Highlight Happy!

Highlighting is a strategy that will help you with your reading. When you highlight something, you use a light-colored marker to color over a special word or words that you want to remember.

Highlighting means you...

Directions: Follow the directions to highlight words in the sentences below.

1. Highlight three things you might find in the ocean.

There are many creatures that live in the ocean. If you are lucky, you might see a whale or a dolphin in the ocean. If you are unlucky, you might find a jellyfish or even a shark!

2. Highlight five things you should bring to the beach.

Spending the day at the beach can be lots of fun. However, you must remember to bring sun block, drinking water, a hat, sandals, a towel, and a snack.

Tooth Tales!

Directions: Read the following information about your teeth.

Did you know that your teeth are made of enamel? Enamel is the hardest material in your entire body. It makes your teeth strong.

There are four different types of teeth in your mouth. Your front four teeth on the top and front four teeth on the bottom are called *incisors*. Ouch! They are sharp teeth used for biting (for biting food that is, not for biting your brother!).

You have two very pointy teeth on the top and two on the bottom called *canines*. They are used for foods that are hard to chew.

In the very back of your mouth, you have twelve wide teeth called *molars*. They are used for grinding food. (These are worth a lot to the Tooth Fairy!)

Finally, you have eight teeth called *bicuspids* for crushing food.

Adults have thirty-two permanent teeth! That's a lot of teeth, so keep smiling!

Tooth Tales, cont.

Classifying

Sometimes, you want to put things in groups. One way to put things in groups is to sort them by how they are alike. When you put things together that are alike in some way, you classify them.

You can classify the things in your room. In one group, you can put toys and fun things. In the other group, you can put things that you wear.

Directions: Look at the words on the bedroom door. Put the toys and playthings in the toy box. Put the things you wear in the dresser drawers.

Shrews

A shrew (*shroo*) is a small animal. It looks like a mouse with a sharp, pointed nose. This animal is sometimes mistaken for a mouse. It has tiny eyes and ears. Its body is covered with short, dark hair. A shrew moves very fast. A shrew eats all day. The shrew's long, pointed nose can fit into

tiny holes to find the insects and worms it eats.

The shrew lives in fields, woodlands, gardens, and marshes. Shrews are harmless to humans. They are helpful in gardens because they eat grubs and other insects. The smallest shrew weighs as little as a United States penny.

Directions: After reading about the shrew, put an **X** on one word that does **not** belong in each group.

- | | | |
|-----------|---------|---------|
| 1. small | large | tiny |
| 2. bugs | corn | insects |

All Animals

There are many kinds of animals. Three kinds of animals are mammals, birds, and reptiles.

Mammals have fur or hair. Baby mammals drink milk from their mothers' bodies. A whale is a mammal.

Birds are the only animals that have feathers. A robin is a bird.

Reptiles have scaly skin. Most reptiles lay eggs on the land. An alligator is a reptile.

Directions: Read the sentences below. Is the animal in the sentence a mammal, bird, or reptile? Put an **M** on the line if it is a mammal, a **B** if it is a bird, or an **R** if it is a reptile.

- ___ 1. Maggie brushes her horse's coat.
- ___ 2. The turtle lays its eggs in the sand.
- ___ 3. Adam cleans the feathers from his pet's cage.
- ___ 4. The baby penguin hides in its father's feathers to stay warm.
- ___ 5. The piglets drink their mother's milk.
- ___ 6. The scaly skin on the snake is dry.
- ___ 7. A blue jay has blue feathers.
- ___ 8. The bunny pulls fur from her body to build a nest.

Baby Animal Names

Many animals are called special names when they are young. A baby deer is called a fawn. A baby cat is called a kitten.

Some young animals have the same name as other kinds of baby animals. A baby elephant is a calf. A baby whale is a calf. A baby giraffe

is a calf. A baby cow is a calf.

Some baby animals are called cubs. A baby lion, a baby bear, a baby tiger, and a baby fox are all called cubs.

Some baby animals are called colts. A young horse is a colt. A baby zebra is a colt. A baby donkey is a colt.

Directions: Use the story about baby animal names to complete the chart below. Write the kind of animal that belongs with each special baby name.

Winter's Sleepers

Directions: Read about hibernation. Then, complete page 128.

As days grow shorter and it gets colder, some animals get ready for their winter's sleep. This winter's sleep is called *hibernation*. Scientists do not know all the secrets of hibernating animals. They do know enough to put hibernating animals into two groups. One group is called "true hibernators." The other group is called "light sleepers."

True hibernators go into a very deep sleep. To get ready for this long winter's sleep, true hibernators will eat and eat so they become fat. As these animals sleep, their body temperature drops below normal. If the animal gets too cold, it will shiver to warm itself. The breathing of true hibernators slows so much that they hardly seem to breathe at all.

True hibernators are animals such as woodchucks, some ground squirrels, the

jumping mouse, brown bat, frogs, and snapping turtles.

Light sleepers include skunks, raccoons, the eastern chipmunk, and the grizzly bear.

Some light sleepers will store up food to have during winter while others will eat and become fat. A big difference between light sleepers and true hibernators is that the light sleeper's body temperature drops only a little, and its breathing only slows. These animals are easy to wake and may even get up if the temperature warms. They then go back to sleep when it becomes colder again.

