French for Everyone: 2200 Vocabulary Lessons for Keen Foreign Language Students

Rosetta Wilkinson

Preface

There is always a clever approach. Going at a problem directly is not always the best course of action; lateral thinking is useful in many different situations.

One of these situations is foreign language learning.

French is a priority language for people of every age in every country in the modern world.

This book takes an indirect approach to help you improve your French vocabulary in a short period of time.

Chapter 1

Quick Rules

Learning a new language can be fun!

Each puzzle in this chapter asks you to guess a commonly used French word, given a few clues about the word. Some of the letters in each word have been replaced by the _ sign. You can use your French vocabulary to try to guess the words. There are also other clues provided as hints, to help you!

Two hints have been provided for every puzzle. One of them gives the first letter of the word, and one of them gives its meaning (in English).

For the shorter words, the answer may not be unique. However, the longer words usually have only one unique solution.

Chapter 60

Quick Rules

In this puzzle format, you still have to guess common French words, but there is a twist.

In a similar way as in the previous puzzle format, you have to discover the commonly used French word clued by each puzzle.

Here are the key details of the format: your main clue contains the letters of the word you have to guess, but all the letters of that word are jumbled up. You have to decode the clue by rearranging the letters so they make a meaningful word. Multiple hints (the first letter of the word, and the meaning of the word in English) are also provided.

You can find the answers at the end of the book, though I am sure that, with the hints and your own ingenuity, you will definitely not need the answers for the majority of the puzzles in this chapter.

Here are your puzzles:
