## Introduction

## The student's book

## Who is this series for?

Anybody who feels the need to supplement the grammar taught in coursebooks with either additional grammar examples and explanations, or exercises, or both. The books are flexible enough to serve a dual purpose as class books and as books to use at home.

## Character page

Turn to the front of the first student's book and you will see the five main characters. It might be a good idea to show this to your students before you start using the book. Each character is accompanied by a brief description. Ruff, Tumble, Splodge, Mabel and Mildred all live in a town called Wibble. Wibble is a tremendous place. It has a sweet factory, a castle, a school and lots of shops - even a Mud Pie Café! If you'd like to see a picture of the town, turn to page 62 of the student's book.

## Characters

For those of you who have not had the good fortune to meet a splodge before there are one or two things that are handy to know. Splodges are incapable of looking after themselves. They're innocent, vulnerable creatures who need constant attention from their elders and betters. A splodge left to his own devices will invariably get into trouble and make a mess of things. Splodges just can't help it. They mean well, but they're pretty hopeless really.

## Splodge

This particular Splodge is no exception. He relies entirely on Ruff and Tumble: for food, for shelter, for love, for pocket money, for education. He looks up to them, aspires to being just like them
one day. Splodge is an intelligent little fellow, keen to learn new things, meet new people, and yet more than likely to 'forget' his homework. He has a natural curiosity which spurs him on to experiment with everything that crosses his path everything from Strawberry Snow to the problem of the past simple. He doesn't know what an adjective is, he's never met an adverb and he thinks the plural of 'dog' is 'dog, dog', but he doesn't allow such things to hold him back. He learns and moves on to the next challenge.
The mud pie is just one of Splodge's great passions. Mud pies are edible, of course, and

usually washed down with a large glass of Fizzy Ink. These slightly unconventional items of vocabulary are ones which you may like to teach your students at an early stage in the course.

There's a picture of Splodge preparing to make a mud pie on page 120, and a Fizzy Ink-making party on page 124. One last word about Splodge: he's mischievous. He puts glue in people's shoes, and worms in their beds. Nice worms. And, perhaps best of all, he GETS AWAY with it!

## Ruff

Ruff is the green character. He's an inventor and quite impossible to live with. Imagine, if you will, the person you'd least like to go on holiday with: that's Ruff. He's highly enthusiastic but terribly impatient. He's like a squirrel: twitchy and nervous, clever and alert, full of energy and zest for living. He rushes about from one room to
another thinking up absurd machines and potions. You can't pin him down for a second. There are always Things To Do. His Dog-Walking Machine is legendary, his Amazing Shrinking Potion really works and his Raspberry Roses are savoured in restaurants the world over.

Ruff's lab is a cavern full of treasure. Bottles, test tubes and phials stand on the shelves. Octopuses sit in boxes on the floor. A dinosaur's skeleton hangs from the ceiling as a reminder of how not to do things. Dust-laden books of potions, plans of past machines and scraps of paper fill every available space. It's a world of mystery, of experimentation, of excitement. There's a sense that anything could happen. This is the place where Splodge accidentally feeds Mildred with some fast-growing Beard Potion. It's also the place where fantastic things come to life - the Talking Teddy Bear for Lonely Children seen in Book Two was developed here, so was the Electric Mouse-Catcher. But beware the

Boomerang Biscuit that flies overhead and the scuttling spiders that crawl underfoot. And if you don't believe me, have a look at page 132 .

## Tumble

I feel sorry for Tumble. He's a sensitive soul. He has a lot to put up with. He's immensely kind and good-natured. He looks after Splodge, puts him right when he gets things wrong. Nothing is too much trouble. When Splodge fails to use the possessive s, Tumble brings him one, complete with an apostrophe - see page 7. That's what friends are for.

Tumble is patient and long-suffering. His attitude to both Splodge and Ruff is almost fatherly. He has long since given up trying to tame Ruff's enthusiasms or stop Splodge from giving Fizzy Ink to the neighbours' cat. He's resigned to the fact that he'll never read the newspaper in peace because there's bound to be an Eggbomb
exploding in the lab or a Green Pea Milkshake overflowing in the kitchen. When things become too much for him, Tumble simply flops into a chair, clutches his head between his paws, shuts his eyes, and waits for the storm to pass. He's quietly intellectual. Thoughtful. Sleepy. A tiny island of stability and common sense in an otherwise mad world.

## Mildred and Mabel

You only have to look at these two to know what they're like. They're a couple of delightful old ladies. Eccentric, perhaps, but supremely tolerant of their neighbours' activities. Mildred, the taller and thinner of the two, has a pet parrot. Mabel has a tortoise. They live next door to Splodge in a tumble-down shambolic house full of cobwebs and broken furniture. Mabel drives a car, too fast usually. Both ladies are indulgent to Splodge. They hand out advice, give him sweets and look after his rabbit when he's on holiday.