Winter Sleepers, cont.

Directions: Read all of the word groups. Then, place them under the correct hibernation type. Use the story on page 127.

- will shiver to warm itself
- body temperature drops a little
- hardly breathes at all
- seems more dead than alive
- moves about and then goes back to sleep
- breathing only slows
- easily awakens
- stores up food
- body temperature drops far below normal
- uses body fat while sleeping

Five Senses

Directions: Read this story about the senses. Then, do the activities on page 139.

As you use your eyes to read this, you are using one of your five senses. You are using your sight. Your sense of sight lets you see faces, places, shapes, letters, and words. Your sight helps you see beautiful things and helps keep you safe.

Bells ringing, children singing, and your mother calling you to dinner all use the sense of hearing. Your ears catch sound waves that travel through the air and you hear them.

Your sense of hearing warns you with a *beep-beep* that a truck is backing up. A phone rings and you hear it. Could it be a friend calling?

Your sense of smell lets you know that a pizza is cooking without you even seeing it.

Your nose smells the fresh sheets on your bed and lets you know that your dog has been playing in the rain or with a skunk.

You use your tongue for tasting. Foods can taste salty, sweet, sour, or bitter. Your sense of smell and taste work together so you can enjoy food. Dill pickles or tangy oranges are tasty treats. Cotton candy and popcorn are also tasty treats.

Your largest sense organ is your skin. Your sense of touch is found in your skin. You can feel smooth, soft, rough, sharp, hot, and cold. Velvet is a smooth touch. Sandpaper is rough. Snow is cold, and cotton balls are soft.

Your five senses help to keep you safe and help you enjoy life.

Making Inferences

Not every story tells you all the facts. Sometimes, you need to put together details to understand what is happening in a story. When you put details together, you **make inferences**.

Directions: Read each story. Fill in the circle beside the inference you can make from the details you have.

Everyone on the Pine School baseball team wears a blue shirt on Mondays. It is Monday and Brenda is wearing a blue shirt.

- Brenda always wears blue clothes.
- Brenda cannot find her red shirt.
- Brenda is on the baseball team.

My cat has brown and white stripes. It meows when it wants to be fed. My cat is meowing now.

- The cat wants to go outside.
- The cat is hungry.
- The cat doesn't like brown and white stripes.

- It is time for ice cream.
- It is time for the children to go home.
- It is time for a fire drill.

Figure It Out

Directions: Read the story.

It is a rainy day. Mom tells Tosh to stay inside until the weather clears up. Tosh lies on his bed and pouts. He sings one song over and over. Now and then, he checks to see if the rain has stopped.

Directions: Use details in the story to make inferences. Fill in the circle beside the phrase that completes each sentence.

- Tosh probably wants to
- go outside and play.
 - lie in bed all day.

- Tosh probably feels
- happy.
 - bored and grumpy.

- The song Tosh probably sings is
- "Rain, Rain, Go Away."
 - "Jingle Bells."

Inferences About Characters

Directions: Read this story. Look for clues about Tom. Then, follow the directions below the story.

"You can't get me!" Goldie teased Tom when she saw him looking at her.

"I never said that I wanted to get you, anyway," answered Tom, knowing that Goldie was right. He walked away, waving his fluffy tail proudly.

Although Goldie had once been afraid of Tom, she now liked to tease him.

"It's fun to tease Tom. When he is upset, all his fur stands straight up," she thought.

Soon Goldie heard noises. Someone else was home. "It is almost time for dinner," thought Goldie. "I'm really glad to be a goldfish. I'm safe and sound and very well fed."

What does Tom look like? Draw a picture of Tom.

Circle the picture that tells how Goldie feels.

Mind-Reading Tricks

Samantha thought of a good joke. She bragged that she could read Maria's mind. She put her hand on Maria's head, closed her eyes, and said, "You had red punch with your lunch!"

"Wow! You're right!" replied Maria, not realizing that she had a little red ring around her lips.

"That was easy. But I bet you can't tell me what I just ate," said Thomas.

"That's a bunch of baloney," answered Samantha.

"How did you know?" gasped Thomas.

"It's my little secret," said Samantha, with a sigh of relief.

"Here comes your mom," said Maria. "Can you read her mind, too?"

Samantha looked down at her watch. She should have been home half an hour ago. As she ran to meet her mother, she yelled back, "Yes, I know exactly what she's thinking!"

Directions: Make inferences about Samantha's mind-reading tricks. Fill in the circle beside the correct inference.

- Was Samantha sure that Thomas had eaten bologna for lunch?
 - No, she was just lucky.
 - Yes, she saw him eat his bologna sandwich.
- What was Samantha's mother probably thinking?
 - Samantha was a great mind reader.
 - Samantha was late.

What Is It?

When you don't get the whole picture, you may need to **draw conclusions** for yourself. To draw a conclusion, think about what you see or read. Think about what you already know. Then, make a good guess.

Directions: Look at each picture. Use what you know and what you see to draw a conclusion. Draw a line to the sentence that tells about each picture.

It must be a clown.

It must be a cowhand.

It must be a baby.

It must be a ballet dancer.

It must be a football player.

Who Said It?

Directions: Use what you see, what you read, and what you know to draw conclusions. Draw a line from the animal to what it might say.

