*, 'place of ease'); from *l'eau* (water) or *gardez l'eau* (mock-French for 'watch out for water', said to be the cry of someone emptying a chamber-pot from an upstairs window into the street below in 17th-century British cities); from *bordalou*, a type of travellers' chamber-pot; from an abbreviation of the name of Lady Louis Hamilton (apparently affixed to a lavatory door) in Dublin in 1870; or, least convincingly of all, from leeward (the side of a boat from which one would logically urinate). It may be significant, however, that this rather refined euphemism for water-closet was not recorded until well after the battle of Waterloo and the naming of the London railway station.

*'And a bit about doing up the loo in chintz is sure to do the trick.'*

(*About Town* magazine, June 1962)

**loon**<sup>1</sup> *n* *British*

**a.** a bout of uninhibited and eccentric behaviour. In this sense the noun is derived from the following verb.

**b.** a crazy, eccentric or silly person. This word is, in its modern usage, a convergence of three sources. It is both a shortening of lunatic and the name of an American diving bird with a cry like a demented laugh. In addition, it probably also recalls an archaic Middle English and later Scottish dialect word, *loun*, meaning a rogue. The late Keith

Moon, drummer with the English rock group The Who, who was notorious for his wild and outrageous behaviour, was dubbed 'Moon the loon' in the late 1960s by acquaintances and the press.

**loon<sup>2</sup>, loon about, loon out** *vb* *British* to behave in an uninhibited, light-hearted and/or outrageous manner. The expression was coined at the end of the 1960s to describe a bout of high-spirited, anarchic play typical of those liberated from convention by drug use and/or progressive ideas.

**loony bin** *n*

a hospital for the insane or mentally sub-normal, an 'insane asylum'. The most common slang expression for such an institution in the English-speaking world since the end of the 19th century. In modern British parlance it is usually shortened to **the bin**.

**loony tune/tunes/toons** *n, adj*

(a person who is) mad or eccentric. Originally an Americanism derived from *Looney Tunes*, the name of a series of cinema cartoon comedies in the 1940s, the term has become fashionable since the 1980s in Britain and Australia.

*'I've been hit twice in the face this morning and now some loony tune is breaking up my aircraft.'*

(*The Flying Doctors*, Australian TV series, 1987)

**loose cannon** *n* *American*

a dangerously uncontrolled ally or associate; a member of one's team who is liable to run amok or cause havoc. This piece of political and journalistic jargon has become fashionable in the late 1980s. It continues the nautical image evoked by such vogue clichés as 'take on board'. In this case the person in question is seen as an unsecured cannon careering unpredictably and dangerously across a deck with the pitching of a ship. The phrase was used of General Haig during the Nixon administration and of Colonel Oliver North under the Reagan administration.

*'Danko is the perfect weapon Charlie – a loose cannon. If he helps us find Victor Rosla, great. If he screws up, breaks rules ... he's a Russian.'*

(*Red Heat*, US film, 1988)

**loot** *n*

money. A predictable extension of the standard English sense of booty. The word is an anglicised spelling of the Hindi word *lut* which sounds and means the same as the English derivation.

*'I tell you what though, Zackerman can recruit the very best because he's got the loot.'*

(*Serious Money*, play by Caryl Churchill, 1987)

**Lord Muck** *n* *British*

What is undisputed is that the expression originated in the USA.

**lose one's rag** *vb* *British*

**mockers** *n* *British*

misfortune, curse, frustration. An expression which is used by schoolchildren as an exclamation, sometimes of defiance, more usually in an attempt to put off or jinx an opponent in sports or games. Mockers probably derives via the Yiddish *makeh*, from Hebrew *makah*, meaning 'plague' or 'wound', reinforced by the English words 'mock' and 'muck (up)'. In adult usage the word normally appears in the phrase **put the mockers on**, meaning to ruin, thwart or jinx.

**mockie** *n* *American*

a Jew. A pejorative term of uncertain etymology; it may be related to the British **mockers**, but this cannot be demonstrated conclusively.

**mockney** *n* *British*

(a person) affecting a quasi-proletarian accent. The term arose in theatrical circles and was picked up by the media in the late 1980s to refer to attempts by upper- and middle-class speakers to modify their accents in order to render them more stylish and 'streetwise'.

**mod** *n* *British*

a member of a 1960s youth cult characterised by an obsessive interest in fashionable clothing, in the riding of motor-scooters and in listening and dancing to soul and ska music. The first mods, who began to gain prominence in 1962, referred to themselves as modernists, whence the more lasting epithet. The intention behind the word at this time was to distinguish these style-conscious, mainly working-class young people from the parochial or traditional appearance and attitudes then prevalent in Britain.

*'When we found out that mods were just as conformist and reactionary as anyone else, we moved on from that phase too.'*

(Pete Townshend, *Rave* magazine, February 1966)

**MoFo** *n* American

a disguised form of **motherfucker**, used in conversation and in journalese in the 1990s

**moggy, moggie, mog** *n* British

a cat. Moggy was originally a term of endearment or familiarity for any animal. In northern English dialect it was used to designate e.g. a mouse, calf or cat. The exact etymology of the word is uncertain; it may be from the Norse *magi*, meaning stomach, or from the use of 'Maggie' as a name for a pet.

*'Can I just inform you that in South Lancashire a moggy is not a cat, it is a mouse or a small insect. When will the rest of the country learn this?'*

(Reader's letter to the *Independent*, 4 September 1992)

**mojo** *n*

**a.** a magic charm, spell or influence. A black American concept, popularised elsewhere by its use in blues and rhythm-and-blues records of the 1950s and early 1960s. The word's origin is thought to be West African, but no specific source has been identified.

**b.** any un-named object; thingummy. The word can be used as a euphemism for anything, but is characteristically employed for sex organs or drugs.

**moll** *n*

**a.** *Australian* a prostitute. Moll, a short form of 'Molly' (itself a familiar version of 'Mary'), has been used to denote a woman of 'easy virtue' since at least the time of *Moll Flanders* by Daniel Defoe, published in 1722. This sense has survived in Australia, where a 'band moll', for instance, is a **groupie**.

**b.** *American* a woman, specifically a female companion. This sense of the word, familiar from its use in crime fiction as 'gun moll' or 'gangster's moll', is now outdated.

*That new video-game is mega-mondo.*

**mondo-** *combining form* American

an all-purpose combining word which in Italian and Spanish means 'world (of)' and in American English means 'a situation of...' or 'a state of affairs characterised by...'. The word is then followed by the defining word, usually with a mock-Latin 'o' ending as in 'mondo-sleazo', 'mondo-bozo' or 'mondo-cheapo'. This pattern derives from the 1963 Italian documentary film *Mondo Cane* (translated as 'A Dog's Life') which acquired cult status and inspired first intellectual wits and later college students and **Valley Girls** to coin similar phrases.

**Monet** *adj* American

attractive at a distance but not when seen at close quarters. This vogue pejorative term from the language of Californian high-school girls in the 1990s (it features in the 1994 US film *Clueless*) is applied to the appearance of persons and occasionally objects. It is based on the notion of Impressionist paintings.

*'To her character Cher Silverstone would have therefore been a "Monet" – which means OK from a distance but a mess close up.'*

(*Sunday Times* 'Style' magazine, 22 October 1995)

What is known is that it has existed in various spellings since the mid-19th century and that it was first used by tramps, vagrants and other 'marginals'. The three most likely derivations are from 'monarch', 'monk' or 'monogram', but none of these is provable nor is there any clear connection with the (Saint's) name 'Monica'.

*'Christened by his father – a heavy duty John Wayne and Cowboy fan – with the name WAYNE WANG. Would this split-cultural, cartoon moniker destine the baby to grow up, leave Hong Kong and end up in California directing an all-American film ... and a violent one at that?'*

*'My client is not the kind of man to be satisfied with a mere monkey for his services.'*

(Arthur Daley in *Minder*, British TV series, 1987)

2. an inferior or menial. Inspired by such images as the organ grinder and his monkey, the word is used to refer dismissively or contemptuously to underlings or errand-runners, etc.

(Recorded, accountant, London, 1986)

**munting toad** *n* *British*

a very ugly or unattractive female. The phrase is an elaboration of the more widespread **munter**.

**muppet** *n* *British*

a retarded, incapacitated or grotesque person. A word usually used with none of the affection or humour that its innocent source (the American TV puppet show of the 1970s) might suggest. The term has been applied to hospital inmates, mentally deranged prisoners or simply to unattractive teenagers by their peers. According to a UK student in 2002, 'when many muppets are gathered in one place, the expanded phrases *The Muppet Show* or *Muppets Take Manhattan* may be used'.

**mush, moosh** *n* *British*

**1.** the face. A word which has been in use since the 19th century, when it often referred specifically to the mouth. Mush is nearly always used in connection with fisticuffs and may have originated as pugilists' slang. The precise etymology of the word is uncertain, but it has obvious connotations of softness and mastication.

**2a.** an all-purpose term of address to a stranger (invariably used by men to other men). A working-class, mainly London, usage which was common in the 1950s and 1960s but is now rarely used. The word is not particularly friendly and is quite often used provocatively. It comes from the Romany word for man, *moosh*.

*'I suggest you buy better shirts in future.*

*Are you asking for a punch up the fag-hole, mush?'*

(*Hancock's Half Hour*, BBC TV comedy, 6 November 1959)

**2b.** a man, unnamed person. The derivation for this usage is as for the previous sense. The word has rarely been used thus (rather than as a term of address) since the 1950s.

**mutton, Mutt 'n' Jeff** *adj* *British*

deaf. Rhyming slang, from the cartoon figures created by Bud Fischer, which were popular before World War II. The slang expression has been heard in London from the late 1940s to the present day. It was spread further afield by its use by the character of Albert in the popular 1960s television comedy series *Steptoe and Son*.

sausages. The term is influenced by the name of a children's lucky dip sweet packet and is both a rhyming slang term for **snags** (another slang term for sausages) and an ironic comment on the dubious contents of some sausages. Often thought to be a native Australian coinage, mystery bags is another example of British slang of the 19th century which seems to have died out in the country of origin but has survived among the emigrant population; it was recorded in 1889 in this form; previously occurring simply as 'mystery' or 'bag of mystery'.

*'What's for dinner?*

*Mystery bags ... snags ... sausages.'*

(*Razorback*, Australian film, 1984)

**nabe** *n* *American*

*A new guy in the nabe.*

**b.** a neighbour

A shortening of the sort popularised by *Variety* magazine and perpetuated in teenage speech. (**Mersh** and **the burbs** are other examples of this trend which enjoyed a particular vogue in the late 1980s.)

(Recorded, 15-year-old boy, Horsham, England, October 1995)

**nadgers** *n pl* *British*

**1.** the testicles. The word was probably used in this sense merely due to the resemblance to **knackers**. It has not been widely used since the 1960s.

*a kick in the nadgers*

**2. the nadgers** a state of nervous agitation, irritation, distress or unhealthiness, as in such phrases as 'he's got the nadgers' or 'it gives me the nadgers'. The word could also be used to describe a curse or jinx in the same way as **mockers**. This humorous nonsense term of the 1950s (popularised in broadcast comedies such as *Hancock's Half Hour*) is now virtually obsolete.

**nads** *n pl* *American*

the testicles. An abbreviated form of 'gonads' used jocularly by teenagers since the 1980s.

**naff** *adj*

tasteless, inferior, shoddy and unappealing. Naff had existed in working-class slang for at least 40 years by the time it became a vogue word in the later 1970s. It had been used in the jargon of prostitutes to mean nothing or negligible. In the theatrical, criminal and street-trading milieus it meant third-rate or poor quality. The word's sudden popularity occurred probably because it was seized upon by TV scriptwriters (particularly Dick Clement and Ian La Frenais in the comedy series *Porridge*) as an acceptable euphemism for **fuck** in such forms as 'naff-all' (meaning **fuck-all**), **naffing** and **naff off**. Naff's ultimate origin, which seems to be 19th century, is nonetheless obscure. It has been claimed that it is a **backslang** form of **fan(ny)** (in the sense of female sex organs) or an acronym or alteration of a phrase involving the word **fuck** (such as 'not a fucking fart' or similar). Neither etymology is attested (or particularly convincing), and the similarity to NAAFI is probably coincidental.

*'To be naff is to be unstylish, whatever that may mean.'*

(*The Complete Naff Guide*, Bryson et al., 1983)

**naffing** *adj* *British*

an all-purpose intensifying adjective used as a euphemism for **fucking**

**naff off** *vb* *British*

to leave, go away. The expression is usually in the form of a dismissive exclamation or instruction synonymous with **fuck off**. First used in the TV series *Porridge* in the mid-1970s, the phrase was given great prominence in 1982 when Princess Anne told reporters who were pestering her to naff off.

**nag** *n*

a horse. The well-known term is used particularly by horse-racing enthusiasts. It was first recorded in 1400 when it

was paralleled by the Dutch *negge*, meaning a small horse.

**nail (someone) vb**

to identify, catch, punish or defeat (or any combination of these). This common term, which can now also by extension (and by analogy with **screw**) refer to the sexual conquest of a woman by a male, has been heard since at least the 18th century.

**nailed-up adj British**

arrested, imprisoned. An item of police and underworld slang.

*'I used to shift cars, but I'm telling you that there's more money and less hassle in this. I don't know anyone who's been nailed-up for shifting spares.'*

(Car thief, quoted in the *AA Magazine*, 1995)

**namby n British**

1. a weak, cowardly person, a **wimp**. A schoolchildren's word of the late 1980s which is a shortening of the standard English adjective 'namby-pamby'.

*'Him? He's a fucking namby.'*

(Recorded, teenage schoolgirl, London, 1988)

2. a committed opponent of a controversial environmental policy (such as nuclear power). This journalistic quasi-acronym of 'not in anyone's backyard' was coined in imitation of the more common **nimby** ('not in my backyard') in the USA in the mid-1980s.

**nana n British**

a silly fool. This word was very popular among children from the 1950s to the early 1970s and is still sometimes revived; adults, too, used the term in the late 1950s and early 1960s. It is a nursery shortening of 'banana', a meaning it still retains in post-colonial nurseries in areas such as India and the Caribbean.

**nanana n South African**

a small car. Recorded as an item of Soutetan slang in the *Cape Sunday Times*, 29 January 1995.

**nancy boy, nance n British**

an effeminate man, a male homosexual. This term seems to have originated in the late 19th century, when the name Nancy, a diminutive form of Ann or Agnes, was applied indiscriminately to women as a term of affection and famil-

arity. The echoes of 'nice' and 'mince' in the rather prissy sound of the word probably went toward reinforcing its derogatory use for men. There was a vogue in the East End of London in the 1930s for male street-dancers in women's clothing who were known as nancy boys.

*'See the nancy boys do their dance.'*

(Poster in satirical illustration of decadent England, *Private Eye* magazine, 1963)

**nang adj British**

excellent. A vogue term among London schoolchildren since the late 1990s. **Bare nang** is an intensified form.

**nanny (goat) n British**

a *quote*. An item of journalistic rhyming slang of the 1990s.

**nanty, nanti, nants adj British**

no, none, nothing. The word was in use in London working-class and theatrical slang from the early 19th century until the 1960s; this is an example of **parl-yaree**, the Italian-inspired patois of actors, showmen and circus workers. Nanty originates in the Italian *niente*, meaning nothing. The last recorded instance of its use was in the radio comedy *Round the Horne*, in which the effeminate characters Julian and Sandy referred to Kenneth Horne's having 'nanty riah' (no hair).

**narc, narco n American**

a narcotics investigator or member of a police drug-squad. The word is particularly heard among drug users referring to undercover agents. It may be influenced by, but is not directly related to, the British **nar**k.

**nards n pl American**

the testicles. A distorted pronunciation of **nads**, itself an abbreviation of gonads. The word is heard among pubescent and adolescent males.

**narg n British**

a tediously or offensively hard-working and/or socially inept individual. The term was first recorded as part of Oxbridge student slang in the 1960s and is invariably applied to males who are typically unattractive and badly dressed. It may derive from an imitation of the drawling nasal speech seen as typical of such students.

**nark<sup>1</sup>** *vb British*

1. to inform on, betray. From the noun **nark**.

2. to stop or to keep quiet. This cockney usage invariably occurred in the command 'nark it!'.

3. to annoy or affront; to needle. This expression, which was particularly popular in the 1950s and which is also heard in Australia, is derived ultimately from the Romany word *nak*, meaning nose. Nark in its modern sense is semantically related to such expressions as 'to have one's nose put out of joint', **to get up one's nose**, or 'poke one's nose in'. It is often heard in the form of its past participle, **marked**, meaning annoyed or affronted.

*'The trouble is, many people today they won't do anything. I got a very poor opinion of my fellow creatures, a very poor opinion. So I nark them whenever I can. I like narking people.'*

(82-year-old Ted Bosley, quoted in the *Independent*, 18 May 1989)

**nark<sup>2</sup>** *n British*

a. an informer. The expression originated in the 19th century as 'copper's nark', meaning a police spy or **grass**, nark being an alteration of the Romany (gypsy) word *nak*, meaning nose.

b. a spoilsport, teacher's pet, nuisance or toady. This more generalised usage, deriving from the previous sense, was fairly widespread in the 1950s in working-class circles and is still heard among schoolchildren.