## Mo and Snapper

Mo and Snapper are the heroes of Splodge's favourite comic. There's a new Mo and Snapper comic every week, and Splodge eagerly rushes down to Wibble Newsagent's to buy it. Other than the fact that he has a crocodile as a best friend, Mo is quite a normal little boy. He has a sister, Milly. He goes to school, reluctantly. He doesn't like grammar, or homework, or lettuce. He especially dislikes a boy at school called Spike.
The Mo and Snapper chapters in these books are designed to provide a change of context from the world of Splodge. The grammar point is
presented by Mo and Snapper through the cartoon. Once out of the confines of the cartoon, Mo and Snapper become colour characters with all the enthusiasms, interests and anxieties of ordinary children.

## How the book is organised

If you look at the contents pages, you will see that grammatical topics are grouped according to the parts of speech to which they belong - unlike a coursebook, in which grammar points are arranged in the order that they will be taught in. This is because this is a series to dip into at random, when the need arises, not to be worked through systematically from start to finish.

Each chapter deals with a separate piece of grammar. With the exception of contrastive chapters where two related grammar points are brought together, you will not find more than one grammar point being taught. The series should serve to support and extend whatever coursebook you use in class. Thus, if you find that your students are having difficulties with a particular bit of grammar in the coursebook, you should be able to find the corresponding chapter in the grammar book.
Some of the more difficult grammar points have been further sub-divided. Where a structure has more than one use, more than one chapter has been devoted to it. An example of this are the two chapters which deal with going to. Chapter 25 only describes and practises going to for intentions (I'm going to read a book) while Chapter 26 treats going to for predictions ( $H e$ 's going to fall off his bike). Similarly Chapters 18 and 19 , which are concerned with the present simple, tackle habitual and stative use respectively.

## Chapters

The chapters vary in length according to how demanding the grammar topic is.

There is no fixed teaching time for any particular chapter. You can use either only the parts of the chapter that you need, or you can start at the beginning and work through to the end.

## Revision sections

Revision sections follow every group of chapters. They differ from the main body of the text in that many of the questions are inductive. The revision pages test what the students can remember. They are comprised of very short exercises and can be done either in class or at home.

## Vocabulary

The vocabulary in the books has been selected by two methods. There is a core of vocabulary used in coursebooks at this level which has been used in this series too. Much of this will not pose any problems either to you or your students. It will be known. There is also a limited amount of vocabulary generated by the contexts. Fizzy Ink and Boomerang Biscuits are an occupational hazard in Splodge's life and have therefore had to be incorporated into the vocabulary load of the books. No language learning can be interesting or fun without a few extra words. There is a glossary of useful words on pages 168 and 169. The part of speech is indicated alongside each word and a space provided for the student to write in either a translation or a definition. Users of The Grammar Champions edition have a translation already provided.

## Verb paradigms

On page 170 and the inside back cover, you will find tables of verbs. These include the present and past forms of verbs in their long and short forms, and a list of irregular verbs. In the series, the short form of verbs has been used throughout to minimise the risk of confusion, and to reflect the language as it is currently written and spoken.

## Description of a chapter

## Presenting the grammar in context

Grammar is an integral part of language and yet in books is so often divorced from it. This series seeks to provide contextualised grammar throughout each chapter. To achieve this, there are two discrete contexts: Splodge and his world, and the cartoon lives of Mo and Snapper.
Whatever activity the characters are engaged in at the start of the chapter is sustained and exploited through the exercises. Every chapter starts with either a picture or a cartoon strip in which the target grammar is briefly presented. The target grammar may be recognised by the fact that it is printed or written in bold.

## Concept questions

The first exercise in each chapter is a very simple 'ticking the correct box' exercise. It is designed to get the students thinking about the grammar. Occasionally, in the Mo and Snapper chapters, I have included a question which helps to explain the cartoon. You may of course wish to supplement the concept questions with further questions of your own. In the Splodge chapters particularly there is considerable scope for asking the students questions about the picture itself.

## Remember! boxes

There are two kinds of remember box. The first refers the student to Chapter 38 of the book where he will find a summary of the parts of speech and other basic points of grammar. These remember boxes are a safeguard against the possibility that a student may have forgotten something which is about to be discussed in the grammar box that follows. Look at this example from Chapter 1:

## REMEMBER!

These are vowels: a, e, i, o, u
These are consonants:
b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, $\mathbf{x}, \mathbf{y}, \mathbf{z}$
See Chapter 38.

Here the student is reminded what vowels and consonants are so as to avoid any confusion or difficulty when he reaches boxes A and B in which these two terms appear:

Put a before a consonant when you want to talk about one thing.

> a dog, a rabbit, a table, a pen

Splodge has got a rabbit.
This is a book.
It's a blue pen.

## C

Put an before a vowel when you want to talk about one thing.
an umbrella, an elephant, an egg, an apple
That's an umbrella.
I'm cooking an egg.
Splodge wants an apple.