Tricky Cause and Effect

Things that happen can make other things happen. The event that happens is the **effect**. Why the event happens is the **cause**.

Example: Marcie tripped on the step and fell down.

Cause: Marcie tripped on the step.

Effect: Marcie fell down.

Directions: Read the story.

Marcie knows a magic trick. She can make a ring seem to go up and down by itself on a pencil. Marcie has to get ready ahead of time. She ties a piece of skinny thread under the pencil's eraser. Then, she ties the thread to a button on her blouse. In front of her audience, Marcie puts a ring on the pencil. When Marcie leans forward, the thread goes loose, so the ring goes down. Then, Marcie leans back. The thread tightens and makes the ring go up the pencil.

Directions: Write the cause to complete each sentence.

1. The audience cannot see the thread because

- 2.

makes the ring go down.

Why Did It Happen?

Directions: Read the effects. Fill in the circle beside the sentence that tells what caused the effect.

Directions: Draw a line to match a cause to an effect.

Because he was tired,

Tran missed the school bus.

Because Tran turned off the alarm,

he had to walk to school.

Because he woke up at eight o'clock,

Tran turned off the alarm.

Because Tran missed the bus,

Tran was late for school.

Because he had a long walk,

he overslept.

A Cause-and-Effect Fable

Directions: Read the story.

Four animals caught a talking fish.

"If you let me go, I will grant each of you one wish," announced the fish.

"Make my trunk smaller!" demanded the vain elephant. "I wish to be the most beautiful elephant that ever lived."

"Make my legs longer!" commanded the alligator. "I want to be taller than all my alligator friends."

"Make my neck shorter!" ordered the giraffe. "I am tired of always staring at the tops of trees."

"Dear Fish, please make me be satisfied with who-o-o-o-o I am," whispered the wise old owl.

Poof! Kazaam! Their wishes were granted. However, soon after, only one of these animals was happy. Can you guess who-o-o-o-o?

Directions: Draw a line to match a cause to an effect.

Because of its short trunk,

Because of its long legs,

Because of its short neck,

Because he could still do all the things he needed,

the giraffe could no longer eat leaves from treetops.

the elephant could no longer spray water on its back.

the owl was happy about his wish.

the alligator could no longer hide in shallow water.

Fiction or Nonfiction?

Some stories are made up and some are true. **Fiction** stories are made up, and **nonfiction** stories are true.

Directions: Read the passages below. Then, write if they are **fiction** or **nonfiction**.

Following a balanced diet is important for good health. Your body needs many kinds of vitamins and minerals found in different types of food. For example, oranges provide vitamin C, and bananas are a good source of the mineral potassium.

We call my dog the alphabet dog. Why? Because my dog can sing the alphabet! That's right! My dog, Smarty Pants, is a dog genius! Smarty Pants can sing the entire alphabet! "S.P.," as we sometimes call her, is also starting her own dog academy to teach other dogs how to sing the alphabet. You should sign up your dog for classes with Smarty Pants today!

Fiction/Nonfiction: Heavy Hitters

Fiction is a make-believe story. **Nonfiction** is a true story.

Directions: Read the stories about two famous baseball players. Then, write **fiction** or **nonfiction** in the baseball bats.

In 1998, Mark McGwire played for the St. Louis Cardinals. He liked to hit home runs. On September 27, 1998, he hit home run number 70, to set a new record for the most home runs hit in one season. The old record was set in 1961 by Roger Maris, who later played for the St. Louis Cardinals (1967 to 1968), when he hit 61 home runs.

The Mighty Casey played baseball for the Mudville Nine and was the greatest of all baseball players. He could hit the cover off the ball with the power of a hurricane. But, when the Mudville Nine was behind 4 to 2 in the championship game, Mighty Casey struck out with the bases loaded. There was no joy in Mudville that day, because the Mudville Nine had lost the game.

About the Tests

What Are Standardized Achievement Tests?

Achievement tests measure what children know in particular subject areas such as reading, language arts, and mathematics. They do not measure your child's intelligence or ability to learn.

When tests are standardized, or *normed*, children's test results are compared with those of a specific group who have taken the test, usually at the same age or grade.

Standardized achievement tests measure what children around the country are learning. The test makers survey popular textbook series, as well as state curriculum frameworks and other professional sources, to determine what content is covered widely.

Because of variations in state frameworks and textbook series, as well as grade ranges on some test levels, the tests may cover some material that children have not yet learned. This is especially true if the test is offered early in the school year.

However, test scores are compared to those of other children who take the test at the same time of year, so your child will not be at a disadvantage if his or her class has not covered specific material yet.

Different School Districts, Different Tests

There are many flexible options for districts when offering standardized tests. Many school districts choose not to give the full test battery, but select certain content and scoring options. For example, many schools may test only in the areas of reading and mathematics. Similarly, a state or district may use one test for certain grades and another test for other grades. These decisions are often based on

the amount of time and money a district wishes to spend on test administration. Some states choose to develop their own statewide assessment tests.

On pages 255–257 you will find information about these five widely used standardized achievement tests:

- California Achievement Test (CAT)
- Terra Nova/CTBS
- Iowa Test of Basic Skills (ITBS)
- Stanford Achievement Test (SAT9)
- Metropolitan Achievement Test (MAT)

However, this book contains strategies and practice questions for use with a variety of tests. Even if your state does not give one of the five tests listed above, your child will benefit from doing the practice questions in this book. If you're unsure about which test your child takes, contact your local school district to find out which tests are given.