(Recorded, social worker, London, 1986)

**nasty<sup>1</sup>** *n*

1. a sex organ, the genitals. A childish word used humorously by adults in phrases such as 'as dry as a nun's nasty': thirsty.

2. a sexual act. A synonym of the coy or euphemistic **naughty**.

**nasty<sup>2</sup>** *adj American*

**natch** *adv*

**nathan** *n American*

**natty** *adj*

impressive, admirable, **cool**. A vogue term in Jamaican youth patois, particularly in the phrase 'natty dread', but usable as an all-purpose term of approval. It derives from a shortening of 'natural', referring in Rastafarian terms to someone following the laws of God and nature, perhaps influenced by the standard English adjective meaning trim or smartly-dressed (which itself is probably a variation of neat).

**naughty<sup>1</sup>** *n*

an illicit act, usually referring to sex and typically occurring in phrases such as 'have a (quick) naughty'. The coy expression, which sometimes also refers to a crime, is heard in both British and Australian speech.

b. impressive, daring. A fashionable usage in working-class speech, generally

among adults, from the late 1980s; the word is used to indicate admiration or approval as in 'That's a well-naughty looking bird'.

**nause** *n* *British*

**a.** a nauseatingly unpleasant person. A middle-class term popular in the mid-1960s and now very rarely heard. It has been suggested that this word is in fact a variation of 'Noah's', short for 'Noah's Ark', 1950s underworld rhyming slang for **nark**. As *nauseate* and *nauseous* were both fashionable terms in middle-class British and American use in the early 1960s, they would seem more likely origins.

*'She was going out with a policeman; God, he was a real nause.'*

(Recorded, student teacher, London, 1965)

**b.** a nuisance, an unpleasant situation or task. 'Nauseate' had a (now obsolete) slang sense of bother, irritate or infuriate in the 1950s, whence this usage. The concept is rendered in modern speech by the colloquial expression to **get up one's nose**.

**nause (someone) out** *vb*

to disgust, *nauseate*. The term is used by adolescents on both sides of the Atlantic, although often in Britain minus the 'out' component.

*Ooh, me nauticals!*

**navvy** *n* *British*

a manual labourer, unskilled construction worker or road digger. *Navvy* is a shortening of 'navigator', which was a nickname given to open-air construction workers engaged in building roads, canals and railways in the late 18th and early 19th centuries. Canals in England were often built by navigation companies, hence the nickname of their employees.

**nearly-wife** *n*

a live-in girlfriend, not a fiancée. An item of student slang in use in London and elsewhere since around 2000.

**neat** *adj* *American*

an all-purpose term of approval which became popular among teenagers in the mid-1960s and has survived. It is often ridiculed by sophisticates as evidence

of naïve or gushing enthusiasm. The word occurred with this sense in the slang of jazz musicians, the 'smart set' and adolescents as long ago as the early 1920s.

*'You're a neat girl.'*

*So are you – I mean ... you're a neat guy.'*  
(*Blue Velvet*, US film, 1986)

**nebbish, nebesh, nebech** *n*

a fool, an ineffectual, clumsy or pathetic person. The word entered English speech from Yiddish in which one of its meanings is a pitiful nonentity or 'loser'. The ultimate origin of the word is the Czech adjective *nebohy*, meaning unhappy, unfortunate or diseased.

(*The Joys of Yiddish*, Leo Rosten, 1970)

**neck**<sup>1</sup> *n*

cheek, impudence, daring, **chutzpah**. This sense of the word is at least 100 years old, originating in rustic northern English speech. It survives principally in the form **brass neck**, a synonym for 'bare-faced cheek'.

(Recorded, housewife, London, 1988)

**neck**<sup>2</sup> *vb*

**1.** to kiss, embrace and pet. An American euphemism dating from the early years of the 20th century.

**2.** *British* to drink, ingest. The raffish verb, probably a back-formation from the drinkers' catchphrase-injunction 'Get this down your neck!', became fashionable from the early 1990s. It was adopted by members of the **acid house** and **rave** subcultures who referred to 'necking E's' (swallowing tablets of **ecstasy**).

**neck-oil** *n*

**2.** in the phrase 'not on your nellie', the word was originally from Nelly Duff, an invented name providing a rhyme for **puff** in the sense of breath, hence life

**3.** a fat and/or dowdy female. The pejorative term, used by adolescents, may derive from the 1950s children's song *Nellie the Elephant*.

**nellie<sup>2</sup>, nelly** *adj* *American*

effeminate. The adjective, based on the earlier noun form, became fairly widespread in the late 1990s.

**Nelson (Mandela)** *n* *British*

**nerd** *n*

a gormless, vacuous, tedious and/or ineffectual person. Since the later 1970s this has been a vogue term, particularly among adolescents. It was coined in the USA in the late 1960s or early 1970s by members of surfing and hot-rodding cliques to refer to outsiders considered feeble or conformist. The word was then

taken up on student campuses and by **hippies**. (An underground cartoon strip of the early 1970s portrayed nerds as a sub-species of suburban dullards.) The word nerd itself (**nurd** was an earlier alternative spelling) is of uncertain origin, but may be influenced by **turd**.

*'And the jock shall dwell with the nerd and the cheerleader lie down with the wimp and there will be peace upon the campus.'*

(*Observer*, 29 May 1988)

*"'Being a nerd is chic these days", proclaimed the tediously Teutonic Britta Hoffner from Frankfurt, Germany. "I am a nerd and proud of it!"'*

It is now a term of racist abuse when used by white speakers, although it can be used affectionately or sardonically between black speakers. The American expression entered common currency in Britain around 1986. (An unqualified opponent to the same issues is a **namby**.)

The use of the word for the famous children's storybook character created by Enid Blyton reinforced the image evoked.

**noddy bike** *n* *British*

a Velocette motorcycle, as used by police patrolmen until the end of the 1960s. The ungainly, inelegant motorbikes were derided by professional police motorcyclists, motorbike enthusiasts, **rockers**, etc. **Noddy** is a nickname applied to low-ranking police officers, reinforced by

**noogie, nuggy** *n American*

**a.** a kiss or hug

**nookie** *n* *British*

sexual intercourse or sex in general. This coy term became popular in the late 1970s and 1980s, probably due to its use in the media in place of more offensive synonyms. (Nookie also occurs, albeit rarely, in American usage.) The etymology of the word is uncertain. It may be a form of the archaic British dialect verb 'nug' (which has survived in American speech in the form **noogie**: kiss or hug), or it may alternatively be an alteration of an older euphemism for the female pudenda as a 'shady nook'. It has been defined recently as '70's style slang for sex, now making a bit of a comeback'.

*I can't be sure, we'll just have to odds it.*

## **ofay** *n American*

a white person. The word is said to be a **backslang** version of 'foe' in black Ameri-

can slang of the late 1960s. Another proposed etymology is the Yoruba word *ofé*, meaning a ju-ju or charm. The word probably originated earlier in the 20th century in the immigrant underworld as a code reference to the police and other authority figures. It is sometimes encountered in the phrase 'ixnay ofay(s)', meaning 'no whites'.

*'Nice integrated neighbourhood, ofays, Arabs, Chaldeans, a few colored folks. Ethnic, man.'*

(*The Switch*, Elmore Leonard, 1978)

**off<sup>1</sup>** *vb* American

to kill. A word popular at the time of the Vietnam War when 'off the pigs' was a slogan much chanted by militant protesters. The term, possibly derived from **bump off**, was picked up by British speakers and enjoyed a brief vogue in the early 1970s. It is still heard occasionally, especially in the verb form 'off oneself' (to commit suicide).

*'Isn't he the dude on trial for offing the undercover cop?'*

**off one's block / chump / crust / head / nut / onion** *adj*

mad, crazy. These phrases are all elaborations of the well-established colloquialism, 'off one's head' (heard since the mid-19th century). The terms are sometimes extended to mean intoxicated by drugs or drink, more usually denoted by phrases beginning with 'out of', such as **out of one's head**.

**off one's face** *adj*

completely drunk or under the influence of drugs. A variant of 'off one's head'. The usage arose in Australian speech, but by the mid-1990s was in common use in Britain among younger speakers.

The variant 'off one's case' is also used by prison inmates in the UK.

*"I went high at university!" he said reasonably. 'Used to get really on my face in fact ...'"*

*"'Off! Off! Dad, it's off your face", Mouche screamed from the bed.'*

(*Girls' Night Out*, Kathy Lette, 1989)

**ohno-second** *n*

a realisation of error, sudden panic, in e.g. medical slang. The expression mimics technical terms such as nano-second. It describes '...the moment you realise you've dropped that blood sample it took six stabs to get'. (Recorded, *British Medical Journal* online, 2002).

**-oid** *suffix*

the suffix, seen in slang since the late 1960s, confers a sense of the pseudo-scientific or pathological on the preceding word or part of a word. It is invariably also pejorative, and as such performs as a negative version of the neutral '-ish' or '-esque'. Examples are 'Rambo**id**', 'bozo**id**' (from **bozo**), 'trend**id**' and **zomboid**.

**oik** *n British*

1. a vulgar, coarse, boorish or socially inferior person. This term was, and still is, applied by public schoolboys (rarely by girls) to local children or those attending state schools. It is also sometimes used self-effacingly or ironically by working-class males to refer to themselves. The word's origin is obscure (one suggestion is that it was an imitation of the sound of unsophisticated speech), but seems to lie in the 19th century; it is almost certainly cognate with the 20th-century Australian term **ocker**, also denoting a working-class male. Evelyn Waugh used the word, in his diary entry of 7 January 1920, when referring to his host as a 'wizened, pleasant little oik'.

*'I'm constantly amazed that a couple of oiks like me and Gray have managed to make it.'*

(Recorded, advertising executive, London, 1986)

2. *American* a synonym for **greaser** in the sense of a Hispanic person

**oily** *n British*

a stupid, unsophisticated or unfortunate person. This derogatory term, heard among black teenagers in the late 1980s, is probably a blend of **oik** and **wally**, rather than a specialised use of the standard English adjective.

*'I don't want to walk down the street and have them shout, "Hey, oily" because of how I look.'*

(Recorded, black youth, London, 1989)

**oily rag** *n British*

a vulgar, obnoxious or greedy person. A young person's euphemism for **pig**. The term was, and is, predictably, applied to police officers.

**OK, O.K., okay** *exclamation*

all right, correct. The term is no longer thought to be slang, but its origins are frequently debated by amateur and professional etymologists. The first recorded use was in the *Boston Morning Post* of 23 March 1839 by C. G. Greene, who used OK as a facetious abbreviation of a mis-spelled 'Orl Kor-rect'. This novelty, possibly reinforced by the Scottish phrase 'Och, aye', which has the same meaning and an almost identical pronunciation, was imitated by other comic writers and taken as the title of a Democratic political club in 1840; this last example was also probably a pun on 'Old Kinderhook', the nickname of the politician Martin van Buren. The several other proposed

sources for the word, including a posited cry in French *au quai!* ('to or on the quayside'), are probably spurious. By the end of the 19th century OK was in use in Britain.

**okey-dokey, artichokey!** *exclamation*  
a joky expression of agreement on the lines of **aye-aye, shepherd's pie**. Apparently the okey-dokey version was a favourite of First Lady Hillary Clinton.

**-ola** *suffix*  
this word ending has been appropriated from Spanish where it signifies large and negative. It is added to standard terms and slang terms (as in **payola** and **bof-fola**) to convey the notion of outrageous, excessive or 'super-'. The usage arose in the USA in the 1950s.

(Alexei Sayle, *Great Bus Journeys of the World*, 1988)

**out to lunch** *adj*

*'The second most out-to-lunch politburo in the north of England.'*

**out trouting** *n* *British*

looking for a sexual partner. A vogue term of the mid-1990s heard in raffish usage, particularly among young adults in the advertising industry, journalism and city financial circles. It is based on the derogatory **old trout**, meaning a woman.

**over the top** *adj, adv* *British*

outrageous, bizarre, beyond the bounds of normal behaviour or decorum. The expression equally describes fury, extraordinary generosity or simple bad taste. It derives from the general idea of going 'off the scale', of being beyond measurable or acceptable limits, reinforced perhaps by the use of the phrase in World War I to describe troops climbing out of the trenches to go into battle, hence throwing caution to the winds. Often abbreviated to **O.T.T.**, the phrase was a vogue term in 1979.

*There's no point in going over the top about someone like that.*

*Wearing that dress with those shoes is really over the top.*

**well-hung.** The term was used by the British comedian Dawn French in January 1994.

## **packet** *n*

the male genitals. A term from the **gay** lexicon, usually referring to the crotch as it appears clothed.

## **pad**<sup>1</sup> *n*

a home. The word now invariably refers to a room, apartment or house. In 17th-century Britain pad was used by peasants and poor travellers to designate a bed made of straw or rags, while in American slang before 1950 it designated a pallet or couch on which opium smokers or other drug takers reclined; this sense was later extended to encompass any room or place in which drug users gathered, or the beds on which they slept. The dissemination of **beatnik**-related jargon introduced the word to a wider audience, as did its adoption by the **hippy** generation.

*'Drop-out pads for the large numbers of people hitting London at the moment looking for the mythical beautiful dream-boat.'*

(*International Times*, April 1968)

## **pad**<sup>2</sup> *vb, n British*

(to go for) a walk

## **paddle** *vb*

to hit, beat, thrash. This synonym of 'wallop' probably derives from the archaic use of the noun paddle to mean both hand and, more rarely, foot. Long before signifying a bat, paddle also denoted a small paddle.

## **Paddy** *n*

an Irish person. A nickname derived from the short form of Patrick, the most common male Christian name in Ireland. It has been used since at least the 18th century. Although the term can be used as an epithet, it may be used descriptively and is also heard among the Irish

themselves, where it is usually a personification of a typical rustic Irishman. An alternative, usually with a slightly more pejorative emphasis, is **mick**.

*'We Import More Paddies Every Year.'*

(Joke acronym for Wimpey, British construction and civil engineering firm)

## **paddywaggon** *n*

a secure police van, a **black maria** or a police car. This term was introduced into Britain and Australia from the United States at the end of the 19th century. The reference to paddy reflects the importance of the Irish population of New York and other northern cities in providing police officers at the time, rather than to the number of Irishmen arrested. **Meat wagon** is a racier, more modern alternative.

## **paedo, pedo** *n British*

an unpleasant or unfortunate person. This contraction of the term 'paedophile' has been adopted as an all-purpose insult in playground parlance since 2000. A synonym is **kiddy-fiddler**.

**b.** a shop, usually a supermarket or general store, operated by a Pakistani or other South Asian

*'I'm just off down the paki for a can of beans.'*

(Recorded, housewife, London, 1987)

The simple shortening is used, in the first sense, as an offensive racial epithet and in the second sense as a simple descriptive term for the many independent corner stores owned and run by immigrant families. In both senses the word is often applied, loosely, to any immigrant from the subcontinent, including those of Bengali, Indian or Sri Lankan origin.

**paladic, palatic** *adj* *British*

**palatic** *adj* See **paladic**

**palooka** *n* *American*

a large, clumsy and/or slow-witted male. Before World War II the word was usually employed to describe a third-rate prizefighter. It was apparently coined by Jack Conway, an ex-baseball player and sports writer. The resemblance to *peluca*, Spanish for wig, may be coincidental.

*'This big palooka has been trying to get me pregnant every which way but lopsided.'*

(*The Boss's Wife*, US film, 1986)

the strong Italian influence on the theatre, dance, music and the humbler entertainments of the streets from the late 17th to the late 19th centuries gave rise to an Italianate jargon. This terminology was adopted by English speakers (including vagabonds, street traders and the like), with resulting deformation of the original Italian words. This code, later known as **parlyaree** or **parliari** (itself a corruption of the Italian *parlare*, meaning

The re-spelling of **fat** (itself alternatively derived from its use in the phrase **fat-city** or from the fat tyres favoured by **low-riders**, etc.) was an emblematic term first in hip hop and **rap** circles and then in other youth subcultures such as surfers, skateboarders and skaters, etc. (A magazine named *Phat* catering for rollerbladers and computer-game fans was briefly published in Britain in 1994.) In this spelling the word, which some authorities claimed was actually based on 'emphatically', had no comparative or superlative forms to compare with 'fattier' or 'fattiest'.

established in Britain during the later 1960s.

**pig's, pig's ear** *n* *British*

1. beer. A London rhyming-slang term that is still heard. (The dismissive exclamatory phrase 'in a pig's ear!' is unconnected, being a euphemism for 'in a pig's arse!').

*I'll have a pint of pig's.*

2. an alternative version of **pig's breakfast/arse**

**pig's breakfast/arse/ear** *n* *British*

a mess, an outrageous failure, a complete disaster. Most often heard in statements such as 'you've made a right pig's breakfast of that!'.

**piker** *n* *American*

a mean, tightfisted person; a **welcher** on a bet or a shirker. A now obsolescent word, related distantly to the British **pikey**, or from an abbreviation of 'turn-pike', piker occurred in the writings of Raymond Chandler in the 1940s. It originally referred to the unreliability of vagrants or itinerants.