The second type of remember box is one which refers the student back to another chapter in the book. This is a kind of warning. Take, for example, Chapter 10 which deals with the plural of nouns. I would suggest that this chapter should not be used until students are confident about nouns. I have therefore inserted a remember box reminding them what nouns are, and giving a reference to Chapter 8:

## REMEMBER!

Nouns are words for people, animals, things and places.
a girl, a crocodile, a table, Rome
See Chapter 8.

```
A
Adds to most nouns.
    a dog }->\mathrm{ two dogs
    a cat }->\mathrm{ cats
    a boy }->\mathrm{ four boys
    a girl }->\mathrm{ girls
```

## Grammar boxes

## Division of grammar boxes

As you will see, the grammar within each chapter has been split into bite-size chunks. Each chunk is labelled with a letter: A, B, C etc. Depending on what your requirements are, you may use all of these or only those which deal with the area of difficulty your students face.

## Rules in grammar boxes

All the grammar boxes give a rule followed by examples (in italic type). The rule is addressed to the student rather than the teacher. The reason for this is to make the language as simple as possible and to facilitate learning and revising at home. Wherever possible, grammatical terminology has been avoided altogether and the 'rule' presented more as an explanation of the grammar than a conventional rule. Here is an example taken from Chapter 28 (can for permission):
can is to ask someone a question when you want to do something and you want the answer to be 'Yes'.

Can I cook some mud pies?
Can my friend come to stay?
Can we go to the park?

Compare this with the more usual rule given for can for permission:

We use can to ask for and give permission.
This may be fine if it is aimed at adults or learners who already benefit from a reasonable knowledge of English, or if it is subsequently translated into the mother tongue, but to my mind less than satisfactory to a child trying to grapple with the language. You will see that throughout the series I have adopted a more child-friendly tone. Inevitably some grammatical terms do feature from time to time, but they are usually prepared for by a remember box (see the example of vowels and consonants above).

Users of The Grammar Champions edition will notice that the grammar rules have been translated for the student.

## Use and form

Children need to know why they're learning a particular structure. In every chapter the use of grammar comes before the form. With luck, this will help to give children a reason for learning.

## Exercises after grammar boxes

Both remember boxes and grammar boxes are followed by a short exercise. These exercises consist of an example followed by four questions, with the exception of a few easier exercises in which you will find six or eight questions. The exercise aims to consolidate the material learnt in the grammar box and acts as a test of understanding before you go on to the next grammar box. The exercise practises only the rule taught in the grammar box. Throughout the series these are written exercises but they can, in most cases, also be done orally.

## Exercises

The main exercises (which you will find in the practice section in every chapter) bring together all the grammar points taught in the chapter.

The emphasis throughout the series is on written exercises. These can be done as homework or in class if time allows. Most exercises require ten written answers, though sometimes there may be fifteen or twenty. Each exercise starts with an example or model (indicated by a triangle) for the pupil to follow. Wherever possible, there is space for the pupil to write the answers in the book itself. Only very occasionally you will find that the instruction calls for paper or a notebook.

There are several different types of exercise in the books. These range from fairly mechanical drilltype exercises designed to build confidence to exercises which require the pupil to think and produce language of his own based on the grammar he has learnt in the chapter. There are also puzzles, crosswords, reading comprehensions, cloze tests, writing activities, personalisation exercises and exercises providing for interaction with other members of the class. You will notice that there is frequently a $\mathbf{b}$ section to exercises. More often than not these provide an opportunity for oral work, pairwork or groupwork. Some
chapters also end with a more light-hearted exercise which can be done in teams or as a class.

Since the grammar book is used as a supplement to the main coursebook you may find that there are more exercises than you or your students have either the time or need for. Because each child's linguistic competence is different we have quite deliberately squashed in as many exercises as we can. This gives you the flexibility to 'pick and choose'- the exercises have been written to allow you to select the ones you think will be most valuable to your particular students' needs. While it is written within the context set by the chapter, each exercise is independent of those that precede and follow it. There is no reason to feel that you cannot, say, do Exercise 8 if you haven't done Exercise 7. You will not be at a disadvantage if you use only the exercises you have time for. Additionally, any unused exercises may be set for the purposes of revision or for holiday and remedial work.

lowis/two or three possible answers.
6 What
Which
Which
What
7 Whose is to ask ...
who owns something.
8 How
Where
What
How
When
How
Why

## The <br> Grammar

The Grammar Lab is a series of three grammar books for children. It is designed for learners who need to supplement the grammar taught in coursebooks with more examples, explanations and exercises.

- The Grammar Lab is flexible. It can be used alongside any coursebook or on its own, either in class or for homework. Teachers can use the chapters in any order to suit their curriculum.
- It covers all the grammatical topics taught on most elementary English courses.
- Grammar rules are taught in short and easy stages.
- There are simple exercises after every stage.
- Revision notes are frequent and regular.
- There are abundant written and spoken exercises, with spaces provided for written answers.
* Every statement, explanation or instruction is addressed directly to the learner.
- All the language used is in context.
- Endearing characters and their funny dialogues entertain both children and their teachers.
- There are plentiful coloured illustrations of outstanding richness and quality.
- Some of the less familiar words used in the text are listed at the end of each book. Spaces are provided for inserting definitions or translations.

## Each student's book is accompanied by a teacher's <br> book. This describes the features and organisation of the student's book and gives answers to the exercises.