Types of Test Questions

Traditionally, standardized achievement tests have used only multiple-choice questions. Today, many tests may include constructed response (short answer) and extended response (essay) questions as well.

In addition, many tests include questions that tap students' higher-order thinking skills. Instead of simple recall questions, such as identifying a date in history, questions may require students to make comparisons and contrasts or analyze results, among other skills.

What the Tests Measure

These tests do not measure your child's level of intelligence, but they do show how well your child knows material that he or she has learned and that is

also covered on the tests. It's important to remember that some tests cover content that is not taught in your child's school or grade. In other instances, depending on when in the year the test is given, your child may not yet have covered the material.

If the test reports you receive show that your child needs improvement in one or more skill areas, you may want to seek help from your child's teacher and find out how you can work with your child to improve his or her skills.

California Achievement Test (CAT/5)

What Is the California Achievement Test?

The *California Achievement Test* is a standardized achievement test battery that is widely used with elementary through high school students.

Parts of the Test

The *CAT* includes tests in the following content areas:

Reading

- Word Analysis
- Vocabulary
- Comprehension

Spelling

Language Arts

- Language Mechanics
- Language Usage

Mathematics

Science

Social Studies

Your child may take some or all of these subtests if your district uses the *California Achievement Test*.

Terra Nova/CTBS (Comprehensive Tests of Basic Skills)

What Is the Terra Nova/CTBS?

The *Terra Nova/Comprehensive Tests of Basic Skills* is a standardized achievement test battery used in elementary through high school grades.

While many of the test questions on the Terra Nova are in the traditional multiple choice form, your child may take parts of the Terra Nova that include some open-ended questions (constructed-response items).

Parts of the Test

Your child may take some or all of the following subtests if your district uses the *Terra Nova/CTBS*:

Reading/Language Arts

Mathematics

Science

Social Studies

Supplementary tests include:

- Word Analysis
- Vocabulary
- Language Mechanics
- Spelling
- Mathematics Computation
- Critical thinking skills may also be tested.

About the Tests

Iowa Test of Basic Skills (ITBS)

What Is the ITBS?

The *Iowa Test of Basic Skills* is a standardized achievement test battery used in elementary through high school grades.

Parts of the Test

Your child may take some or all of these subtests if your district uses the *ITBS*, also known as the *Iowa*:

Reading

- Vocabulary
- Reading Comprehension

Language Arts

- Spelling
- Capitalization
- Punctuation
- Usage and Expression

Math

- Concepts/Estimate
- Problems/Data Interpretation

Stanford Achievement Test (SAT9)

What Is the Stanford Achievement Test?

The *Stanford Achievement Test, Ninth Edition (SAT9)* is a standardized achievement test battery used in elementary through high school grades.

Note that the *Stanford Achievement Test (SAT9)* is a different test from the *SAT* used by high school students for college admissions.

While many of the test questions on the *SAT9* are in traditional multiple choice form, your child may take parts of *the SAT9* that include some open-ended questions (constructed-response items).

Parts of the Test

Your child may take some or all of these subtests if your district uses the *Stanford Achievement Test*:

Reading

- Vocabulary
- Reading Comprehension

Mathematics

- Problem Solving
- Procedures

Language Arts

Study Skills

Listening

Critical thinking skills may also be tested.

Metropolitan Achievement Test (MAT7 and MAT8)

What Is the Metropolitan Achievement Test?

The *Metropolitan Achievement Test* is a standardized achievement test battery used in elementary through high school grades.

Parts of the Test

Your child may take some or all of these subtests if your district uses the *Metropolitan Achievement Test*:

Statewide Assessments

Today, the majority of states give statewide assessments. In some cases, these tests are known as *high-stakes assessments*. This means that students must score at a certain level in order to be promoted. Some states use minimum competency or proficiency tests. Often, these tests measure more basic skills than other types of statewide assessments.

Statewide assessments are generally linked to state curriculum frameworks. Frameworks provide a blueprint, or outline, to ensure that teachers are covering the same curriculum topics as other teachers in the same grade level in the state. In some states, standardized achievement tests (such as the five described in this book) are used in connection with statewide assessments.

When Statewide Assessments Are Given

Statewide assessments may not be given at every grade level. Generally, they are offered at one or more grades in elementary school, middle school, and high school. Many states test at grades 4, 8, and 10.

State-by-State Information

You can find information about statewide assessments and curriculum frameworks at your state Department of Education Web site. To find the address for your individual state, go to www.ed.gov, click on **Topics A–Z**, and then click on **State Departments of Education**. You will find a list of all the state departments of education, mailing addresses, and Web sites.

How to Help Your Child Prepare for Standardized Testing

Preparing All Year Round

Perhaps the most valuable way you can help your child prepare for standardized achievement tests is by providing enriching experiences. Keep in mind also that test results for younger children are not as reliable as for older students. If a child is hungry, tired, or upset, this may result in a poor test score. Here are some tips on how you can help your child do his or her best on standardized tests.

Read aloud with your child. Reading aloud helps develop vocabulary and fosters a positive attitude toward reading. Reading together is one of the most effective ways you can help your child succeed in school.