**pikey, pikie** *n* *British*

a gypsy or vagrant. The term properly denotes one of the travelling people who lives in a settlement, such as a member of a family of hop-pickers. The precise origins of these terms (and the American **piker**) are unclear because of the convergence of two similar senses of 'pike'; the first is a toll road as in turnpike, the second is an archaic British verb meaning to depart or travel. In 2004 pikey was one of the terms used as a synonym for **chav**.

**pillock** *n British*

a foolish or stupid, annoying person. A vulgar but not taboo term of abuse which had existed in British slang usage since the 1950s (its exact date of origin is undetermined), coming into vogue in the mid-1970s. Various etymologies have been proposed for the word; 'pillcock' was a late medieval term for the penis, sometimes used as an expression of endearment or affectionate abuse; pillocks has also been explained as a rural term for rabbit droppings, or as a synonym for the testicles (**pills**) employing the diminutive or affectionate suffix '-ocks' (as in the case of **balls** and **bollocks**).

**pillow-biter** *n*

a male homosexual, particularly a passive partner in sodomy. This expression probably originated in Australia, where it is common. **pipe one's eye** *vb*  
to weep. This phrase is now almost obsolete, except in self-consciously fanciful speech. Although 'pipe your eye' has been interpreted as cockney rhyming slang for *cry*, the expression had been recorded as early as the beginning of the 19th century (before either cockney rhyming slang or the use of the word *cry* to mean weep were widespread). Connections have been drawn with plaintive, tear-provoking pipe music or the more prosaic image of waterworks,

but the precise origins of the term remain uncertain.

It presumably originally referred to the incontinence of a helpless inebriate, or else to the equation of alcohol itself with urine. This sense of the word is rare in American English, but was encountered e.g. in the 1980s parlance of East Coast sophisticates.

**plonker** *n* *British*

**1.** the penis. A term probably influenced by 'plonk (down)' in the sense of place down heavily or present defiantly. The word has been in use since early in the 20th century. It was rarely heard during the 1960s and 1970s but was revived during the 1980s vogue for 'schoolboy' vulgarity.

*'If she's game and wants your plonker wear a Jiffi so you can bonk her.'*

(Promotion slogan for Jiffi condoms, 1988)

**2.** a **dicthead**. Inspired by the previous 3sense of the word and by the suggestion in 'plonk' of ponderous or clumsy movement, this usage became a vogue term of the late 1980s.

*'You end up shouting at the people who care about yer, not to the plonkers who treat you like dirt.'*

**Pomgolia** *n*

an alternative form of **Pongolia**

**Pommy, Pommie** *n, adj* *Australian*

(a person who is) British. The standard, and usually derogatory, slang term for natives of or immigrants from the British Isles, Pommy is probably a corruption of 'pomegranate', chanted as a humorous semi-rhyme for 'immigrant'. The epithet has been in use since the first decade of the 20th century. The noun is now probably more common in the form **Pom**.

**pom-pom** *n* *Jamaican*

Ponce derives either from the standard English 'pounce', or possibly from the French *pensionnaire*, in the sense of a non-paying guest. The following senses are terms of contempt directed at individuals thought to be showy, smugly idle or parasitic.

2. *American* a promiscuous female. Equivalent to the male **player**, it is probably from the euphemism/song lyric 'ride the pony'.

**pony**<sup>2</sup> *adj* *British*

of poor quality, disappointing, worthless. In this sense the word is a shortening of the rhyme 'pony and trap': **crap**.

*'If we don't take our time, it risks being utterly pony.'*

(Recorded, theatre director, London, July 2003)

**pony up** *vb* *American*

to pay. A synonym for 'pay up' or 'fork out', the phrase was first recorded in the early 19th century and was said to derive from the earlier British use of the Latin form *pone*, meaning put (money down or forward).

**poof, pooff, poove, pooffer, pooftah, puff** *n*

a male homosexual. The most common slang term in Britain and Australia. The variations of the word go in and out of fashion. Poof and poove were popular in the 1960s, pooffer in the 1970s. The origin of the epithet is obscure and the subject of argument. Possibilities include 'pouff!' as a supposedly affected exclamation of disdain, or a northern English pronunciation of 'puff', which itself could be a dialect exclamation of disgust, a reference to puffed-up with pride, or a Victorian term for a sodomite. It might equally be inspired by the 'puff' of 'powder puff', or the French words *pouffe*: a stuffed seat and *pouffer* (*de rire*): giggle.

Poop is heard all over the anglophone community but is particularly prevalent in the USA. It has existed since the time of Middle English and the same word has been used with the same meaning in Dutch. **Poo-poo** is a synonym.

**poop-chute** *n*

the anus

**pooped, pooped out** *adj*

exhausted, out of breath. The word is probably an imitation of the sound of puffing and blowing, although there is a theory that it derives from British sail-

ors' slang for a ship being swamped by a 'poop' wave. In its current sense it was originally a North American term, spreading to Australia and Britain in the 1960s.

This use of the word originated in North America in the early years of the 20th century but its etymology is unknown. Some authorities claim a derivation from an obscure Mexican term for the drug (*potiguaya* or *potaguaya*), others that there is a connection with the use of **tea** as a nickname for marihuana, or that it is a deformation of **pod**, an attested synonym.

**prick** *n*

**1.** the penis. The Oxford English Dictionary records the first use of the term in 1592; it was probably extant in the spoken language for some time before. Prick was probably coined with the image of a thorn in mind, from the shape and the image of penetration evoked. In the 20th century while it is, in 'polite company', the least acceptable of the many terms (**cock, tool**, etc.) for the male member, it is nevertheless commonly used, together with **dick**, by women in preference to those alternatives.

1. a bumptious but insignificant or contemptible person. This sense of the word has been well-established in American English since the 19th century referring typically to a youth, particularly a presumptuous or irritating one, or to a petty criminal or gangster. The word originated in British slang around the end of the 17th century when it was used to denote a **whore** and later was a precursor of the modern **rent boy**. In the 20th century the term punk fell out of use in Britain, being reintroduced via the American media and later by way of the punk rock phenomenon of 1976 and 1977.

*Each night receive some Cullie's soft address...*

*(Poor Pensive Punck, poem by John Dryden, 1691)*

2. an adherent of a youth subculture first coalescing in 1976 around punk rock music. Punk rock was so called because of the callow, defiant poses and amateurish musicianship of its proponents. Led by American groups such as the Ramones and the British band the Sex Pistols, punk rock became the musical vogue of 1977, accompanied by a self-consciously nihilistic and pessimist attitude and imagery, spikey and mohican hairstyles, safety pins and chains, etc.

b. a customer or client. The sense of punter as a gambler was extended to refer to anyone paying money for a service or item. First specifically applied to prostitutes and street-trader's customers, punter became a key word in the market-oriented 1980s.

by police, journalists, parents, etc. and only rarely by drug users or sellers.

**push the envelope** *vb* *American*

to test or extend limits, go too far. The term, used in fiction by Tom Wolfe and John Grisham, derives from the jargon of test pilots: the envelope is the ultimate technical capability as expressed on a graph.

**puss** *n*

1. *American* the face, mouth. A word often used in compounds such as 'sour puss' and 'glamour-puss', puss was a favourite word of pugilists and 'tough guys' in the earlier 20th century. It derives from the Irish Gaelic *pus*, meaning mouth.

**pussy**<sup>1</sup> *n*

1. the female genitals. A cause of many double entendres and minor embarrassments, this usage of the word derives from the resemblance of pubic hair to fur, perhaps reinforced by male notions of affection. (The French equivalent is  *chatte*, virtually a literal translation.) **Pussy** or **puss** was first recorded in the sexual sense in the 16th century.

2. women viewed as sex objects. An unromantic male term used in the same indiscriminate manner as **tail**, **ass**, etc. In this generic sense, the term may be expressed as **pussy**, 'some pussy' or, occasionally, 'a piece of pussy'.

(US police officer, *Sunday Times* colour supplement, 1 January 1967)

*Yeah, but he's our pussy.'*

(*Blue Velvet*, US film, 1986)

4. furs, in the jargon of criminals and the police. This example of the jargon of cat

burglars was recorded in *FHM* magazine in April 1996.

5. a coquettish or 'kittenish' female, in lesbian parlance

**pussy**<sup>2</sup> *adj* *British*

unpleasant, execrable. This use of the word in the late 1990s was probably inspired by the noun sense of the female pudenda, rather than that of a weak, ineffectual person and reflects a distaste for female sexuality on the part of male adolescent gang members, its first users.

**pussy-whipped** *adj*

'hen-pecked'. An American vulgarism probably inspired by the western cliché 'pistol-whipped'. **Pussy** is a long-established term for the female genitals or women in general.

*As soon as he starts to put the hammer on, let me know.*

to frustrate, ruin, prevent, jeopardise. Many conflicting and often far-fetched etymologies have been suggested for this phrase, first recorded in the 1830s meaning to defeat. Its ultimate origin remains obscure.

**put the mockers on** *vb* *British*

to frustrate or jeopardise (someone's plans), to curse with bad luck. This old phrase was last popular in the 1960s, but is still heard occasionally. It almost certainly originates in the Yiddish *mockers*, meaning a curse or bad luck, from the Hebrew *maches*, meaning plague.

# Q

## Q *n*

**1a.** a geriatric person

**1b.** a hospital patient

**1c.** a corpse

**2.** All senses of the term are based on the image of the capital letter Q as representing an open mouth with lolling tongue and seem to have originated in the slang of North American health carers. The letter may be written (in notes, on charts, etc.) or pronounced by medical staff.

**Q.T., q.t.** *n* See on the **q.t.**

## **quack** *n*

a doctor. This usually lightheartedly pejorative term originated in the 17th century when it referred to a peddler of spurious cures. It is a shortening of 'quacksalver' which is composed of 'quack' (give one's verbal 'patter') and 'salve' (save, soothe or cure), and is a pun on 'quicksilver'.

## **quad, quod** *n* *American*

a clumsy or unfortunate person, misfit. The word, used by high school and college students from the 1990s, is probably a shortening of 'quadriplegic' (disabled in all four limbs), although some users derive it from 'quadrilateral' as a version of **square**.

## **quail** *n*

a girl, young woman, or females viewed as sex objects. This equating of the female with the game bird is approximately three hundred years old, surviving in the language of American high-school and college students, where predatory males also talk of going out 'loaded for quail' (ready or equipped for seduction).

## **quakin'** *adj* *American*

excellent, impressive, exciting and/or excessive. A synonym, heard since 2000, for **slamming**, **jamming**, etc.

## **quean** *n* *British*

the earlier spelling of **queen**, meaning an effeminate homosexual. This spelling coexisted with queen until the early 1960s when it virtually disappeared. Quean was a descendant of Old and Middle English words related to (but not derived from) 'queen', stemming ultimately from an Indo-European ancestor, *gwenā*, meaning woman. Over 1,000 years the senses of quean shifted from 'woman' to 'wanton', before being transferred to a male context.

## **queef** *n* *American*

an alternative spelling of **kweef**

## **queen** *n*

an effeminate homosexual. The word **quean** signified a **whore** in early 19th-century slang. This appellation was transferred to male prostitutes (often transvestite) and thence to male homosexuals in general. The use of the word is obviously reinforced by its colloquial use to mean an imperious or ostentatious (older) woman. In the **gay** environment of the 1970s and 1980s queen was used to refer specifically to individuals who are affected in manner, elderly and/or consciously effeminate.

*'And he's just a go-getting queen. He's interested in you purely because of your plays.'*

(Kenneth Halliwell, quoted in Joe Orton's *Diary*, 2 May 1967, 1986)

**queer** *n, adj*

(a person who is) homosexual. Until the 19th century queer denoted odd or curious, as it still does in standard English. Its use as first a euphemism, then a slang synonym for homosexual arose between the world wars, probably first in the USA. Queer ultimately derives from *quer*, a German word meaning crooked or awry. In the mid-1980s **gay** activists began to use the term to refer to themselves, in keeping with the trend among 'transgressive' minorities to appropriate the language of their oppressors (as in the earlier case of **nigger**).

*'You can't expect to pick up a young post-office worker and his middle-aged keeper, and burst into tears because the keeper is queer.'*

(Joe Orton's Diary, 2 May 1967)

**queer-bashing** *n British*

**quiche out** *vb*

**1.** *British* to eat very greedily or to excess. A **Sloane ranger** and **yuppie** version of **pig out**, which was later adopted by university students.

**2.** to behave in a weak, irresolute, cowardly way; to **wimp out**. In this sense the term has been used in Oxbridge student slang, sometimes shortened to 'quiche'.

**quickie** *n*

a hurried or short-lived sex act

**quid** *n*

a pound sterling. The word was first used to refer to a guinea, then a sovereign, later to the sum of one pound. The origin of the word (it arose in the 17th century) is obscure. Partridge suggests 'what' (*quid* in Latin) as a synonym for

'wherewithal'. An equally plausible derivation is from *quid pro quo*, alluding to the words on older banknotes, 'I promise to pay the bearer the sum of...'

**quidlets** *n pl British*

money, pounds sterling. A humorous version of **quid** using the diminutive suffix '-let'.

**quiff** *n*

**1.** *British* a pompadour hairstyle, kiss-curl or backcombed fringe. The quiff was fashionable with **teddy boys** and **rockers** among others.

**3. a fart**

**4a.** *American* a prostitute or promiscuous woman

**4b.** *American* a woman or women as (a) sex object(s). A term used invariably by males.

*I'm going to get me some quiff.*

**quim** *n British*

the female sex organs. A taboo term featuring in 19th-century pornography and the 20th-century lexicon of obscenity. The word has probably lost popularity since the 1950s, although it remains in use, invariably among males, particularly outside the southeast of the country. The exact origin of quim is unclear. It may be related to the Chaucerian *queynte* (the vagina) or the Welsh *cwm* (a valley or crevice).

**quince** *n Australian*

a male homosexual or effeminate male. The word is probably a blend of **queen** and 'mince'. It may also be derived from the Asian fruit of the same name.

**quoit** *n Australian*

the anus. A coinage inspired by the earlier **ring**.

The word gained widespread currency through TV comedies of the 1970s and the soundtrack to a 1980s advertisement for Courage Best beer. Rabbit (or 'rabbit on') is now often used by middle-class speakers unaware of its rhyming provenance. Genuine cockneys often prefer the derivation **bunny**.

*I was racked by 9 p.m.*

## **racked-off** *adj* Australian

irritated, disgruntled. An expression ranking in vehemence somewhere between 'cheesed-off' and **pissed-off**.

## **racked-up** *adj* American

**rambunctious** *adj*

lively, troublesome, loud. A facetious invention elaborated from rumbustious. The term has been in use since the early 19th century and is probably Irish or American in origin, although the invention of such jocularities (as in the 19th-century 'obstreperalous' and the recent 'spondiculous') was paralleled in Britain.

*'This is a lullaby my mother used to play when I'd get rambunctious. It always seemed to calm me down.'*

**randy** *adj* British

sexually aroused, lecherous. A word which was formerly considered unsuitable for normal use but which, since the 1960s, has been used in the media and in 'respectable' conversation. (Mickey Dolenz of the pop group The Monkees heard the phrase 'randy Scouse git' on the British TV comedy series 'Till death us do part' and used it as the title of a single in 1967. This was deemed too offensive for radio and in Britain the song title was changed.) Randy is of uncertain origin. It was first recorded at the end of the 18th century. Two suggested etymologies for the word are: a dialect verb meaning to behave in a wild or wanton manner, and a Hindi word meaning lustful. Of these, the first (the rarely recorded word was related to 'rant' and 'random') is the more likely.

'Girls...showing their arms in thin, thin frocks (good luck to randy grandfathers).'  
(*About Town* magazine, June 1962)

**rang-a-tang** *n* Caribbean

**rank**<sup>1</sup> *adj*

**1.** unpleasant. The standard adjective (its original meaning was overbearing or excessively strong) has been adopted as an all-purpose vogue term of disapproval by teenagers in the USA and in Britain, where it probably originated in black usage.

*'This health-drink stuff is just so rank!'*

(Recorded, teenage schoolboy, London, 1994)

**2.** excellent, admirable. A term of approbation originating, it is said, in the 1960s *pachuco* (Hispanic street-)culture of the USA.

**rank**<sup>2</sup>, **rank out**, **rank on (someone)** *vb* American

to insult, taunt or provoke. The terms, which occur in adolescent speech, probably originated in black street slang.

**rap**<sup>1</sup> *n*

**1a.** a conversation, especially an earnest and/or lengthy discussion. A word which became an important part of the counter-culture lexicon at the end of the 1960s, rap was originally used by blacks and **beatniks**, deriving from the verb form.

**1b.** a rhythmic spoken chant, often to a musical background. This form of (originally) improvised delivery became a vogue first among young blacks in New York and other eastern American cities (inspired by Jamaican 'toasting'), and then a worldwide pop phenomenon in the 1980s.

**2.** an accusation or charge, blame or punishment. An 18th-century British use of the verb 'rap' was to denote swearing an oath against, accusing of, or charging (with a crime). This sense survives, via American English, in the phrases 'take the rap' and 'beat the rap' and the term **rap sheet**.

**rap**<sup>2</sup> *vb*

**a.** to talk, converse or discuss. A key term from the **hippy** era which usually denoted

an earnest or communal exchange of ideas. The word was first heard in this sense in black American speech; it was subsequently adopted by white **hipsters**, **beatniks** and hippies in turn. (Rap was in use in Britain in the late 1960s but in its original sense is now confined to the remnants of hippy culture.) The exact origin of this use of the word is not at all clear; possible etymologies include a shortening of 'rapid' (speech), 'rapport' or 'repartee'. The term might come simply from the similarity between talking and tapping ('rapping') on a drum or other surface; this might fit an origin among jazz musicians. Alternatively, in archaic slang a 'rapper' was someone who 'talked' to the authorities (see the noun form) and this notion may have become generalised in black argot into 'talk'.

**b.** to deliver an (originally improvised) monologue to a musical backing; to perform rap music. This musical form of the 1980s originated as a street phenomenon among black youth in American cities in the 1970s.

**rapid** *adj* British, Irish

clever, stylish, attractive. In 2000 the term was defined as 'dead cool, as used by Ronan and Shane from Boyzone'. In Leicester in 2004 the same word was being used as an all-purpose term of appreciation.

**rapper** *n*

a practitioner or devotee of **rap** music

**rapt** *adj*

delighted. A vogue term of the late 1980s which seems to have spread from Australia to both Britain and the USA in the **hip** parlance of adolescents. The word is the standard (literary) English term meaning enraptured.

*She wasn't exactly rapt when I told her, I can tell you.*

**rare** *adj* *British*

1. an all-purpose term of approbation, often employed as an exclamation by schoolchildren since the 1980s, especially in the north of England and Scotland. This sense of the word probably originated in black youth-culture in the USA and was transmitted via **rap**, skateboarding terminology, etc. Rare was previously used as a generalised vogue term in this way by **mods** briefly in 1966. It was used as long ago as the 16th century, with sporadic examples in between.

2. unpleasant, unattractive, inappropriate. Probably a deliberate reversal of the earlier slang usage, since around 2000 this has been a vogue term of disapproval among UK teenagers.

**rasta** *n*

a Rastafarian. The word is a shortening of the name of the devotees of Ras Tafari (one of the titles of the late emperor of Ethiopia, Haile Selassie) whose sacrament is **ganja** and who wear **dreadlocks**. The language of the Jamaican movement has influenced English slang mainly via reggae music.

**ratbag** *n* *Australian*

a despicable, disreputable or obnoxious person. This term of abuse originated in Australia where it derived either literally from a bag used by a rat-catcher or from the notion of a bag full of rats as the epitome of obnoxiousness. The word became popular in Britain in the early 1960s (helped in no small part by its frequent use in the popular radio comedy-series *Hancock's Half Hour*) and is now often used with a degree of affection. In Australia it often denotes an eccentric.

*'She's a total ratbag – I don't want to have anything more to do with her.'*

(*Neighbours*, Australian TV soap opera, 1987)

The expression usually forms part of a provocative rhetorical question 'who rattled your cage?', addressed to someone suddenly roused to anger or indignation. **Yank (someone around/someone's chain)** is an American alternative.

**rattly** *n*

a female. The word was used by British adolescents in 2001.

**raunchy** *adj*

sexually provocative, earthy, risqué; lustful or lust-inducing. The word prob-

ably took one of its original meanings, 'ripe' or over-ripe in the metaphorical sense, from the Italian *rancio*, meaning rank or rotten, although a British dialect origin has also been posited. Until the late 1960s raunchy was mainly in American usage.

**rumble**<sup>2</sup> *vb*

*'If you wanna stop us then you'll have to come and rumble us.'*  
(The Firm, British TV play, 1989)

2. *British* to uncover (a deception), to be disabused. Now a fairly widespread colloquialism, rumble, like 'tumble', in this sense originated in the 19th century. *We better get out of here – we've been rumbled.*

**rumpo** *n* *British*

an act of sexual intercourse. A 'smutty' euphemism first popularised by the fictitious folksinger and specialist in innuendo, 'Rambling Sid Rumpo', played by Kenneth Williams in the Kenneth Horne radio comedies of the 1960s. In the 1980s the term was seen as an acceptable suggestive euphemism. It derives from 'rump' as an archaic verb meaning to copulate and from the noun as a synonym for **tail**, **arse**, etc. **Rumpty-tumpty** and **rumpy-pumpy** are elaborated forms.

*'Susannah Hoffs is writing a "steamy" romance novel. Packed with intrigue and rumpo, it will, she claims "put Jackie Collins in the shade".'*  
(Smash Hits magazine, November 1989)

('Heroin', the Velvet Underground, 1967)

**run**<sup>2</sup> *vb* *British*

meaning of 'run down'. The term was recorded in use among North London schoolboys in 1993 and 1994.

**1.** the initial heady or euphoric sensation consequent on taking a mind-altering drug. The word is used especially, and most literally, of stimulant drugs such as cocaine and amphetamines; it generally refers to the sudden effects of a drug injected intravenously or taken through the mucous membranes rather than the more gradual onset attendant upon smoking or swallowing. The term is sometimes extended to refer to any exciting or stimulating action or situation.

*'When you inhale real hard, even before you exhale you're starting to feel the rush.*

*It just goes straight to your head quicker than any other drug, and a better rush than any other drug.'*

*I think we should sack the whole idea.*  
*Tina's planning to sack Martin, but she won't admit it if you ask her.*

## **sack**<sup>2</sup> *n*

1. a bed. The word was probably first used of hammocks in the 19th century.

See also **sad sack**

2. the scrotum

## **sack artist** *n*

a womaniser, seducer, Lothario. In the *Literary Review*, June 1987, in a review of *Intercourse* by Andrea Dworkin, Jane Ellison attributed this to Martin Amis. She was wrong. It is North American in origin, in common with other formulations such as 'con artist', spreading to Britain in the 1980s. Sack artist started life with the quite different meaning of a lazy person or idler (who spent most of their time in the **sack**).

## **sack it, sack it off** *vb* *British*

to forget, disregard (something or someone). As used by adolescents since 2000, the term may be inspired by the colloquial 'sack' as dismiss, or the image of disposal in a bag.

## **sackless** *adj*

1. (of a female) flat-chested

2. incompetent, vacuous. The word is used in this sense particularly in the north east of England. It is said to derive from a Norse word meaning innocent or

naïve. An annoyingly inefficient person is often described as a 'sackless wonder'. The term is also used in the USA.

*'R- C- is a gutless, sackless pansy who has never failed to shy away from a challenge in his life.'*  
(Recorded, US Internet sports chat room, 9 July 2004)

b. time spent sleeping

## **sad** *adj* *British*

unfortunate, unattractive, unexciting. This standard word was appropriated as an all-purpose vogue term of dismissal, disapproval, etc. among adolescents and younger children in the early 1990s, shortly afterwards crossing over into adult speech. (The bouffanted Tory minister Michael Portillo, for instance, was said to have 'sad hair'.)

*'I hate myself when I find myself using "sad" in all its repulsively contemporary glory ... basically it's no more than the latest linguistic expression of the bullying, teasing ways of school - it refers to kids with glasses, trainspotters, slow learners ...'*  
(Paul Stump, *Guardian*, 8 November 1992)

## **saddo** *n* *British*

a pitiable, contemptible or unfortunate individual. An elaborated form of the fashionable adjective **sad** in adolescent usage throughout the 1990s.

(Julie Burchill, *Sunday Times* magazine, 28 November 1993)

**sad sack** *n* American

**safe**<sup>1</sup> *adj* British

good, fine. The standard meaning was extended in schoolchildren's slang at the end of the 1980s to encompass anything positive. The word is thus used as an all-purpose term of approbation, often as an exclamation. 'Safe' in this generalised sense probably derives from its over-use by petty criminals and gang members.

**safe**<sup>2</sup> *n* Canadian

a short form of **French safe**

**sag (off)** *vb* British

to play truant. The verb, which can be used transitively or intransitively, became well known after reports of the abduction and murder of the toddler James Bulger by truanting boys in 1993. Partridge dates 'sag' in the sense of absenting oneself from work to the 19th century, and in the sense of truancy to the Merseyside of the 1930s.

*'In the first interview child A admitted "sagging off" school with B and going to the Strand precinct, but denied taking James.'*

(*Evening Standard*, 2 November 1993)

**2.** a fool. A high-school and campus term.

**salamite** *n* British

a male homosexual. Part of the language of teenage London schoolchildren in the 1990s, this term, usually used derogatively, is probably a deformation or misunderstanding of 'sodomite', perhaps blended with 'catamite'.

*'Kayleigh said Keith was a salamite and he completely lost it.'*

(Recorded, London schoolgirl, May 1995)

**salmon** *n* British

**1.** a cigarette. This usage, which is probably from the older rhyming slang phrase 'salmon and trout', meaning **snout**, was popular among London schoolchildren from the mid-1990s and was featured in the Shamen's controversial 1995 hit *Ebenezer Goode*. **Biff** was a contemporary synonym.

**2.** See **on the salmon**

**salty** *adj* American See **jump salty**

**sambo** *n*

a black person (usually male). This derogatory racist term comes from *zambo*, the Spanish American designation of those (slaves) with three-quarters negro and one-quarter Amerindian or European blood. The word was picked up by English speakers in the early 18th century and its use was reinforced by the 19th-century children's storybook character, 'Little Black Sambo'. The term has fallen out of use in the USA since the 1950s but is heard in Britain and Australia.

**sandbag** *vb* American

**1a.** to attack unexpectedly, stop (someone) dead, incapacitate or thwart. A sand-filled bag was formerly used as an improvised cosh or blackjack. The word was taken up into business jargon in the 1980s. (**Handbag** has been coined as a feminine counterpart.)

**sap** *n* *American*

1. a fool, simpleton or dupe. Originally a British term, the word is now more often heard in the USA. It was in origin a shortening of the word 'sapskull', meaning wooden-head, dating from the late 17th century. In the 19th century schoolboy **swots** were known as 'saps', from the Latin *sapiens* (wise or knowledgeable), and this meaning applied ironically may have converged with the older sense of the word.

2. a blackjack, cosh. This sense of the word is probably based on sap meaning a hoe or shovel in archaic speech.

**saphead** *n* *American*

a fool, simpleton or dupe. A version of **sap**.

**sarnie** *n* *British*

a sandwich. A diminutive form which has spread from the north of England.

**sashay** *vb*

to walk proudly, stride, flounce or 'mince'. Sashay originated as an Americanisation of the French *chassé* (in this case a rapid, gliding movement; a term used in square dancing).

*She sashayed up to the bar and ordered a daiquiri.*

**sass**<sup>1</sup> *vb* *American*

to speak or behave irreverently or insolently (towards), to cheek (someone). The verb is from the earlier, but now rarer, noun form.

*Don't you sass me, boy.*

**sass**<sup>2</sup> *n* *American*

impudence, insolence. Sass is a folksy or dialect form of 'sauce', in the sense of sauciness. It is now rare in the noun form, although the verb is still used.

*I don't need none of your sass.*

**sauce** *n*

alcoholic drink. In Britain this is a mainly middle-class euphemism employed particularly by heavy drinkers; the implication is that alcohol is liberally dispensed. There may also be a subconscious identification with **soused**.

*'I couldn't stop – I got on the sauce real good.'*

*(The Dancer's Touch, US film, 1989)*

**sauced (out)** *adj*

drunk. A usage based on **sauce** as a slang term for alcoholic drink (and influ-

a **gay** male. A pejorative term used by heterosexuals in the 1990s. The British equivalent is **sausage-rider**.

**sausage-rider** *n* *British*

a male homosexual. The term was one of many supposedly comic synonyms in use among heterosexuals in the 1990s.

**savage** *adj*

excellent. Like many similar terms (**brutal**, **evil**, **tough**, etc.), the standard word has been appropriated for use in adolescent slang in both Britain and the US.

**sawbuck** *n* *American*

underpants. The term, often referring to male underwear, was recorded in 2005.

**scads**<sup>2</sup>, **scad** *n* *American*

a great deal, large quantity (particularly of money). This colloquialism is of uncertain origin; it probably derives from a British dialect form of 'shed(full)' or from a dialect word 'scald', meaning multitude.

**scaffer, scuffer** *n* *British*

a homeless person, beggar or tramp. The term is heard in Scotland and the north of England. It is probably a version of the archaic dialect word *scaff*, related to 'shuffle' and denoting a vagabond or idler.

**scag, skag** *n*

heroin. This word entered American usage in the later 1960s, probably from

black street slang in which *skag* and **skank** were used to refer to anything inferior or unpleasant. The word presumably first referred to low-quality narcotics.

*'The ladies kept a couple of grams [of cocaine] in the refrigerator. Ordell said he would not tolerate any scag, though.'*  
(*The Switch*, Elmore Leonard, 1978)

**scally** *n* British

**a.** a young man, lad

**b.** a criminal, delinquent or hooligan, **chav**

**c.** a male inhabitant of the Liverpool area. The word has overtones of 'cheeky', 'smart' and 'one of the boys'; it is a regional shortening of 'scallywag', a word meaning reprobate or rascal first used abusively in the USA before the Civil War. Scallywag itself is probably a form of an older expression from English or Scottish dialect meaning something like 'scurvy wretch'.

**scallywag** *n* American

the penis. The standard colloquial term for a rascal (which dates from the 19th century but is of unknown origin) has been appropriated by older teenagers and young adults for facetious use.

**scalper** *n*

a ticket tout or other form of ruthless (though small-scale) profiteer. The term comes from the verb to scalp, which was 19th-century stock-exchange jargon for buying cheap and selling at an exaggerated price (from the notion of 'taking a cut off the top').

**scalping** *n*

profiteering, particularly by re-selling tickets at an inflated price

*'This is a shrewd and practised Londoner trading in what the Americans call "scalping". We call the business "touting", and this summer ticket touts are set for a final beano.'*  
(*Evening Standard*, 9 May 1988)

**scam**<sup>1</sup> *n*

a deception, fraud, swindle or confidence trick. This Americanism entered fashionable British usage around 1977, subsequently becoming fairly widespread, particularly in business parlance. 'Scampery' was British slang for a highway robbery in the 18th century, a word later used by vagrants, showmen, etc. This, via American adoption, may explain the modern term (the similarity with 'scheme' is probably fortuitous). By the late 1980s scam had

come sometimes to be used to mean merely a 'dubious scheme or display'.

*"You know, I think there are a million people running scams out there", said Suzanne McGuire, the tournament's director of corporate marketing. "But what can you do? This is New York".'*  
(*Sunday Times*, 10 September 1989)

**scam**<sup>2</sup> *vb* American

to perpetrate a fraud, deception or devious scheme. The verb is derived from the noun.

**scan** *vb* British

*You stay here and scan while we check out the shop.*

**scangey** *adj* American

unpleasant, squalid, disreputable. A term of unknown origin (it is pronounced to rhyme with 'mangy') which first became fashionable in adolescent speech at the beginning of the **grunge** era around 1992.

**scarf (up/down)** *vb*

to devour greedily and completely, eat and/or drink voraciously. Perhaps a humorous alternative, tinged with onomatopoeia, of **scoff**, the term originated in the USA where it was adopted by adolescents from 'low-life' milieu in the 1960s. ('Scarf out' is another derivative; a synonym of **pig out**.)

*'Harvey watched Joan scarfing down Milanos, biting them in half with her even teeth.'*

(*The Serial*, Cyra McFadden, 1976)

practising auto-asphyxiation as sexual stimulus. The term came to prominence after the death of Conservative MP Stephen Milligan in 1994. Practitioners are known as **gaspers**.

**scarper** *vb*

to leave hurriedly, run away. The word was adopted by cockneys at the turn of the 20th century, from **parlyaree**, the Italianate pidgin used by peddlars, showmen, actors, etc. *Scappare* (to escape) is the original Italian term. Since World War I many have assumed that the word is rhyming slang from 'Scapa flow': *go*.

**scatty** *n* South African  
a weak or irresolute person

**scene** *n*

1. **the scene** the fashionable, **hip** or currently favoured milieu. A favourite word from the **beatnik** and later **hippy** vocabularies, often used in such phrases as 'make the scene' (to be present or active in the currently hip environment) and 'on the scene'. 'It's not my scene' was a common dismissal of an undesirable activity or place. In colloquial usage the word simply means environment or 'world', as in 'the music scene'. The word is now dated but is still used by some journalists and, self-consciously or ironically, by the fashionable young.

2. a state of affairs, situation. In this generalised sense the word is now dated.

*"It was a very emotional time, a lot of yelling and screaming, a really bad scene", Bolker remembered.'*

(*Sunday Times*, 24 September 1989)

3. See **have a scene (with someone)**

**sch-** *prefix*

many slang words of Yiddish origin may be spelled with these initial letters, but 'sch' is the standard German form and, as such, is not employed in this dictionary, except for words which have been specifically recorded in this form. The alternative spelling **sh-** is used in writing by most Yiddish speakers and writers in English-speaking countries and is therefore preferred here.