Share experiences. Baking cookies together, planting a garden, or making a map of your neighborhood are examples of activities that help build skills that are measured on the tests, such as sequencing and following directions.

Become informed about your state's testing procedures. Ask about or watch for announcements of meetings that explain about standardized tests and statewide assessments in your school district. Talk to your child's teacher about your child's individual performance on these state tests during a parent-teacher conference.

Help your child know what to expect. Read and discuss with your child the test-taking tips in this book. Your child can prepare by working through a couple of strategies a day so that no practice session takes too long.

Help your child with his or her regular school assignments. Set up a quiet study area for homework. Supply this area with pencils, paper, markers, a calculator, a ruler, a dictionary, scissors, glue, and so on. Check your child's homework and offer to help if he or she gets stuck. But remember, it's your child's homework, not yours. If you help too much, your child will not benefit from the activity.

Keep in regular contact with your child's teacher. Attend parent-teacher conferences, school functions, PTA or PTO meetings, and school board meetings. This will help you get to know the educators in your district and the families of your child's classmates.

Learn to use computers as an educational resource. If you do not have a computer and Internet access at home, try your local library.

Remember—simply getting your child comfortable with testing procedures and helping him or her know what to expect can improve test scores!

Getting Ready for the Big Day

There are lots of things you can do on or immediately before test day to improve your child's chances of testing success. What's more, these strategies will help your child prepare him- or herself for school tests, too, and promote general study skills that can last a lifetime.

Provide a good breakfast on test day.

Instead of sugar cereal, which provides immediate but not long-term energy, have your child eat a breakfast with protein or complex carbohydrates, such as an egg, whole grain cereal or toast, or a banana-yogurt shake.

Promote a good night's sleep. A good night's sleep before the test is essential. Try not to overstress the importance of the test. This may cause your child to lose sleep because of anxiety. Doing some exercise after school and having a quiet evening routine will help your child sleep well the night before the test.

Assure your child that he or she is not expected to know all of the answers on the test. Explain that other children in higher grades may take the same test, and that the test may measure things your child has not yet learned in school. Help your child understand that you expect him or her to put forth a good effort—and that this is enough. Your child should not try to cram for these tests. Also avoid threats or bribes; these put undue pressure on children and may interfere with their best performance.

Keep the mood light and offer encouragement. To provide a break on test days, do something fun and special after school—take a walk around the neighborhood, play a game, read a favorite book, or prepare a special snack together. These activities keep your child's mood light—even if the testing sessions have been difficult—and show how much you appreciate your child's effort.

Taking Standardized Tests

What You Need to Know About Taking Tests

You can get better at taking tests. Here are some tips.

Do your schoolwork. Study in school. Do your homework all the time. These things will help you in school and on any tests you take. Learn new things a little at a time. Then, you will remember them better when you see them on a test.

Feel your best. One way you can do your best on tests and in school is to make sure your body is ready. Get a good night's sleep. Eat a healthy breakfast.

One more thing: Wear comfortable clothes. You can also wear your lucky shirt or your favorite color on test day. It can't hurt. It may even make you feel better about the test.

Be ready for the test. Do practice questions. Learn about the different kinds of questions. Books like this one will help you.

Follow the test directions. Listen carefully to the directions your teacher gives. Read all instructions carefully. Watch out for words such as *not*, *none*, *never*, *all*, and *always*. These words can change the meaning of the directions. You may want to circle words like these. This will help you keep them in mind as you answer the questions.

Look carefully at each page before you start. Do reading tests in a special order. First, read the directions. Read the questions next. This way you will know what to look for as you read. Then, read the story. Last, read the story again quickly. Skim it to find the best answer.

On math tests, look at the labels on graphs and charts. Think about what the graph or chart shows. You will often need to draw conclusions about the information to answer some questions.

Use your time wisely. Many tests have time limits. Look at the clock when the test starts. Figure out when you need to stop. When you begin, look over the whole thing. Do the easy parts first. Go back and do the hard parts last. Make sure you do not spend too much time on any one part. This way, if you run out of time, you still have completed much of the test.

Fill in the answer circles the right way. Fill in the whole circle. Make your pencil mark dark, but not so dark that it goes through the paper! Be sure you pick just one answer for each question. If you pick two answers, both will be marked as wrong.

Use context clues to figure out hard questions. You may come across a word or an idea you don't understand. First, try to say it in your own words. Then, use context clues—

the words in the sentences nearby—to help you figure out its meaning.

Sometimes it's good to guess.

Here's what to do. Each question may have four or five answer choices. You may know that two answers are wrong, but you are not sure about the rest. Then, make your best guess. If you are not sure about any of the answers, skip it. Do not guess. Tests like these take away extra points for wrong answers. So it is better to leave them blank.

Check your work. You may finish the test before the time is up. Then, you can go back and check your answers. Make sure you answered each question you could. Also, make sure that you filled in only one answer circle for each question. Erase any extra marks on the page.

Finally—stay calm! Take time to relax before the test. One good way to relax is to get some exercise. Stretch, shake out your fingers, and wiggle your toes. Take a few slow, deep breaths. Then, picture yourself doing a great job!

● Lesson 16: Nonfiction (cont.)