**schemie** *n* British

a synonym for **chav**, recorded in 2005. Like **ned** the term originated in lowland Scotland and refers to (low-rent) housing schemes.

**schizzed-out** *adj* American

a. deranged, uncontrolled

b. drunk

The term is an elaboration of 'schizophrenic' or 'schizoid'. In fashionable slang of the early 1970s, schizzed-out was used in the same way as the more common 'flipped out' or 'freaked out'. The sense of drunk was an adaptation by high-school and **preppie** speakers.

**schlemiel** *n*

a fool, clumsy unfortunate, loser. A Yiddish word (pronounced 'shler-meal') used with a mixture of pity and contempt. In 1813 von Chamisso wrote *Peter Schlemihl's Wunderbare*

*Geschichte*; a parable describing a man selling his shadow and his soul. The author probably took the name from Schlumiel, a biblical general notorious for losing battles.

*'I've never been able to stand Woody Allen – he's such a schlemiel.'*

(Recorded, antiquarist, London, 1986)

**schlong**<sup>1</sup> *n* American

the penis. A Yiddish word (meaning 'snake') which has entered the mainstream of American slang since the 1960s. It has been used in the novels of Elmore Leonard, Philip Roth's *Portnoy's Complaint* and the film *Sophie's Choice*, among other instances. In the late 1980s wits coined an alternative form; 'schlort'.

**schlong**<sup>2</sup> *vb*

to have sex (with). The word was in use among UK university students in 2001 according to the Student World website.

**schlub**, **schlob** *n* American

alternative or earlier forms of **slob**

**schmaltz** *n*

sickly sentimentality. The word is Yiddish, from the German for cooking fat or dripping. The word was used in the New York Jewish community to describe what Leo Rosten in *The Joys of Yiddish* (1970) defines as 'corn, pathos, maudlin and mawkish substance; excessive sentimentality, overly emotional mush, sugary banality'.

*'With chapter headings such as "I'm in love with a dishwasher", "I love you too, Mommy", "I love you, Michael", and "We all love each other", On the Outside Looking In has more schmaltz than a New York deli.'*

(Book review by Nigella Lawson, *Sunday Times*, April 1989)

**schmeck** *n* American

1. a sniff or taste (in Yiddish from German)

2. heroin. It is this second sense which is the origin of the more recent **smack**.

**schmeckle** *n* American

an unnamed object, substance, etc. The Yiddish word actually denotes the penis, but in adolescent usage since the late 1990s has been generalised to an all-purpose designation

*She's got some schmeckle down the front of her shirt.*

*Pass me the schmeckle on the shelf there.*

**schmendrick** *n* American

a foolish or clumsy nonentity. A Yiddish word which is used by Jews and non-Jews alike in American speech. Shmendrik was a character in an operetta by Abraham Goldfaden.

**schmooze, schmooze** *vb* See **shmooze****schmuck** *n* American

a pitiful, foolish or obnoxious person, usually male. Schmuck is from the Yiddish word *shmok*, itself from the German *schmuck*, meaning ornament. In Yiddish the word was used first as a euphemism for the male member, it then became a synonym for the English **prick**, figuratively as well as literally. As employed today, especially by non-Jewish speakers, schmuck is a fairly mild term of abuse, often used ruefully, despairingly or affectionately. It was perceived as an obscenity in the USA for many years with the result that the euphemism **shmo** was invented in the 1940s.

*'He gave his small son a gun and taught him how to shoot all God's little creatures ... and called him "his little schmuck", giving Mike a nice warm glow, until he finds out what it means.'*

(Nigella Lawson, *Sunday Times*, April 1989)

**schmutter** *n*

clothing. The word is Yiddish, deriving from the Polish *szmata*, meaning rag. Schmutter was popularised in Britain by its use in the tailoring trade.

*a nice bit of schmutter if you ask me*

*They used to be in the schmutter business.*

**schnocker** *adj*

drunk. The word is probably not Yiddish or German, despite its most usual spelling, but may derive from an archaic dialect term 'snock', meaning to hit. Schnocker, also spelled **snocker**, is encountered more often in American speech than British.

*'As a whiskey salesman ... I'm often lit up by elevenses, loop-legged by luncheon and totally schnockerd by 6.'*

(Posy Simmonds cartoon, *Guardian*, 1979)

**schnook** *n* American

an unfortunate, timid or pathetic person. The word is Yiddish, but apparently was coined in the USA. It is probably related to the German *schnucki*: darling, or *schnuck*: a small sheep.

**schnozzle, schnozz** *n*

the nose. The word is Yiddish, from German, in which *schnauze* is the translation of 'snout'. The comedian Jimmy 'Schnozzle' Durante (named for his large nose) introduced the word to non-Americans.

**schwung!** *exclamation* American

1. to have sex (with). This use of the word was recorded in Grose's *Dictionary of the Vulgar Tongue* in 1785. Since the late 1960s the verb can refer to the sexual act from the woman's point of view as well as the man's. The word owed much of its popularity to the fact that it is a synonym for **fuck** which is nevertheless acceptable in the media and what used to be referred to as 'mixed company'.

2a. to take advantage of, defraud, cheat or treat unfairly

2b. to ruin or spoil. An extension of the previous sense paralleled by **fuck**, **bugger**, etc.

3. *British* to stare (at). In working-class London speech, especially among **skin-heads** of the late 1960s, the question 'Who're you screwin'?' was often the prelude to violence. It has been suggested that this use of the word is in origin a shortening of scrutinise, but this seems hard to credit. Screwing up one's eyes or metaphorically boring a hole into someone are other possibilities.

*'Villains call it clocking in Leeds, eyeballing in Manchester and screwing in London's East End ... It came as a shock: juries can be intimidated by a stare.'*

a Jew. The term appeared in Britain in the early 19th century when it did not

necessarily have the offensive racist overtones it acquired in the 20th century. Many possible etymologies have been proposed for sheeny: the three most plausible are the German word *schön* (beautiful) as applied either to their children or to merchandise by Jews, the 'sheen' of dark hair or skin as perceived by Anglo-Saxons, or the Yiddish phrase *a miesse meshina* ('an ugly fate or death'), a phrase supposedly common among Jews.

**sheep-dip** *n*

low-quality alcoholic drink

**sheepdog** *n* *Australian*

a brassière. The jocular usage, invariably heard in male speech, is based on the notion that, like the bra, the dog 'rounds them up and keeps them together'.

**sheepshagger** *n* *British*

a rustic, bumpkin or primitive. A vulgarity heard since the 19th century.

*'Uni is over and I'll never see you pathological sheepshaggers again!'*

(Posted on online student blog, December 2004)

**sheet** *n* *British*

an official report. An item of prison jargon recorded in the 1990s in Brixton and Wandsworth prisons.

**Sheila** *n* *Australian*

a woman. This well-known Australianism, although old-fashioned, is still heard. It is an alteration of an earlier word *shaler* (meaning 'young woman'), of Gaelic origin, which was used by Irish immigrants. The word became a generic term for females, the feminine counterpart of **Paddy**, and was altered to coincide with the female Christian name.

*'Cripes! I was nearly up shit creek that time. Now I'm stuck with this po-faced Sheila!'*

(Barry Humphries and Nicholas Garland, *The Wonderful World of Barry McKenzie*, 1988)

**shell** *n* *American*

1. a dollar. This usage may recall the use of cowries and other sea shells as currency, or come from the verb to 'shell out' (in which shell refers to the shell or pod containing seeds). **Clams** is a synonym.

2. a beer, beer can. This rare sense of the word may conceivably draw a comparison between empty beer cans and discarded (ammunition) shell cases.

**shellacked** *adj*

drunk. A term originating in the USA in the 1920s; 'shellack' (its standard meaning being to apply varnish) first meant to beat or punish; this was then extended to denote the effects of alcohol.

**shellacking** *n*

a beating, defeat. A humorous borrowing of the standard term meaning to slap on shellac, a resin used for varnishing and insulation. The slang sense arose in the USA where it is still heard; it is not unknown in British speech.

**sherbert** *n* *British*

an alcoholic drink. A term first heard in the raffish or jocular speech of the colonial era, since the late 1990s in use among adolescents.

**sheriff** *n* *British*

a fifty-pence coin. The nickname comes from the supposed resemblance to a western sheriff's star.

**Sherman (tank)** *n* *British*

1. a native of the USA, **Yank**. A piece of rhyming slang playing on the name of the World War II vehicle.

2. an act of masturbation, a **wank**. A probably ephemeral piece of rhyming slang of the late 1980s, quoted for instance in Steve Bell's *If* comic strip in the *Guardian*.

**shibby**<sup>1</sup> *adj* *American*

excellent, attractive. A vogue term since 2000 when it featured in the US comedy film *Dude, Where's My Car?* It is probably inspired by the noun form.

**shibby**<sup>2</sup> *n* *American*

cannabis. The word is of uncertain origin but may be an alteration of the earlier **chiba**.

**shickered, shikkered, shicker** *adj*

drunk. The word is used primarily in the USA and Australia. It is from *shikker*, the Yiddish word for inebriated, which itself is from the Hebrew *shikor*.

*'You're stoned, Bazza!*

*Come off it – just a bit shicker.'*

(*Bazza Comes into His Own*, cartoon by Barry Humphries and Nicholas Garland, 1988)

**shif(t)** *vb* *British*

**shikse, shiksa** *n* *American*

a non-Jewish female. A Yiddish term used by Jews of gentiles often, but nowadays not always, pejoratively.

**shill** *n*

a con-man's accomplice. The word has been used since the 19th century to denote a decoy or agent planted in a crowd to stimulate trade or encourage spending. Nowadays it usually refers to a participant in a rigged card game or other fraud. The origin of the term is unclear; it is said to be based either on a proper name such as Shillibeer or on an archaic dialect form of 'skill'.

**shinaton** *n*

a girl who gives a lot of oral sex. The term is probably an Afro-Caribbean pronunciation of 'shinathon', an imaginary event combining shiner(s), fellator(s) and marathon.

**shine**<sup>1</sup> *n* *American*

a black person. This now dated, usually pejorative term from the early 20th century (used by Raymond Chandler among others when describing the Los Angeles low-life of the 1940s) is still occasionally heard. The origin of this usage is obscure; it may be inspired by the appearance of black skin or contrasting white teeth, or may even be a shortening of 'shoe-shine'.

**shine**<sup>2</sup> *vb* *American*

to snub, reject. The term is probably a back-formation of the earlier **shined-on**.

*'Let's face it, she shined you.'*

(*California Man*, US film, 1992)

**shined-on** *adj* *American*

ignored, disregarded. Its origin may be by analogy with **mooning** (showing one's buttocks as a gesture of contempt) or connected with the noun **shine**, meaning a black person, hence a social inferior, or more poetically may derive from the image of the moon shining down with cold indifference.

*I'm not going to be shined-on! I think I deserve some attention.*

**shiners** *n*

**a.** fellatio

**b.** a girl giving oral sex

The term, heard among gang members, hip hop aficionados and schoolchildren in London since 2000, is probably in origin a shortening of 'knob-shiner'.

**shine the fireman's helmet** *vb* *British*

*'I was having my fireman's helmet shined.'*

(Posted on Alaskan 'flirting' website, June 2005)

**shirt-lifter** *n*

a male homosexual. An Australian euphemism used pejoratively but usually humorously. The phrase originated in the 1960s and had been adopted by some British speakers by the late 1970s. (The Melbourne satirist Barry Humphries has frequently used the term and has coined 'chemise-lifter' as a lesbian counterpart.)

**shit**<sup>1</sup> *n*

**a.** excrement. This word of Anglo-Saxon origin has parallels in other Germanic languages (e.g. in modern German *Scheisse*). It derives from an ancient common verb, imitative of the sound of defecation. In English shit is now a mild vulgarism, although in rustic speech it has been the standard term for centuries.

**b.** an act of defecation, usually in phrases such as 'have/take a shit'

**c.** a contemptible person. This usage conveys real dislike or disapproval and has been common, particularly in upper- and middle-class speech in Britain since the 1920s.

*'Tiny 19-year-old Mark Aldrich beat up two youths who called him "a little shit" – but the comment "could be appropriate" a judge said yesterday.'*

(*Daily Mirror*, 10 September 1988)

**d.** an illicit drug, especially hashish. In the 1950s heroin users referred to their drug as shit; by the mid-1960s the word usually designated hashish (which is characteristically brown) or marihuana. When used in this context the word is synonymous with 'stuff' and carries virtually no pejorative overtones.

*Hey, this is excellent shit, man.*

*'P.S. I cannot get any shit, my friends have split to other lands, they are free.'*

(Reader's letter in *Oz* magazine, February 1970)

**e.** rubbish, something worthless or inferior

**f.** nonsense, lies or deceitful talk. This is a specific use of shit as something worthless, or simply a shortening of **bullshit**.

*Come on, don't give me that shit, I wasn't born yesterday.*

**g.** unnecessarily hostile behaviour or ill-treatment

*'I'm definitely not going to take any more shit from any of them.'*

(Recorded, disgruntled office worker, London, 2005)

**shit<sup>2</sup> vb**

**1.** to defecate. The verb probably predates the noun form. Both seem to have existed in Old English, deriving from a common Germanic ancestor, itself cognate with the Greek *skāt-* (later giving 'scatological'). Used intransitively the verb is now probably rarer than phrases such as 'have a shit'. (The usual past form in British English is 'shat', in American 'shit'.)

**2a.** to deceive, bamboozle, confuse (someone)

**2b.** to browbeat or annoy (someone)

These transitive usages may originate as short forms of the verb **bullshit**, but have taken on separate identities as a designation, usually in American speech, of time-wasting or harassment by lies or deceit.

**shit<sup>3</sup> adj**

**1.** awful, inferior. A simple transference of the noun form, popular especially in British youth parlance of the 1980s.

*a shit record*

**2.** American excellent, admirable. In the **hip** language of the street, of **rap** and hip hop practitioners and their teenage imitators, shit has been used with this unexpected sense. The probable explanation is that it is a shortening of **shit-hot**.

(*A Passion for Murder*, US film, 1993)

**shit-for-brains n**

a very stupid person. This term of abuse, deriving from an earlier rustic expression on the lines of 'he/she must have shit-for-brains', has been widespread in the USA and Australia since the 1970s. It is now sometimes used adjectivally, as in 'a shit-for-brains idea'.

(Posting on a Canadian blog, November 2004)

**shlock** *n*

anything shoddy, inferior or meretricious. The word is Yiddish from German (either *schlacke*: dregs, or *schlagen*: slap or knock, in the sense of jacking up prices or damaged goods). The main application of shlock in American, and later British, slang has been to the products of the entertainment industry, particularly films and television.

**shlong** *n* See **schlong<sup>1</sup>**

**shlub** *n* See **schlub**

(Interview, *Making the Break*, British TV documentary about advertising, 1989)

a fool, 'sucker' or **jerk**. The word was invented in the USA as an acceptable euphemism for the Yiddish **schmuck** in the late 1940s when the latter term was understood in its literal and obscene sense. Shmo, like 'shmuck', has been heard in Britain in Jewish and non-Jewish circles since the 1950s.

*She seems to like him but the guy's a bit of a shmo if you ask me.*

**shmooze, shmooze** *vb* *American*

**snide** (in both its standard sense of sneering and its slang sense of counterfeited). This quasi-Yiddish pronunciation has been popular with the **hip** young and some working-class speakers since the 1950s; other words are having their pronunciation altered in a similar fashion (**sharmy** and **shmeg**, for instance). In this case the speakers may be reproducing the original pronunciation (see **snide** for the origins of the word).

The verb form was first used to mean imprison, then (since the first decades of the 19th century) to cause to be imprisoned. **shreddies** *n pl* *British*

revolting, tattered (shredded) underwear. A mainly middle-class usage among students and schoolchildren, punning on the name of a popular breakfast cereal. The term has been heard since the 1960s. The first time the words appeared in print was in October 1975, but Peter York was not the originator of the expression. It was used by bar-room wits of the early 1970s to refer to would-be 'men about town' frequenting Chelsea pubs, only some of whom were the upper-class youths (then known solely as **Hooray Henrys**) later so described. The source of the pun, the Lone Ranger, was the dashing cowboy hero of a 1950s TV series; Sloane Square is in Chelsea.

### snuff movie *n*

a violent, **hardcore** pornographic film supposedly featuring the actual death of one of the actors. Rumoured to have been made in the early 1970s, the actual existence of such a movie has never been proved. In the 1980s the term began to be applied to **splatter movies**, where the death and mayhem is indisputably faked.

*'And that was another coincidence because he was the bloke I'd met earlier in the boozer, so I gave him my last £20 note because I thought, poor sod, he'll soon be dead.'*

(William Donaldson, *Independent*, 26 August 1989)

**1c.** a nuisance or annoyance

*That lid's a real sod to get off.*

**2.** a sodomite. The original sense of the word is almost never heard in current English, it was last used in this way in the early 1960s. (The inhabitants of Sodom were, according to the book of Genesis, guilty of unnatural sexual practices.)

**sod**<sup>2</sup> *vb* British

the verb usually occurs as part of expletives such as 'sod you!' (indicating indifference, rejection, etc.) or 'sod it!' (indicating irritation or anger). Unlike its synonym **bugger**, the word is not used to mean sodomise.

The expression is roughly the equivalent of the British **bastard** or **sod**, and often implies active nastiness, although it may be used with pity ('poor son of a bitch') or annoyance ('that engine's a son of a bitch!'). The epithet fell out of use in British speech around the middle of the 19th century. (The British Reverend Benjamin Newton records in his diary for 1818 how a wealthy fellow clergyman who had two sons called the one born out of wedlock 'son of a whore' and the one born within 'son of a bitch'.) In American speech the phrase son of a bitch was until recently considered too offensive for 'polite company' or broadcasting and would often be reduced to **S.O.B.**

a black or coloured person, an Arab. The racist epithet is derived from the colour of soot and the name of a glove puppet of a yellow bear, a popular figure in children's entertainment, especially television, since the 1950s. Although sooty does not sound unaffectionate, in actuality it is often used highly offensively. (In 1745 Henry Fielding referred to Jews as 'the Sooty Tribe' in his *Covent Garden Tragedy*.)

*'We're pretty liberal really, we've only got one rule: no sooties.'*

(Recorded, proprietor of **Sloane Rangers'** nightclub, 1986)

fashionable, exciting. This term of unknown origin, recorded among London's schoolchildren in the early 1990s,

to lose control of oneself, lose one's temper. A teenage and **Valley Girl** term of the early 1980s, the phrase with its variant form, **chuck a mental**, has become popular among British and Australian schoolchildren.

*I totalled the car and Mom threw a mental.*

**throw a wobbly/wobbler** *vb* *British*

to suddenly behave irrationally or to have a temper tantrum. This phrase has become popular in Britain since the end of the 1970s, but dates from the 1950s. Its exact derivation is unclear, but may reflect simply an attack of shaking or quivering, or alternatively refer to throwing or bowling a ball in an erratic and confusing arc, or may refer to the loss of control when a wobbling wheel comes off e.g. a wagon or a bicycle.

*'Caroline's much calmer these days. She hasn't thrown a wobbly for ages.'*

excellent, attractive. This all-purpose vogue term, heard especially among young black speakers in the late 1990s, usually indicates admiration of someone's appearance or physique. Although it is the Afro-Caribbean pronunciation of **thick**, the word more probably refers to a tick as a mark of approval.

1. a smaller, and often younger, school pupil, usually one considered insignificant and irritating. A traditional public-school term which is still heard today, it likens the person to the parasitic insect.

**tickle** *n* *British*

a. a hint

**tight** *adj*

1. mean, stingy, miserly. Now a common colloquialism rather than slang, this usage originated in the USA in the early 19th century. The image evoked is of someone who is 'tight-fisted'. A modern elaboration is **tight-arsed**.

1. an act of urination. A coy, humorous or childish expression, in common use since the 1920s.

*I'm just off upstairs for a tinkle.*

**tiswas, tizwoz** *n* *British*

a state of confusion and/or flustered excitement. Usually found in the expressions 'all of a tiswas' or 'in a (bit of a) tiswas'. This folksy, light-hearted term probably comes from 'it is – it was', that is, expressing a disorientation in time, or else is an elaborated form of the colloquial 'tizz' and 'tizzy'.

**tit** *n*

1a. a breast. Various Old Germanic languages and late Latin dialects contained related words formed on the root *tet-* or *tit-* (*teta* in Spanish and *téton* in French are modern cognates). 'Teat' was, for many centuries, the standard English form; in the 17th century the alternative spelling and pronunciation **tit** began to be used. It was only in the 20th century that the variant spellings and pronunciation

clearly differentiated the vulgar and standard usages.

**1b.** any button, knob, nipple or small protuberance

*You have to attach it to the tit on the end.*

**1c.** the sight or touch of a woman's breast(s). An exclusively male vulgarism.

**ToBo** *adj* *American*

a lesbian. The term was posted on the b3ta website in 2004.

**to die** *adj* *American*

utterly excellent, wonderful. A **preppie** term, used typically by female speakers in thrilled approval or admiration. The expression, shortened from the colloquial 'to die for', refers to the notion of dying for something or of love for someone and is probably influenced by a usage such as **killer**.

*Did you see that boy in the cut-off chinos? My God, he was to die!*

*It was just to die.*

**toe-jam** *n*

an accretion of dirt between the toes

**toerag** *n* *British*

a contemptible person, a scrounger, ne'er-do-well, tramp or thief. Toe-rags were the bindings wound around the feet of convicts or tramps in the 19th century. The word had taken on its present meaning by early in the 20th century in both Britain and Australia. During the 1950s and 1960s toerag was an obscure cockney term; it was given wider currency in the 1970s by TV programmes such as *The Sweeney* and the pop songs of Ian Dury. From the mid-1980s it has been revived by working-class Londoners. In Britain toerag is often used facetiously or slightly dismissively, in Australia it can sometimes

indicate approval of one who acts like a (natural, rather than social) gentleman.

**toey** *adj* *Australian*

nervous, agitated. By 2004 the term was in use in the UK.

**toff** *n* *British*

a socially superior and/or wealthy person. The word dates from the middle of the 19th century and probably derives from 'tuft' (used of a titled undergraduate at Oxford or Cambridge who wore a decoration on his cap) rather than the later 'toffee-nosed'. The word had an archaic ring in the 1960s and early 1970s but, like other working-class terms relating to money and status, has been revived by modern cockneys and their 'upwardly-mobile' emulators.

*'Max was trying to build a high-tech laboratory complex, but all kinds of posh people were blocking his path. Basically, nobody loves you if you're common and you presume to take liberties with toffs.'*  
(Kate Saunders, *Evening Standard*, 17 May 1989)

**toffee** *n* *British*

1. nonsense, empty talk or flattery. This is predominantly a working-class usage, particularly popular in the armed forces and in London. The origin of the image is probably in the idea of something sweet, sticky and attractively wrapped.

*'She gave me a load of old toffee as usual about what a reputable organisation they are and how they enjoy doing business with us.'*  
(Recorded, advertising executive, London, 1988)

2. gelnignite. A term used by criminals and terrorists since the 1950s, from the explosive's appearance.

(Recorded, Devon, 1986)

**toke** *vb, n*

(to take) an inhalation of a **joint** or pipe of cannabis. This has been a standard term in the marihuana and hashish smokers' vocabulary since the late 1960s. Toke probably comes from the Spanish *tocar*, meaning to touch, although, perhaps coincidentally, the word existed for many years in British underworld slang, meaning prison bread or a small piece or slice, becoming archaic by the 1930s.

**tokus** *n* *American* See **tush**

**tom**<sup>1</sup> *n* *British*

1. jewellery. A piece of underworld rhyming slang, from **tomfoolery**.

2. a prostitute. In police jargon and in the slang of the underworld and prison this has been a standard term since the 1940s. It derives from a 19th-century use of the nickname Tom to denote a masculine, assertive or aggressive streetwalker.

*'...and he says that the tom couldn't have been where the police officer said she was because she was in bed with him. He was transferred the same day.'*

(Police sergeant, *Inside the British Police*, Simon Holdaway, 1989)

**c.** £1,000 in the parlance of City of London financial traders and others

**tongue-job, tongue-bath** *n*

**a. a French kiss**

**b.** an act of cunnilingus

Both uses of both terms are from the late 1960s lexicon of **hippies** and pornographers. In the sense of kiss the expression has been supplanted in US teenage and **preppie** usage by **tongue sushi**.

**tongue sushi** *n* American

**French kissing**. A **preppie** term inspired by the Japanese raw fish delicacy fashionable from the late 1970s and 1980s.

**tonguing** *n*

**b.** oral sex, usually fellatio. The term was popular among American college students in the late 1990s.

**ton-up kid/boy** *n* British

a teenage or young adult motorcyclist, a precursor of the **rocker**. Ton-up boys were the bugbears of the popular press in the late 1950s. 'A ton' or 'the ton' was 100 mph, the goal of the leather-jacketed groups who gathered near suburban by-passes and main roads to stage informal speed trials and races or to go for a 'burn-up' (to drive as quickly as possible, simply for the enjoyment of speed).

*'The BBC broadcast of "Morning Service" from Keele University, Staffs, yesterday was interrupted when a record about "ton-up" boys was heard above the hymn singing. A loudspeaker was found hidden behind a stage in the chapel.'*

(Daily Telegraph, 25 January 1965)

**tool** *n*

**1.** the penis. The notion of the male member as an implement is very ancient. The word tool itself appeared in Middle English and by the 16th century had been recorded as a sexual metaphor. It was at first an acceptable colloquialism, but since the beginning of the 19th century has been considered vulgar.

*'Play it safe*

*Play it cool*

*Wear a Jiffi*

*On your tool.'*

(Promotional slogan for *Jiffi* condoms, 1988)

**2.** a fool. Like many other words designating the male member, tool has the secondary meaning of a stupid (male) person. In the US since 2000 the word has also denoted an inept, unpopular or unpleasant male.

**3.** a weapon. This usage is now rare, but has given rise to the standard underworld and police jargon expression **tooled-up** (armed with firearms) in British English.

**tool around/about** *vb*

to idle or loaf, mess around performing trivial tasks. Originally an upper-class Edwardian phrase, probably from the sense of tool meaning to drive (a coach) skilfully and smoothly, hence to perform without effort. In modern speech there may also be a convergence with the sense of **tool** as the male member, paralleled in the synonymous usage **dick around**.

**tooled-up** *adj* *British*

**a.** armed, issued with firearms. A term used by the underworld and the police since the early 1950s. The noun **tool**, denoting a firearm, is now archaic. The expression tooled-up became more widely known in the later 1970s and 1980s after references in the media; it is sometimes extended to denote armed with knives, coshes or other weapons.

the vagina. A variant form of **tuntun**, recorded in the Midwest in 2001.

**toot<sup>1</sup>** *vb*

to take any inhaled drug, but especially cocaine or amphetamine crystals (**speed**). This word had existed in the drug users' lexicon since the mid-1960s, but became widespread in the late 1970s with the increased popularity of cocaine among otherwise 'respectable' people. It employs the predictable simile (as in **bugle, hooter**) of the nose as a musical instrument.

**toot<sup>2</sup>** *n*

**1a.** an inhalation or sniff of a crystalline drug

*D'you want a toot of this?*

**1b.** a drug normally inhaled, particularly cocaine

**tootin'** *adv, adj* *American*

**toot sweet** *adv*

immediately. The phrase is an anglicised version of the French *tout de suite* ('straightaway'), used jocularly, typically by students.

**top<sup>2</sup>** *adj* *British*

excellent, fashionable. A vogue term of approbation among adolescents from the late 1980s. In this sense, the word was probably adopted first in the north of England, later spreading to all other regions. **Mint** and **fit** were other fashionable synonyms from the same period.

**torn up, to'up** *adj American*

drunk. An expression used on campus in the USA since around 2000.

**tosh** *n British*

1. a term of address to a stranger, invariably used by a man to another man. This working-class word, now obsolescent, was a favourite with **spivs** and young toughs in the 1950s and early 1960s. It can be used with bravado, in rough comradeship or provokingly. In this sense it possibly derives from Scottish or Cornish dialect, in which it meant smart or well-dressed.

2. nonsense. A 19th-century public-school and university term that was obsolescent, except in affected usage, during the 1960s and 1970s, but was revived in the 1980s. It often forms part of phrases

such as 'tosh and tarradiddle' or 'tosh and twaddle', equating with 'stuff and nonsense'. The origin of this sense of the word is obscure; it may be an imitation of a snort of derision (as in 'tish' or 'bosh') or derive from 'toshy', meaning over-dressed.

*'He gave me some sort of explanation, but it was basically a load of old tosh.'*

(Recorded, film producer, London, 1986)

2. *British* an attempt, try. In working-class usage 'give it a tumble' is the equivalent of 'give it a whirl' (the Australian expression is 'give it a **burl**').

3. arrest, capture or detention. In criminal and police parlance in both Britain and the USA the word is used in these senses by analogy with a fall suffered by a racehorse or sports contender.

4. See **take a dive/tumble/fall**

1b. sexual activity

1c. the female sex organs

The use of the seafood metaphor (popular in the USA long before it was readily available in Britain) as a euphemism for femininity or femaleness is inspired by the piscine quality of the female sexual odour.

2. marijuana. The reason for this usage is unclear; it may simply be a transference of the idea of tuna as a delicacy or staple food.

**tuneage** *n* *American*

music. A mock-pompous coinage using the **-age** suffix and recorded among college students in the mid-1990s.

**tune in** *vb*

**turbo-crush** *n* *British*

an infatuation. 'Turbo-' here is used as an intensifier in the same way as the contemporary and more common 'mega-'. 'To have a turbo-crush on someone' was a vogue expression among younger British adolescents in the mid-1990s.

**turd** *n*

1. a piece of excrement. A descendant of the Anglo-Saxon word *tord*, the term was freely used until about the 17th century, by which time it was being avoided in polite speech and writing. It is still considered vulgar by many speakers, although, when referring e.g. to dog droppings, it is now sometimes used even in broadcasts.

Until the early to mid-1960s the word was in widespread use in this context, often amongst schoolchildren and some adults who were unaware of its provenance (and probably thought it an intensive form of **twit**).

1a. a male homosexual or effete, fey or eccentric man

1b. a cute, attractive person

Both senses of the words derive from the trademark snack food *Twinkies*, a sort of cupcake. The word has echoes of 'twinkle-

*Look at 'er, she's a right two and eight.*

Both senses of the term are London working-class rhyming slang for a **state**.

**two-bit** *adj* *American*

cheap, penny-pinching, worthless. This Americanism of the mid-19th century is now occasionally used even in countries where 'two bits' does not signify 25 cents (a 'bit' is one-eighth of a dollar).

**twoccer, twocker** *n* *British*

a joy-rider, car-thief. This term of criminal slang comes from the offence recorded on charge sheets as 'taken without owner's consent', and refers to the culture of **hotting** which grew up in working-class areas in the 1990s.

An alternative suggestion is that the person has 'fallen out of the ugly tree'.

## **u-ie** *n*

a U-turn. The expression is used by skateboarders as well as drivers, usually in the form 'do a u-ie' or 'hang a u-ie'.

## **uncle**<sup>1</sup> *n*

1. *British* a pawnbroker. A use of the word which arose in the 18th century, referring (probably ironically) to the moneylender's avuncular assistance. The term was still heard in London in the 1950s and may survive. From the 1980s it was heard in the British TV soap opera *EastEnders*.

3. *American* the law-enforcement establishment when seen as benevolent, protective or rewarding by crooks

All three main senses of the word derive from the notion of an uncle as a potential protector or provider of funds (in the third

case perhaps reinforced by 'Uncle Sam'). There are many other examples of this, for instance in theatrical jargon where the word equates with 'angel'.

## **uncle**<sup>2</sup>, **Uncle Dick** *adj* *British*

## **underarm** *adj* *British*

**a.** underhand, **dodgy**

**b.** illegal, illicit

The use of underarm in these senses stems from the literal sense of passing or carrying something concealed under the arm, reinforced by the supposed offensive nature of the armpit. ('Under the arm' is an archaic expression, once used by vagrants and marginals and meaning bad or inferior.)

## **underchunders** *n* *pl* *Australian*

**unplugged** *adj British*

behaving naturally and unself-consciously rather than boisterously, particularly towards a partner or friend. This sense of the word, heard among adolescents in the later 1990s and usually referring to male behaviour, is inspired by the use of the term to describe rock and pop musicians performing informal and relaxed acoustic sets as opposed to more contrived electrified stage shows.

**unravelled** *adj*

1. *American* 'dried', having forgotten one's lines. A theatrical term of uncertain origin.

2. exhilarated or intoxicated, **high**

a shout of rage, defiance or menace. This Americanism, chanted on anti-war or Black Power demonstrations in the late 1960s and early 1970s, and invariably followed by the epithet **motherfucker**, was intended to evoke the righteous rage of a revolutionary mob about to summarily execute their oppressors, and to parody the police instruction when 'spreading' a suspect or captive.

**upchuck** *vb*

to vomit. A humorous reversal of **chuck up** (itself based on 'throw up'), this expression surfaced in the USA in the 1920s and, having spread to British and Australian speech, has enjoyed a limited currency ever since.

**up each other/one another** *adj, adv* *Australian*

**up the duff** *adj* *British*

pregnant. A working-class synonym of **up the poke/pole/spout/stick**, here employing the long-established British metaphor of pudding. Duff is an old-fashioned boiled or steamed pudding; the word is a dialect version of 'dough'. It has an all-purpose sexual sense (encompassing gratification, the penis, semen or a woman and baby).

**up the guts** *adj* *Australian and South African*

pregnant. A vulgar version of **up the duff**.

**up the poke/pole/spout/stick** *adj* *British*

They can describe either the act of conception, as in 'he's put her up the stick', or the condition of being pregnant, as in 'she's up the stick again'.