Directions: Read or listen to the paragraph below that tells about dolphins and sharks. Then, answer the questions.

Dolphins and Sharks

Dolphins and sharks both live in the ocean, but they are very different. Dolphins are mammals. Sharks are fish. Both animals swim underwater. Sharks breathe through gills, and dolphins have lungs. Dolphins breathe through a blowhole on their heads. Dolphins have smooth, slippery skin, but sharks have scales. Dolphins give birth to live young. Sharks lay eggs. When the eggs hatch, young sharks come out. Sharks and dolphins live in water, but they have many differences.

5. Which animal has smooth, slippery skin?

- (A) dolphins
- (B) sharks
- (C) eggs
- (D) fish

6. Why did the author write about dolphins and sharks?

- (F) to feel the smooth skin of the dolphins
- (G) to learn how to swim
- (H) to tell others about dolphins and sharks
- (J) to breathe through the gills

7. What do you know about dolphins and sharks?

- (A) They are mostly alike.
- (B) They both have blowholes.
- (C) There are many different things about them.
- (D) They live in rivers and streams.

8. What do sharks need to breathe?

- (F) lungs
- (G) blowholes
- (H) noses
- (J) gills

- (J) Chad would make sure to go to see Ryan play soccer.

READING: COMPREHENSION SAMPLE TEST

- **Directions:** Read or listen to the story below. Then, answer the questions. The story is about a new boy named Raj who is deaf and comes to Patsy's school. Raj was born in India, and he knows sign language, English, and Hindi, his family's language in India. The story tells about Patsy's first experience with Raj.

A New Friend

"Can I sit here?" asked Raj in an unusual voice. He signed while he talked, and it was a little difficult to understand him.

"Sure," answered Patsy. She was very nervous, and her words barely came out. "What am I supposed to do?" she asked herself. "I've never met a deaf person before."

All that morning, Patsy kept looking over at Raj. He seemed to be able to understand what was going on in class. "How does he do that?" she wondered to herself. That afternoon, Mrs. Martin took some time to let Raj and the other students get to know each other better. Patsy was surprised to find that her friend Kyle actually knew sign language. Soon, Patsy found she could understand most of what Raj was saying.

That afternoon, Raj and Patsy walked home together. Patsy learned some signs and told Raj about her family. By the time they reached Raj's house, she was able to sign "good-bye."

5. **What do you think about Raj from reading the story?**
- (A) He is embarrassed.
 - (B) He is pleasant.
 - (C) He is unfriendly.
 - (D) He is very tall.
6. **What do you think Patsy will do in a few weeks?**
- (F) She will forget sign language.
 - (G) She won't walk home with Raj.
 - (H) She will look for other friends.
 - (J) She will have learned more sign language.

7. **What would you conclude from reading this story?**

- (A) Raj makes new friends easily.
- (B) Raj has a hard time learning languages.
- (C) Raj was more frightened than Patsy.
- (D) Raj was not a nice person.

8. **Which of the following is a fact?**

- (F) Patsy isn't a nice girl.
- (G) Patsy will never learn sign language.
- (H) Raj knows sign language.
- (J) Raj and Patsy will become best friends.

SAMPLE TEST

- **Directions:** Read or listen to the paragraphs about how people talk in the country of India. Then answer the questions. India is a country near China. Much like the U.S.A. is next to Canada, India is next to China. Have you ever heard of the country of India?

India

In the U.S.A. most people speak English. In India, there are over 1,000 different languages. This has caused many problems. Many of the people speak the words in different ways. Hindi was made the main language to speak to solve the problem. However, it is still hard for people to talk to each other.

There are many ways to let others know what you think without words. Some actions mean different things in India. For example, to show an older person that you respect him, bow down and touch his feet. If you want to be rude, sit with the bottoms of your shoes showing. To show you are clean, never wear your shoes in the house or in the kitchen. If you don't want to be polite, point at your feet.

9. What can you do to be rude in India?

- (A) Never wear your shoes in the house.
- (B) Learn how to read.
- (C) Sit with the bottoms of your shoes showing.
- (D) Go to the store.

10. What is the main idea of the paragraphs?

- (F) It is fun to live in India.
- (G) Learning to read is important.
- (H) Never point at your feet or show the bottom of your shoes.
- (J) There are many ways to let others know what you think in India.

11. What do you think people feel about talking to each other in India?

- (A) It is easy to talk to others.
- (B) It is mostly easy to talk to others.
- (C) It is hard to talk to others.
- (D) It is just like in the U.S.A.

12. What can you do to show respect in India?

- (F) Wear your socks outside.
- (G) Bow down and touch an older person's feet.
- (H) Frown at people.
- (J) Talk quietly.

READING: COMPREHENSION SAMPLE TEST

- **Directions:** Read or listen to the paragraphs below about sign language. Then answer the questions.

Sign Language

People who may not be able to hear or speak well use sign language. They use their hands instead of their voices to talk. Their hands make signals to show different letters, words, and ideas. For example, to say the word "love," cross your arms over your chest.

Other people use sign language too. Have you ever watched a football game? The referees use hand signals to let you know what has happened in the game, such as a foul or time out. Have you ever been stuck in a traffic jam where there is a police officer? The police can use sign language to tell cars to go and wait.

Guess who else uses sign language? You! You wave your hand when you say hello and good-bye. You nod your head up and down to say "yes" and back and forth to say "no." You use your fingers to point and show which way to go. We use our hands and body to make signals all of the time!

13. Why do people use sign language?

- (A) Because they don't feel like talking.
- (B) Because they don't feel like listening.
- (C) Because they cannot ride a bike.
- (D) Because they cannot hear or speak well.

14. What do people use when signing?

- (F) their hand and arms
- (G) their eyes, ears, and mouth
- (H) their feet and legs
- (J) their hair and head

15. Who would be the most likely to use sign language?

- (A) a boy playing at the park
- (B) a man who cannot hear
- (C) a woman who cannot walk
- (D) a girl learning to tie her shoe

16. What is the main idea of the story?

- (F) using sign language
- (G) writing sign language
- (H) playing with children who use sign language
- (J) buying food using sign language

Read or listen to the paragraph below that tells about horses. Then, answer the questions.

Horses

Horses are beautiful animals. Most horses have smooth, shiny coats. They have long manes and tails. Their hair may be brown, black, white, yellow, or spotted. Sometimes horses neigh, or make a loud, long cry. Horses need to be brushed every day. This helps keep them clean. Many people keep horses as pets or to work on farms. Some people enjoy riding them for fun. Horses are wonderful animals.

1. What does the word **neigh** mean?

- (A) to smile
- (B) to be different colors
- (C) to keep clean by brushing
- (D) to make a loud, long cry

2. How often should horses be brushed?

- (F) every day
- (G) every week
- (H) every month
- (J) every year

3. What do you know about horses?

- (A) Horses are the same color.
- (B) Horses never make noise.
- (C) Some people enjoy riding horses for fun.
- (D) Horses have feathers.

4. If you had a horse for a pet, what might happen?

- (F) You would have to feed it.
- (G) You would have to brush its mane and tail.
- (H) You would have to have a place for the horse to stay.
- (J) All of the above

READING PRACTICE TEST

● Part 3: Story Comprehension (cont.)

Directions: Read or listen to the paragraphs below that tell about stars. Then, answer the questions.

Stars

(1) When you look up on a clear, dark night, you can see small points of light called stars. Actually, stars are not small at all. Some stars may be 50 million miles across! Stars just look like points of light because they are so far from Earth. Our sun is a star. It looks bigger than other stars in the sky because it is closer to us. A star's brightness depends on its mass and distance from Earth. Bigger stars are brighter than smaller ones. Stars also look brighter when they are closer.

(2) To make it easier to study, people have grouped stars into patterns. The patterns are called constellations. They may be large or small. They may have bright or dim stars. Sometimes in a constellation, the bright stars may be in the shape of a person or animal.

(3) Stars, unlike planets, make their own heat and light. The color of a star's light can tell us how much heat it has. The cooler stars give off a reddish light. The hottest stars look blue or blue-white in color. Stars do not last the same amount of time. They all will eventually burn out.

5. What does the word **constellation** mean?

- (A) large and in space
- (B) different stars people see from Mars
- (C) different color stars we can see from the earth
- (D) a pattern of stars that are grouped together

6. Which of the following is an **opinion**?

- (F) Stars are fun to look at every night.
- (G) Our sun is a star.
- (H) Stars look brighter when they are closer.
- (J) Cooler stars give off a reddish light.

7. What is a **supporting detail** for paragraph 2?

- (A) Colors of stars help us to know how hot they are.
- (B) Our sun is a star.
- (C) It takes imagination to find when different patterns in the sky look like people or animals.
- (D) When stars burn out they turn into new kinds of stars.

8. What would happen if you traveled through space and got closer and closer to a star?

- (F) You would see it get smaller.
- (G) It would look like a rainbow.
- (H) It would get brighter.
- (J) All of the above

READING PRACTICE TEST

● Part 3: Story Comprehension (cont.)

Directions: Read or listen to the paragraph below. It tells about honey and bees. Then, answer the questions.

Sweet as Honey

Honey is sweet and thick. Honeybees make it. First, they fly from flower to flower. At each flower, they collect nectar. Nectar is watery. It is found inside flower blossoms. The bees sip the nectar from flowers. Next, they store it in their bodies. It is kept in their honey bags. Then, the nectar in the honey bags changes. It changes into two kinds of sugars. The bees fly back to their hives. Finally, they put the nectar into their hives. While it is there, most of the water leaves or evaporates. All that is left is the sweet, thick honey inside the honeycomb. People who collect honey remove the combs. Last, the sweet honey is sold for us to eat.

9. What is nectar?

- (A) a flower
- (B) a watery substance that bees sip from flowers
- (C) another name for honey
- (D) a part of a bee's body that makes honey

10. What would happen if the bees didn't have honey bags?

- (F) They couldn't make honey.
- (G) They would fly in circles.
- (H) They couldn't find flowers.
- (J) They wouldn't be able to see.

11. What happens after the bees put the nectar into their hives?

- (A) They fly from flower to flower.
- (B) They collect the nectar.
- (C) The bees sip the nectar from flowers.
- (D) Most of the water leaves or evaporates.

12. If you were a honey collector, where would you go to find honey?

- (F) in the store
- (G) in the honeybees' hive
- (H) in your house
- (J) in the sand

● Part 3: Story Comprehension (cont.)