**uptight** *adj*

1. tense, repressed, humourless, unrelaxed. A black slang term which is probably in origin a short form of 'wound-up tight' or 'screwed-up tight'. The term was adopted into the **hippy** vocabulary to express the unliberated, repressed characteristics of **straight** society, particularly the authority figures thereof. Since the early 1970s uptight has passed into (mainly middle-class) colloquial usage, although by the late 1980s it had begun to sound rather dated.

*'The cops? Oh, just about as uptight and corrupt as in Britain.'*

(Terry Reid interviewed in *Oz* magazine, February 1979)

2. *American* satisfactory, in good order. In black American street-talk the expression retains a second, rare and positive connotation, possibly deriving from 'locked-up tight', meaning fixed, settled,

under control or, alternatively and more probably, from a sexual sense of being 'coupled' or 'snuggled-up tight'.

*'It's uptight, everything is all right/Uptight, it's out of sight.'*

(Chorus lyric from 'Uptight' by Stevie Wonder, 1963)

**Vals, Valley Girls** *n pl* *American*

a Californian (and later more widespread) youth culture of the early 1980s, based on the habits, mannerisms and distinctive vocabulary of teenage girls from the San Fernando Valley region of outer Los Angeles. The Vals, daughters of affluent parents working typically in the media, music industry or professions, had developed a sybaritic lifestyle in which consumerism ('recreational shopping') and leisure activities were elevated to a social code. Vals employed a colourful hyperbolic repertoire of slang, typically expressed in a high-pitched, breathless drawl. Their lexicon was partly invented and partly adopted or adapted from the argot of surfers, college and high-school students and other sources. (**Grody**, **gnarly** and **to the max** are examples). Many of these terms became teenage vogue expressions on a wider scale in the mid-1980s.

*'The greatest creative work that any Val does is trying to think of a good slogan for her [car number] plate.'*

(*Harpers and Queen* magazine, 1983)

**Valspeak** *n* *American*

the jargon of **Valley Girls**, as spoken in California in the early 1980s, and subsequently elsewhere

*'Valspeak is an almost impossible farrago of surfer expressions, Midwesternisms*

*and irrational neologisms, delivered in nasal lockjawed whining tones.'*

(*Harpers and Queen* magazine, 1983)

**vamoose** *vb* *American*

to leave, go away, get moving. The word, familiar since its use in cowboy-era fiction and subsequent film and TV drama, is a corruption of the Spanish *vamos* ('we're going') or *¡vamonos!* ('let's go!').

*OK, I think it's time we vamoosed.*

**vamp** *vb, n*

(to behave as) a seductress. The word is usually employed only semi-seriously to denote an individual (usually, but not invariably, female) affecting a languid, mysterious and predatory air. The term arose in 1918, inspired by the vampire legend as interpreted by such film stars as Theda Bara.

**vamping** *n*

showing off, behaving ostentatiously. A key term in the lexicon of club culture, hip hop, street gangs, etc. since the 1990s. It derives from the verb to **vamp** (from 'vampire'), denoting the seductive displays of 1920s film stars.

**vamp up** *vb* *British*

**a.** to intensify, make more effective, improve or renovate

**b.** to improvise, ad-lib

These colloquial usages are from the standard informal musical sense of 'vamp' (an improvised accompaniment, ultimately from the archaic French *avantpied*) and not, as is often assumed, from the verb to **vamp** (to pose as a temptress).

**V and T** *n* *British*

(a) vodka and tonic

**vanilla** *adj*

**veggie, vedgie** *n, adj*  
(a person who is) vegetarian

**velcro** *n*

**vibe on** *vb* American

*'Some people would say things like, "Oh, that boy's gonna really be great. You don't know how talented that boy is". And the others would say, "Yeah, yeah, yeah, uh-uh, sure". They didn't really vibe on me.'*

(Former detective, *Inside the Brotherhood*, Martin Short, 1989)

**-ville** *suffix*

a termination used in **hip** talk, **beatnik** slang and later teenage usage. It denotes a place, situation or state of affairs. **Endsville** (the ultimate in either boredom or pleasure) and 'Dullsville' (boredom only) are typical examples. **Compare -city**

**wack**<sup>2</sup>, **wacker** *n* *British*

**wad** *n*

In Britain the word was heard principally in working-class speech before being adopted as a vogue term in 1988 following its use by the alternative comedian Harry Enfield. One of his **Loadsamoney** character's catchphrases was 'wanna see my wad?', shouted before brandishing a roll of notes.

**b.** *British* a bun or (thick) slice of bread  
**-wad** *combining form* *American*

**WAG** *n* *British*

**wag it** *vb* *British*  
to play truant. A modern version of the phrase 'hop the wag', in which the wag in question is a shortening of waggon. The Australian term **wag** and its extension **wag off** are other modern derivations.

(David Lodge, *Nice Work*, 1988)

**wag off** *vb*

*'Please, please Sid. You'll have the wallopers in here in a minute.'*

(*Hancock's Half Hour*, British comedy series, October 1959)

**wally, wallie** *n* *British*

1. a pickled gherkin. This old working-class name for a bottled delicacy is still heard in London. It may be a variation of 'olly', a corruption of 'olives', to which the gherkins were likened by earlier unsophisticated eaters.

*'Want a gherkin, Doll?... Charlie calls them Wallys, I call them gherkins.'*

(East Ender, *Sunday Times* colour supplement, 2 June 1968)

2. a foolish, ridiculous, clumsy and/or unsophisticated person. This word emerged from obscurity into great popularity between 1976 and 1978 and many theories as to its origin have since been advanced. What seems certain is that the word originated in working-class London usage. The word began to be used in the school playground and in the media from about 1978 (with a meaning very similar to its almost contemporary American counterpart, **nerd**). The term may derive from the earlier sense of a pickled gherkin (**dill** is a synonym in both senses) or from an obscure dialect origin (the archaic Scottish dialect *waly draigle*, meaning a weakling, has been proposed). **Punks**, who helped to popularise the expression, cited an eponymous Wally, a friend and fan of the Sex Pistols and other coevals; it also seems possible that the usage simply arose because of what was felt to be the inherent comicality of the Christian name.

*'The George Formby Appreciation Society in plenary session. Until you have seen this herd of wallies, all long past their sell-by dates and playing their ukeleles in time to a film of their diminutive hero, you haven't lived.'*

(John Naughton, *Observer*, 15 January 1989)

3. a cry or chant, heard e.g. at rock concerts (particularly of the **punk**, post-punk, **hardcore** variety). This phenomenon recalls the street and playground cry 'ollie, ollie, ollie!' heard in London in the 1950s and 1960s and recorded in cockney use as long ago as the 1870s as a shout of recognition or derision.

**wamba, womba** *n* *British*

money. A vogue word in 1988 and 1989, emerging from London working-class argot into more general usage. Wamba, like many other obscure or dated synonyms (**rhino**, **moolah**, **spondulicks**, etc.), came into use in the financially-oriented atmosphere of the later 1980s. The word is most probably an alteration or mishearing of **wonga**, perhaps in imitation of an exotic 'tribal-sounding' word such as the archaic Amerindian 'wampum'.

**wand-waver** *n* *American*

a male sexual exhibitionist, a **flasher**. A term in use among police officers, prostitutes, etc. **Wienie-wagger** is an alternative.

**wang, wanger** *n*

the penis. These are more recent spellings of **whang** and **whanger**; words which emerged around the turn of the 20th century. They probably derive from an echoic British dialect word meaning beat, hit or slap, with a secondary meaning of strike in the figurative sense of impress or surprise. Although a vulgarism, wang is often considered less offensive than **prick** (but probably more offensive than synonyms such as **dong**, **willie**, etc.) Unlike many similar terms, wang does not have the additional sense of a fool.

**wanger, wanga** *n* *British*

a schoolchildren's euphemism for **wanker**. This expression from the late 1980s is apparently sufficiently disguised to allow its use in the presence of adults or even on broadcasts such as the British children's TV series *Grange Hill*.

**wank** *vb* *British*

1. to masturbate. This very widespread vulgarism (with some recent exceptions, still taboo in the printed and broadcast media) is, perhaps surprisingly, of obscure origin. It seems to have entered the spoken language in the late 19th century, significantly at a time when the word **whang** was emerging as a vulgar term for the penis. Wank (earlier spelled 'whank') is probably derived from the same source; 'whang' as a dialect word first meaning hit, beat or slap. Wank may simply be a variant pronunciation or a development of the earlier word, influenced by 'whack' and 'yank'. Since the 1960s the word has been used of and by women as well as men.

2. to behave in an ostentatious, self-indulgent and/or futile manner. A usage deriving from the interpretation of masturbation as purposeless and/or offensive.

**wanker** *n* *British*

1. a masturbator. For the probable etymology of the word see **wank**.

2. an inconsequential, feeble, self-indulgent or otherwise offensive person. The term of abuse or disapproval (most frequently applied to males) has been in use since the early 20th century, but became extremely common in the

1970s. In the USA the word is known, but its force as a taboo term in Britain is often underestimated by American speakers.

**wankered** *adj* *British*

extremely drunk. A popular word with students and other adolescents in the 1990s.

**wank off** *vb* *British*

to masturbate. A longer version of the more widespread term **wank**.

**wankshaft** *n, adj* *British*

(something or someone) unpleasant, obnoxious. In playground usage.

**wank stain** *n* *British*

a tedious, insignificant and/or obnoxious person. This vulgarism seems to have arisen in the 1970s among adolescents; in the 1980s it became a popular term of abuse, particularly among students. The less offensive shortening, **stain**, was a vogue term from the late 1980s.

**wanky** *adj* *British*

meagre, inadequate, disappointing. A popular term amongst schoolchildren, also used in the TV comedy *Men Behaving Badly* in 1995, formed from **wank(er)** and possibly influenced by **manky**.

**wannabe** *n*

an aspirant or imitator. A fashionable Americanism of 1986 and 1987 which was quickly adopted in the UK. The wannabe, typically a teenager or young adult, exhibits an envious or ambitious desire, characterised by phrases such as 'I wannabe like Madonna', 'I wannabe thin', 'I wannabe in the Seychelles', etc.

*'There are two types of Wannabee. The first kind are the clones – the stagedoor Georges, the Cindy Lauperettes, the Apple scruffs, the Madonna Wannabees (aka Wannabes) – the devoted fans who ape their idols as closely as possible. The other kind are the young urban upstarts with a desperate lust for fame.'*  
(*I-D* magazine, November 1987)

**waps** *n* *pl* *British*

female breasts. A term popular among younger speakers since 2000.

**warby** *n, adj* *Australian*

(something or someone) filthy, inferior or defective, coarse. This Australianism is a survival of a Scottish dialect term for a maggot, archaic in Britain since the 19th century.

**warehouse** *vb* *British*

to hold or attend an **acid house** party

*'The philologically inclined will note that in Tony's world the word "warehouse" has turned into a verb. "Yea", says Tony, "I warehouse, you warehouse... we was warehoused..." Essentially what it means is this: to overwhelmingly swamp with people.'*  
(*Evening Standard*, 9 October 1989)

**WASP** *n*

a 'white Anglo-Saxon Protestant', a member of the traditionally dominant ethnic group in the US establishment. This was probably the first of many acronyms, first denoting ethnic subgroups (such as **JAP**), and later social subcultures (**yuppie**, etc.) The term WASP originated in the 1960s.

**waste (someone)** *vb*

to kill (someone). A euphemism inspired by 'lay waste'. In the 1950s US street gangs used the word to mean

defeat, while criminals used it to mean kill. In the Vietnam War era the term first signified to devastate and then to annihilate and kill someone.

**wasted** *adj*

**a.** exhausted, drained of energy

**b.** intoxicated by drugs (or, occasionally, alcohol), **stoned**. This is an extension of the sense of to devastate or annihilate (arising in the late 1960s), on the pattern of synonymous terms such as **wrecked**, **smashed**, **blitzed**, etc.

lescents or young adults and were used derisively by those who considered themselves socially superior or more sophisticated. **Trev** and **Darren** are more recent versions.

**way-out** *adj*

extreme, excessive, exotic, eccentric. A vogue term first among pre-World War II jazz aficionados, later among **beatniks**. The phrase was picked up by more conventional speakers to refer to unorthodox behaviour and has become a fairly common, if dated expression.

**wazoo** *n* *American*

2a. *British* a dodge, stratagem or half-truth

2b. *British* a tip, a reward achieved by trickery

The weasel is used as a by-word for deviousness in all English-speaking areas. Historically, even its name embodies this; the Old English *weosule* is related to the Latin *virus* and originally meant a slimy liquid or poison.

**weasel**<sup>2</sup> *vb* *British*

a. to behave in a devious, sly or underhand way

b. to carry luggage in order to earn or extract a tip

The verb sub-senses are specific instances of the more prevalent notion of untrustworthiness and unscrupulousness associated with the animal.

**weasel words** *n*

insincere, devious or unscrupulous talk. This well-established usage probably derives from the weasel's claimed ability to suck the contents from an egg without shattering the shell, hence the notion of evasion.

**wedding tackle** *n* *British*

the male genitals. A humorous phrase which is an elaboration of the earlier 'tackle', heard in this context since the 18th century. Wedding tackle is a euphemism which is considered inoffensive enough to be broadcast and printed, as well as used in conversational contexts. It was popular during the 1980s but probably dates from much earlier. (Partridge dates the synonym 'wedding kit' to 1918.)

**wedge** *n*

money, wealth. In the 18th century wedge specifically referred to silver, which criminals melted down and reconstituted as 'wedges' (ingots or bars). The term was used throughout the 20th century by working-class speakers, including street traders and criminals. Perhaps unconsciously influenced by **wad** and 'edge', the word has enjoyed a renewed popularity, like most of its synonyms, in the money-conscious environment of the 1980s.

*'I've come into a bit of wedge.'*

(*Budgie*, British TV series, 1971)

**wedged(-up)** *adj* *British*

financially well-endowed, wealthy or 'flush'. A racy working-class back-formation from **wedge**, meaning money. Wedged(-up) or 'well-wedged' were adopted in the **yuppie** era by middle-class speakers.

*'... the senior partner who spends his lunch hours not at a sandwich bar but at a casino, and every so often comes back "wedged up with more than just a round of tuna mayonnaise".'*

(*Sunday Times*, 15 December 1996)

**wee**<sup>1</sup>, **wee-wee** *n*

urine or an act of urination. A nursery term in use for the last 90 or so years. The word is an invention, probably influenced by **pee**, 'wet', the word 'wee',

meaning small (as opposed to **big jobs**), and the sound of urination.

**wee<sup>2</sup>, wee-wee** *vb*

to urinate. An inoffensive nursery term, often used facetiously by adults.

**weed, the weed** *n*

2b. a cigarette. A usage popular among American teenagers.

4. **the weed** *British* a system of extra, unofficial work or a scheme yielding unofficial or illicit income. This sense of the word, used by workers and fair-ground employees among others, is probably obsolete now. It is related to the following verb form.

*I need some weight.*

**weighted off** *adj British*

**weirdie, weirdo** *n*

a non-conformist, eccentric, a **beatnik** or **hippy**. The terms have been used, typically by disapproving adults, since the end of the 1950s; weirdie was the standard British version ('bearded weirdie' was an elaboration) until about 1966 when the American equivalent weirdo became more prevalent. The standard English word 'weird' (from the Old English *wyrd*, meaning fate) not only describes the appearance and behaviour of 'deviants' but was a vogue word among beatniks themselves, meaning impressive and acceptable as well as bizarre.

An extension of the use of 'weird' in **hipster**, **beatnik**, **hippy** and later teenage parlance, originally frequently used in a drug context, the phrase currently more often refers to unpredictable or temperamental displays by children, parents, etc. To 'weird someone out' is to disorientate or confuse them.

The first instances of the use of the word have not been definitively identified, although the Scottish comedian Billy Connolly popularised the term, closely followed by several radio disc-jockeys.

but is possibly related to domestic abuse as a result of drinking too much.

**wig out** *vb*

**wikkid** *adj*

an alternative spelling of **wicked** (in its vogue youth sense of admirable)

**wild** *adj*

exciting, impressive, excellent. This was a vogue term among jazz aficionados, **hipsters** and **beatniks** of the 1950s in the USA. It is inspired by the use of wild to mean enthusiastic in the phrase 'wild about something'. The transferred use of wild as a term of approbation mainly survives in adolescent and pre-teenage speech.

**wilding** *n*

running amok. A black youth vogue term, seemingly first published in the *New York Times*, 22 April 1989.

*'A beautiful woman jogger viciously gang-raped and left in a coma by a mob of "wilding" youths in New York's Central Park has woken from the dead.'*

*(People, 14 May 1989)*

**Wilf** *n* *British*

a fool. A mild term of (usually) jocular or affectionate abuse from London working-class speech. The word, typically heard in a school context, is either based on the supposedly inherent comic nature of the name Wilfred, or on the use of that name for a character in the cartoon strip *The Bash Street Kids*, appearing in the *Beano* children's comic since the 1950s.

*Come on, don't be such a Wilf!*

impotence. A middle- or upper-class embellishment of 'wilt', heard since the early 1970s.