Directions: Read or listen to the paragraphs below that tell about a mom who lost her spaghetti. Then, answer the questions.

The Investigation

The bowl sat empty. "Oh, no! My spaghetti is missing!" shrieked Mom. "I was supposed to take it to the school potluck tonight. What am I going to do?"

I decided to help my mom find her lost spaghetti. "Don't panic Mom, I'll look for clues," I said as I started looking around. The spaghetti had been in the bowl, on the counter, near the sink. First, I ran outside to check for footprints. There were none! It must have been an inside job.

Who would be my first suspect? I went to my baby sister Laurie's room. I checked in her crib, in her toy box, and in the closet. There was no sign of the spaghetti.

Next, I went to question my second suspect. I asked Dad if he had seen anything unusual. He had been mowing the lawn and didn't know anything about the case.

My leads seemed to be vanishing. Could a thief have come into our house and helped himself to dinner? Had aliens zapped it aboard their spaceship?

I looked around. Suddenly, I noticed through the open window two birds carrying long, red-and-white worms in their beaks. The Case of the Missing Spaghetti was closed!

13. What is the solution to The Case of the Missing Spaghetti?

- (A) Dad took the spaghetti.
- (B) Laurie ate the spaghetti.
- (C) Birds took the spaghetti.
- (D) Mom had put the spaghetti in the fridge.

14. Who was the second suspect?

- (F) baby Laurie
- (G) Mom
- (H) Dad
- (J) the birds

15. How do you know Dad didn't take the spaghetti?

- (A) He was mowing the lawn.
- (B) He was watching Laurie.
- (C) He liked pizza better.
- (D) Dad didn't like to investigate.

16. Why might the birds have taken the spaghetti?

- (F) They liked Italian food.
- (G) They thought they were worms.
- (H) They wanted to try something different.
- (J) They needed to make a nest.

● Part 3: Story Comprehension (cont.)

Directions: Read or listen to the paragraphs below that tell about a boy who builds a robot. Then, answer the questions.

Bert, the Inventor

Every day after school, Bert locked himself in his bedroom. He was working on a secret project. He didn't tell anyone what he was doing. Not even his best friend Larry.

Bert finally finished. He had made a robot that looked exactly like himself. The robot had orange hair, freckles, and glasses. The robot and Bert both talked in a squeaky voice. "Life is going to be easy now!" exclaimed Bert. "I'm going to send my robot to school while I stay home and play."

The next morning the robot ate breakfast. Then, he rode the bus to school. After school the bus dropped the robot back home. The robot knocked on the door.

"Sweetie, I am so glad you're home. I really missed you!" said Mom. Then, she took the robot into the kitchen and gave him a snack before dinner.

"We had lots of fun at school today," said the robot. "We went to the space museum. I got to try on a real space suit. It was too big for me but the teacher took my picture."

Bert was listening outside the kitchen. He was sad. He wanted to be an astronaut someday. He decided this wasn't a good idea. So the next day, Bert went to school himself.

17. What did Bert look like?

- (A) He had curly hair and was tall.
- (B) He had red hair and wore a cap.
- (C) He was short with blonde hair.
- (D) He had orange hair, freckles, and glasses.

18. Why did Bert decide to go to school himself?

- (F) He missed his mom's smile.
- (G) He missed going to the space museum.
- (H) He missed his friend Larry.
- (J) He missed eating breakfast and going to school.

19. Where does this story take place?

- (A) at school
- (B) at the grocery store
- (C) at Larry's house
- (D) at Bert's house

20. Why did Bert create the robot?

- (F) He wanted to make life easier and have the robot go to school for him.
- (G) His mom was feeling sick and needed help cleaning.
- (H) He didn't want to be friends with Larry anymore.
- (J) He was sad that he didn't have any brothers.

Fiction/Nonfiction: Heavy Hitters

Fiction is a make-believe story. **Nonfiction** is a true story.

Directions: Read the stories about two famous baseball players. Then, write **fiction** or **nonfiction** in the baseball bats.

In 1998, Mark McGwire played for the St. Louis Cardinals. He liked to hit home runs. On September 27, 1998, he hit home run number 70, to set a new record for the most home runs hit in one season. The old record was set in 1961 by Roger Maris, who later played for the St. Louis Cardinals (1967 to 1968), when he hit 61 home runs.

The Mighty Casey played baseball for the Mudville Nine and was the greatest of all baseball players. He could hit the cover off the ball with the power of a hurricane. But, when the Mudville Nine was behind 4 to 2 in the championship game, Mighty Casey struck out with the bases loaded. There was no joy in Mudville that day, because the Mudville Nine had lost the game.

202

Nonfiction: Tornado Tips

Directions: Read about tornadoes. Then, follow the instructions.

A tornado begins over land with strong winds and thunderstorms. The spinning air becomes a funnel. It can cause damage. If you are inside, go to the lowest floor of the building. A basement is a safe place. A bathroom or closet in the middle of a building can be a safe place, too. If you are outside, lie in a ditch. Remember, tornadoes are dangerous.

Write five facts about tornadoes.

1. **A tornado begins over land.**
2. **Spinning air becomes a funnel.**
3. **Tornadoes can cause damage.**
4. **A basement is a safe place to be in a tornado.**