*It was a case of wiltshire, I'm afraid.*

**wimp** *n*

a feeble, weak or timid person. This now well-established term first appeared as a term of derision employed by US high-school and college students in the mid-1970s. Its exact origins are obscure: suggested derivations are from 'whimper'; from a British undergraduate term for a girl (which was, however, in very limited use and was obsolete by 1930); from the name Wimpy, given to a character in the Popeye cartoons; or from a blend of 'weak', 'simple' or **simp** and 'limp' or **gimp**. By the late 1970s the word had spread to adult speech and beyond the USA.

*'Well, goodnight Ralph. It was nice meeting someone so sensitive, aware and vulnerable. Too bad you're such a wimp.'*

*(Real Men Don't Eat Quiche, Bruce Feirstein, 1982)*

**wimp out** *vb*

**window** *n*

**a.** an opportunity

**window-licker** *n*

a slow-witted, unfortunate and/or irritating person. A popular term among adolescents and in office slang from around 2000. The image is said to be that of a handicapped person peering from inside a bus.

**wind someone up** *vb* *British*

to provoke, tease, deceive someone. A London working-class usage which became fashionable at the end of the 1970s in raffish circles. It described the sort of straightfaced manipulation of a victim which discomfits increasingly; the image is probably that of winding up a clockwork toy or tightening a winch. By the early 1980s the phrase was in widespread colloquial use and was generalised to encompass mockery, deliberate irritation, etc.

*It took me a few minutes to realise that she was winding me up.*

**wind-up** *n* *British*

a provocation, teasing or deception. A London working-class back-formation from the verb **wind someone up**, which became a fashionable term in the late 1970s, spreading into general colloquial usage around 1979. (An expert at this kind of deliberate irritation is a 'wind-up artist'.)

**wing it** *vb*

**1.** to improvise, ad lib. Rather than being inspired, as is sometimes thought, by the phrase 'on a wing and a prayer', this usage almost certainly comes from a 19th-century theatrical term 'to wing', meaning to learn one's lines at the last moment (while standing in the wings, literally or metaphorically).

**2.** to leave, go away

**wing-nut** *n*

a person with protruding ears. The jocular pejorative, heard in all English-speaking areas but particularly the USA, has been applied to Prince Charles, among others.

**wipe out** *vb*

a failure, particularly a sudden and/or spectacular one

**wired** *adj*

1. tense, edgy, manic. The word combines the notion of highly strung with that of electrified. It arose among amphetamine (and later cocaine) users in the 1970s, originally in American speech. The word was subsequently adopted in the USA in a non-drug context to denote someone overstimulated or anxious.

*'Frankie man you're all wired, you're all pumped up – you know you're not thinking straight.'*

**with-it** *adj*

fashionable. A vogue term of the early to mid-1960s which, in its sense of stylish or up-to-date, is still used by the middle-aged in particular, but now sounds dated. It derived from the phrase 'get with it', an essential item of pre-World War II **jive talk** and post-war **beatnik** parlance. In its sub-sense of 'on the ball' or in touch with events, the phrase may be used by speakers of all ages.

**wobbler, wobbly** *n* *British*

a bout of erratic, neurotic or extreme behaviour. The term usually occurs in the phrase **throw a wobbly/wobbler**. The word has been widespread since about 1980.

1. *British* a lump or slice. The word is a blend of 'wad' and 'wedge' and has been in use since at least the mid-19th century.

2. money. In this sense, recorded in 2002, the word is probably a variant from of **wedge**.

**wog** *n*

1. *British* a foreigner. The word was first used to refer to dark-skinned inhabitants of other countries and is still usually

employed in this sense. First recorded in the late 19th century, some people believe the term is derived from the initials for 'Westernized Wily Oriental Gentleman', a condescending euphemism supposedly applied to Indians or Arabs working for the British colonial authorities. An equally plausible source is the word 'golliwog' (originally 'golliwogg'), denoting a black doll with curly hair; a character invented by the children's writer Bertha Upton in the late Victorian era. The word is common in Australia and not unknown in the USA.

*'The only reason I was opposed to them calling me a wog was because I realise that in this country the word is used adversely against dark-skinned people.'*

**womba** *n* *British*

an alternative spelling of **wamba**

**wombat** *n*

the term is an acronym, the letters standing for 'waste of money, bandwidth (or brains) and time'.

**womble** *n* *British*

a foolish, clumsy or unfortunate person. Since the appearance of the books and television puppets of the same name in the early 1970s, the word has been appropriated, particularly by schoolchildren, to refer to someone considered feeble, contemptible or a misfit. **Gonk** and **muppet**, both names of grotesque creatures, have been used with the same connotations.

(someone who is) stylish, in the know. The word is probably somehow related to the black slang concept of 'woofing' (itself derived either from the imitation of a dog's bark or from 'wolf'), as used to describe someone who is behaving in a boastful or intimidating manner.

The word was first applied to young dandified ne'er-do-wells, thugs or pimps in New York's Little Italy in the first decade of the 20th century. It derives from the Sicilian dialect term *guappo*, itself from the Spanish *guapo*, meaning handsome.

Someone asking 'word up?' is making the informal greeting 'How are you today and what's happening, my friend?' In the UK *The Word* was adopted first as the title of a radio programme on the station Kiss FM and then for a controversial TV youth programme of the early 1990s.

cocaine, in the street language of the late 1990s. It was included in so-called **Ebonics**, recognised as a legitimate language variety by school officials in Oakland, California, in late 1996.

**yak, yack**

**1.** *vb, n* (to indulge in) incessant talk, idle chatter. The word imitates the sound of monotonous, grating and/or inane

speech. Nowadays variants of the verb form such as 'yak away' or 'yak on' are often preferred.

*'How much longer are you going to be yakking into that damn phone? We're late.'*

(Recorded, middle-class woman, Bristol, 1989)

**2.** *n* a laugh, joke or instance of humour. **Yok** is an alternative form, favoured in fashionable journalism.

**3.** *n* the **yak** *American* cognac, brandy. The use of the term reflects a vogue for expensive cognacs among US **rap** and hip hop stars, such as Busta Rhymes and Puff Daddy, from 2002.

Compare **Hennessey**

**yakka, yacka, yacker** *n* *Australian* work. The word is a native Aboriginal proper name.

**yakkety-yak** *vb, n*  
(to indulge in) incessant talk, idle chatter. An elaborated form of **yak** heard especially in the USA and enshrined in the pop song of the same name (written by Jerry Leiber and Mike Stoller and a worldwide hit for the Coasters in the late 1950s). The term often denotes gossip as well as chatter or talk.

**ya mamma, ya mam** *exclamation* defined by a UK teenager in 2004 as 'a way to diss someone or to answer an insult'

**yammer** *vb*

**a.** to wail, complain or jabber fearfully

**b.** to talk or shout insistently

Yammer is probably a modern descendant of an Anglo-Saxon verb meaning 'to murmur or lament'. Its use is reinforced by the influence of words like yell and stammer and, in the USA, by the similarity to the German and Dutch *jammeren*, which means to whine or lament and derives from the same Old Germanic root as the English cognate.

**yang** *n* *American*  
the penis. This term may be an alteration of the more established **whang**, influenced by the verb to 'yank', or is perhaps a shortened form of the post-1970s expression **yinyang** (itself possibly containing the Chinese *yang*, meaning masculine principle).

*'Hanging around toilets waiting for some poor guy to reach for a cop's yang by mistake.'*

(*The Switch*, Elmore Leonard, 1978)

**yangyang** *n* *American*  
a variant form of **yinyang**

**yank (off)** *vb*

(of a man) to masturbate. A fairly rare but geographically widespread term.

**yank (someone around/someone's chain)** *vb* *American*

to mislead, deceive, harass or irritate someone. The image on which the expression is based is that of a chained or leashed animal or prisoner being thoughtlessly or maliciously jerked about or led in different directions. (Phrases commencing with **jerk** are used in the same way.)

**Yank, Yankee** *n*

an American, a native or inhabitant of the USA. Yankee is the older form of the word and seems to be connected with the early Dutch settlers in Connecticut and the rest of New England. It may be a familiar form (Jan-Kees) of the common forenames Jan and Cornelius, a diminutive Janke ('Johnny'), or an invented epithet Jan Kaas ('John Cheese'), all applied to Dutchmen in general. Other suggestions are that it is from a nickname given to English-speaking pirates and traders by the Dutch, or a deformation of the word 'English' by Amerindian speakers. It may possibly be connected with *yonker*, which is Dutch for young (noble-)man. In the USA Yankee is used as an epithet by which old-school southerners damn northerners and also as a straightforward designation of an inhabitant of the northeastern states.

**yank someone's crank/weenie/zucchini** *vb* *American*

to mock, mislead or irritate someone. These expressions are all vulgarisations of 'pull one's leg'.

**yap**<sup>1</sup> *vb*

to talk incessantly and/or inanely. An echoic term also used to depict the persistent high-pitched barking of small dogs.

**yap**<sup>2</sup> *n*

**1a.** incessant talk, idle chatter

**1b.** the mouth

This echoic term is often heard in the form of the British working-class exclamation 'shut your yap!'.

**2.** *American* a country bumpkin. This sense of the word is from an archaic British rural dialect term for a simpleton.

**yard** *n*

1. the penis. A usage said to be archaic by most authorities, but still revived from time to time by those in search of a robust or rustic-sounding euphemism.

2. **the Yard** *British* Scotland Yard, the headquarters of the London Metropolitan Police

3. *American* one thousand. Also one hundred (dollars).

4. Jamaica. A nickname used by the local inhabitants, probably deriving from the notion of 'my own backyard'.

a. a member of a secret Jamaican crime-syndicate or gang, said to operate in Britain and the USA since the late 1980s

**yards** *n* *British*

a home, flat or accommodation. From Caribbean usage, since around 2000 this form has been more fashionable than the singular.

*I'm heading for my yards man.*

**yarko** *n* *British*

a synonym for **chav**, in vogue in 2004. The derivation of the term is obscure but it seems to have originated in East Anglia.

**yarning** *n* *British*

telling stories, especially tall stories. The word, based on the phrase 'to spin a yarn' (itself from nautical rope-making or spinning cloth), is heard particularly among adolescent girls since the later

1990s and probably originated in black usage.

*'Yarning is telling your girlfriends all about this amazing bloke you met on holiday and what a deep experience you had...when nothing actually happened.'*

(Recorded, London student, 2003)

**yarra**<sup>1</sup> *adj* *Australian*

crazy, mad. There is a psychiatric hospital at Yarra Bend in the state of Victoria.

**yarra**<sup>2</sup> *n* *Australian*

a stupid and/or obnoxious individual. This usage derives ultimately from the Yarra river, upon which Melbourne is situated, and refers either to the opacity of its water or, like the adjectival form, to a psychiatric hospital on its banks.

**yass, yaas** *exclamation*

an exclamation of derision, defiance or provocation in black Caribbean English. It is a conflation of '(up) your **ass**'. The expression was briefly adopted by some black Americans and white British speakers in the early 1970s. (The Rolling Stones' use of the term ya-yas in the title of their 1970 live album, *Get yer Ya-Yas out*, was a misreading of this expression.)

**Yasser** *n* *American*

an erection. A shortened form of 'Yasser Crack-a-fat', an expression punning on the phrase **crack a fat** (to have an erection) and on the name of the late Palestinian leader, Yasser Arafat. The word was used by male college and high-school students in the later 1990s.

*She hangs out with those posh yatties.*

**yawn**<sup>1</sup> *n*

something extremely boring, dull or uninspiring. A colloquial term, particularly prevalent in middle-class usage. It is either a noun, as in 'the film was a total yawn' or an interjection, as in 'they took us round the exhibition – yawn!'. A racier alternative is **yawnsville**.

**yawn**<sup>2</sup> *vb, n*

(to) vomit. Although particularly popular in Australia, where it is often embellished

to **technicolour yawn**, the usage also exists in Britain and the USA.

**yawnsville** *n*

**2.** an instance of vomiting  
*He's up in the bathroom having a yell.*

**yellow** *adj*

cowardly, afraid. This now common term is of obscure origin. It is an Americanism of the late 19th century which was quickly adopted into British and Australian English. (In English slang of the 18th and early 19th centuries, yellow meant jealous and/or deceitful.) Some authorities derive the modern sense from the activities of the sensationalist 'yellow press'; other suggestions include a racial slur on the supposedly docile Chinese population of the western US or a reference to a yellow-bellied submissive reptile or animal, but it seems more likely that it is an extension of the earlier pejorative British senses.

**yellow-belly** *n*

a coward. This phrase, adopted by modern schoolchildren from the language of western movies, was probably coined after the turn of the 20th century. The use of the word **yellow** to denote cowardice is a 19th-century development.

**yen sleep** *n*

a waking trance state brought about by the smoking of opium or, by extension, a drowsy, restless sleep resulting from

opium or heroin withdrawal. An expression from the 1950s jargon of drug abusers. The Chinese word *yen*, meaning smoke or opium, is also the source of the English word for a yearning.

**yenta, yentl** *n*

a shrewish woman, a gossip or crone. The word is a middle-European Jewish woman's name or title (probably related to forms of the word 'gentile'). The yenta became a comic figure in Jewish folklore, particularly in the American Yiddish theatre before World War II.

**yeti** *n British*

**yinyang, ying-yang** *n American*

**1a.** the anus

**1b.** the sex organs

**Yang** and **w(h)ang** are both common expressions for the penis. Yinyang may be either an embellished version of these, a genuine nonsense nursery word for any unnameable thing or part (it was used in a pseudo-Chinese music-hall chorus in the earlier years of the 20th century) or, alternatively, an adult imitation thereof influenced by 'yang' and 'yin' as describing the Chinese masculine and feminine principles respectively (given currency in the early 1970s via the *I Ching* and subsequently in therapy and sex manuals).

**2.** a fool, dupe, an inept person, a **yojo**. This use of the term probably postdates its other sense of the anus or genitals, by analogy with most other words of similar meaning.

*'Well, if it's a yinyang you want, you've got three much better guys for this job.'*  
(*Vice Versa*, US film, 1988)

**yip** *n American*

**yippy, yippie** *n*

a **hippy** activist, a member of the so-called 'Youth International Party' founded by Abbie Hoffman and Jerry Rubin in 1968, the date of the Chicago Democratic Convention where they put forward a pig as a presidential candidate. This short-lived movement was a loose coalition of radicals, anarchists, libertarians and left-wingers concerned with 'situationist' and confrontational political methods. The term was sometimes applied to other politically involved hippies and was one of the sources (albeit a heavily ironic one) of the later word **yuppie**.

*'Yippy politics, being made up as it goes along, are incomprehensible.'*  
(*Oz* magazine, 1970)

**yo** *exclamation*

an all-purpose greeting, also indicating solidarity, enthusiasm, etc.

**yob, yobbo** *n* *British*

This is one of the only pieces of **backslang** to enter the popular lexicon; it was heard occasionally in working-class and underworld milieus from the 19th century until the early 1960s, when it became a vogue word and was extensively used in the newly-liberalised entertainment media. 'Yob-bishness', 'yobbery' and even 'yobocracy' are more recent derivations, often used to refer to brutal behaviour in a social and political context as well as in connection with juvenile delinquency and hooliganism.

*'The London International Financial Futures Exchange, terrible place, full of the most frightful yobs.'*

(*Serious Money*, play by Caryl Churchill, 1987)

**yo-boy** *n* *British*

*There's lots of yoks in this new movie.*

**yomp** *vb* *British*

to tramp across rough country wearing or carrying heavy equipment. This item of arcane military slang became known to the general public at the time of the war between Britain and Argentina over the Falkland Islands in 1981. The word is now used, by non-military hikers and others, more or less as a synonym for 'trek'. It is either an invented blend, influenced by words like 'tramp', 'hump', 'stomp' and 'jump', or an imitation of the sound of boots slamming into muddy ground.

**yoni** *n*

the vagina. This Sanskrit word (originally meaning 'abode' or 'womb' and later the female equivalent of a religious phallic symbol) is sometimes used jocularly or by writers on sexual matters in place of a taboo or clinical-sounding alternative. **yonks** *n* *British*

**youngblood** *n* *American*

a black youth. The term, inspired by its literary use referring to Amerindian braves, is used particularly of a junior member of a street gang. In the late 1980s the word was often shortened to **blood** (which also derives from 'blood brother').

**young fogey/fogy** *n* *British*

a youngish person of self-consciously traditional attitudes, manners and aesthetic ideals. Young fogey, by humorous analogy with the colloquial 'old fogey', characterised another social subgroup of the 1980s. Personified by the fastidious and conservative novelist and critic A. N. Wilson, these mainly male members of, or aspirers to the upper-middle-class re-create in their lifestyle and outlook the more refined pre-1960 establishment values (i.e. [high] Anglicanism, literary dabbling, a liking for traditional cooking/clothing, etc.)

*'These days a "party" is often a sedate à deux affair at the latest Young Fogey night-spot.'*

(*Sunday Times*, Men's Fashion Extra, October 1989)

The yuppie, originally

identifiable in New York City by a uniform of a business suit worn with running shoes, is an ambitious work-oriented materialist, usually highly paid and extremely receptive to consumer fashions. The term quickly became established all over the English-speaking world, epitomising the 'aspirational' mood of the 1980s.
